This invention having been sufficiently proven as a labor-saving instrument, and its utility in every respect satisfactorily tested by uninterrupted use in various post offices in the United States, application was made to the Thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already alluded to. Another claimant to said invention appearing, the House committee of that Congress, who were then considering the subject of compensation, decided that since the validity of the title to the same, as well as that of prior invention, was called in question, that should first be determined by the courts, and the case was accordingly thereupon remanded.

By a transcript of the proceedings and judgment now submitted as rendered in the United States circuit court for the northern dis-
2593 trict of New York, it appears that the question of invention and of validity of title were tried, and decided in favor of the patent and the assignees, Shavor & Corse. Again, therefore, the assignees appear before the present Congress, claiming a suitable remuneration for said invention and patent, on condition of an assignment of all their right and title to the same to the United States.

The value and importance of this invention to the government is verified in the nature and manner following, to wit:

Having used the said invention, the postmasters at Washington, District of Columbia; Baltimore, Maryland; New York City, Brooklyn, Albany, Troy, Syracuse, Rochester, and Buffalo, State of New York; Hartford, Connecticut; Boston, Springfield, and Worcester, Massachusetts; Cincinnati, Ohio; Detroit, Michigan; and Chicago, Illinois, formally certify that, in their several offices, the government is thereby saved from one-third to one-half the stamping and canceling clerk hire heretofore required and employed, and that "it greatly facilitates the despatch of letters for transportation in the mails"; that "it greatly economizes in the time in the making up of the mails for transportation"; "that it cancels in the most perfect and permanent manner the postage-stamps on letters, packets, &c., and at the same time gives on the envelope an intelligent postmark"; and that "it also contributes to prevent frauds on the revenue by the chemical cleansing or washing of postage stamps for reuse or reissue after once used."

Its utility, facility, and economy in labor are so far established that the invention is being put into use in the larger post-offices of the United States as rapidly as they can be supplied by the government manufacturers. The government has contracted for their manufacture with Messrs. Fairbanks & Co., of New York, at a price of six dollars each, whose contract bears date on or about the 1st day of April, 1863,
2594 and for a term of four years, and consequently it will expire on

the 1st day of April, 1867. The Post-Office Department is now supplying post-offices at the rate of more than five hundred per annum.

The government, in consulting its interest, has fully committed itself, through the Post-Office Department, to the adoption, general and continuous use of said invention; and over four years' use determines it an indispensable requisite to the safe, rapid, and economical operation of marking, stamping and cancelling in the postal department.

It is shown by a letter from Postmaster-General Dennison, under date of March 15, 1866, addressed to Senate Committee on the Post Offices and Post-Roads, that at that time the government was saving, by the use of said invention, the compensation annually of two hundred and fifty-four clerks of the various salaried classes. At an average salary of $900 per annum, this saving for labor alone would amount to the sum of $228,600, and an aggregate at this rate for the four years which the government has already enjoyed the use of the invention, it will amount to the sum of $914,400, to say nothing of the other benefits and advantages derived from this invention during the past four years. In view of this saving in labor, directly traceable to the use of said invention, the saving must be much larger annually, by its future and increased use in many more and other large post-offices throughout the United States, where the Norton stamp is being rapidly substituted for the old unreliable and discarded device, used prior to the making of the Norton invention aforesaid.

The present Postmaster-General, in his letter to this committee, bearing date January 15, 1867, states that the Post-Office Department has already saved several hundred thousand dollars by the use of said invention; that the question of value to that department has long since been settled; that the continued use of the invention by that department is a necessity beyond question; that it is the best invention
2595 there is for the postmarking of letters and packets, and for the cancellation of stamps thereon, and that there is no doubt but that the government will continue to save large sums by its future use.

The committee, therefore, after a most thorough examination and consideration of the whole subject, have determined upon the sum of ($100,000) one hundred thousand dollars as a full and just compensation to the assignees, Shavor & Corse, for the past and future use of said invention and patent, and in full compensation for the transfer of said patent to the Post-Office Department. To carry out such determination, the committee recommend the passage of the accompanying bill.

And passed the following bill to a second reading, to wit:

[S. 582.—39th Congress, 2d Session.]

IN THE SENATE OF THE UNITED STATES.

FEBRURRY 9, 1867.

Mr. Van Winkle, from the Committee on Post-Offices and Post-Roads, submitted a report (No. 164), accompanied by the following bill, which was read and passed to a second reading:

A bill to provide for the payment of past and future use and purchase of the invention and patent upon "postmarking of letters, packets, and so forth, and cancellation of postage-stamps thereon," made by and patented to Marcus P. Norton, of Troy, New York, April fourteen, eighteen hundred and sixty-three, and reissued August twenty-three, eighteen hundred and sixty-four.

Be it enacted by the Senate and House of Representatives of
2596 the United States of America, in Congress assembled, That the

Postmastr-General be, and he is hereby, authorized and directed to pay, out of any moneys heretofore or hereafter appropriated for the Post-Office Department, the sum of one hundred thousand dollars to whoever shall appear to be the rightful owner or owners of the letters patent of the United States granted to Marcus P. Norton, of the city of Troy, State of New York, on the 14th day of April, eighteen hundred and sixty-three, and reissued on the twenty-third day of August, eighteen hundred and sixty-four, provided that within thirty days from the approval of this bill such assignees, owner, or owners of said patent shall duly assign and transfer the said letters patent and the invention therein contained to the United States of America for the use of the Post-Office Department, and formally accept of the said one hundred thousand dollars, in full compensation for the past use, title to, and right to use said letters patent and the invention therein contained.

Which said bill is now pending in the Senate of the said United States.

Which sum of one hundred thousand dollars ($100,000), so recommended in compensation for the past and future use of said invention and patent, the said Shavor and Corse are unwilling to accept, in view of the fact of the great value and importance of said invention to the public and to the Post-Office Department, and in view of the great saving already had, in cash, and the great economy in the management of the affairs of the postal department of the government, as fully shown in and by the following letter written by the Postmaster-General, to wit:

POST-OFFICE DEPARTMENT,
Washington, D. C., January 15, 1867.

SIR: I have examined the papers sent to me in regard to Norton's cancelling stamp, as suggested by your letter of the 20th December.

2597 It is difficult for me to determine the amount which ought to be allowed for the use of that invention. The department has saved already several hundred thousand dollars by its use, and I have no doubt will continue to save large sums by its future use. The question of value to the department has long been settled.

The necessity to the department of its continued use is beyond question. It is also necessary that some settlement be immediately made with the owners of the patent for this cancelling stamp. About the first of February next the department must again advertise for furnishing cancelling stamps, and Norton's stamp is the one desired; it is the best there is. If no settlement is made by the government, so that these stamps can be made and furnished to the department without interference or embarrassment from the owners of the patent, it is apprehended the department will be compelled to resort to a more expensive and less approved method of cancelling stamps, and so incur great expense and suffer great loss.

I cannot undertake to fix what the value of this invention is to the department and to the public. The fact that this department derives the chief benefit from this improvement, and that economically it is a necessity, is no argument against a full and fair compensation for its exclusive use. I think twenty thousand dollars entirely too small a sum, and that fifty thousand dollars is not a fair measure of the great value of this invention.

In conclusion permit me to urge that this question be settled in some way, and on some terms, at this session of Congress.

Very respectfully, &c.,

ALEX. W. RANDALL,
Postmaster-General.

Hon. T. W. FERRY,
Of Com. of Post-Offices and Post-Roads.

2598 And the said Shavor and Corse would now most respectfully show unto this honorable court that they were recommended and advised by a former Postmaster-General to apply to the Congress of the United States aforesaid for payment for the use of said invention, in conformity to said agreement and understanding aforesaid, and for the purchase of the said letters patent, and that upon such application he would recommend said Congress not only to pay for the past use, but also to purchase said invention and patent for some fair, just, and equitable compensation or sum, as it was a matter of necessity that that department should use said invention, and at that time to let a contract to manufacture the same for a term of four years. That from that time until now, said Shavor and Corse have urged upon said Congress the payment for past use of said invention, and for the purchase of said invention and patent. That during said time said Congress has taken the action substantially as hereinbefore stated in relation to said use and purchase of said invention and patent, and said Shavor and Corse, plaintiffs and petitioners, have now come to the conclusion that no fair, just, and equitable compensation will be agreed upon by the present Congress, and being unwilling to incur the large expense, delays, and uncertainty as to when Congress will so act as to do justice to the wants and demands of the department and country in relation to said invention and patent, as well as justice to the legal and equitable rights of said plaintiffs and petitioners in the premises, under said agreement and understanding in relation to such use of said invention, they have deemed it best, as well as their duty, to apply to and to petition this honorable court for payment for past use of the said invention, according to said agreement and understanding for and during the said past four years as aforesaid.

2599 And the said Shavor and Corse claim for the aforesaid past use of said invention by said department and government in the manner as aforesaid stated, and with the right so to use said invention—and under the said agreement and understanding that the said department would of necessity use said invention, and let said contract to manufacture it for its use, and that the government should pay a fair, just, and equitable compensation for such use of said patented invention as aforesaid—the sum of one hundred thousand dollars ($100,000) for and during each year of the said four years' use of said invention; and they, therefore, claim for the said four years of such past use of said invention the sum of four hundred thousand dollars ($400,000) as a fair, just, and equitable compensation for the said past use of said invention in the several post-offices throughout this country as aforesaid. The said Shavor and Corse therefore pray that judgment for the sum of four hundred thousand dollars ($400,000) for such past use of said invention by the P. O. Department, in the manner as aforesaid, may be duly entered of record by this honorable court, in the manner and form as by the law and rules of this court is provided.

And said Shavor and Corse, plaintiffs and petitioners, would most

respectfully show unto this honorable court that the papers filed by them under their petitions to Congress as aforesaid were printed by an order of the House of Representatives, copies of which are hereto annexed, including the said report of the Senate committee, and to which they would respectfully ask leave of this honorable court to refer.

And the said Jacob Shavor and Albert C. Corse, plaintiffs and petitioners, aver and declare that they and each of them and the original and every prior owner of said invention and letters patent have at all times borne true allegiance to the Government of the United States; that they have not, in any way, voluntarily aided, abetted, or given encouragement to the rebellion against said government; that the entire title to said invention and patent now is fully vested in the said
2600 Shavor and Corse as hereinbefore set forth; that they fully believe that the said sum or amount claimed herein, to wit, four hundred thousand dollars, is justly due from the said United States to said Shavor and Corse, after allowing all just credits and offsets, if there be any such.

JACOB SHAVOR,
ALBERT C. CORSE,
Plaintiffs and Petitioners, of Troy, N. Y.

MARCUS P. NORTON,
Attorney and of Counsel for said Shavor & Corse, Troy, N. Y.

DISTRICT OF COLUMBIA,
City and County of Washington, ss:

Jacob Shavor, of the city of Troy, county of Rensselaer, and State of New York, being duly sworn, doth depose and say: My name is Jacob Shavor; I reside at the city of Troy, aforesaid; I am one of the claimants named in the petition to which this affidavit is annexed. And deponent says that no assignment or transfer of said claim, or any part thereof, or any interest therein, has been made, except as in said petition stated. That said claimants are justly entitled to the amount therein claimed from the United States of America, after allowing all just credits and offsets, and he verily believes the facts as stated in said petition are true in each and evey respect and particular.

Subscribed and sworn to before me on this 21st day of February, 1867.

CHARLES WALTER,
Justice of the Peace, Washington, D. C.

2601 In the Court of Claims of the United States.

SHAVOR & CORSE
vs.
THE UNITED STATES. } No. 2571.

Claimants respectfully ask leave to file an amended petition in this cause, to be substituted for the original petition in the record.

June 1, 1868.

A. L. MERRIMAN,
For Pet'rs.

(Endorsement:) 2571. Shavor & Corse vs. The U. S. Amendment allowed nunc pro tunc as of 29 April, 1868. 1 June, 1868. Filed June 1, 1868. By the court.

Amended petition.—Filed June 1, 1868.

In the Court of Claims of the United States.

JACOB SHAVOR, ALBERT C. CORSE
vs.
THE UNITED STATES.
No. 2571.

To the honorable the judges of the Court of Claims:

Your petitioners, Jacob Shavor and Albert C. Corse, who are citizens of the city of Troy, in the State of New York, respectfully state unto your honors:

2602 That on the 14th day of April, A. D. 1863, letters patent were issued to one Marcus P. Norton for an invention and improvement in the post marking letters and of the cancellation of postage-stamps thereon, of which said Norton was the first and original inventor; that the said letters patent were, on the 20th day of April, A. D. 1863, duly assigned and transferred to petitioners, although petitioners were the equitable owners of such invention for several months prior to the date of such transfer, they having purchased the same from the said Norton several months prior thereto.

Petitioners further state that in the month of March, 1863, or thereabouts, the Postmaster-General, being desirous of using the said invention in his said department, obtained the consent of petitioners thereto, and promised petitioners to pay for such use its fair and reasonable value, and thereupon with the consent and agreement of petitioners that the government should be permitted to use such invention, the said Postmaster-General adopted the said invention into use, and has constantly used said invention in his said department from the first day of April, A. D. 1863, until the present time. Petitioners further state that such agreement has been at different and numerous times since such date repeated by the said Postmaster-General and his successors in office, upon and for the consideration that petitioners would permit the government to use the same, and not embarrass or prevent its use as aforesaid by legal proceedings.

Petitioners further state that the use of such invention so the property of petitioners as aforesaid has been and is of great value to the United States; that such use has saved, and does save, to the United States, as petitioners are informed believe, an annual expense of clerk-hire over two hundred and thirty thousand dollars; that such use also greatly facilitates the business in the post-offices in the

2603 making up mails for transportation; that such use enables the Post-Office Department to cancel the postage-stamps in a more perfect manner, thus preventing frauds upon the government in the re-use of such postage stamps.

Petitioners further state that they applied to the 38th Congress of the United States for compensation for such use; and also for the sale of such invention to the United States, which petition of petitioners was by the House of Representatives referred to the Committee on Post-Offices and Post Roads of said House, who required petitioners to establish in court their title to such invention and the validity thereof; whereupon petitioners instituted a suit in the circuit court of the United States for the northern district of New York against Edmund Hoole, who was then engaged in the manufacture of post-office stamps for the Post-Office Department, in which suit it was determined that the said

invention was new and useful; that the said Norton was the first inventor thereof, and that the title of such invention was vested in petitioners, as will more fully appear by reference to the record of such suit. Petitioners, however, state that [in pursuance of their aforesaid agreement with the said Postmaster General, they waived all damages as against said Hoole, simply demanding nominal damages of six cents.

Petitioners further state that] at each Congress thereafter prior to the filing their original petition in this case, they presented their like application to Congress, but without success, as Congress failed to pass any act for the relief of petitioners in the premises, although such applications were presented by and with the advice of the Postmaster-General, who invariably declined and refused to assume the responsibility of fixing the amount of such compensation, or of the purchase of said patent; but he at the same urged upon Congress to purchase such patent for the use of his said department, and to pay for such use.

Petitioners further represent that the use of the said patent for
2604 the period aforesaid is reasonably worth the sum of two hundred and fifty thousand dollars, which sum they now claim in this action.

'etitioners further state that they are the sole owners of this claim; that petitioners and said Marcus P. Norton have at all times borne true allegiance to the Government of the United States, and that neither have petitioners or said Norton in any way voluntarily aided, abetted, or given encouragement to the late rebellion against said government.

And as in duty bound your petitioners will ever pray, &c.

A. L. MERRIMAN,
Att'y for Petitioners.

STATE OF NEW YORK,
County of Rensselaer, ss:

Jacob Shavor, one of said claimants, being first duly sworn, deposes and says, that no assignment or transfer of said claim has been, or of any part thereof, or any interest therein; that the claimants are justly entitled to the amount therein claimed from the United States after allowing all just credits and offsets, and that he believes the facts stated in said petition are true.

JACOB SHAVOR.

Subscribed & sworn to before me, a notary public within & for said county. Witness my hand and seal notarial, this 15th day of May, 1868.

[SEAL.] C. M. WELLINGTON,
Notary Public, Troy, N. Y.

2605 In the Court of Claims of the United States. December term, 1867.

THE UNITED STATES
vs.
JACOB SHAVOR & ALBERT C. CORSE. } No. 2571.

And the said defendants come and make answer to the amended petition of the claimant on file herein, and do hereby deny each and every allegation therein contained, and calls for proof of the same.

And as to so much of said petition as sets forth and avers that the United States is indebted to said claimant in the sum of two hundred

and fifty thousand dollars, the defendants say that they are not indebted to said claimant in said sum of money, nor any part thereof.

T. LYLE DICKEY,
Ass't Att'y Gen'l.

(Stipulation endorsed thereon:)

This traverse may be filed as of June 2, 1868, without prejudice as to time.

Jan'y 7, 1869.

A. L. MERRIMAN,
Cl'ts Att'y.

2606 *Findings of fact and conclusions of law in the Court of Claims.—Filed December 6, 1869.*

SHAVOR ET AL.
vs.
THE UNITED STATES. } No. 2571.

This case coming on to be heard the 28th day of January, A. D. 1869, before all of the judges of the Court of Claims, the said court finds as matter of fact:

1. The claimants are and have been the assignees and owners of the patent issued to Marcus P. Norton April 14, 1863, for his invention for postmarking and stamp-cancelling letters, more particularly set forth and described in the petition in this action.

2. The defendants have used the said invention in the Post-Office Department since the year 1863, and the said invention has been of great use and value to the defendants. But the cancelling instruments used by the defendants in their Post-Office Department were for the most part manufactured and sold to them by the firm of Fairbanks & Company, of the city of New York, under a contract bearing date the 18th April, 1863, whereby the said firm represented and agreed "to furnish for the use of the post-offices of the United States, for four years from the first of April next, marking stamps with Norton's attachment for cancelling the postage-stamps at the same time the marking stamp is applied, letters patent for which have been issued, and which patent is exclusively under our control."

3. This court finds as matter of fact that the contract set up in the claimant's petition of March 11, 1863, alleged to have been entered into by the Postmaster-General with the claimants for the use of the
2607 said invention, was never entered into by the claimants and defendants as in the said petition alleged, but that, on the contrary, it was expressly agreed between the claimants and the agents of the defendants (the Postmaster-General and his successors) that the Postmaster-General had no authority to purchase the said patent right or its use, and that the claimants should allow the use of the invention in the postal service so long as they, the claimants, saw fit, leaving the matter of remuneration, if any, to the will and action of Congress.

4. Congress have never sanctioned or approved of the use of the said invention in the postal service, and have never awarded remuneration to the claimants for the use thereof; and the claimants have voluntarily continued to allow it to be used in the postal service under the agreement and upon the condition set forth in the preceding finding of fact, and have never been remunerated therefor.

And this court, as a conclusion of law upon the facts aforesaid, decides:

That the claimants having wholly failed to prove and sustain the contract or agreement between themselves and the defendants, declared upon in their petition, their petition should be dismissed.

2608 In the Court of Claims of the United States, December term, 1868.

SHAVOR & CORSE
vs.
THE UNITED STATES. } No. 2571.

At a Court of Claims, held at the Capitol, in the city of Washington, on Monday, the 15th day of February, 1869, judgment was ordered to be entered as follows:

The court, on due consideration of the premises, find for the defendants, and do order, adjudge, and decree, that the claimants, the said Shavor and Corse, take nothing by their suit, and that their said petition be dismissed.

By the court.

2609 In the Court of Claims.

JACOB SHAVOR AND ALBERT C. CORSE
vs.
THE UNITED STATES. } No. 2571.

I certify that the foregoing printed and manuscript pages, numbered from one to thirty-two, inclusive, contain true copies of pleadings, of the findings of fact and conclusion of law thereon by the court, filed in the cause aforesaid, and of the final judgment of said court, rendered the 15th day of February, A. D. 1869, therein.

In testimony whereof I hereunto set my hand and affix the seal of said Court of Claims this 23d day of March, 1878.

[SEAL.] JOHN RANDOLPH,
Ass't Clerk Court of Claims.

I, Charles D. Drake, Chief Justice of the Court of Claims, certify that the foregoing attestation of John Randolph, assistant clerk of said court, is in due form.

C. D. DRAKE.

2610 *Defendant's Exhibit* 159.—*April* 1, 1878.—*J. A. S., Ex.*

In the Court of Claims.

JACOB SHAVOR & ALBERT C. CORSE
v.
THE UNITED STATES. }

The testimony of Marcus P. Norton for the plaintiffs and claimants.

CITY, COUNTY, AND STATE OF NEW YORK:

On the 16th day of November, A. D. 1867, personally appeared before

me Marcus P. Norton, the witness within named, who being first by me duly sworn to tell the truth, the whole truth, and nothing but the truth, the narratives and questions within contained in the within deposition were written down by the commissioner and then read by him to the witness, who then subscribed the deposition in the presence of the commissioner.

The adverse party was present and represented by John J. Weed, esq., assistant solicitor of Court of Claims.

WM. W. MANN,
Commissioner of Court of Claims of New York.

The deposition of MARCUS P. NORTON, taken at the request of the plaintiffs and claimants in this action, before William W. Mann, a commissioner of the Court of Claims in and for the State of New York, at his office, 149 Fulton street, in the city of New York, to be used in the investigation of a claim against the United States now pending in the Court of Claims in the name of Jacob Shavor and Albert C. Corse vs. The United States, and being duly sworn to tell the truth, the whole
2611 truth, and nothing but the truth, the witness says in reply to questions by the commissioner:

My name is Marcus P. Norton; my age is thirty-seven years; am a practicing attorney; residence during the past year in Troy, New York; I have no interest in the claim which is the subject matter of inquiry, and am not related to either of claimants.

Being examined for plaintiffs by Mr. MERRIMAN, their counsel, the witness says:

I am the original inventor of the invention and improvement named and set forth in the petition in this case, which invention I assigned to the claimants April 20, 1863, as will appear from "Exhibit D, Shavor and Corse," in the manner and form therein stated. The invention named in the petition was first put into use in the New York City post-office in the latter part of the year 1860, by way of experiment, at my request, and by the Post-Office Department. It was so continued in use until some time in 1862, when the whole subject-matter of the invention was by the Post-Office Department referred to the postmaster of New York for a full report, to show whether, in the experience of that office, that the postage-stamps were and would be so effectually destroyed by the use of my invention as to prevent its being cleansed and used a second time, and also to ascertain the amount of labor saved by the use of the invention.

Some time in the forepart of winter or year 1863 I received a letter from the Post Office Department stating that the Postmaster-General desired to see me personally in relation to the adoption and permanent use by the Post-Office Department of the invention tested in the New York post-office, as I have before stated, and also set forth in the petition in this case. That letter also stated that the Post-Office Department was about to make a contract under an advertisement for proposals to fur-
2612 nish rating and canceling stamps for the use of the department. That letter contained a printed copy sent by the department to me and was a copy of the advertisement for proposals to furnish such stamps and had the appearance of being cut or taken from some newspaper. Among other things it contained a request for proposals to furnish postmarking and postage-canceling stamps of my invention and of the character set forth in the petition in this cause. I went to Washington soon after and had an interview with the then acting First As-

sistant Postmaster-General, whom, I think, was General Skinner, the present First Assistant Postmaster-General, and also with the Postmaster-General, in relation to the adoption and permanent use of this invention. In the spring of the year 1863 I saw the persons last above named in relation to the matter of which I have testified. The First Assistant Postmaster-General stated to me at that time that upon opening the package of proposals to furnish instruments containing my invention which I have before named, it was found that several parties had offered to manufacture and furnish for the department's use machines or instruments containing the invention named in the petition in this cause, varying somewhat in the price for the manufacture of the same. He also stated to me at that time that the Post-Office Department had determined to adopt for general use the invention in all the large post offices in the country, as it was a matter of great economy to the postal service and in the management of the Post Office Department. That the department desired to make a contract with some of the parties who had made proposals to furnish the postmarking and canceling instruments about which I have testified and for the use of the department. He at that time inquired of me if either of the parties who had made proposals to the department to furnish my said invention had any legal right to manufacture and furnish such for the use of the Post-Office Department.

2613 I replied that neither of the parties who put in proposals as stated to me had any rights or privileges whatever to my said invention or under any patent granted thereon; that I would grant no such right to any person whatever for the reason that the government were and would continue to be the users of my invention, which would, of course, be of more value to me and bring me greater profit than any manufacturer of the instrument could well afford to pay, and that the law made the manufacturer, the vendor and user of a patented machine separately responsible for the infringement of a patent; that the patentee or his assignees might elect to pursue one or all for such infringements. He then inquired of me that in case the department should make a contract to furnish my invention for the use of the department if I would grant license to such party, giving them a right to manufacture for that purpose. I told him that there would be no such license granted, but that an arrangement might be made with the Post Office Department which would answer the same purpose, which was by the department purchasing the invention and the patent thereon. Upon this question of purchase we together went into the rooms of the Postmaster General and there had an interview with him upon this whole matter. The Postmaster-General said that he did not believe that he had the legal right to purchase this or any other patent, but if the department were permitted to obtain this invention through some of the persons that had put in bids to manufacture the same and thereafter to use the same without hindrance or molestation on account of the patent, that there should be paid by the government a liberal and just compensation for such use of the invention to the original and first inventor of it or to his assignees; and that at the next session of Congress thereafter he would recommend that Congress pay for the past use and purchase of the invention and patent; and that if I would consent to this

2614 it should be the understanding and arrangement between us, and, as he thought, the best way to dispose of it, as it had become a matter of necessity to the department that this invention go into general use in the larger post-offices. I told him that would be satisfactory and left his office with that understanding, and that under this

agreement he might make the contract to manufacture and furnish such instruments containing my invention with whoever he pleased.

I then, previous to leaving, stated to him that a petition would be sent to the next session of Congress, which would cover the case and understanding, and ask for the purchase and payment of the patent. At this time this invention really belonged to the claimants, and I was acting as their agents and attorney in the matter, for I had agreed with the claimants to assign this patent when issued, as the application was then, and had been for some time, pending before the Commissioner of Patents, and the patent had at that time been ordered to issue, but there was some delay in the Patent Office in the engrossment and preparation to issue the patent. The patent was issued upon and bears date April 14, 1863, and was assigned, as I have before stated, on the 20th of April, 1863, in pursuance of my former agreement.

(Mr. Weed, on behalf of the United States, excepts and objects to so much of the testimony of this witness as purports to give the contents of letters received by him from the Post-Office Department, or any advertisements for proposals for furnishing said department with a postmarking and canceling machine, and also to all conversations had by this witness with either the Postmaster-General or the First Assistant Postmaster-General, in regard to the use, or the payment for such use, by the Post Office Department of the invention of said witness, for the reason, first, that the said testimony is illegal, incompetent, and
2615 immaterial to the issues involved in this case; and, second, because neither the Postmaster-General nor the First Assistant Postmaster General had authority under the law to make the contract upon which the claimants in this case rely, nor was such pretended contract made in the manner required by law.)

The witness further testifies as follows:

At the next session of Congress, after the agreement of which I have testified, a petition was sent to the House of Representatives, signed by these claimants, which was presented and referred to the Committee of Post-Offices and Post-Roads, and by that committee was transmitted to the Postmaster-General for his reply. He replied to the petition by admitting the matter therein contained, but denied the validity of the patent, and the committee required, before proceeding further on the petition, that the validity of patent should be tested in the proper court, the Postmaster General having denied its validity on the ground only that I was not the original and first inventor of the invention therein contained. A suit was accordingly brought against Edmund Hoole, contractor, who was at that time furnishing these instruments to the department for the use of the department, and after a lengthy and expensive litigation the suit was decided in favor of patent, and that I was the original and first inventor of the invention.

I have had an interview with every subsequent Postmaster-General in regard to this invention and the continued use of it by the department, as well as in regard to the purchase of the patent by Congress. With Postmaster General Dennison I had conversation in relation to the delay of complainants' petition in Congress for the use and purchase of patent, that such delays on the part of Congress would be likely to induce the complainants to undertake to prevent the further manufacture and use of the invention. He said he hoped not, and hoped
2616 and wished the contractors would be allowed to continue to manufacture these stamps under their contract with the department, and for the department's use. That if the complainants would permit the continued manufacture of the stamps for the government, that the

government would pay for the use of the invention and improvements a fair, just, and liberal compensation. This was the agreement and understanding made with Mr. Dennison as P. M. General, and relying upon this, the manufacturer of the instrument was permitted to continue, and the P. O. Department was permitted to continue to use the instrument and invention. When Mr. Randall became Postmaster-General the same arrangement was made with him, and under similar circumstances, and the claimants have permitted the use of this invention under this agreement up to the present time.

The first contract with the person for the manufacture of this instrument was for four years, and it expired on the first day of April, 1867, and a new contract has been made by the Post-Office Department for another and second term of four years from the first day of April, 1867, to manufacture and furnish this invention for government use.

(Mr. Weed, on behalf of the government, objects and excepts to so much of the foregoing testimony as gives, or purports to give, conversations with Postmasters General Dennison and Randall, for the reasons stated in his objections to former testimony of this witness.)

And the witness further says this invention and improvement has always, since the year 1863, been considered by the Post Office Department, and acknowledged by postmasters, where it has been used since then, as one of great value and importance to the postal service, in that, by its use, one person will do the work of two persons in the same length of time, and also for the more permanent cancellation or destruc-
2617 tion of the postage-stamp on letters and other post-office packages. By its use the postmark upon the envelope is more plain and legible, while at the same time and blow the enamelled surface of the postage stamp is somewhat broken, thereby allowing the ink to penetrate the paper portion of the stamp, thereby contributing to prevent the rewashing or chemical cleansing of such postage-stamp for second use; and it also saves the handling or sorting over of letters or packets more than once to postmark and cancel stamp thereon. By its use in the larger post-offices mails may be kept open until a later hour before closing the same for transportation by car or otherwise, thus allowing business men time to get their letters into the post-office. In the foregoing conversations, about which I have testified, I do not undertake to give the exact words as they may have occurred, but I do undertake to give and to testify and swear in the most positive manner to the substance of each of those conversations and the subject-matter thereof, at the time, place, and manner as I have testified.

This invention has now been more than four years in constant use in many of the post-offices throughout the country, under these several agreements made with the several Postmasters-General and First Assistants, as I have testified.

Since the filing of the petition, as I have testified, and at every session of Congress since that time, these claimants, through me, as their agent and attorney, have petitioned Congress, requesting the settlement and payment for the use of this invention, and for the purchase of the patent for future use; and at every session the matter has been before the Committee on Post-Offices and Post-Roads of the House or of the Senate, and such committee have always reported in favor of such petition; and at the last session of the Thirty-ninth Congress the Senate passed a bill to provide for the payment of past use and for the purchase of the patent of this invention. This bill was laid upon
2618 the table of the House at the last session of Thirty-ninth Congress on the motion of a jackass.

(Mr. Weed, on behalf of government, objects and excepts to all this evidence detailing the action of either House of Congress.)

For several years past I have been extensively engaged in the practice of law where the subject-matter of inventions and infringement of patents were brought before the court for adjudication, and have also been somewhat extensively engaged in the purchase of patents upon good inventions. I therefore consider myself competent to judge of the character and value of an invention. In regard to the value of this invention I have to state, that having made the same for the accomplishment of particular objects, and the same being fully accomplished in the actual use and operation of the invention, and having personally had conversation with the present Postmaster-General and other officers of the Post-Office Department as to the real and substantial value of this invention in the economy of time in the making up of mails for transportation, as well as for postmarking and cancelling of stamps; under all these circumstances I would fix the sum of $100 on each stamp in use as a fair and reasonable sum, under all circumstances.

MARCUS P. NORTON.

Subscribed and sworn before me Nov. 16, 1867.

WM. W. MANN,
Comm'r of Court Claims for New York.

The further examination of this witness was then, by consent of parties, adjourned until Monday, Nov. 18th, 1867, at my office, 149 Fulton street, New York.

2619 No. 149 FULTON STREET,
New York, Monday, Nov. 18th, 1867.

Parties all present, and the witness, being interrogated by Mr. MERRIMAN for plaintiffs and claimants, says:

"Exhibit A, Shavor and Corse," is constructed upon the principle and contains the invention set forth and described and claimed in the patent mentioned in the petition in this case, and about which I have testified. It contains substantially the same invention, and is the same invention about which I had interviews and conversations with the several Postmasters-General in the manner and at the times and places as I have before testified; and it is the same invention which the government have been using through the Post-Office Department since the spring of 1863, at which time it was adopted and put into general use by the Post-Office Department, and it has been continued in use until the present time, under the arrangement, agreement, or contract, as I have before testified. And it was, about two years previous to 1863, upon trial in the New York City post-office under the directions of the Post-Office Department, for the purpose of ascertaining its utility and value in the postal service.

"Exhibit B, Shavor & Corse," contains a package of letter envelopes, most of which are directed to me personally, and were received by me from different post-offices to whom the same were directed and received in a regular business way.

The envelopes contained in this package are postmarked with an instrument containing the invention and improvements of which I have testified, and also contained in the patent mentioned in the petition, with the exception of two, which are postmarked, and the postage stamps are cancelled under the old system of postmarking and cancellation, which I request the commissioner to mark as Exhibits B B, Shavor &

Corse, and they are so marked by the commissioner; and two other
2620 envelopes which are postmarked with an instrument containing an iron or steel cancelling device in combination with the postmarking part of the instrument, and which are covered by the third claim of the patent mentioned in the petition, and they show not as thorough cancellation as that done by the cork part, covered by the first and second claims of patent, which I request the commissioner to mark "B B B, Shavor & Corse," and they are so marked. Most of the other envelopes the postage-stamps are cancelled with the cork device mentioned in the patent.

Being cross-examined by Mr. WEED, in behalf of the United States, the witness says:

The first arrangement made with regard to the use of this cancelling stamp was made with the First Assistant Postmaster-General and the Postmaster-General; I think General Skinner was then the First Assistant, and Montgomery Blair was Postmaster-General; I saw the First Assistant Postmaster-General several times in regard to this matter; and, on the morning of the day in which the contract was made with parties to manufacture and furnish this invention for the use of the department, I saw Postmaster-General, and saw him but once and at request of the then Acting First Assistant Postmaster-General, General Skinner.

Q. What length of time was the Post-Office Department to be permitted to manufacture and use this postmarking and cancelling stamp under the arrangement you claim to have made with the department?

A. For four years at least, commencing April 1, 1863, and during all the time the department might deem it best to continue its use.

Q. Was anything said in any of the arrangements you claim to have made with the Post-Office Department in regard to the compensation you was to receive for the use of this instrument, or when such compensation was to be paid?

2621 A. There was nothing said as to the price or amount to be paid, and there was nothing said as to when any sum was to be paid. We could not then get any price or amount which would do justice to the claimants or the government; but if the future and continued use of the invention proved of such benefit to the department in other post-offices as had at that time been shown by the use of the invention in the New York post-office, that there would then be no difficulty in getting at a fair, just, and equitable compensation. This was promised on the part of the Post-Office Department in any event.

The invention at that time had been used in but few of the larger post-offices, and we could not in justice fix any price; it so was understood.

Q. Have you, since you made the first arrangement with the Post-Office Department in regard to the use of your patent postmarking and cancelling stamp, had a more specific agreement with the department in regard to the amount you are to receive for the use of this patent?

A. There has never been any other agreement to my knowledge than that made with the several Postmaster-Generals, and testified to by me in my direct examinations.

Q. Was it not understood that the whole matter of compensation you should receive for the use by the Post-Office Department of your postmarking and cancelling stamps should be referred to and determined by Congress?

A. It was not so understood, but the Postmaster-General thought it best, that it might be an object for the government to purchase the pat-

ent, as the patent would have seventeen years to run before the invention would become public property; and the patent containing an invention of great service and value to the department, it would be well for the government to purchase the patent; and he and the First Assistant Postmaster-General requested that I cause a petition to be sent to Congress asking Congress to purchase the patent, and ex-
2622 pressed a desire or hope that Congress would allow a sum sufficiently large to cover the past and present use of the invention at the time of purchasing the patent.

By COMMISSIONER:

Do you know any other matter or thing relative to the claim in question? If so, state it.

A. I think of nothing else at this time.

(Signed) MARCUS P. NORTON.

Subscribed and sworn before me this 18th day of November, 1867.

WM. W. MANN,
Commissioner of Court of Claims.

(Indorsed): 2571. Jacob Shavor & Albert C. Corse agt. The United States. In Court of Claims. Testimony of Marcus P. Norton for pl'ffs & claimants. New York City, Nov. 16th & 18th, 1867. Wm. W. Mann, comm'r of Court Claims for New York. Filed Nov. 21, 1867.

In the Court of Claims.

JACOB SHAVOR AND ALBERT C. CORSE
vs.
THE UNITED STATES. } No. 2571.

I certify that the foregoing manuscript pages, numbered from one to twenty-seven, inclusive, and upon which I have written my name, contain a true copy of the deposition of Marcus P. Norton filed in the cause aforesaid, November 21, 1867; that the corrections of this copy,
2623 made on pages 3, 6, 7, 8, 9, 13, 17, 18, 19, 21 and 24, and opposite which I have written my initials, were made by me, upon a careful comparison with the original on file.

In testimony whereof I hereunto set my hand and affix the seal of said Court of Claims this 24th day of January, A. D. 1878.

JOHN RANDOLPH,
Ass't Cl'k Court of Claims.

I, Charles D. Drake, Chief Justice of the Court of Claims, certify that the foregoing attestation of John Randolph, assistant clerk of said court, is in due form.

C. D. DRAKE.

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this

office of the caveat of Marcus P. Norton, filed October 20th and 27th, 1853, for "Machine for Mailing and Folding Letters," and that said annexed copy has been compared by me with the originals, and that it is a correct transcript therefrom and of the whole of the contents thereof.

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this third day of January, in the year of our Lord one thousand eight hundred and seventy-eight, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

To the Commissioner of Patents:

The petition of Marcus P. Norton, of Troy Conference Academy, West Poultney, & county of Rutland, and State of Vermont, respectfully represents:

That he has invented a certain machine for mailing and folding letters in the outside wrapper with their way-bills, and that he is now engaged in making experiments for the purpose of perfecting the
2625 same, preparatory to his applying for letters patent therefor. He therefore prays that the subjoined description of his invention may be filed as a caveat in the confidential archives of the Patent Office, agreeably to the provisions of the act of Congress in that case made and provided; he having paid twenty dollars into the Treasury of the United States, and otherwise complied with the requirements of said act.

Troy Conference Academy, West Poultney, Vt., Oct. 13, 1853.

MARCUS P. NORTON.

SUBJOINED DESCRIPTION.

My post-office stamp & way-bill folding machine is so constructed as to print the name of the town, State, month & day thereof, also the name of the postmaster, paid 3 cts. & unpaid 5 cts., upon the letter, and to fold the same, together with its way-bill, in an outside envelope, 2d envelope & way-bill are made together, & in the form and manner as shown by a place which I send enclosed.

That part of the machine which stamps the letter consists of a shaft, upon which is placed two arms crossing each other at right angles, which contains the type in the form as shown upon the way-bill; upon the same shaft are two cams, one at or near each end of the same, which are used to move the continuous or sliding platform (upon which the letter is moved under the type) down so as to let it receive an impression from the type. The platform upon which the letter passes under the type is continuous or to slide under and back as I may deem best upon experimenting. The platform belt is to be moved with the same speed of the type cylinder by means of a band or its equivalent. The platform plays up & down by means of spiral springs around the guides of s'd platform, which are four in No. The belt or band is tightened at
2626 pleasure by means of movable boxes & screws. The types are to be inked by means of inx rollers, two in number, placed in such a manner by means of movable boxes & screws so as to roll over the face of the types as they pass around. In order to change the motion of the platform belt or slide, two small gears are used, one on the cam & type shaft, the other on the crank shaft. The frame for the entire work is to be made in any form to suit the eye of the mechanic. A pulley is fastened to one of the cams, for the pur-

pose of moving the continuous belt or slide & the ink rollers. That part for folding the letter with its way-bill in the outside envelope consists of a small table placed at one end of the stamping part upon legs. A hole is made through the center of this table large enough to receive any size letter, around this is made a box containing four folders which turn upon hinges by means of levers, two of which move at a time only, which fold one half of the envelope, after which the other two move & fold the remaining half; then the bottom of the aforesaid box opens & lets the letter drop out folded in its way-bill envelope ready for transportation. The folders are worked by means of levers fastened to them, at the end of which a cord is fastened, which passes up through the table, over pulleys down through the table, & are fastened to pedals. At the other end of the levers are fastened cords for the purpose of opening the folders when closed. Those cords for opening the folders are worked by means of weights or springs.

Having thus described my machine, I will now state its object, &c. Its object is—

1st. To facilitate mailing & wrapping up letters with their way-bills, &

2nd. To save the expense of paper for wrapping purposes, lessening the cost about one-half, & saving all of the paper, as now requi'd for way-bills.

2627 3d. To lessen the No. of laborers, as now required in large post-offices.

(Endorsed:) Rec'd 2. Oath written for Oct. 20, '53. S. T. S. Exhibit A.

TROY CONFERENCE ACADEMY,
West Poultney, and County of Rutland and State of Vermont, ss:

On this twenty fifth day of October, one thousand eight hundred and fifty-three, before the subscriber, a justice of the peace, personally appeared the within-named Marcus P. Norton, and made solemn oath that he verily believes himself to be the first and original inventor of the improvement described in his caveat for mailing & enveloping letters together with their way-bills in an outside envelope, and that he does not know or believe the same was ever before known or used; and that he is a citizen of the United States.

Before me.

J. B. BEAMAN,
Justice of the Peace.

(Endorsed:) Rec'd & filed Oct. 27, 1853. S. T. Shugert.

T. C. A., WEST POULTNEY, VT.,
Oct. 25th, 1853.

Hon. CHAS. MASON,
Commissioner of Patents:

SIR: I send enclosed an oath of my improvement in mailing & enveloping letters, &c., as described in my caveat. I consulted the patent laws for an oath to accompany a caveat, but did not find one.

2928 But one for an application for a patent. Pardon me, sir, for the mistake. I am anxiously waiting to hear from those papers; drawings & model for my impt. in R. R. car brakes as rejected.

Most respectfully, your ob't serv't & friend,

MARCUS P. NORTON.

Hon. C. MASON,
Com'r of Patents.

TROY CON. ACAD.,
West Poultney, Vt., Oct. 27th, '53.

To the Commissioner of Patents:

SIR: I send enclosed a plan for my type for letter-stamp & way-bill folder, which should have gone with the caveat which I sent you yesterday, but was left out through a mistake, & not noticed until too late for the mail.

Most respectfully, yours,

MARCUS P. NORTON.

COMMISSIONER, &C.

Know all men by these presents, that I, Marcus P. Norton, of Tinmouth, in the county of Rutland, hereby constitute and appoint Silas H. Hodges, of said Rutland, for me and in my name and behalf, to prosecute and attend to my application for a patent for a post-office letter-stamp and way-bill folding-machine, and I hereby request the Commissioner of Patents to correspond with him respecting the same, and also respecting my caveat filed for the above improvement for me.

Rutland, Vt., Mar. 11, 1854.

MARCUS P. NORTON.

(Endorsed:) M. P. Norton's power of att'y to S. H. Hodges. Rec'd & filed 14 March, 1854. A. B. S.

2629 TINMOUTH, VT., *Aug. 7th,* 1854.

To the Commissioner of Patents:

SIR: I send to day an additional description of my machine for mailing & folding letters, &c.

When will my caveat expire? The copy you sent me has no date; I wish to petition for a patent before the caveat shall expire. Please communicate the ans. to Mr. Hodges if I trespass your rules, &c.

Respectfully, your ob't serv't,

MARCUS P. NORTON.

EXHIBIT B.

To the Commissioner of Patents:

SIR: I wish the following to be added to my subjoined description for mailing and folding letters, for which I have a caveat in your office.

In the mailing of letters I have provided means for postmarking of letters, newspapers, and the like, and for the cancelation of the postage-stamps thereon, at one and the same blow or operation of the instrument or machine by which the postmark is had or made upon the letter, envelope or wrapper or package in a plain and intelligible manner, and thereby always retaining the same, while the postage stamp or stamps are more effectually and permanently cancelled, so as to prevent frauds upon the revenue derived from the sale and use of such stamps.

The said device is arranged upon the type-cylinder contained in first paper filed in my said caveat, between the way-bill form of type, and it gives the impression in ink upon the letter, envelope, or packet by means of the revolving cylinder, and at the same time and operation it also gives a heavy impression in ink upon the postage-stamp when or where used upon the said letter or envelope, and
2630 the postage-stamp becomes thoroughly impregnated with ink by

the means herein provided, and therefore it cannot be cleansed by chemical washing or by other means so as to allow of the same being used a second time, and thus frauds are prevented. If there should be no stamp used for payment of postage on letters, packets, &c., this device would do no sort of harm to the letter, envelope, &c., for it would only postmark the same with the name of the town & date; such as month, day of the month, and year, and upon one side thereof at same time give a heavy impression in ink, which would appear was only intended for cancellation of the postage-stamp as aforesaid stated. This would make a plain and more intelligable postmark than by the old method now in use, while it would at same time, blow, and operation of the instrument cancel in ink the postage-stamp or stamps, when such are used, as aforesaid, in a most thorough, perfect and permanent manner, so that the same could not be cleansed for the purpose of being used a second time. This part of my invention I construct of the ordinary form of type now used in the post-offices for the postmarking of letters with the name of the town, month, day of the month, and the year, &c., and I combine therewith in some good, practical, and suitable manner, a device, which I denominate a postage-stamp canceling type, to be used in or with any kind of ink suitable for that purpose, and by such combined instruments one device is formed, which will give the name of post-office, month, day of the month, & year, and at same time and blow cancel and thus destroy the postage-stamp, thereby greatly economizing in the time now required in the making up of the mail—in fact saving one half of the labor required for postmarking and for canceling of postage-stamps, when it is desirable to give the impression of name of the town & date upon the envelope, letter, or packet in order to preserve the same for any purpose of proofs or other thing. I now
2631 think that the best way to make this part of my invention is to use a cross-bar or cross-piece upon the periphery of the cylinder set forth in other papers in my caveat, and fasten in some suitable manner the postmarking stamp upon one end thereof, and the postage canceling type or device upon the other end of said bar or cross-piece, which would of course give dating stamp at one end and canceling stamp at the other end thereof. This bar thus constructed with said type arranged thereron as aforesaid, is securely fastened to the periphery of said cylinder in some suitable manner. The canceling type or stamp may be made of iron, steel, wood, rubber, cork, or of any other suitable material, and the same may be combined with said cross-bar by the drilling of a suitable hole therein, or by a tube to receive the same, and said tube being suitably fastened to said cross-bar, or the same may be fastened directly upon and to the said cross-bar at any required dis-
Material. tance from said dating part or dating type. A screw may pass through said cross-bar into the material used for the canceling type and thus hold it firmly thereto, or a suitable tube may first be fastened to said cross-bar and then the canceling material or part used for the canceling type may be inserted therein, and thereon, and thereby held until worn out by use, when the same may be replaced. Rubber or cork, I think, will make the best and most suitable canceling type or device, while soft wood used endwise will make a most excellent cancelling type. If it should be found impracticable to use the said cylinder and other parts of said machine as contemplated in the caveat papers now on file, then the said cross-piece or bar may be removed from the said type cylinder by means of loosening the screws by which it is fastened thereto, and a suitable handle affixed thereto in place of such cylinder and the same then used as a hand stamping device for post-

marking & canceling postage-stamps. The said cross-bar may be removed from said cylinder in order to reset the type for the date
2632 to be given, or for the purpose of removing and replacing the said canceling type or stamp, and then the same may be replaced upon said cylinder as aforesaid. By means of this device I get a good and more perfect impression upon the letter, envelope, or packet of the name of the town, day of the month, month, &c., and at the same time and operation, cancel the postage-stamp or stamps in ink in a most complete, thorough and perfect manner. When cork is used it contains a greater quantity of the ink used, and being somewhat elastic, and somewhat rough upon the face containing the ink, it will to a considerable extent break the enameled surface of the postage-stamp, formed as such by means of the indelible ink used in the manufacture of such stamp so as to form a hard surface in order that the stamp might not become defaced by transportation to places of sale, while on sale, or while being carried in a person's pocket ready for use, and having broken somewhat such surface of such postage-stamp by the blow of the cork upon the same, the ink impregnates in a most thorough manner the whole postage-stamp, and of course it cannot be removed without destroying the printed surface of such postage-stamp and so defacing it that such efforts at reuse of it would be at once detected. Soft wood used endwise will have nearly the same effect, so therefore some soft and porous material will be the most suitable to use in the construction of said canceling type or device used for the cancellation of all postage-stamps.

The cam-frame which draws the letters under said type cylinder for postmarking of letters, packets, &c., and for the cancellation of postage-stamps thereon, will give the blow against the said postmarking and postage canceling device which is done at one operation and at the same time, and when thrown out of gear, then the way-bill printing part may be worked and thus print the way-bills as I have described in former papers on file in my said caveat. I would perfer the use of an in-
2633 delible ink with my said device or instrument, or machine, if the same could be had by all the postmasters who use the said machine, &c.

This part of said machine may easily and readily be converted into a hand stamp when and where no other part of said machine would be used, save and except the postmarking containing the name of the town, when used, the month and day of the month, and year, &c., and the postage-stamp cancelor or canceling device attached to and combined with the said cross-bar or cross-piece substantially as aforesaid, with a suitabl handle at the centre of said cross bar or piece, or at some suitable place between the two stamping devices aforesaid, which handle is used for the giving of the blow or impression of the two devices attached to said cross-bar as aforesaid, and of course it would then be a simple device of postmarking stamp, of cross-bar, and cork, rubber, or wood (or other suitable material) postage-stamp canceling device combined thus into one instrument, and operated by the handle with one blow, and to be used in or with any kind of ink desired. One blow of the instrument in the hand of the operator will do the printing of the name of the town, of the month, of the day of the month, upon the letter or envelope, and the cancellation of the postage-stamp in a most complete and effectual manner, substantially as aforesaid, thereby saving great labor and the rehandling over of the letters in order to postmark them, and afterwards to cancel the postage-stamps when it is desired to have an intelligable postmark preserved on the letter or envelope, and to have the postage.

stamp permanently canceled so as to prevent frauds by the reuse of the same, as is often now the case. This instrument will therefore prevent such frauds and very much simplify and economize in the time for the making up the mails for transportation. This will be the effect and result if no other part of said machine be used, save the said parts converted into a simple hand stamp as aforesaid, to wit, the postmarking
2634 part, the postage stamp canceling part, all attached to the said cross-bar and combined therewith as and in the manner aforesaid.

If the entire machine set forth in all the caveat papers be used, there will be great saving of labor and time in mailing of letters, and a large quantity of paper, twine, & sealing wax, &c., by the use set forth in all the papers of this caveat. There would be also great labor saved as aforesaid by the use of such hand stamp combined as aforesaid. I am having a full size machine made according to my caveat papers, which when done I shall apply for a patent, or at least as soon, hereafter as I may be able to get the Post-Office Department to consider and adopt for use in the various post offices my said improvements or some parts thereof, preferring to submit the same to the judgment of that department before applying for my patent upon the invention herein contained. I desire you to file this with my other papers in my said caveat. I intend to renew my caveat if such be at all necessary in order to protect my rights while engaged in efforts with the Post-Office Department for the general use of my invention, and especially that part which relates to the hand stamp form of postmarking & postage-stamp canceling combined with and upon a cross-bar or piece containing a suitable handle substantially as aforesaid, so as to give both impressions at one blow and operation of the instrument as aforesaid, thereby saving great labor, and preventing frauds, &c.

MARCUS P. NORTON.

TINMOUTH, VT., *August* 7, 1854.

EX.—J. A. W. M. McK.

(Endorsed:)

EXHIBIT B.

This paper, marked Exhibit B, after due notice to M. P. Nor-
2635 ton and trial had before a commission appointed by the Commissioner of Patents, was by the said commission adjudged to be fraudulent, and to have been surreptitiously introduced into the caveat file of M. P. Norton for a mach. for mailing & folding letters, filed Oct. 20th and 27th, 1853.

In the order of the Commissioner of Patents, dated Sept. 18th, 1871, and approved by the Sec'y of the Interior, in the case of the trial of M. P. Norton for gross misconduct, see the finding of the commission as to charges 1 and 2.

This paper does not therefore form a valid portion of the above-named caveat.

M. D. LEGGETT,
Commissioner of Patents.

EXHIBIT C.

TINMOUTH, VT., *Aug.* 21, 1855.

Com. of Patents

Will you please send me the 2d part of your report of 1854?

Can I make application for a patent (on my caveat), for post-office waybill printing & folding machine at two different times?

The caveat has expired. I wish to make application on the folding part first, as the whole machine will be subject to two patents or applications. If I can apply for one at the time, can the caveat fee be applied on that one application?

Respectfully, your obt. servt.,

MARCUS P. NORTON.

(Endorsed:) Rec'd & fld. Aug. 25, 1855. S. T. Shugert.

EXHIBIT C.

This paper (marked Exhibit C, and to which the paper marked
2636 D is attached) does not pertain to the caveat file of M. P. Norton for a R. R. ticket printing press, filed June 21st, 1855, but does pertain to the caveat file of M. P. Norton for a mach. for mailing & folding letters, filed Oct. 20th and 27th, 1853.

See the endorsement on the back of Exhibit D, hereunto attached.

M. D. LEGGETT
Commissioner of Patents.

Paid Aug. 12.

AUGUST 10, 1870.

Hon. Commissioner of Patents:

SIR: Please have made for me certified copy of file wrapper and of the contents therein (in writing) of my caveat upon "machine for mailing & folding letters," filed the 20th day of October, 1853.

I want two copies of these papers certified in two separate packets.

MARCUS P. NORTON.

2 file and cts., Aug. 10. $7.50.

Ex'd.—C. K. H. W. H.

2642 ington, D. C., on the 8th day of September, 1871, at 10 o'clock a. m., and show cause, if any exist, why the said Commissioner of Patents (by virtue of the authority conferred upon him by the seventeenth section of the act of Congress approved July 8, 1870, and entitled "An act to revise, consolidate, and amend the statutes relating to patents and copyrights") should not refuse longer to recognize you as a patent agent, it being alleged that you have been guily of "gross misconduct," more particularly with reference to the matters hereafter named.

1st, viz: That said Marcus P. Norton, having on the 20th day of October, 1853, filed in the United States Patent Office a certain caveat, dated "Troy Conference Academy, West Poultney, Vt., Oct. 13th, 1853," a copy of which is hereto attached and marked Exhibit A. That some time after filing said paper marked Exhibit A he, the said Marcus P. Norton, surreptitiously conveyed to the files of this office a certain other paper, a copy of which is hereto attached and marked Exhibit B, as a subjoined description to said caveat, which said Exhibit B purports to have been written August 7, 1854; and the said Marcus P. Norton is herewith charged and accused of writing said paper marked Exhibit B at a much later date than the said August 7, 1854.

2nd. That the said Marcus P. Norton is hereby charged and accused of gross misconduct for having (without authority from this office and without filing said paper, Exhibit B) placed it among the files of this office with the intention to deceive and practice fraud upon this office.

3rd. That the said Marcus P. Norton, acting for himself and in behalf of his own interest in a certain case wherein he was interested, in letters patent, upon a certain "railroad printing press," did surreptitiously take and remove from the files in said case, in said Patent Office, a certain paper, dated "Tinmouth, Vt., Aug. 21st, 1855," a copy of
2643 which is hereto attached and marked Exhibit C; said paper, marked Exhibit C, was received and filed in said Patent Office, as appears by endorsement, August 25, 1855.

4th. That the said Marcus P. Norton is hereby charged with purloining from said files in said Patent Office said paper or letter marked Exhibit C, and attaching thereto a certain other paper, a copy of which is hereto attached and marked Exhibit D, intending thereby to deceive and practice gross fraud upon this office. That said paper, Exhibit D, purports to have been written and signed by Marcus P. Norton on the said 21st of August, 1855, which paper, marked Exhibit D, said Norton is hereby charged with writing and surreptitiously placing among the files at a much later date than said August 25, 1855, while in fact said paper, marked Exhibit D, was never duly filed in this office, but being attached by said Marcus P. Norton to said letter or paper marked Exhibit C, as said letter marked Exhibit C had been duly received and filed in the Patent Office Aug. 25, 1855, thus practicing gross fraud and deception upon this office, and undertaking and intending to impress upon this office that said paper marked Exhibit D was duly filed Aug. 25, 1855, in said Patent Office.

5th. That said Marcus P. Norton did, on the 15th day of August, 1871, file in this office a false and fraudulent paper, a copy of which is hereto attached and marked Exhibit E, in which he alleges that he never did make any assignment to F. G. Ransford and Peter Low, dated May 2nd, 1859, and that if any such is on file in this office, or has been recorded in "Liber G, page 73," of "transfers of patents," is in error "and is a gross fraud and a forgery," and that said paper was duly received and filed in this office on said 15th day of August, 1871, and

sworn to by Marcus P. Norton before T. C. Connolly, a justice of the peace of the city and county of Washington, D. C.

6th. That the said Marcus P. Norton, acting for himself and in
2644 his own behalf, and in order to defeat the rights of other parties, viz, F. G. Ransford and Peter Low, did write, utter, and publish a certain paper, a copy of which is hereto attached and marked Exhibit F. That said paper purports to have been written July 20th, 1857, and signed by F. G. Ransford and P. Low, and witnessed by R. G. Fox and Thomas H. Hardman. That said Marcus P. Norton is hereby charged (on or about July or August, 1871,) with writing, publishing, and forging said paper marked Exhibit F, and of forging the names of said F. G. Ransford and P. Low, the pretended assignors, as well as the names of R. G. Fox and Thomas H. Hardman, witnesses to said assignment.

7th. That said Marcus P. Norton filed in the United States Patent Office in person said paper marked Exhibit F, as the original paper or assignment, for record in said office, on the 22nd day of August, 1871, and claimed said paper marked Exhibit F was an original paper duly executed by said F. G. Ransford and P. Low, and duly witnessed by said R. G. Fox and Thomas H. Hardman, intending thereby to practice gross deception upon this office.

8th. That the said Marcus P. Norton is hereby charged of forging the signatures of F. G. Ransford and P. Low, the assignors, as well as with forging the names or signatures of R. G. Fox and Thomas H. Hardman, the witnesses to said paper or assignment marked Exhibit F, and presenting the same for record in said Patent Office, to wit, said paper marked Exhibit F, and presenting it as a genuine and true paper or assignment for record on said Aug. 22d, 1871, all of which he did in defiance of the rights of said assignors, viz, F. G. Ransford and P. Low, and the said Marcus P. Norton was and is guilty of gross misconduct as a patent attorney or agent, and is unworthy of the confidence or respect of the United States Patent Office.

M. D. LEGGETT,
Commissioner.

2645 (Copies of the exhibits were served on Mr. Norton, but, being voluminous, are omitted here.)

By the request of the attorney of said Marcus P. Norton, the hearing in the matter of the above charges was postponed until September 14th, at 10 o'clock a. m.

Understanding that Mr. Norton was fearful the Commissioner would not do him exact justice, he was informed that, if agreeable to his wishes, a commission of three gentlemen connected with the Patent Office would be appointed to hear and investigate the charges, and to report their findings to the Commissioner. He expressed his satisfaction with such arrangement, provided he might designate persons whom he did not want on the commission. He was granted such privilege, whereupon examiners T. C. Connolly, Ellis Spear, and C. M. Parks were appointed such commission.

At the time to which said case had been postponed, said Marcus P. Norton appeared before the commission, and was assisted in his defense by two able attorneys. He plead "not guilty" to all the charges. Over two days were occupied in the hearing. The report of the commission is as follows, to wit:

Hon. M. D. LEGGETT,
Com'r of Patents:

SIR: We, the undersigned, having been appointed a commission to

nvestigate certain charges made against Marcus P. Norton, a practicing attorney before the United States Patent Office, by order dated Sept. 14, 1871, have carefully investigated said charges, examined the papers and witnesses in the case, and heard the arguments of counsel on both sides, and respectfully submit the following report:

We find that the accused, Marcus P. Norton, is—

Of the first charge, guilty.

Of the second charge, guilty.

2646 Of the third charge, not guilty.

Of the fourth charge, guilty, except of the words "purloining from said files" * * said papers, &c.

Of the fifth charge, guilty.

Of the sixth charge, guilty.

Of the seventh charge, guilty.

Of the eighth charge, guilty.

All of which is respectfully submitted.

T. C. CONNOLLY.
ELLIS SPEAR.
C. M. PARKS,
Commission.

U. S. PATENT OFFICE, *Sept.* 18, 1871.

It is therefore adjudged:

I. That said Marcus P. Norton has been guilty of such "gross misconduct" as to make it the duty of the Commissioner of Patents to refuse longer to recognize him as a patent agent, and it is accordingly ordered, by virtue of the authority conferred upon the Commissioner of Patents under the 17th section of the act approved July 8, 1870, that the said Marcus P. Norton, or any firm of which he shall be a continued member, after said firm shall have been notified of this order, be hereafter excluded from practicing before the Patent Office in any and all cases.

II. In view of the fact that said Marcus P. Norton is also an inventor and frequently appears in his own behalf in prosecuting applications for patents, extensions, interferences, &c., and whereas it having been clearly proven in this case that he is an unsuitable person to be trusted with the files in this office, it is further ordered that hereafter said Marcus P. Norton shall not be permitted to have personal access to any of the files, drawings, or models in the Patent Office for any purpose what-
2647 ever. When necessary, in the transaction of business connected with his own personal interests, to know the contents of documents on file in the office, he must call for certified copies, or make examination by an attorney.

III. The examiners and other employees of the Patent Office will take cognizance of and enforce the above orders.

M. D. LEGGETT,
Commissioner of Patents.

Approved.

C. DELANO,
Secretary of the Interior.

2648 *Def't's Ex.* 162.—*April* 1, 1878.—*J. A. S., Ex.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of Exhibits A, B, C and D, referred to in charges made against Marcus P. Norton by the Commissioner of Patents; said charges having been served upon the above Norton on or about their date, to wit, August 29, 1871.

In testimony whereof I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this ninth day of January, in the year of our Lord one thousand eight hundred and seventy-eight, and of the Independence of the United States the one hundred and second.

W. H. DOOLITTLE,
Acting Commissioner.

To the Commissioner of Patents:

The petition of Marcus P. Norton, of Troy Conference Academy, West Poultney, and County of Rutland, and State of Vermont, respectfully represents:

That he has invented a certain machine for mailing and folding letters in the outside wrapper with their way-bills, and that he is now engaged in making experiments for the purpose of perfecting the same, preparatory to his applying for letters patent therefor. He therefore prays that the subjoined description of his invention may be filed as a caveat in the confidential archives of the Patent Office, agreea-
2649 bly to the provisions of the act of Congress in that case made and provided; he having paid twenty dollars into the Treasury of the United States, and otherwise complied with the requirements of said act.

MARCUS P. NORTON.

TROY CONFERENCE ACADEMY,
West Poultney, Vt., Oct. 13th, 1853.

SUBJOINED DESCRIPTION.

My post-office stamp and way-bill folding machine is so constructed as to print the name of the town, state, month and day thereof, also the name of the postmaster, Paid 3cts., and Unpaid 5 cts., upon the letter, and to fold the same together with its way-bill, in an outside envelope; said envelope and way-bill are made together, and in form and manner as shown by a plan which I send enclosed.

That part of the machine which stamps the letter consists of a shaft, upon which is placed two arms crossing each other at right angles, which contains the type in form as shown upon the way-bill; upon the same shaft are two cams, one at or near each end of the same, which are used to move the continuous or sliding platform (upon which the letter is moved under the type) down so as to let it receive an impression from the type. The platform upon which the letter passes under the type is continuous, or to slide under and back, as I may deem best upon experimenting The platform belt is to be moved with the same speed of the type cylinder, by means of a band or its equivalent. The

platform plays up and down by means of spiral springs around the guides of s'd platform, which are four in No. The belt or band is tightened at pleasure by means of movable boxes and screws. The types are to be inked by means of ink rollers, two in number, placed in such a manner by means of movable boxes and screws so as to roll over the face of the types as they pass around. In order to change the motion of the platform belt or
2650 slide, two small gears are used, one on the cam and type shaft, the other on the crank shaft. The frame for the entire work is to be made in any form to suit the eye of the mechanic. A pulley is fastened to one of the cams for the purpose of moving the continuous belt or slide and the ink rollers. That part for folding the letter with its way-bill in the outside envelope consists of a small table placed at one end of the stamping part upon legs. A hole is made through the center of this table large enough to receive any size letter; around this is made a box containing four folders, which turn upon hinges by means of levers, two of which move at a time only, which fold one-half of the envelope, after which the other two move and fold the remaining half, then the bottom of the aforesaid box opens and lets the letter drop out folded in its way-bill envelope ready for transportation. The folders are worked by means of levers fastened to them, at the end of which a cord is fastened which passes up through the table over pulleys, down through the table, and are fastened to pedals. At the other end of the levers are fastened cords for the purpose of opening the folders when closed. Those cords for opening the folders are worked by means of weights or springs. Having thus described my machine, I will now state its object.

Its object is—

1st. To facilitate mailing and wrapping up letters with their way-bills, &c.

2d. To save the expense of paper for wrapping purposes, lessening the cost about one-half, and saving all of the paper as now required for way-bills.

3d. To lessen the No. of laborers, as now required in large post-offices.

Ex.—J. A. W., M. McK.

(Endorsed:) Ren'd 2 oath. Written for Oct. 20, '53. S. T. S. Exhibit A.

2651 EXHIBIT B.

To the Commissioner of Patents:

SIR: I wish the following to be added to my subjoined description for mailing and folding letters, for which I have a caveat in your office:

In the mailing of letters I have provided means for post-marking of letters, newspapers, and the like, and for the cancellation of the postage-stamps thereon at one and the same blow or operation of the instrument or machine by which the post-mark is had or made upon the letter, envelope, or wrapper or package in a plain and intelligible manner, and thereby always retaining the same, while the postage-stamp or stamps are more effectually and permanently cancelled so as to prevent frauds upon the revenue derived from the sale and use of such stamps.

The said device is arranged upon the type cylinder contained in first paper filed in my said caveat between the way-bill form of type, and it gives the impression in ink upon the letter, envelope, or packet by means of the revolving cylinder, and at the same time and operation it also

gives a heavy impression in ink upon the postage stamp when or where used upon the said letter or envelope, and the postage-stamp becomes thoroughly impregnated with ink by the means herein provided, and therefore it cannot be cleansed by chemical washing, or by other means, so as to allow of the same being used a second time, and thus frauds are prevented. If there should be no stamp used for payment of postage on letters, packets, &c., this device would do no sort of harm to the letter, envelope, &c., for it would only postmark the same with the name of the town and date, such as month, day of the month, and year, and upon one side thereof, at same time give a heavy impression in ink, which would appear was only intended for cancellation of the postage-stamp, as aforesaid stated. This would make a plain and more
2652 intelligible postmark than by the old method now in use, while it would at same time, blow, and operation of the instrument cancel in ink the postage-stamp or stamps, when such are used as aforesaid, in a most thorough, perfect, and permanent manner, so that the same could not be cleansed for the purpose of being used a second time. This part of my invention I construct of the ordinary form of type now used in the post-offices for the post-marking of letters with the name of the town, month, day of the month and the year, &c., and I combine therewith, in some good, practical, and suitable manner, a device which I denominate a postage-stamp canceling type to be used in or with any kind of ink suitable for that purpose, and by such combined instruments one device is formed which will give the name of post-office, month, day of the month, and year, and at the same time and blow cancel and thus destroy the postage-stamp, thereby greatly economizing in the time now required in the making up of the mail—in fact saving one-half of the labor required for post-marking and for canceling of postage-stamp when it is desirable to give the impression of name of the town and date upon the envelope, letter, or packet, in order to preserve the same for any purpose of proofs or other things. I now think that the best way to make this part of my invention is to use a cross bar or cross-piece upon the periphery of the cylinder, set forth in other papers in my caveat, and fasten in some suitable manner the post-marking stamp upon one end thereof, and the postage-canceling type or device upon the other end of said bar or cross piece, which would of course give dating-stamp at one end and cancelling-stamp at the other end thereof. This bar, thus constructed with said type arranged thereon as aforesaid, is securely fastened to the periphery of said cylinder in some suitable manner; the canceling type or stamp may be made of iron, steel, wood, rubber, cork, or of any other suitable material, and the same may be combined with said cross-bar by the drilling of a suitable hole therein,
2653 or by a tube to receive the same, and said tube being suitably fastened to said cross-bar, or the same may be fastened directly upon and to the said cross-bar at any required distance from said dating part or dating type. A screw may pass through said cross-bar into the material used for the canceling type and thus hold it firmly thereto, or a suitable tube may first be fastened to said cross-bar and then the canceling material or part used for the canceling type may be inserted therein and thereon, and thereby held until worn out by use, when the same may be replaced. Rubber or cork, I think, will make the best and most suitable canceling type or device, while soft wood used endwise will make a most excellent canceling type. If it should be found impracticable to use the said cylinder and other parts of said machine as contemplated in the caveat papers now on file, then the said cross-piece or bar may be removed from the said type cylinder by means of loosen-

ing the screws by which it is fastened thereto, and a suitable handle affixed thereto in place of such cylinder and the same then used as a hand-stamping device for post-marking and canceling postage-stamps. The said cross-bar may be removed from said cylinder in order to reset the type for the date to be given, or for the purpose of removing and replacing the said canceling type or stamp, and then the same may be replaced upon said cylinder as aforesaid. By means of this device I get a good and more perfect impression upon the letter, envelope, or packet, of the name of the town, day of the month, month, &c., and at the same time and operation cancel the postage-stamp or stamps in ink in a most complete, thorough, and perfect manner. When cork is used it contains a greater quantity of the ink used, and being somewhat elastic and somewhat rough upon the face containing the ink, it will to a considerable extent break the enameled surface of the postage-stamp, formed as such by means of the indelible ink used in the manufacture of such
2654 stamp, so as to form a hard surface, in order that the stamp might not become defaced by transportation to places of sale, while on sale, or while being carried in a person's pocket ready for use; and having broken somewhat such surface of such postage-stamp by the blow of the cork upon the same, the ink impregnates in a most thorough manner the whole postage-stamp, and of course it cannot be removed without destroying the printed surface of such postage-stamp, and so defacing it that such effort at reuse of it would be at once detected. Soft wood used endwise will have nearly the same effect, so, therefore, some soft and porous material will be the most suitable to use in the construction of said canceling type or device used for the cancellation of all postage-stamps.

The cam-frame which draws the letters under said type cylinder for post-marking of letters, packets, &c., and for the cancellation of postage-stamps thereon, will give the blow against the said post-marking and postage-canceling device, which is done at one operation and at the same time, and when thrown out of gear, then the way-bill printing part may be worked and thus print the way-bills as I have described in former papers on file in my said caveat. I would prefer the use of an indelible ink with my said device or instrument, or machine, if the same could be had by all the postmasters who use the said machine, &c.

This part of said machine may easily and readily be converted into a hand stamp when and where no other part of said machine would be used, save and except the post-marking containing the name of the town where used, the month, and day of the month, and year, &c., and the postage-stamp canceler or canceling device, attached to and combined with the said cross-bar or cross-piece substantially as aforesaid, with a suitable handle at the center of said cross-bar or piece, or at some suitable place between the two stamping devices aforesaid, which handle is used for the giving of the blow or impression of the two devices
2655 attached to said cross-bar as aforesaid, and, of course, it would then be a simple device of post-marking stamp, or cross-bar, and cork, rubber, or wood (or other suitable material), postage stamp canceling device combining thus into one instrument, and operated by the handle with one blow, and to be used in or with any kind of ink desired. One blow of the instrument in the hand of the operator will do the printing of the name of the town, of the month, of the day of the month, upon the letter or envelope, and the cancellation of the postage-stamp, in a most complete and effectual manner, substantially as aforesaid, thereby saving great labor and the rehandling over of the letters in order to postmark them, and afterwards to cancel the [postage-stamps when it is de-

sired to have an intelligible post-mark preserved on the letter or envelope and to have the postage-stamp permanently canceled so as to prevent frauds by the reuse of the same as is often now the case. This instrument will therefore prevent such frauds and very much simplify and economize in the time for the making up of the mails for transportation. This will be the effect and result if no other part of said machine be used save the said parts converted into a simple hand stamp as aforesaid, to wit, the post-marking part, the postage-stamp canceling part, all attached to the said cross-bar and combined therewith, as and in the manner aforesaid.

If the entire machine set forth in all the caveat papers be used there will be great saving of labor and time in mailing of letters, and a large quantity of paper, twine, and sealing-wax, &c., by the use set forth in all the papers of this caveat. There would be also great labor saved, as aforesaid, by the use of such hand stamp combined as aforesaid. I am having a full size machine made according to my caveat papers, which, when done, I shall apply for a patent, or, at least, as soon hereafter as I may be able to get the Post-Office Department to consider and adopt for use in the various post-offices my said improvements or some
2656 parts thereof, preferring to submit the same to the judgment of that department before applying for my patent upon the invention herein contained. I desire you to file this with my other papers in my said caveat. I intend to renew my caveat if such be at all necessary in order to protect my rights while engaged in efforts with the Post-Office Department for the general use of my invention, and especially that part which relates to the hand stamp form of post-marking and postage-stamp canceling combined with and upon a cross-bar or piece containing a suitable handle substantially as aforesaid, so as to give both impressions at one blow and operation of the instrument, as aforesaid, thereby saving great labor and preventing frauds, &c.

MARCUS P. NORTON.

TINMOUTH, VT., *August* 7, 1854.

Ex'd—H. M. H., E. A. M.

(Endorsed:)

EXHIBIT B.

This paper, marked Exhibit B, after due notice to M. P. Norton and trial had before a commission appointed by the Commissioner of Patents, was by the said commission adjudged to be fraudulent and to have been surreptitiously introduced into the caveat file of M. P. Norton for a mach. for mailing and folding letters, filed Oct. 20 and 27, 1853. In the order of the Commissioner of Patents, dated Sept. 18, 1871, and approved by the Sec'y of the Interior, in the case of the trial of M. P. Norton for gross misconduct. See the finding of the commission as to charges 1 and 2.

This paper does not, therefore, form a valid portion of the above-named caveat.

M. D. LEGGETT,
Commissioner of Patents.

2657 EXHIBIT C.

TINMOUTH, VT., *Aug.* 21, 1855.

COM. OF PATENTS:

Will you please send me the 2d part of your report of 1854?

Can I make application for a patent (on my caveat) for post-office

way-bill printing and folding machine at two different times? The caveat has expired; I wish to make application on the folding part first, as the whole machine will be subject to two patents or applications. If I can apply for one at the time can the caveat fee be applied on that one application?

Respectfully your ob't se'v't,

MARCUS P. NORTON.

Ex'd—C. C. W., F. F.

(Rec'd and filed Aug. 25, 1855.)

S. T. SHUGERT.

(Endorsed:)

EXHIBIT C.

This paper (marked Exhibit C, and to which paper marked Exhibit D is attached), does not pertain to the caveat file of M. P. Norton for a R. R. ticket printing press, filed June 21st, 1855, but does pertain to the caveat file of M. P. Norton for a mach. for mailing and folding letters, filed Oct. 20th and 27th, 1853.

See the endorsement upon the back of Exhibit D, hereunto attached.

M. D. LEGGETT,
Commissioner of Patents.

2658 EXHIBIT D.

Additional Paper to Railroad Printing Press.

TINMOUTH, VT.,
August 21st, 1855.

Hon. COMMISSIONER OF PATENTS:

SIR: I wish to file this paper as an additional caveat description to my Railroad Printing Press, now on file under date of June 4th, 1855, and sworn to the 11th day of June, 1855.

I propose to make the form of type as I have described in my caveat, or make a cylinder of sufficient size to contain upon its surface or periphery the name (in stereotype) of the name of stations on the line of road, in order as they are on said road. This I call the cylinder of towns to where tickets are sold; this cylinder is placed into the form and made to revolve at the will of the operator; there is another cylinder of the same form like unto the other, and this is called cylinder from which the tickets were sold; the name of the road and all other printed matter to be done may be done by cylinders constructed for that purpose, or stationary type may be used for all excepting for the month, the day of the month, and the year, which will be done by cylinders made for that purpose. At one end of each cylinder there is an index for each cylinder. And a pointer connected with the cylinder revolves the same to where it may be desired to use the same, when it is then held by the use of a pin and spring. The operator moves these cylinders to and from whatever name or date he wishes to sell and date tickets for use on the railroad.

This press is chiefly designed to be used in the general ticket office by the general ticket master or his clerks, or it may be used in any office on the line of the road when printing and dating is desired. The said cylinders when moved to their respective places are held fast by a spring connected with the pointer, and governed or regulated by the in-

2659 dexes, as will more fully appear herein. I have set forth a series of revolving type wheels or cylinders for printing certain matter on railroads, but I also intend such wheels to do all kinds of printing required in any office other than the printing the name of towns on a railway line with the date of the selling of the tickets, all of which is done by means of suitable cylinders for that purpose. I have deemed it best to give a more full description of the dating wheels, and it is substantially as follows: I make two wheels, or more if necessary, and on the circumference or periphery of which I have the required type arranged so as to print the several months in the year, and on another cylinder or wheel I have arranged the type to print the day of the month. There may also be a type for the years, so that several years may be printed when desired from the type put on a wheel in same manner as for the month and day of the month. These wheels or cylinders, containing such type may be desired to print from, are put and arranged on a central shaft or other good bearing and turning points, and the printing surface is brought together on a line or in a suitable form when the month, the day of the month, and the year with any other matter connected with the same, or printed by a blow of the instrument arranged to give the impression. It may be used as a hand printing or stamping device for dating anything desired to have the date printed or formed thereon. This would be very convenient for them, there would be no type to lose for all the dates would be on the cylinders from which the same may easily and readily be set or arranged to print the correct dates. The dating cylinders may be if any size that will answer the purpose required. The day of the month wheel may be made of such size as to require two wheels in order to give the correct dates and to reduce the size of the wheels or cylinders. In that case one wheel would have figures 1, 2, 3, on the periphery of the same, while on the wheel to correspond to the same there would be on the periphery 2660 the figures 1, 2, 3, 4, 5, 6, 7, 8, 9, and *a*, *o*, or cipher. These when changed will give any date required. It will now be seen that the correct date is given from and by type wheels or revolving and changing cylinders, or discs. The letters or type may be cast on the periphery of such wheels, or formed in slips or pieces and soldered upon the periphery of the wheel desired, or they may be engraved on the same, or they may be swedged, formed, or pressed thereon out of the same circumference or periphery, or they may be so constructed as to be dovetailed therein. There are various other ways for forming or constructing on such wheels such letters or figures as may be required. The wheels or cylinders may be made of malleable cast iron, or of other cast metal, or made of brass or similar metal. Brass would be the better metal to use when the letters or figures are to be engraved, or swedged or raised, or pressed or formed thereon, because it would work more easy and make better work. Stereotype letters and figures can be made and then soldered on such circumference surface of such wheels. I think the best way will be to dovetail them in, because when worn out a new one can be put in its place, and it would require expensive machinery to cast or press, form a swedge the letters or figures on said circumference or periphery of such type and dating wheels or cylinders. To ink the said wheels or type cylinders when arranged for printing and dating, I pass an ordinary inking roller over the face or surface of all the type to be printed from, and then it is returned to its proper place. This roller is passed over a suitable distributing surface which is for the purpose of getting the ink on the type wheels more evenly and thus make a better impression on the paper to be printed and dated.

These wheels are each operated in a suitable form or close constructed for that purpose. So set them each in proper condition or order for the date, and as a matter of convenience I use pointer or arm of any
2661 suitable construction, and secure the same to the shaft of the type wheel or to the wheel itself, and then I have indexes on the frame or on the respective type wheels so arranged as to enable the operator to put the right month, day of the month, or year, &c., into the printing line or surface so that the same will print the date required. These indexes will be of any suitable construction and engraved, stamped, or otherwise put upon the said type wheel framework or upon each wheel, as may be best, and in such manner that the operator may readily see the same so as to know how to govern the setting of the wheels in order to print correctly the matter desired. These wheels or cylinders are held in their fixed position by a small pin having a suitable spring attached which may be in the arm or pointer, or in the said framework and extending into the respective wheels, having a corresponding hole or opening for the spring to pass into to hold it. The spring is to hold the pin in its place so that the wheel cannot move when in its fixed position and in use. By moving any one of the type wheels or cylinders forward to change its use, either to change the month, or the day of the month, or the year, the pin will be forced into a corresponding opening by the spring and then held until another change is had, and so the operation will continue. Words or figures may be used to index or represent the month, and may be on the side of the wheel, or on the frame holding the type wheels, on their shaft, and will of course always be so constructed as to be in sight the most convenient. This will apply to all the wheels or cylinders for printing the month, the day of the month, and year, so, too, if any cylinder be used to print any other matter, the same may have an index to correspond to the matter to be printed. The said dating type wheels may be in a fixed frame and the impression taken from the top by any suitable device to give the force or blow thereon, and the inking roller made to pass over the top in any good and convenient way, or the said
2662 type, dating wheels and frame in which the same operate may be so arranged as to give a striking like blow by the hand, or put into a frame on a stern and be forced down upon the paper and then brought back by a spring.

I am having a machine made with these improvements in and hope to apply for a patent within the caveat year, yet there are some other improvements I propose to make in this machine as a whole.

The machine may be used for banks, railroad companies, business firms, and in post-offices.

Respectfully, your ob't s'v't,

MARCUS P. NORTON.

(Endorsed :)

EXHIBIT D.

This paper, marked Exhibit D, after due notice to M. P. Norton and trial had before a commission appointed by the Commissioner of Patents, was by the said commission adjudged to be fraudulent and to have been surreptitiously introduced into the caveat file of M. P. Norton for a R. R. ticket printing press, filed June 21st, 1855.

In the order of the Commissioner of Patents, dated Sept. 18th, 1871, and approved by the Sec'y of the Interior, in the case of the trial of M. P. Norton for gross misconduct, see the finding of the Commissioner as to Charge 2.

The paper does not, therefore, form a valid portion of the above-named caveat.

M. D. LEGGETT,
Commissioner of Patents.

POST-OFFICE DEPARTMENT,
APPOINTMENT OFFICE,
Washington, D. C., September 28th, 1860.

POSTMASTER, *New York, N. Y.:*

SIR: It appearing from your reports that about the same number of letters is each day deposited in the lamp-post boxes for the mail upon which the carrier's fee is unpaid, and the public having now had sufficient time to become advised of this new order requiring prepayment of such fee, the P. M. General directs that you give notice in the newspaper that after a given day all such letters will be treated like letters placed in the post-office wholly unpaid. Thereafter you notify the parties ad-
2664 dressed, that on transmitting the postage due, their letters will be forwarded.

Very respectfully,
(Signed)

H. KING,
1st Ass't P. M. G.

POST-OFFICE DEPARTMENT,
OFFICE OF THE 1ST ASSISTANT POSTMASTER-GENERAL,
Washington, D. C., August 10th, 1860.

POSTMASTER, *New York, N. Y.:*

SIR: I have to acknowledge the receipt of your letter of the 8th inst., in relation to cancelling stamps. The arrangement is an excellent one, and will save much labor in making up the mails, but I fear the attachment you have affixed to your marking stamp has not only been thought of before, but has actually been patented. If so, it may at some future time subject your office to a heavy charge to the patentee for its use, or perhaps to a lawsuit. The Postmaster General therefore desires that you will give the subject such timely attention as will be calculated to avoid such consequences.

He also desires me to call your attention to the imperfect impressions made by the marking stamps in your office, and to ask if a remedy cannot be found for the defect. Complaints are received at the department almost daily from all parts of the Union on this subject, and the P. M. General would be much gratified if some plan could be devised to make them less frequent.

Very respectfully,
(Signed) ST. JOHN B. L. SKINNER,
Acting 1st Ass't P. M. G.

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the bound volumes of the library of this office of the specification and drawing in the matter of the English letters patent granted D. G. Berri, dated April 24, 1860, No. 1020, for "an improved date stamp."

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed, this sixth day of February, in the year of our Lord one thousand eight hundred and seventy-eight, and of the Independence of the United States the one hundred and second.

W. H. DOOLITTLE,
Acting Commissioner.

A. D. 1860, 24th ril. . 1020.

Date stamp.

Letters patent to David Garden Berri, of Bloomsbury, in the county of Middlesex, for the invention of "An Improved Date Stamp." Sealed the 27th September, 1860, and dated the 24th April, 1860.

2670 Complete specification filed by the said David Garden Berri, at the office of the Commissioner of Patents, with his petition and declaration, on the 24th April, 1860, pursuant to the 9th section of the Patent Law Amendment Act, 1852.

To all to whom these presents shall come:

I, David Garden Berri, of Bloomsbury, in the county of Middlesex, send greeting:

Whereas I, the said David Garden Berri, have petitioned Her Majesty to grant unto me, my executors, administrators, and assigns, Her Royal Letters Patent for an invention for "An Improved Date Stamp":

Now, know ye, that I, the said David Garden Berri, do hereby declare the nature of my said invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement, and the drawings therein referred to (that is to say):

My invention, which has reference to the improved date stamp, to be employed for the general purposes of stamping letters, documents, or otherwise, whereby any alteration, by means of movable type, may be made with greater facility than hitherto, consists in the lower portion or face of the stamp or plate being connected to the body of the same by means of a hinge joint and screw fastening, in such manner that the said face may be thrown or turned back, and admit of the removal of the type for the purpose of changing the same when required for the alteration of the date or otherwise.

But in order that my said invention may be more fully understood and readily carried into effect, I now proceed to describe the same by the aid of the accompanying drawings, reference being had to the letters and figures thereon marked (that is to say)-

Fig. 1 represents a vertical end view of my improved date stamp Fig. 2 a side view thereof; Fig. 3 a plan or underneath view;

2671 showing the face of the stamp or engraved plate as applied to postal purposes; Fig. 4 a side view of the same, showing the application of the hinge opening joint, and the manner in which the type are to be removed or changed; Fig. 5 a top or plan view thereof; Fig. 6 a longitudinal section, taken through the dotted line in Fig. 5; Figs. 7 and 8 detached front and side views of the thumb-screw for securing the face to the body of the stamp; and Figs. 9 and 10 corresponding views of one of the type. In each figure the same letters of reference denote similar corresponding parts.

A A the handle of wood or otherwise; B B metallic hinge plate or body of the stamp to which the handle is attached; C C engraved face or plate from which the impression is taken; D D pin or hinge joint for enabling the stamp to be opened or separated for the removal or changing of the type, as represented at Figs. 4 and 5; E E thumb-screw or pin for holding or securing the parts together when closed and required for use; F and F[1] semicircular openings and tap or nut in the upper and lower plates, forming, when closed, the hole or socket in which the screw or pin is secured; G G movable type; H H openings

or perforations in which the same are placed; I I recess or cavity fitting over the flanged heads or tops J J of the type.

In conclusion to the foregoing description, it may be here necessary to note that my improved date stamp may be employed, either in connection with the double or obliterating mark, as represented, or separately, in conformity with the usual requirements, the stamp being used in the ordinary way, and the operation of changing the type effected by the removal of the pin or thumb-screw, so as to admit of the plates being opened or separated, as shown at Fig. 4, and the type removed and others substituted, as required.

Having now described the nature of this my said invention, and the manner in which the same is to be performed, I would have it clearly understood that I do not claim the exclusive use of the several
2672 parts hereinbefore mentioned and referred to, except when the same are employed in and for the purposes of my said invention, which I hereby declare to consist in the construction and employment of a date stamp, in which the engraved portion of the stamp is hinged to the upper plate or body of the same, so as to admit of the separation of the plates, and facilitate the changing of the type.

In witness whereof, I, the said David Garden Berri, have hereunto set my hand and seal this twenty-first day of April, in the year of our Lord one thousand eight hundred and sixty.

DAVID GARDEN BERRI. [L. S.]

Witness:
T. R. DARKIN CAMPBELL,
Clerk to Messrs. Weatherdon & Co., 77 Chancery Lane.

Ex'd—H. M. H., E. A. M.

(Here follows diagram marked page 2673.)

2674 *Defendant's Exhibit* 170—*Robertson.—J. A. S., ex'r.*

DEPARTMENT OF THE INTERIOR.

United States Patent Office, to all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the records of this office of the letters patent granted T. J. W. Robertson, dated September 22, 1857, No. 18249, for "hand stamp."

In testimony whereof, I, W. H. Doolittle, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this eleventh day of October, in the year of our Lord one thousand eight hundred and seventy-seven, and of the Independence of the United States the one hundred and second.

[SEAL.] W. H. DOOLITTLE,
Acting Commissioner.

The United States of America to all to whom these letters patent shall come:

Whereas T. J. W. Robertson, of New York, N. Y., has alleged that he has invented a new and useful hand stamp, which he states has not been known or used before his application; has made oath that he is a citizen of the United States; that he does verily believe that he is the original and first inventor or discoverer of the said hand stamp, and

that the same hath not, to the best of his knowledge and belief, been previously known or used; has paid into the Treasury of the United States the sum of thirty dollars, and presented a petition to the
2675 Commissioner of Patents, signifying a desire of obtaining an exclusive property in the said hand stamp, and praying that a patent be granted for that purpose.

These are therefore to grant, according to law, to the said T. J. W. Robertson, his heirs, administrators, or assigns for the term of fourteen years from the twenty-second day of September, one thousand eight hundred and fifty-seven, the full and exclusive right and liberty of making, constructing, using, and vending to others to be used, the said hand stamp, a description whereof is given in the words of the said Robertson in the schedule hereunto annexed, and is made a part of these presents.

In testimony whereof I have caused these letters to be made patent, and the seal of the Patent Office has been hereunto affixed.

Given under my hand, at the city of Washington, this twenty-second day of September, in the year of our Lord one thousand eight hundred and fifty-seven, and of the Independence of the United States of America the eighty-second.

[L. S.] JACOB THOMPSON,
Secretary of the Interior.

Countersigned and sealed with the seal of the Patent Office.

J. HOLT,
Commissioner of Patents.

The schedule referred to in these letters patent, and making part of the same.

To all whom it may concern:

Be it known that I, T. J. W. Robertson, of the city, county, and State of New York, have invented a new and useful improvement in hand stamps, and I do hereby declare that the following is a full,
2676 clear, and exact description of the same, reference being had to the accompanying drawings making a part of this specification, in which

Fig. 1 is a side sectional elevation of my improvement.

Fig. 2 is a central sectional elevation of the same.

Fig. 3 is a plain view of the bottom of the stamp.

Similar letters of reference indicate corresponding parts in the several figures.

This invention consists in the construction of hand stamps in the manner herein described and represented.

A is the handle, to the bottom of which is attached a metallic forked shank, B. To the bottom of this shank is attached a metallic ring, C, said ring being secured to the shank by means of screw bolts (*a*). The lower part of the shank is also notched as shown at (*b b*), in order to receive the ring C, and form a front bearing for it. Various other methods may be adopted at the pleasure of the maker for attaching the ring C to the shank B.

When the stamp is intended for a letter stamp, the name of the post-office may be engraved upon the face of the ring C, as shown in Fig. 3.

D is a shaft, which passes horizontally through the shank B. Upon

this shaft are placed three type wheels (*c*, *d*, *e*), which revolve independent of each other on the shaft D. The faces of these type wheels may be provided respectively with the names of the months of the year, and also the ten numerals.

The shaft D is arranged at such a distance from the face of the ring C that the type wheels (*c*, *d*, *e*) may be turned, so that the types upon said wheels will come in line, or form a horizontal plane with the types on the ring C; and thus when the face of the stamp is inked over by any suitable inking device, and the stamp duly pressed upon a letter or other suitable substance, an impression will be left thereupon of the types contained on the ring C, and also of those types of the type wheels (*c*, *d*, *e*) that are in line with the types of the ring C.

2677 It will be seen that only one line of types upon the type wheels can simultaneously come into a horizontal plane with the types on the ring C, the remaining types being distributed around the peripheries of the type wheels (*c*, *d*, *e*), so that they cannot touch the paper on which the impression is to be made.

E is a lock pin which passes horizontally through the shank B, and also through the type wheels (*c*, *d*, *e*). The object of this pin E is to lock the type wheels, so that when any one line of types has been turned and brought into a horizontal plane with the types upon the ring C, the said line of types will be held fast and prevented from getting out of place.

By removing the bolt E the combination of letters on the type wheels (*c*, *d*, *e*) may be changed at pleasure.

F is a space wheel or washer upon the shaft D. It is there placed for the purpose of having a greater distance between the type wheels

The stamp here shown has the face of its ring, C, made in circular form. But it is obvious that the shape of the ring may be changed to suit the pleasure of the purchaser without changing the general construction of the stamp.

The type wheels and ring may also be engraved with any suitable letters or figures.

This device is particularly useful for stamping letters, tickets, etc., where the words or number has to be constantly changed.

The common stamps are provided with movable or separate types secured by means of a screw.

These types are liable to be lost or misplaced. But in my improvement the types are always at hand, ready for use.

Instead of the bolt E for locking the type wheels, a small spring may be used, one end being attached to the shank B, and the other end pressing into the interstices between the lines of types upon the type wheels.

2680 *Defendant's Exhibit* 180.—*Troy, July* 16, 1878.—*I. B., ex'r.*

(Copy.)

TROY, N. Y., *Feb.* 6, 1864.

Hon. ABRAM WAKEMAN, P. M.,
New York:

SIR: Your letter of the 22d ult. is before me for answer, it having been referred to me for that purpose by Mr. Ransford, to whom it is addressed. Mr. Ransford is not and does not claim to be the inventor at all of the stamp to which you refer. The "double canceling stamp" now used by you in your post-office is my invention as far back as the year A. D. 1856, as I can most fully and satisfactorily prove. It was patented to me in the early part of the year 1863, upon an application made by me a long time before then. I had several such stamps made in 1858, as I can prove by the person who made them. In the year 1859 I conceived the plan of attaching a cutting device to a cylinder dating stamp, which combination of "cylinder dates" and "cutting device" was patented to me in August. 1859. This patent was by me assigned to "F. G. Ransford, Peter Low, and Chas. Eddy & Co.," some time during that year. This device was tested in the Washington City post-office in the year 1859 or '60, by order of Hon. Horatio King, First Assistant P. M. G. It was found not to operate well, and Mr. Tree, of the Washington post-office, reported against it. I then returned to the original invention, which I found by test made at the New York office to be the best invention. The "cutting device" was also tested in your office, and found to cut too much into the letter; but at the same time making a more effectual cancellation of the stamp. I then made improvements upon the double canceling stamp (by cutting), which were also patented to me in the early part of 1862. In the year 1859 a
2681 patent was granted to me. In the year 1862 two patents were granted to me, and in the year 1863 one patent was granted to me, all of which were for improvements of a different character in post-office stamps. In the year 1856 I first submitted the double canceling stamp to the Post Office Department for consideration. This is the same stamp in principle and combination which you now use, and have for about three years used in the New York post-office. During each year from 1856 to the year 1863 inclusive I have urged upon the Post-Office Department the use of said stamp. So I have the improvements covered by the patent of 1859-'62, and after having tested them all in the manner and the time (as well as place) selected and directed by the Post-Office Department, the improvements of 1856, patented in 1863, were selected and adopted as the best, and which at first I thought of the least value. The patents of 1862 and 1863 are now held by assignment by "Jacob Shavor & Albert C. Corse" of this city, as the Patent Office records will most fully show, and who also own one-third of the patent of the "cutting device" of 1859, and which was invented by me in that year.

I first began with the Post-Office Department for a change in the then existing unwieldy plan of postmarking and mailing of letters in the year 1854, and have letters, &c., to show that fact. The P. O. Department at Washington contains a large number of letters written by me in the years 1858, '59, '60, '61, '62, and '63, upon the matter of postmarking letters and canceling stamps thereon, also in making up of the mails. I have the best of proof of this. More than that, the records fully show it to be true.

These improvements I have also patented in Europe, and which are now meeting with great favor there. The Postmaster General gave me an order in the fore part of 1859 to use for three months in the Troy post-office my invention now used by you. I have the original order.

Any information you may desire I will furnish you with if in
2682 my power to do so within the strict rule of right. You can address Mr. "Shavor & Corse" aforesaid.

Your ob'd't serv't,
(Signed) MARCUS P. NORTON.

POST-OFFICE DEPARTMENT,
Washington, D. C., Mar. 28, 1878.

I, David M. Key, Postmaster-General of the United States of America, certify this to be a true copy of the original now on file in this department.

In testimony whereof I have hereunto set my hand, and caused the seal of the Post Office Department to be affixed, at the city of Washington, the day and year above written.

[L. S.] D. M. KEY,
Postmaster-General.

2683 *Defendant's Exhibit* 181.—*Troy, July* 16, 1878.—*I. B., Ex'r.*

(Copy.)

WASHINGTON, D. C., *Mar.* 14, 1866.

HON. WILLIAM DENNISON,
Postmaster-General:

SIR: In addition to the amount of money expended by Messrs. Shavor & Corse for me and on my account, as stated by them in their affidavit made on the 2nd day of January, 1866, and to be found on page 6 of Ex. Doc. No. 30, 39th Congress, 1st session, I have expended full $5,000 (five thousand dollars), which was done before my assignment of the patents to them. This sum was expended in the perfecting of the invention described in the patents (there being two and one reissue), and in getting the same into use. This is for money actually and necessarily expended, nothing being charged for my services rendered as attorney in the suit brought to establish the validity of the patent, nor was there anything charged for counsel who tried the cause before the court on part of the plaintiffs.

I may further say, that this invention has been in use by the department in the New York office since the fall of the year 1860, at a saving in that office of six thousand dollars per year in the item of clerk hire alone. It is now in extensive use by the department. I have never received from the department or government in any manner whatever a single dollar for the use of this invention, nor have my said assignees.

In order to successfully defend my right to this invention as the original and first inventor, it became necessary to part with the title by deed of assignment to Shavor & Corse, as at that time parties to suits in the United States courts could not be witnesses in their own behalf. Since
then Congress has changed the law in that respect. But for this,
2684 I would to-day have been the owner of the entire invention. So
it is, and all I now ask or expect is a fair, just, and liberal compensation in an equitable proportion to the real and actual value of the invention, for the term or life of the patent, to wit, 17 (seventeen) years from the date thereof.

Very respectfully, your obed't serv't,
(Signed) MARCUS P. NORTON.

POST-OFFICE DEPARTMENT,
Washington, D. C., Mar. 28, 1878.

I, David M. Key, Postmaster-General of the United States of America, certify this to be a true copy of the original now on file in this department.

In testimony whereof I have hereunto set my hand, and caused the seal of the Post Office Department to be affixed, at the city of Washington, the day and year above written.

[L. S.] D. M. KEY,
Postmaster-General.

2685 *Defendant's Exhibit* 182.—*Troy, July* 16*th*, 1878.—*I. B., Ex'r.*

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT.

I, J. M. McGrew, Auditor of the Treasury for the Post-Office Department, do hereby certify the annexed to be a true and correct copy of the original receipt of Chauncey Clifford Nott, dated March 31, 1853, for fifty dollars, for services in the Post-Office at Cleveland, Ohio, from February 2d to March 9th, 1853, pertaining to the accounts of D. M. Haskell, late postmaster at Cleveland, Ohio, in the office of the Sixth Auditor.

In testimony whereof I have hereunto signed my name, and caused to be affixed my seal of office, at the city of Washington, this twenty-seventh day of June, in the year of our Lord one thousand eight hundred and seventy-eight.

[SEAL.] J. M. McGREW,
Auditor.

Dan. M. Haskell, P. M., to Chauncey Clifford Nott (age 27 years), Dr.

To services in the post-office at Cleveland, Ohio, from Feb. 2d to March 9th, 1853 ..... $50 00

Received of D. M. Haskell, postmaster of Cleveland, Ohio, fifty dollars in full of the above account.

Post-office, Cleveland, Ohio, March 31st, 1853.

2688 NORTON'S POSTMARKING AND POSTAGE-CANCELLING STAMP.

Hon. J. A. J. CRESWELL,
Postmaster-General of the United States of America:

Your department having under consideration the application for settlement of and payment for the past and future use of the invention and improvements in postmarking letters, packets, &c., and for the cancellation of the postage-stamps thereon, contained in the letters patent granted to Marcus P. Norton, of the city of Troy, State of New York, as the original and first inventor thereof, on the 14th day of April, 1863, and reissued on the 3d day of August, 1869; also another letters patent dated July 13th, 1869, and antedated to June 10, 1869; and also certain other letters patent bearing date as follows, to wit: December 16, 1862, and August 15, 1865, the invention and improvements patented April 14, 1863, reissued August 3, 1869, having been in successful and extensive use by the Post-Office Department for the past

eight years, after an experimental trial and test of the same in the larger post-offices for a term of nearly two years prior to the permanent adoption of the same, in March, 1863, by the Postmaster-General, it is deemed best in the examination of the papers and consideration of the premises and case by you, to solicit your attention to the following propositions; that is to say:

1st. That the use of this invention is of great value to your department, and results in the saving annually of large sums of money
2689 to the government, and it prevents frauds upon the postal revenue, and economizes in time and facilities the making up of the mails for transportation.

2d. That you have authority under the law to make compensation for the use of this invention under the said patents, or either of the same, by contract for a term of years.

3d. That Marcus P. Norton has legal right to receive from the Post-Office Department compensation to be made by it for the past and future use of said invention by virtue of any contract which may be made by the Postmaster-General, founded upon said patents or either of them, and upon the value, usefulness and importance of said invention to the postal service.

POINT FIRST.

As to the value, usefulness, necessity, importance, and expediency of this invention for purposes in the postal service.

Proceeding to the consideration of the testimony upon this point, it is so conclusive and so abundant that it is no longer a matter of controversy. The records of your department afford much evidence upon this question, and this is strongly corroborated by those witnesses who have testified to its value, in the legal investigations where its value has been drawn in question. The testimony of the officers and agents of your department as to the necessity and value of the use of this invention, is so complete and full that we direct your special attention to it. In July, 1860, the Postmaster-General issued an order prohibiting the cancellation of postage-stamps by the dating or postmarking stamps, and requiring this canceling to be done by a separate
2690 instrument. This involved much additional expense, and the postmaster at New York, then General Dix, stated that it could not be done without a large additional clerical force. In this extremity he attempts to construct an instrument which will avoid the necessity of the employment of the required additional clerical force. He describes his supposed invention in these words:

"The order of the Postmaster-General of the 23d of July last, prohibiting the cancelling of postage-stamps by the dating or postmarking stamps, and requiring the work to be done in conformity to the postal regulations as well as in conformity to the law in relation thereto, by a separate instrument, could not be executed without an increase of the clerical force. We were compelled a few days ago to keep back a mail nearly half an hour in order that the postage-stamps on letters to be transmitted by it might be properly cancelled.

"When the letters amount to thousands, the duplication of the work of cancelling and postmarking is a very serious matter.

"In this extremity, and with an extreme reluctance to augment the clerical force of this office for the purpose of doing the work, I have hit upon an expedient which answers the purpose perfectly. It occurred to me that the separate instrument required by the department might

be attached to the postmarking stamp, and I sent for the stamp-maker and gave him my idea, which he has carried out very well. The cancelling-stamp is soldered on to the other, so that one handle answers for both; the double operation is performed with one blow; there is, therefore, no increase of work."

And there was therefore no increase of the clerical force or number of clerks in that office, as would certainly have been the case to just twice the number of clerks then employed in the postmarking and postage-cancelling of letters, &c., had not this Norton invention at that very time come to the rescue and to the aid of the department in such necessity and extremity.

On the 10th day of August, 1860, General Dix is informed by
2691 Acting First Assistant Postmaster-General Skinner that his supposed invention had been thought of before, whereupon he says:

"The arrangement is an excellent one and will save much labor in making up the mails, but I fear the attachment you have fixed to your marking stamps has not only been thought of before but has actually been patented; if so, it may at some future time subject your office to a heavy charge to the patentee for its use, or perhaps to a lawsuit.

"The Postmaster-General, therefore, desires that you will give the subject such timely attention as will be calculated to avoid such consequences."

The Post-Office Department desired to test the utility of this invention, and for that purpose the Postmaster at New York was requested to report to the Post-Office Department as to the utility of this invention, and on the 3d day of January, 1863, Mr. Wakeman, in his report upon this subject, uses the following language:

"Some time since you requested that I should test the utility of Norton's double or combined postmarking and postage-cancelling stamp and then report my opinion thereon. It was in use in this office when I first entered upon my duties.

"We have used the cork for the cancelling device, by inserting it in the cylinder of the cancellor. This has proved successful, and cancellation is now performed in this way. I am confident that no office in the country performs cancellation more thoroughly.

"The design of Mr. Norton is indispensable to us. Indeed, unless I should nearly double the stamping force, we could not dispense with its use. I am satisfied the interests of the department would be subserved by securing its general use."

Marcus P. Norton, who is the inventor and patentee of this invention, memorialized Congress for compensation for the use of this invention, and the committee of the Senate, to which the memorial was referred, of which Hon. Jacob Collamer was chairman, desired from the Post-Office Department information respecting the claim then pending before them. On the 1st day of March, 1865, Postmaster-General Dennison, in reply to the communication of the Senate committee, said:

2692 "SIR: I have the honor to return herewith the papers submitted to me, with your letter of the 24th ultimo, in relation to the claim upon the patent granted to Marcus P. Norton for a combined postmarking and cancelling stamp, now in use by this department.

"In reply to your inquiries on the subject, I have to state, that this stamp is an invention of importance and value to the postal service, particularly at our large post-offices, where expedition in the making up the dispatch of mails is always an object of importance; and it is also an effectual instrument for cancelling postage-stamps, and in that respect

it is of value to the extent that it diminishes the chances of cleansing postage stamps and using them a second time.

"It is stated that the use of these stamps effects a saving in labor of seven clerks at the New York post-office, and it is probable that a saving of clerical labor, in like proportions, has been effected by its use in all the large post-offices. The extent to which the cancelling stamp has protected the postal revenues from losses incidental to the cleansing of postage-stamps once used, and using them the second time, is of course impossible to determine."

The subject of the memorial in relation to said invention not having been disposed of by Congress at that session, its attention was again invited to the consideration of this subject.

The Committee on Post-Offices and Post-Roads of the House of Representatives addressed a communication to the Postmaster-General, soliciting information upon this subject. On the 15th day of January, 1867, your predecessor in office, in reply to the communication of said committee, used the following language:

"I have examined the papers sent me in respect to Norton's cancelling stamp, as suggested by your letter of the 20th of December. It is difficult for me to determine the amount which ought to be allowed for the use of that invention. The department has already saved several hundred thousand dollars by its use, and I have no doubt it will continue to save large sums by its future use. The question of value to
2693 the department has long been settled. The necessity to the department of its continuing it in use is beyond question. It is the best there is.

"If no settlement is made by the government so that these stamps can be made and furnished to the department without interference or embarrassment from the owner of the patent, it is apprehended the department will be compelled to resort to a more expensive and less approved method of cancelling stamps, and thus incur great expense and suffer great loss."

Congress having failed to take any action on the memorial, suit was instituted against the United States, in the United States Court of Claims, to recover compensation for the use of said invention by the Post-Office Department. During the pendency of that suit in the Court of Claims, your department was called upon to furnish evidence to be used upon the trial of said cause, and in response to a rule of the Court of Claims issued for that purpose, your department, on the 25th day of March, 1868, made a return to the rule of the Court of Claims. One of the questions submitted to your department, and upon which information was desired, was as follows:

"4th. Statement of the estimated saving of expense per annum to the United States by the use of the 'Norton postmarking and cancelling stamp,' that this statement shall embrace the number of clerks engaged in post-marking letters and cancelling stamps in the different post-offices where the Norton stamp is in use, giving the number required to perform said work before and subsequent to the introduction of said Norton stamp, and the salaries or compensation paid annually to persons so employed."

The reply of your department to this inquiry was as follows:

"It is not within the power of the department, at this time, to furnish any reliable estimate of the saving of expense by the use of the Norton stamp.

"From data obtained in 1866 it was estimated that the depart-

2694 ment then saved, annually, the compensation of two hundred and fifty-four clerks, whose salaries ranged from $700 to $900 a year."

Your department, in the communication from which the above extract is taken, stated that at that date there had been manufactured and used by the Post-Office Department two thousand two hundred and one of these stamps.

At the present time there is a largely increasing demand for the use of the said invention and improvements by the postmasters throughout the country, and the same are being furnished by your department under a contract made by your predecessor with Benjamin Chambers, jr., at the rate of between two and three hundred per quarter on an average, or from eight hundred to one thousand during each year.

There is a great saving to the department in the cost of the manufacture of this instrument as compared with the old devices used separately for the postmarking of letters, and thereafter for the cancellation of the postage-stamps by a second handling of the said letters. The same will last a long time, and not require repairs at any expense to the department. The cork is the most certain, the less laborious in the use of the postmarking stamp, and more successful and economical than any other known cancelling device.

We now invite your attention to the testimony of the witnesses who were examined upon the question of the value of the use of these stamps, taken and submitted to the Court of Claims.

Samuel P. Kittle testifies:

"Supposing an office required two clerks for the performance of the duties for which this stamp or contrivance is intended, and that one of the clerks were able to do it by the introduction of this, which I judge to be a fair statement of the case, then the office would save the hire of one clerk; it would also save an item in the expense of stamps; it would also save an item in the room that would otherwise be re-
2695 quired; it would also, in my judgment, cancel the postage-stamp more perfectly. All of this saving justified me in the conclusion that the stamp would be worth at least the salary of one clerk in each office during each year. As a business man and as a mechanical expert, I would state, that the government ought, at least, to be willing to pay the man who was the means of inventing, contriving, and furnishing an instrument to create so great a benefit to the department, and the people, in truth, at least one-half that saving."

And this witness being asked whether $100 per stamp would be unreasonable to pay to the inventor, answers that it would be a very low price.

Edmund Hoole, the former manufacturer of these stamps, for the government, under the contract of Fairbanks & Co., says, "that $100 for each stamp manufactured would be a fair price for the government to pay for the use to this patent."

Benjamin Chambers, jr., the contractor, who manufactures these stamps for your department, under a contract made by the Postmaster-General with him for a second term of four years, says:

"If the stamp cancelling and marking the letter at the same time save the labor of an extra hand during that time, and the patent-right for the same belonged to me, in my judgment, if I asked for the use of said patent-right stamp the sum of seventy-five dollars for every one used, I would not be unreasonable, and I don't think I should hesitate to ask one hundred dollars each. What I have said on this subject is the result of no close calculations, but merely my judgment of it; the

result of a few moments' consideration of the amount of labor saved by it, and the number of postage-stamps which it probably prevents the reissue of by perfect cancellation."

The record from which this testimony is extracted is filed with the clerk of the U. S. Court of Claims, at his office at the Capitol, and may be found therein and thereat, if the same shall be required of us. We may safely assume, therefore, that the question of the value of the use of
2696 this invention is settled beyond all question. Neither your department, the committee of Congress, nor the Court of Claims have declined to award compensation for this invention because it was not valuable, useful, and of great importance to the postal service. It is conceded by all of them that it is an invention of great value, and that its use saves very large sums of money to the government each year. The Court of Claims (two of its judges dissenting) failed to give judgment in the suit before them, because the evidence did not satisfy the court that there was a specific contract by your department to make compensation for the use of this invention, and that because of the want of evidence of the existence of such contract, the court had no power to award the compensation which it was conceded this invention was entitled to receive under said patents, and which ought to be allowed and paid.

Point Second.

As to your legal authority to make compensation for the use of this invention, by a specific contract or otherwise.

It is very clear that there is no law which prohibits your making an agreement to make compensation for the use of this invention, unless such prohibition results from the provisions of the acts of Congress in relation to the making of contracts by the executive departments of the government. The only act of Congress now in force on this subject is as follows:

"No contract or purchase shall hereafter be made unless the same be authorized by law, or be under an appropriation adequate to its fulfillment." (12 U. S. Stat. at Large, p. 220. sec. 10, ch. 84.)

You can, therefore, make a contract with the inventor and pat-
2697 entee, Norton, to compensate him for the use of his invention, for there is a law authorizing you to make the contract, and there are appropriations which may be applied to that purpose. It is not necessary that there should be a law authorizing the specific contract which we propose and offer to make. If the making of it is an incident of the general duties which devolve on you, then your power is as broad as the duty imposed. The duties which the law imposes upon you are to be found in the act organizing your department. The first section of that act defines the general duties of the Postmaster-General, in the following language:

"He shall pay all expenses which may arise in conducting the Post Office and in the conveyance of the mail, and all other necessary expenses arising on the collection of the revenue and management of the General Post-Office." (Sec. 1 act of March 3, 1825, 4 U. S. Stat. at Large, 102.)

"All letters brought to any post-office half an hour before the departure of the mail shall be forwarded therein; but at offices where, in the opinion of the Postmaster-General, more time for making up the

mail is required, he may prescribe accordingly, not to exceed one hour's time." (Act of March 3, 1825, U. S. Statutes at Large, vol. 4, page 105, section 11.)

The act of Congress requiring postage-stamps to be defaced and destroyed, so as to prevent their reuse, for the prepayment of postage on letters after once used, is as follows, to wit:

"It shall be the duty of every postmaster to cause to be defaced, in such manner as the Postmaster-General shall direct, all postage-stamps attached to letters deposited for delivery or to be sent by mail." (9th U. S. Stat. at Large, 589.)

It was the duty of the Postmaster-General, under this law, to prescribe the best mode of accomplishing the ends or purposes required.

2698 The legal duty of the Postmaster-General to cause the postage-stamps used in the transmission of letters to be effectually defaced and destroyed is very clear, and that there is coupled with that legal duty authority to that officer to make such agreements or contracts for such instrument as will most effectually accomplish the desired object, is equally clear. The Post-Office Department having decided that this invention is best adapted to the perfect cancellation and destruction of postage-stamps, and having adopted it for general use, should make compensation for the use of said invention. The use of this invention results from the imposition of legal duties upon the Postmaster-General, and he may lawfully use any means which in his judgment will best enable him to discharge those duties. These principles are fully affirmed in several cases by the Supreme Court of the United States. We refer to some of them. In the case of Nelson vs. Lagow, 12 How., 101, it was objected that the United States could not acquire the legal title to land under a deed of trust given to secure the payment of money due to it; that the United States, by the act of Congress approved May 1, 1820, could purchase no land except under a law authorizing such purchase. But the court, in this case, held that the act did not prohibit the acquisition of the legal title to land, without express legislative authority, when obtained as aforesaid, and say, "That such powers exist as an incident to the general right of sovereignty, and may be exercised by the proper department, if not prohibited by special legislation, we consider settled by the cases of Dugan, ex'r, vs. The United States (3 Wheaton, 172); United States vs. Tinzey (5 Peters, 117); United States vs. Bradley (10 Peters, 343); United States vs. Lynn (15 Peters, 290).

These authorities fully sustain the legal proposition for which we are here contending. They fully recognize the right of the head of

2699 an executive department to use such means to discharge legal duties as to him shall seem most appropriate, and best adapted to that end and purpose.

The right of a department to make compensation for the use of a patented invention has been considered by the Attorneys-General at different times. We refer you to two cases where this right is fully conceded. In the 9th volume of the Opinions of the Attorneys-General, p. 135, there is an opinion of Attorney-General Black upon this question, in which he uses the following language:

"The department under whose direction a machine for which a patent was issued was made and used, may legally allow the patentee the amount claimed by him as damages for such use, provided there be any fund under the control of the department which can be appropriated for that purpose."

Attorney-General Stanton, upon the reference of a similar question to him, says:

"There is nothing in the act of Congress of July 2, 1836, which forbids an employee from supplying your department, at agreed rates, with any device or improvement invented and patented by him, that may be useful or convenient in the postal service." (Trott's Case, Opinions of Attorneys General, vol. 10.)

The question in that case was whether the Postmaster-General could make a contract with an employee of his department for an improved label for mail bags, for which he had obtained a patent. It was supposed that the act of Congress approved July 2, 1836, prohibited the making of such contracts, because the inventor was an employee of the Post-Office Department. The Attorney General held that there was no prohibition of such contract in the act referred to, and advised that the Postmaster-General might lawfully make a contract for the needed article. There was no appropriation then made to pay for the desired article, nor was there any law authorizing the special contract, yet the contract was actually and lawfully made.

2700 Congress annually appropriates money for the necessary and required expenses of your department. Portions of this fund are subject to your exclusive control, and may be disbursed as you see proper in the management of the business and affairs of your department required by the law. You may, therefore, use such portions of it as you may deem just and expedient to compensate the inventor and patentee, Norton, for this invention, and for its use in the postal service by the authority of your department.

"The law of Congress, approved on the 3d day of March, 1851, among other things, provides that all stamps used for the payment of postage upon mail matter shall be defaced or cancelled at the post office where the same shall be mailed." (See U. S. Statutes at Large, vol. 9, page 589.)

"It shall be the duty of every postmaster to cause to be defaced in such manner as the Postmaster-General shall direct, all postage-stamps attached to letters deposited in his office for delivery, or to be sent by mail; and if any postmaster sending letters in the mail with postage-stamps attached, shall omit to deface the same, it shall be the duty of the postmaster to whose office such letter shall be sent for delivery to deface the stamp, and to report the delinquent postmaster to the Postmaster General; and if any person shall use or attempt to use, in prepayment of postage, any postage-stamp which shall have been before used for like purposes, such persons shall be subject to a penalty of fifty dollars for every such offence, to be recovered in the name of the United States, in any court of competent jurisdiction." (See section 279 Postal Laws and Regulations.)

The records of the Post-Office Department will show most conclusively, and beyond doubt, that hitherto it has been the right of, and customary for, the Postmaster-General to contract, in such manner and upon such terms as could be agreed upon for the best interests of the government, for the use of such patented inventions and improve-

2701 ments, under letters patent, as by him have been deemed expedient, and considered valuable, useful, and important in the successful, expeditious, and economical management of matters appertaining to the postal service, among which may be found devices for catching and delivering mail-bags upon postal cars, also improvements for the construction of the postage stamp by the puncturing or embossing, or breaking of the under side in such manner as to permit the ink from

the cancelling device to impregnate the same with more ease and certainty, also mail locks for mail bags, and many other inventions and improvements not deemed necessary here to specify.

The law or acts of Congress requiring the Postmaster-General to do certain things in the management of the affairs and business of the Post Office Department, carries with it the legal right to employ such means or devices as in his judgment shall be the most effective, expeditious, economical, and successful in the accomplishment of the same, or of such things as shall have been required by the law.

The Norton combined postmarking and postage cancelling stamp is now furnished by the Post-Office Department at the rate of not less than two hundred per quarter of three months, and, besides this, the same is being furnished to the postal railway cars quite extensively, and for which there is a rapidly increasing demand for its use, it having thus proven of great service, and regarded as almost indispensable in the making up of the mails, in postmarking, and for the cancellation of the postage stamps upon letters for delivery at the stations on the route, and especially so when the time and the distance between stations is short, as is very frequently the case on almost all routes where postal cars are now used.

The saving in the clerk-hire or employment of at least six hundred and seventy six clerks at this present time, October, 1869, in the
2702 post-offices alone throughout this country, effects a saving of at least as many thousand dollars during each and every year, for it cannot but be regarded as a fair estimate, at least, that you pay one thousand dollars per year to each clerk employed.

You have 148 No. 1 post offices,
" " 287 " 2 " "
" " 599 " 3 " "

now in full operation, while there are many others rapidly advancing to take a place among these classes of post offices, as the country grows in size, and the population increases.

Were it not for the said Norton invention and stamps, your first-class offices would at least need, and absolutely require, from one to eight extra stamping or post-marking and postage-stamp cancelling clerks.

The very lowest possible estimate that can be made will save two clerks on an average in all the first class offices, which will be 296 clerks. In the No. 2 or second class post offices, say two thirds on an average, which would be 180 clerks, and in the No. 3, or third class post-offices, say one-third on an average, which would be 200 clerks, and in all these, at this low estimate, the whole amount will be 676 clerks, whose services would be actually and positively required in addition to those now employed, but for the use or employment of the said Norton invention; and as the country advances in its greatness, and the number of post-offices become increased from year to year, permanently, so will the value and importance of this invention and improvements become correspondingly increased.

The above estimate does not include the postal car clerks employed in same line of duty, of which there are already a large number, and which are also largely and rapidly increasing, and where this stamp and invention must be used in many cases, and on many routes, in order that the mails may be made up in time for delivery at the stations.
2703 We submit, therefore, that your authority to make a contract to pay for this invention, or for its use, is very clearly shown, and that you have that authority from the existence of said appropriations, as well as from the act of Congress which imposes upon you the duty

of providing the means by which the stamps used in the transmission of letters shall be defaced and destroyed by the postmaster at the office where the same shall have been deposited for transportation in the mails, whereby to protect and secure the postal revenue of the government, and requiring expedition in the making up and transportation of the mails.

POINT THIRD.

Marcus P. Norton, the original and first inventor of the invention and improvements contained and set forth in the several letters patent under consideration, with the view and purpose of settling and determining compensation for the use of the same, being the patentee and the legal and equitable owner of said invention and said several patents, has the lawful right to contract for and to receive compensation for the use of said invention and improvements.

A printed pamphlet, marked No. 7 in the schedule of documents and papers now before you (upon which documents the application before you is founded), and signed by six different persons, has been filed, claiming certain things founded in gross untruthfulness, without even a shadow of evidence or proof to sustain a single point therein asserted as to the said patents and the title thereto, now before you for consideration in said application for compensation.

A letter signed by Jacob Shavor and Albert C. Corse, and dated Troy, N. Y., August 12th, 1869, in speaking of the title and
2704 ownership of the said invention and patents, and for the most positive and reliable information as to the same, very properly refers you to the records of the U. S. Patent Office.

We have produced certified copies of each and every paper in anywise relating to the said letters patent, and the same are marked in the said schedule as Nos. 16 and 17, and to which you are most respectfully referred. We have also produced for your inspection and examination a certified search and abstract of the U. S. Patent Office records upon the subject-matter of the title and ownership of the said several inventions and patents before you, and named in the said schedule as well as numbered 1, 2, 3, and 4, to which you are most respectfully referred.

By these papers, under the great seal of the U. S. Patent Office, it will at once fully appear that the full, complete, and perfect ownership of the said inventions and patents is vested exclusively in Marcus P. Norton, the patentee and original and first inventor of the aforesaid invention and improvements.

On the 20th day of April, 1863, Norton assigned, in trust for certain legal purposes, the letters patent of April 14, 1863, to Jacob Shavor and Albert C. Corse, of Troy, N. Y., which was not recorded in the U. S. Patent Office until nearly one year thereafter, to wit, March 8, 1864, and on the 20th day of December, 1862, the patent granted December 16, 1862, was assigned to Jacob Shavor and Albert C. Corse in trust, as was the fact and purpose in relation to the said patent dated April 14, 1863.

The other and remaining patents were never assigned to any person whatever. It is the letters patent dated April 14, 1863, reissued, bearing date August 3d, 1869, and the patent dated July 13th, 1869, antedated June 10, 1869, and the inventions therein contained and set forth that are of so great value, usefulness, and importance to your department in the postal service of the United States.

2705 It will be observed by reference to said printed pamphlet, that

the pretended claim of these several persons is founded upon mere statements and declarations made by them without the producing of a single paper or thing in proof or in evidence to support such declarations and statements. It is submitted that the legal and sacred rights of persons cannot be assailed, delayed, or stayed in any manner whatever by such statements. Were such to be the case and rule of action, how easy it would be for evil-minded and corruptly-inclined persons to delay, and to secure the whole or an interest in any person's just claim upon or against the government. Whose rights would be secure for a moment before any department of the government, were such proceedings to be allowed to interfere, or to have consideration at all? Whose business would be safe, or who could transact any business in security before any department?

On the other hand, we produce the record from the U. S. Patent Office full, complete, and perfect on the matter concerning the title and ownership of this valuable invention and of the several patents thereon. This record shows beyond a question of doubt that Marcus P. Norton, of the city of Troy, N. Y. (who is the original and first inventor of the said invention and improvements), is the legal and equitable owner of the said inventions and patents, and that all rights under the same are fully vested in him.

Not a single authenticated paper or document is produced by the said six persons, or either of them, to in any manner sustain their pretended, unjust, wicked, and most cruel claim, while, on the other hand, we produced duly-authenticated copies of each and every assignment, transfer, or other paper ever made as touching the title and ownership of the said inventions and patents, and the same show that Marcus P. Norton is the lawful owner of the same, and fully vested with all and the exclusive rights and privileges conferred by virtue of the said
2706 patents or either of them, as granted and issued to him.

The law and court decisions in relation to the Patent-Office records is briefly summed up in the following cases, to wit:

1. A certified copy of an assignment of letters patent is competent evidence, and the party producing the same cannot be required to produce the original assignment. (Brooks vs. Bicknell, 3d McLean, p. 436.)

2. Certified copies of papers in the Patent Office must be received in evidence when offered. (Emerson vs. Hogg, 2 Blatchford, p. 12.)

3. Certified copies of papers in the Patent Office is prima-facie evidence of the genuineness of the original, and absolute evidence of the correctness of the copies from the records. (Parker vs. Haworth, 4th McLean, p. 371.)

We desire to refer your honor to the statement and chain of title as set forth in the fore part of the specifications of the reissued patent now before you, dated August 3d, 1869, for there it will be seen that the chain of title and the ownership of said invention is fully set forth, and being thus set out and contained in such specifications, the same has been endorsed and confirmed as entirely regular and truthful by the Commissioner of Patents, in and by virtue of the reissue of the said patent of April 14th, 1863, in the manner and form therein contained. It will also be observed that this statement in the said specifications is in full harmony, and the same conforms to and with the certified copy record and certified abstract of title produced by us, and filed in the application for settlement, and for compensation for the use of said inventions and patents by your department.

Jacob Shavor and Albert C. Corse never owned, in fact, any part or portion whatever of the inventions patented December 16, 1862,

2707 and April 14, 1863, reissued August 3, 1869. No actual and bona-fide sale was ever made to them, or either of them, of any invention whatever by said Norton. They never paid a single dollar to Norton for any invention in the postmarking of letters and for the cancellation of postage-stamps thereon, or for any other invention or letters patent. The paper called or known as an assignment of said patents was made and executed in trust, in order that Norton might be a competent witness in relation to his caveat upon the invention afterwards patented April 14, 1863; and also that Norton might explain and give testimony in the proposed suit to settle and determine the validity of the patent of 1863 as to the substantial and material differences between the aforesaid patented invention of April 14, 1863, and that on which the patent of August 9, 1859, was granted. The law at that time not allowing an inventor to testify in a suit wherein he should be a plaintiff, they were to occupy for the time the relation of friends to Norton. Congress has since passed a law allowing inventors to be both party and witness in any suit in court, in his own behalf and interest, upon any letters patent.

The said Shavor and Corse instituted the suit in the U. S. Court of Claims to recover against the United States for the use of said invention for the time intervening the date of the assignment from Norton to them (dated April 20, 1863) and the time or date of their reassignment and retransfer of said patent to Norton, on the 23d day of February, 1864. Norton was put on the stand as a witness in that suit, and he testified that he had no interest in the then pending claim, which was for that portion of time above referred to, and which is self-evident upon examination of the said original assignment and reassignment and retransfer of said letters patent. The question was not asked, nor did Norton on that occasion, or upon any other occasion or time, testify that he had no interest in the said letters patent dated April 14,
2708 1863; for at that time Norton held in his possession the explanatory deposition and reassignment and retransfer of the said patent of April 14, 1863, by said Shavor and Corse to him. No question touching the title or ownership of said letters patent was put by the then government solicitor to said Norton upon the cross-examination of Norton as a witness on that occasion.

On the 23d day of February, 1864, the said Jacob Shavor and Albert C. Corse made a deposition explaining their relations with Norton, and the reasons, as well how they came to have the assignment of April 20th, 1863, made to them, and Norton not being able to do much with his said patent in or before Congress while the same stood in their names as assignees, they at his request returned the title to him, Norton, in and by an absolute assignment and transfer attached to the said deposition, which was also done in conformity to the terms of the original verbal agreement, as stated in said deposition of February 23d, 1864.

This reassignment and retransfer by them to Norton was not put upon the U. S. Patent Office record until in the month of July, 1869; and the reason of this delay of the recording was because of the proceedings then pending before Congress as well as in the U. S. Court of Claims; for had this instrument been recorded at an earlier time, it would have necessitated a change in all those proceedings, and it was deemed best not thus to interfere with the same until they should have come to a close, which was done in the month of February, 1869.

If this delay in the recording of this assignment and transfer, under the law, renders null and absolutely void the instrument itself, because it was not recorded within the three months' time named in the law of

Congress, then the assignment and transfer made by Norton to Jacob Shavor and Albert C. Corse on the 20th day of April, 1863, is by the same rule and law void and of none effect, for that was not re-
2709 corded until nearly one year after it was executed by Norton; and this would bring the title back into Marcus P. Norton, by virtue of the original patent granted to him as the original and first inventor of the invention therein contained. The said act of Congress in relation to assignments reads as follows, to wit:

"That every patent shall be assignable in law, either as to the whole interest or any undivided part thereof, by any instrument in writing; which assignment, and also every grant and conveyance of the exclusive right under any patent to make and use, and to grant to others to make and use the thing patented within and throughout any specified part or portion of the United States shall be recorded in the Patent Office within three months from the execution thereof." (See section 11, act of Congress approved July 4, 1836.)

In any event, or under any and all circumstances, there is, there can be, no doubt, but that the legal and equitable title and ownership is fully and rightfully vested in Marcus P. Norton, the patentee; and for full and unequivocal proof and evidence of this we again ask your permissi*ng* to refer you to the authenticated record we produce and put on file with you in this application, and the same being upon the schedule of documents referred to by the Third Assistant Postmaster-General in his report to you, as Nos. 16, 17, 18, 19, 20, and 21, which stand forth as pure, faithful, and reliable evidence and proofs on this point.

There is but other matter contained in the said printed pamphlet deemed at all necessary to mention, and that is the effort made to drag in the letters patent of August 9, 1859, held and owned by Ransford, Low, Hatch, and Chas. Eddy & Co., under an assignment from Norton, dated May 2d, 1859. A more unjust, wicked, and malicious claim rarely has ever been made; especially so, when we consider this fact, that it was this same claim made by these same persons when the petition was pending before Congress, on the part and behalf of said Nor-
2710 ton, that compelled Marcus P. Norton to assign patents of December 16th, 1862, and of April 14th, 1863, to said Jacob Shavor and Albert C. Corse, IN TRUST, in order to settle that question, thus raised, by judicial proceedings in the courts. Accordingly a suit was instituted by said Shavor and Corse against Edmund Hoole, a government subcontractor under Fairbanks & Co., who claimed the right to manufacture under license from said Hatch, who claimed to have obtained his right from said Ransford, Low, and Eddy & Co., under their said assignment of said letters patent dated August 9, 1859, and who was a partner in the said firm of Fairbanks & Co., to whom a contract had been awarded by P. O. Department to manufacture Norton's invention, patented, not August 9th, 1859, but on the 14th day of April, 1863. That suit was brought to trial before the Hon. N. K. Hall, U. S. judge, and formerly Postmaster General; and the trial was by a jury. That suit fully established the validity of Norton's letters patent, dated April 14th, 1863, as against his said patent of August 9th, 1859, and also against each and every other claim or thing. We beg leave to refer you to a duly authenticated copy of the case and proceedings in that suit and trial, and made Nos 8 and 13 of the said schedule of documents presented by the report of the Third Assistant Postmaster-General. The patent of August 9, 1859, was the cause of the assignment, in trust, by Norton to Shavor & Corse, and it was the cause of that suit against Hoole; and the verdict being in favor of the patent of April 14, 1863,

and against that of August 9, 1859, and the validity of the patent of April 14, 1863, having been fully established and maintained by the courts, no question upon the same can here be successfully made. The invention of 1859 is altogether and entirely different from that of April 14, 1863. That of August, 9, 1859, was condemned as entirely worthless by the post-office at New York and by the Post-Office De-
2711 partment, while that of April 14, 1863, has stood the test, and is now so extensively and successfully used to the great gain, profit, and advantage of your department.

Please examine the last part of the specifications in the reissued patent, dated August 3, 1869, and also same part of the specifications in the patent of July 13, 1869, ante-dated to June 10, 1869, and immediately preceding the claims in each patent, and you will find it stated that the invention contained in each patent, and covered by the respective claims thereof, are no part or parcel, in any form, shape, or manner, of the cutting device patent dated August 9, 1859, and which is said to be claimed by these six persons. In such conditions, with each specification containing such statement of facts, the Commissioner of Patents granted and issued each of the said patents, under the respective dates stated, which is conclusive evidence of the substantial and material difference in the two inventions, and which fully endorses and affirms the judgment of the courts in the aforesaid suit at law between the said Shavor and Corse vs. Hoole, as well as fully sustains the declarations and statements of the inventor, Norton, that there is no conflict whatever between the patent of April 14, 1863, reissued August 3, 1869, and the patent dated August 9, 1859, which last-named patent is entirely worthless and of no value whatever in the postal service, and which has been so declared by the New York City post-office, and by the Post-Office Department, upon a full and fair trial of the same in the said New York post-office.

It is a curious fact, and a matter to which we wish to invite your careful attention, that when Shavor and Corse learn that they cannot wrest from Norton his valuable property and invention of April 14, 1863, under their assignment in trust, dated April 20, 1863, and finding that they cannot compel Norton to yield his just and lawful rights to them, they seek to damage him all in their power by setting up the patent of August 9, 1859, whereby to induce you to believe that the patent of April 14, 1863, is
2712 in conflict with said patent of 1859, and they modestly ask you to refer a question of their own making to the courts for a decision, and thus delay action on the application for compensation, and, if possible, prevent Norton from having and receiving the benefits of his own property for the time being; and for this purpose they invoke the aid of, and confederate with their former adversaries—Ransford, Low, Hatch & Co. (holders of the said patent of 1859), who appear quite willing, in the hope of gain, to join in that undertaking, for their names appear with those of Shavor & Corse as signers of the printed paper, which has been placed on file in this application pending before you—no doubt hoping that your honor would overlook the fact that said patent of August 9, 1859, was set up in the pleadings and answer as against said patent of April 14, 1863, in the suit at law in the circuit court of the United States, northern district of New York—and which case will appear fully reported by reference to said schedule No. 8.

We have no reflections to make, no words to utter on the question of honesty or the honorable motives of these six men; we leave them and their unjust, malicious, and wanton record, bearing upon its very face

the motive that induced this printed pamphlet, and placed it upon your file, as well as the desire that has inspired their brains into action.

POINT FOURTH.

Marcus P. Norton, of the city of Troy, N. Y., is the original and first inventor of each and every part of the inventions and improvements set forth and contained in each and every aforesaid named letters patent; and he is also the legal and equitable owner, exclusively so, of the entire invention and improvements covered by or contained in the said
2713 patents of April 14, 1863, reissued August 3, 1869, and dated July 13, 1869, ante-dated to June 10, 1869; and he therefore has the good and lawful right and privilege to enter into any contract, concerning the same, with the Postmaster-General that may be deemed beneficial to the Post-Office Department, and for the security and maintainance of his right in the premises. The Post-Office Department having exclusively used his aforesaid invention for so many years without any compensation to said Norton, and now continuing the same in such use, it is but fair, right, and just, that said department now enter into contract with him, to compensate him for the use of his said valuable inventions, covered and protected by the said letters patent thereon under date as aforesaid. That compensation should be fair, just, equitable, and liberal, in view of the great length of time the department has used the same without any compensation whatever to him therefor, as well as in view of the great labor saved, and many other benefits conferred upon the postal service, and upon the Post-Office Department, also, upon the people paying postal revenue and transacting business in and through the mails.

Having thus presented the facts, the law, and the case, we now leave the same in your hands, trusting to your own good judgment and liberal views upon all questions of right and equity, to measure up justice to one who merits liberal compensation for the lasting benefits and great economy bestowed by means of his said inventions and improvements.

2714 *Defendant's Exhibit* 184.

DISTRICT OF COLUMBIA,
County of Washington, to wit:

The grand jurors of the United States of America for the county and District aforesaid, on their oath present:

That Marcus P. Norton, late of the county aforesaid, yeoman, on the twenty-second day of August, in the year of our Lord one thousand eight hundred and seventy one, with force and arms, at the District aforesaid, feloniously did falsely make and forge a certain paper writing, which said paper writing is as follows, that is to say:

An agreement concerning the application of Marcus P. Norton, of Troy, State of New York, for a patent upon "Post-Office Postmarking Stamp," dated on or about the 14th day of June, 1859, and rejected June 27, 1859, by Commissioner of Patents, and now pending in the U. S. Patent Office, under said rejection.

Whereas, the above-named application has been rejected by the Commissioner of Patents upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage-stamps, by cutting the same; and whereas, before a patent can be

granted upon the invention covered by the rejected claims aforesaid, to wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Robertson, upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas we, the undersigned, are unwilling to undertake any further and additional expenditure of time and
2715 money, which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14, 1859, we give up and surrender to said Marcus P. Norton any and every claim we have or may have by reason of our contract and agreement with him to all invention and improvement contained in said application, and not covered by said third claim, so as to allow him to make a new application for a patent upon the same, he having requested us so to do, or to go on, and carry out our said agreement with him, all of which is to be done at his own expense; while he, at the same time, shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14, 1859, was by him made to the Commissioner of Patents; and whereas the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said "third claim," not now rejected, and thereafter to make an application for a patent upon the invention and improvements contained in said rejected claims, to wit, "first," "second," and "fourth" and thereafter have the same put into "interference" with said patent of September 22d, 1857, and granted to said Robertson as aforesaid, at his own cost, expense, and charges. We do therefore, and by reason of these premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14th, 1859, upon the conditions aforesaid, and for that purpose we agree and consent that two separate applications may be made out of said pending application as aforesaid. And we do hereby release and relinquish each and every claim we now have, or may have, in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton may at any time put into a new application for a patent as his own invention and im-
2716 provement, and for which we have no claim whatever on and after the signing of these papers by us, and for which any patent hereafter granted may issue to said Marcus P. Norton, the same as though we had made no previous contract and agreement with him concerning the obtaining of a patent upon the said invention contained in said application of June 14, 1859, and the introduction of the same into public and general use. And no cost or charge shall be made against us, or either of us, of any kind whatever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14th, 1859, as that a patent shall issue upon the invention covered by said third claim and known as the "Cutters or knives" for cancelling the postage-stamps by cutting the same, while the said "first," "second," and "fourth claims," and the invention and improvements contained therein, may be erased therefrom and from said application, and reserved for, and put into another division or new application for a patent upon the same at any time whenever said Norton may desire to do the same, without any expense to us or either of us, and for which we now and forever relinquish and

surrender unto the said Marcus P. Norton any and every claim or right which we may now have or ever did have thereto in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and improvements contained in the said "first," "second," and "fourth" claims now standing rejected as aforesaid, to wit, June 27, 1859; also, any and every invention and improvement set forth and described or mentioned in the specifications in said application of June 14, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to the heirs and assigns of the said Marcus P. Norton, the original and first inventor of the said invention and improvements.

2717

F. G. RANSFORD.
P. LOW.

We have hereunto set our hands on this 20th day of July, 1859, in the presence of—

R. G. Fox.
THOMAS H. HARDMAN.

To the prejudice of the rights of a private person, to wit, Frederick G. Ransford, with intent to defraud the said Frederick G. Ransford, against the form of the statute in such case made and provided, and against the peace and government of the United States.

2. And the grand jurors aforesaid, upon their oath aforesaid, do further present:

That the said Marcus P. Norton afterwards, to wit, on the day and the year aforesaid, with force and arms, at the county and District aforesaid, feloniously did falsely pass, utter, and publish as true, a certain or other false, forged, and counterfeit paper writing, which said last mentioned false, forged, and counterfeited paper writing, which is as follows; that is to say:

An agreement concerning the application of Marcus P. Norton, of Troy, State of New York, for a patent upon "Post office Postmarking Stamp," dated on or about the 14th day of June, 1859, and rejected June 27th, 1859, by Commissioner of Patents, and now pending in the U. S. Patent Office under said objection.

Whereas the above-named application has been rejected by the Commissioner of Patents, upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage-stamps, by cutting the same; and whereas, before a patent can be granted upon the invention covered by the rejected claims aforesaid, to wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Robertson upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas, we, the undersigned, are unwilling to undertake any further and additional expenditure of time and money which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14, 1859, we give up and surrender to said Marcus P. Norton any and every claim we have or may have by reason of our contract and agreement with him, to all the invention and im-

2718

provements contained in said application, and not covered by said third claim, so as to allow him to make a new application for a patent upon the same, he having requested us so to do, or to go on and carry out our said agreement with him, all of which is to be done at his own expense, while he at the same time shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14, 1859, was by him made to the Commissioner of Patents. And whereas the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said "third claim" not now rejected, and thereafter to make an application for a patent upon the invention and improvement contained in said rejected claims, to wit, "first," "second," and "fourth," and thereafter have the same put into "interference" with said patent of September 22d, 1857, and granted to said Robertson, as aforesaid, at his own expense and charges. We do, therefore, and by reason of the premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14, 1859, upon the conditions aforesaid, and for that purpose we agree and consent that two separate applications may be made out of said
2719 pending application as aforesaid. And we do hereby release, relinquish each and every claim we now have, or may have, in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton may at any time put into a new application for a patent, as his own invention and improvement, and for which we have no claim whatever on and after the signing of this paper by us, and for which any patent hereafter granted may issue to said Marcus P. Norton, the same as though we had made no previous contract and agreement with him concerning the obtaining of a patent upon the invention contained in said application of June 14, 1859, and the introduction of the same into public and general use.

And no cost or charges shall be made against us, or either of us, of any kind whatever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we therefore hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14, 1859, as that a patent shall issue upon the invention covered by said third claim, and known as the "Cutters or knives," for cancelling the postage stamp by cutting the same, while the said "first," "second," and "fourth" claims, and the invention and improvements contained therein, may be erased therefrom and from said application, and reserved for and put into another division or new application for a patent upon the same at any time whenever said Norton may desire to do the same, without any expense to us, or either of us, and for which we now and forever relinquish and surrender unto the said Marcus P. Norton any and every claim or right which we may now have, or ever did have thereto, in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and
2720 improvements contained in the said "first," "second," and "fourth" claims now standing rejected as aforesaid, to wit, June 27th, 1859. Also any and every invention and improvement set forth and described or mentioned in the specifications in said application of June 14, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to the heirs and assigns of the

said Marcus P. Norton, the original and first inventor of the said invention and improvements.

F. G. RANSFORD.
P. LEON.

We have hereunto set our hands on this 20th day of July, 1859, in the presence of—

R. G. FOX.
THOMAS H. HARDMAN.

To the prejudice of the right of a private person, to wit, Frederick G. Ransford, with intent to defraud the said Frederick G. Ransford, he, the said Marcus P. Norton, at the time he so passed, uttered, and published as true the said last mentioned false, forged, and counterfeited paper writing as aforesaid, then and there well knowing the same to be false, forged, and counterfeited, against the form of the statute in such case made and provided, and against the peace and government of the United States.

3. And the grand jurors aforesaid, on their oath aforesaid, do further present:

That the said Marcus P. Norton afterwards, to wit, on the day in the year aforesaid, at the District aforesaid, with force and arms, feloniously did falsely make and forge a certain paper writing, which said paper writing is as follows, that is to say:

An agreement concerning the application of Marcus P. Morton, of Troy, State of New York, for a patent upon "Post-office post marking stamp," dated on or about the 14th day of June, 1859, and rejected June 27, 1859, by Commissioner of Patents, and now pending in the U. S. Patent Office under said rejection.

2721 Whereas the above named application has been rejected by the Commissioner of Patents upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage stamps by cutting the same; and whereas, before a patent can be granted upon the invention covered by the rejected claims aforesaid, to wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Robertson upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas we, the undersigned, are unwil ing to undertake any further and additional expenditure of time and money, which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14, 1859, we give up and surrender to said Marcus P. Norton any and every claim we have or may have by reason of our contract or agreement with him, to all the inventions and improvements contained in said application, and not covered by said third claim, so as to allow him to make a new application for a patent upon the same, he having requested us so to do, or to go on and carry out our said agreement with him, all of which is to be done at his own expense; while he at the same time shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14, 1859, was by him made to the Commissioner of Patents; and whereas the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said

"third claim" not now rejected, and thereafter to make an application for a patent upon the invention and improvements contained in
2722 said rejected claims, to wit, "first," "second," and "fourth," and thereafter have the same put into "interference" with said patent of September 22, 1857, and granted to said Robertson, as aforesaid, at his own cost, expense, and charges. We do, therefore, by reason of the premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14th, 1859, upon the conditions aforesaid; and for that purpose we agree and consent that two separate applications may be made out of said pending application as aforesaid. And we do hereby release and relinquish each and every claim we now have or may have in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton may at any time put into a new application for a patent as his own invention and improvements, and for which we have no claim whatever on and after the signing of this paper by us, and for which any patent hereafter granted may issue to said Marcus P. Norton, the same as though we had made no previous contract and agreement with him concerning the obtaining of a patent upon the invention contained in said application of June 14th, 1859, and the introduction of the same into public and general use. And no cost or charges shall be made against us, or either of us, of any kind whatever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we therefore hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14th, 1859, as that a patent shall issue upon the invention covered by said "third claim," and known as the "cutters or knives," for cancelling the postage-stamps by cutting the same, while the said "first," "second," and "fourth" claims and the invention and improvements contained therein, may be erased therefrom, and from said application and reserved
2723 for and put into another division or new application for a patent upon the same, at any time whenever said Norton may desire to do the same, without any expense to us, or either of us, and for which we now and forever relinquish and surrender unto the said Marcus P. Norton any and every claim or right which we may now have or ever did have thereto, in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and improvements contained in the said "first," "second," and "fourth" claims now standing rejected as aforesaid, to wit, June 27th, 1859; also, any and every invention and improvement set forth or mentioned in the specifications in said application of June 14, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to the heirs and assigns of the said Marcus P. Norton, the original and first inventor of the said invention and improvements.

F. G. RANSFORD.
P. LOW.

We have hereunto set our hands on this 20th day of July, 1859, in the presence of—

R. G. FOX.
THOMAS H. HARDMAN.

To the prejudice of the right of a private person, to wit, of one Peter Low, with intent to defraud the said Peter Low against the form of the

statute in such case made and provided, and against the peace and government of the United States.

4. And the grand jurors aforesaid, upon their oath aforesaid, do further present:

That the said Marcus P. Norton afterwards, to wit, on the day in the year aforesaid, with force and arms, at the District aforesaid, feloniously did falsely pass, utter, and publish as true, a certain other false, forged, and counterfeited paper writing, which said last mentioned false, forged, and counterfeited paper is as follows, that is to say:

2724 An agreement concerning the application of Marcus P. Norton, of Troy, State of New York, for a patent upon "Post-office Postmarking Stamp," dated on or about the 14th day of June, 1859, and rejected June 27th, 1859, by Commissioner of Patents, and now pending in the Patent Office under said rejection.

Whereas the above-named application has been rejected by the Commissioner of Patents upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage stamps by cutting the same; and whereas, before a patent can be granted upon the invention covered by the rejected claims aforesaid, to wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Robertson upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas we, the undersigned, are unwilling to undertake any further and additional expenditure of time and money, which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14th, 1859, we give up and surrender to said Marcus P. Norton any and every claim we have or may have by reason of our contract and agreement with him to all the invention and improvements contained in said application, and not covered by said third claim, so as to allow him to make a new application for a patent upon the same, he having requested us so to do or to go on and carry out our said agreement with him, all of which is to be done at his own expense; while he, at the same time, shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14, 1859, was
2725 by him made to the Commissioner of Patents. And whereas the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said "third claim" not now rejected, and thereafter to make an application for a patent upon the invention and improvements contained in said rejected claims, to wit, "first," "second," and "fourth," and thereafter have the same put into "interference" with said patent of September 22d, 1857, and granted to said Robertson, as aforesaid, at his own cost, expense, and charges: We do therefore, and by reason of the premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14th, 1859, upon the conditions aforesaid; and for that purpose we agree and consent that two separate applications may be made out of said pending application as aforesaid. And we do hereby release and relinquish each and every claim we now have, or may have, in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton

may at any time put into a new application for a patent as his own invention and improvements, and for which we have no claim whatever on and after the signing of this paper by us, and for which any patent hereafter granted may issue to said Marcus P. Norton the same as though we had made no previous contract and agreement with him concerning the obtaining of a patent upon the invention contained in said application of June 14th, 1859, and the introduction of the same into public and general use. And no cost or charges shall be made against us, or either of us, of any kind whatever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we therefore hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14, 2726 1859, as that a patent shall issue upon the invention covered by said third claim, and known as the "cutters or knives," for cancelling the postage-stamps by cutting the same, while the said "first," "second," and "fourth" claim, and the invention and improvements contained therein may be erased therefrom and from said application, and reserved for and put into another division or new application for a patent upon the same at any time whenever said Norton may desire to do the same, without any expense to us, or either of us, and for which we now and forever relinquish and surrender unto the said Marcus P. Norton any and every claim or right which we may now have, or ever did have thereto, in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and improvements contained in the said "first," "second," and "fourth" claims now standing rejected as aforesaid, to wit, June 27th, 1859; also any and every invention and improvements set forth and described or mentioned in the specifications in the application of June 14th, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to the heirs and assigns of the said Marcus P. Norton, the original and first inventor of the said invention and improvements.

F. G. RANSFORD.
P. LOW.

We have hereunto set our hands on this 20th day of July, 1859, in the presence of—

R. G. FOX.
THOMAS H. HARDMAN.

To the prejudice of the right of a private person, to wit, one Peter Low, and with intent to defraud the said Peter Low, he, the said Marcus P. Norton, at the time he so uttered, passed, and published as true the said last mentioned false, forged, and counterfeited paper writing as aforesaid, then and there well knowing the same to be false, forged, and 2727 counterfeited; against the form of the statute in such case made and provided, and against the peace and Government of the United States.

5. And the grand jurors aforesaid, upon their oath aforesaid, do further present:

That the said Marcus P. Norton afterwards, to wit, on the day in the year aforesaid, with force and arms, at the county and District aforesaid, feloniously did falsely make and forge a certain other paper writing, which said paper writing is as follows, that is to say:

An agreement concerning the application of Marcus P. Norton, of Troy, State of New York, for a patent upon "Post-office Postmarking Stamp," dated on or about the 14th day of June, 1859, and rejected June 27, 1859, by Commissioner of Patents, and now pending in the U. S. Patent Office under said rejection.

Whereas the above-named application has been rejected by the Commissioner of Patents upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage-stamps by cutting the same; and whereas, before a patent can be granted upon the invention covered by the rejected claims aforesaid, to wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Roberston upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas we, the undersigned, are unwilling to undertake any further and additional expenditure of time and money which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14th, 1859, we give up and surrender to said Marcus P.
2728 Norton any and every claim we have, or may have by reason of our contract and agreement with him, to all the invention and improvements contained in said application, and not covered by said third claim; so as to allow him to make a new application for a patent upon the same, he having requested us so to do, or to go on and carry out our said agreement with him, all of which is to be done at his own expense; while he at the same time shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14, 1859, was by him made to the Commissioner of Patents. And whereas the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said "third claim" not now rejected, and thereafter to make an application for a patent upon the invention and improvements contained in said rejected claims, to wit, "first," "second," and "fourth," and thereafter have the same put into "interference" with said patent of September 22d, 1857, and granted to said Robertson as aforesaid, at his own cost, expense, and charges: We do therefore, and by reason of the premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14th, 1859, upon the conditions aforesaid; and for that purpose we agree and consent that two separate applications may be made out of said pending application as aforesaid. And we do hereby release and relinquish each and every claim we now have, or may have, in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton may at any time put into a new application for a patent, as his own invention and improvements, and for which we have no claim whatever on and after the signing of this paper by us, and for which any patent hereafter granted may issue to said Marcus P. Norton, the same as though we had made no previous contract and agree-
2729 ment with him concerning the obtaining of a patent upon the invention contained in said application of June 14th, 1859, and the introduction of the same into public and general use. And no cost or charges shall be make against us, or either of us, of any kind what-

ever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we therefore hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14th, 1859, as that a patent shall issue upon the invention covered by said third claim, and known as the "cutters or knives," for cancelling the postage-stamps, by cutting the same, while the "first," "second," and "fourth claims," and the invention and improvements contained therein, may be erased therefrom, and from said application, and reserved for and put into another division or new application for a patent upon the same, at any time whenever said Norton may desire to do the same, without any expense to us, or either of us, and for which we now forever relinquish and surrender unto the said Marcus P. Norton any and every claim or right which we may now have, or ever did have thereto, in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and improvements contained in the said "first, "second," and "fourth" claims now standing rejected as aforesaid, to wit, June 27th, 1859; also, any and every invention and improvements set forth and described or mentioned in the specifications in said application of June 14th, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to the heirs and assigns of the said Marcus P. Norton, the original and first inventor of the said invention and improvements.

F. G. RANSFORD.
P. LOW.

We have hereunto set our hands on this 20th day of July, 1859, in the presence of—

R. G. FOX.
THOMAS H. HARDMAN.

2730 To the prejudice of the right of Frederick G. Ransford and Peter Low, with intent to defraud the said Frederick G. Ransford and Peter Low, against the form of the statute in such case made and provided, and against the peace and Government of the United States.

6. And the grand jurors aforesaid, upon their oath aforesaid, do further present:

That the said Marcus P. Norton afterwards, to wit, on the day in the year aforesaid, with force and arms, at the District aforesaid, feloniously did falsely pass, utter, and publish as true, a certain other false, forged, and counterfeited paper writing, which said last mentioned false, forged, and counterfeited paper writing is as follows, that is to say:

An agreement concerning the application of Marcus P. Norton, of Troy, State of New York, for a patent upon "post office postmarking stamp," dated on or about the 14th day of June, 1859, and rejected June 27th, 1859, by Commissioner of Pa ents, and now pending in the U. S. Patent Office under said rejection.

Whereas the above named application has been rejected by the Commissioner of Patents, upon a patent granted to T. J. W. Robertson, and dated on or about the 22d day of September, 1857, with the exception of the third claim, to which there now appears to be no objection to the granting of a patent, and which is for a cutting device to cancel postage stamps, by cutting the same; and whereas, before a patent can be granted upon the invention covered by the rejected claims aforesaid, to

wit, the first, second, and fourth claims in said application, it will be necessary to have an interference case with said Robertson upon the patent of September 22d, 1857, and the said pending application of said Marcus P. Norton; and whereas we, the undersigned, are unwilling to undertake any further and additional expenditure of time and
2731 money, which such an interference would be likely to demand or result in, and preferring not to incur or become in any way responsible for any expenses whatever beyond those now incurred in said application of June 14th, 1859, we give up and surrender to said Marcus P. Norton any and every claim we have, or may have, by reason of our contract and agreement with him, to all the invention and improvements contained in said application, and not covered by said third claim; so as to allow him to make a new application for a patent upon the same, he having requested us so to do, or go on, and carry out our said agreement with him, all of which is to be done at his own expense, while he, at the same time shall release us, and each of us, from our said contract and agreement with him, upon which the said application of June 14th, 1859, was by him made to the Commissioner of Patents; and whereas, the said Marcus P. Norton desires himself to separate and divide the said pending application, taking a patent upon the said "third claim" not now rejected, and thereafter to make an application for a patent upon the invention and improvements contained in said rejected claims, to wit, "first," "second," and "fourth," and thereafter have the same put into "interference" with said patent of September 22d, 1857, and granted to said Robertson, as aforesaid, at his own cost, expense, and charges: We do, therefore, by reason of the premises aforesaid, hereby consent to such division as he, the said Marcus P. Norton, shall desire to make of the said pending application of June 14th, 1859, upon the conditions aforesaid; and for that purpose we agree and consent that two separate applications may be made out of said pending application as aforesaid. And we do hereby release and relinquish each and every claim we now have, or may have, in, to, and for the invention in "type dating wheels and printing device," and contained in the said rejected claims aforesaid, which the said Marcus P. Norton may at any time put into a new application for a patent as his own
2732 invention and improvements, and for which we have no claim whatever on and after the signing of this paper by us, and for which any patent hereafter granted may issue to said Marcus P. Norton, the same as though we had made no previous contract and agreement with him concerning the obtaining of a patent upon the invention contained in said application of June 14th, 1859, and the introduction of the same into public and general use.

And no cost or charges shall be made against us, or either of us, of any kind whatever, by said Marcus P. Norton, upon such division and such new application for a patent upon said invention covered by said rejected claims.

And we therefore hereby authorize and permit the said Marcus P. Norton so to amend the said pending application of June 14th, 1859, as that a patent shall issue upon the invention covered by said third claim, and known as the "cutters or knives," for cancelling the postage stamp, by cutting the same, while the said "first," "second," and "fourth claims," and the invention and improvements contained therein, may be erased therefrom and put into another division or new application for a patent upon the same, at any time whenever say Norton may desire to do the same, without any expense to us, or either of us, and for which

we now and forever relinquish and surrender unto the said Marcus P. Norton any and every claim or right which we may now have, or ever did have thereto, in any manner or means whatsoever, hereby giving and granting a full release and acquittance to said Marcus P. Norton for the said invention and improvements contained in the said "first," "second," and "fourth" claims, now standing rejected as aforesaid, to' wit, June 27th, 1859; also, any and every invention and improvements set forth and described or mentioned in the specification in said application of June 14th, 1859, and not covered by said third and unrejected claim. Each and every matter herein contained shall also apply to
2733 the heirs and assigns of the said Marcus P. Norton, the original and first inventor of the said invention and improvements.

F. G. RANSFORD.
P. LOW.

We have hereunto set our hands on this 10th day of July, 1859, in the presence of—

R. G. FOX.
THOMAS H. HARDMAN.

To the prejudice of the right of Frederick G. Ransford and Peter Low, with intent to defraud the said Frederick G. Ransford and Peter Low, he, the said Marcus P. Norton, at the time he so passed, uttered, and published as true the said last-mentioned false, forged, and counterfeited paper writing as aforesaid, then and there well knowing the same to be false, forged and counterfeited, against the form of the statute in such case made and provided, and against the peace and Government of the United States.

2734 *Def't's Ex. Marcus P. Norton A.—I. B. ex'r, May* 18, 1878.

CANAAN, 4 CORNERS, N. Y.,
November 27th, 1876.

JACOB SHAVOR, Esq.:

DEAR SIR: Your letter of the 25th instant came to me this morning, and from Troy to-day.

I am up again and am getting better every day. I will be in Troy one week from to-day, and in the meantime will have the papers you

name prepared in good shape. I have twice written Mr. Secombe, since I sent his last letter to me to Mr. Eddy, and I am waiting his reply to each of them. I little care whether he signs the paper that I sent him or not, because he has utterly failed in his trust and the title revests, at least all the title he ever had. He took no absolute title but a title subject to a certain trust; whenever the trust fails then fails the title. He failed in that trust more than four years ago; and when called on for money to carry out the trust then he refused and has so refused three or four times, and I have it in writing. Still I have thought it best to have him make a reassignment. If he will do so, very well; and if not, then just as well. I have good letters from Attorney-General Williams, also from General Butler about my 1863 letters, patent dated April 14th of that year, and all the subsequent reissues, and they fully concur in my views and opinions about the title; use by the government; its great value and certainty of recovery under that patent for the past 13 years' use of that invention. And they are strongly in favor of the Court of Claims till No. S. 571, which you have.

I have also a letter from "Mr. Senator Wadleigh," who reported bill 571, dated the 24th instant, which I will let you three see when in Troy. I come to Troy to take proofs in a patent case, and will be there four days.

2735 The 21st Joint Rule of the Senate and House will not admit of one bill coming up until after six days from the commencement of next session which will be on next Monday. The "six days" will be upon the fol. Monday, to wit, December 11th, or two weeks from to-day. Congress convenes on Monday, one week from to-day.

If you, Corse, and Eddy will now take hold and push the 1863 invention on in line of S. bill 571 you will be pursuing the right course; and that which will certainly succeed and bring money to your entire satisfaction. It must not be encumbered with the 1859 patent. in any way of association or compromise; because such a course will bring with it certain defeat even of the 1863 patent. That patent must and will stand alone in the claim against the government for its use, and when put into Mr. Eddy as trustee it must be that in no way or manner shall it be coupled with the 1859 patent. I have very carefully examined the whole matter since I came from Washington last August, and my conclusions are stated in a few words just above. Mr. Butler and Williams both agree with me in this. I have now the evidence which will satisfy you about it. If the 1859 men have any claim for the use of that patent, let them put in a case on their own hook and then they can find out all about it. Congress, on the 14th day of July, 1870, expressly authorized the government, by the Postmaster-General, "to continue in use" the patent of April 14th, 1863, and its reissues, and that has been done and is being done to-day. Every report made in Congress without an exception have spoken of and confirmed the use of the April 14, 1863, patent and of its reissues. This has been done by giving the dates of that patent, and by describing the invention in the reports. The August 9th, 1859, patent is nowhere there mentioned. There is much more on these points, but enough now. You will please let Mr. Eddy and Corse see this letter.

Truly yours,

MARCUS P. NORTON.

2736 *Complainant's Exhibit A, Ransford.—I. B., ex'r, July 6th, 1878.*

Order of the Commissioner of Patents refusing to recognize Marcus P. Norton as a patent agent.

UNITED STATES PATENT OFFICE,
September 18, 1871.

The following charges were, on or about the day of their date, served upon Marcus P. Norton, of Troy, New York, a patent agent practicing before the United States Patent Office, to wit:

UNITED STATES PATENT OFFICE,
Washington, D. C., August 29, 1871.

To MARCUS P. NORTON, *Troy, N. Y.*:

SIR: You are hereby notified to appear before the Commissioner of Patents at his office in Washington, District of Columbia, on the 8th day of September, 1871, at 10 o'clock a. m., and show cause, if any exist, why the said Commissioner of Patents (by virtue of the authority conferred upon him by the seventeenth section of the act of Congress approved July 8, 1870, and entitled "An act to revise, consolidate, and amend the statutes relating to patents and copy rights") should not refuse longer to recognize you as a patent agent, it being alleged that you have been guilty of "gross misconduct," more particularly with reference to the matters hereafter named, viz.:

1st. That said Marcus P. Norton, having, on the 20th day of October, 1853, filed in the United States Patent Office a certain caveat dated "Troy Conference Academy, West Pawlney, Vermont, October 13, 1853," a copy of which is hereto attached and marked Exhibit A. That some time after filing said paper marked Exhibit A, he, the said Marcus P. Norton, surreptitiously conveyed to the files of this office a certain other paper, a copy of which is hereto attached and marked Exhibit B,
2737 as a subjoined description to said caveat, which said Exhibit B purports to have been written August 7, 1854, and the said Marcus P. Norton is herewith charged and accused of writing said paper marked Exhibit B at a much later date than the said August 7, 1854.

2d. That the said Marcus P. Norton is hereby charged and accused of gross misconduct for having, without authority from this office and without filing said paper Exhibit B, placed it among the files of this office with the intention to deceive and practice fraud upon this office.

3d. That the said Marcus P. Norton, acting for himself, and in behalf of his own interest in a certain case wherein he was interested, in letters patent upon a certain "Railroad Printing Press," did surreptitiously take and remove from the files in said case, in said Patent Office, a certain paper dated "Tinmouth, Vermont, August 21, 1855," a copy of which is hereto attached, and marked Exhibit C.

Said paper marked Exhibit C was received and filed in said Patent Office, as appears by indorsement August 25, 1855.

4th. That the said Marcus P. Norton is hereby charged with purloining from said files in said Patent Office said paper or letter marked Exhibit C, and attaching thereto a certain other paper, a copy of which is hereto attached and marked Exhibit D, intending thereby to deceive and practice gross fraud upon this office. That said paper, Exhibit D, purports to have been written and signed by Marcus P. Norton on the said 21st of August, 1855, which paper, marked Exhibit D, said Norton is hereby charged with writing and surreptitiously placing among the files

at a much later date than said August 25, 1855, while, in fact, said paper marked Exhibit D was never duly filed in this office, but was attached by said Marcus P. Norton to said letter or paper marked Exhibit C, said letter marked Exhibit C having been duly received and filed in the
2738 Patent Office, August 25, 1855, thus practicing gross fraud and deception upon this office and undertaking and intending to impress upon this office that said paper marked Exhibit D was duly filed August 25, 1855, in said Patent Office.

5th. That said Marcus P. Norton did, on the 15th day of August, 1871, file in this office a false and fraudulent paper, a copy of which is hereto attached and marked Exhibit E, in which he alleges that he never did make any assignment to F. G. Ransford and Peter Low, dated May 2, 1859, and that if any such is on file in this office, or has been recorded in liber G, page 73, of Transfer of Patents, "is in error," and is "a gross fraud and a forgery;" and that said paper was duly received and filed in this office on said 15th day of August, 1871, and sworn to by Marcus P. Norton, before T. C. Connolly, a justice of the peace of the city and county of Washington, D. C.

6th. That the said Marcus P. Norton, acting for himself and in his own behalf, and in order to defeat the rights of other parties, viz, F. G. Ransford and Peter Low, did write, utter, and publish a certain paper, a copy of which is hereunto attached and marked Exhibit F; that said paper purports to have been written July 20, 1859, and signed by F. G. Ransford and P. Low, and witnessed by R. G. Fox and Thomas H. Hardman; that said Marcus P. Norton is hereby charged (on or about July or August, 1871), with writing, publishing and forging said paper marked Exhibit F, and of forging the names of said F. G. Ransford and P. Low, the pretended assignors, as well as the names of R. G. Fox and Thomas H. Hardman, witnesses to said assignment.

7th. That said Marcus P. Norton filed in the United States Patent Office, in person, said paper, marked Exhibit F, as the original paper or assignment for record in said office on the 22d day of August, 1871, and claimed said paper marked Exhibit F was an original paper duly
2739 executed by said F. G. Ransford and P. Low, and duly witnessed by said R. G. Fox and Thomas H. Hardman, intending thereby to practice gross deception upon this office.

8th. That the said Marcus P. Norton is hereby charged with forging the signatures of F. G. Ransford and P. Low, the assignors, as well as with forging the name or signatures of R. G. Fox and Thomas H. Hardman, the witnesses to said paper or assignment marked Exhibit F, and presenting the same for record in said Patent Office, to wit, said paper marked Exhibit F, and presenting it as a genuine and true paper or assignment for record, on said August 22, 1871, all of which he did in defiance of the rights of said assignors, viz, F. G. Ransford and P. Low; and the said Marcus P. Norton was, and is, guilty of gross misconduct as a patent attorney or agent, and is unworthy of the confidence or respect of the United States Patent Office.

M. D. LEGGETT,
Commissioner.

(Copies of the exhibits were served on Mr. Norton, but being voluminous, are omitted here.)

By the request of the attorney of said Marcus P. Norton, the hearing in the matter of the above charges was postponed until September 14, at 10 o'clock a. m.

Understanding that Mr. Norton was fearful the Commmissioner would

not do him exact justice, he was informed that, if agreeable to his wishes, a commission of three gentlemen connected with the Patent Office would be appointed to hear and investigate the charges, and to report their findings to the Commissioner. He expressed his satisfaction with such arrangement, provided he might designate persons whom he did not want on the commission. He was granted such privilege, whereupon Examiners T. C. Connolly, Ellis Spear, and C. M. Parks were appointed such commission. At the time to which said case
2740 had been postponed, said Marcus P. Norton appeared before the commission, and was assisted in his defense by two able attorneys. He pleaded "not guilty" to all the charges. Over two days were occupied in the hearing. The report of the commission is as follows, to wit:

UNITED STATES PATENT OFFICE,
September 18, 1871.

SIR: We, the undersigned, having been appointed a commission to investigate certain charges made against Marcus P. Norton, a practicing attorney before the United States Patent Office, by order dated September 14, 1871, have carefully investigated said charges, examined the papers and witnesses in the case, and heard the arguments of counsel on both sides, and respectfully submit the following report:

We find that the accused, Marcus P. Norton, is—

Of the first charge, guilty.

Of the second charge, guilty.

Of the third charge, not guilty.

Of the fourth charge, guilty, except of the words "purloining from said files" * * * said papers, &c.

Of the fifth charge, guilty.

Of the sixth charge, guilty.

Of the seventh charge, guilty.

Of the eighth charge, guilty.

All of which is respectfully submitted.

T. C. CONNOLLY,
T. ELLIS SPEAR,
C. M. PARKS,
Commission.

HON. M. D. LEGGETT,
Commissioner of Patents.

It is therefore adjudged—

I. That said Marcus P. Norton has been guilty of such "gross misconduct" as to make it the duty of the Commissioner of Patents, to refuse longer to recognize him as a patent agent; and it is accord-
2741 ingly ordered, by virtue of the authority conferred upon the Commissioner of Patents, under the 17th section of the act approved July 8, 1870, that the said Marcus P. Norton, or any firm of which he shall be a continued member, after said firm shall have been notified of this order, be hereafter excluded from practicing before the Patent Office in any and all cases.

II. In view of the fact that said Marcus P. Norton is also an inventor, and frequently appears in his own behalf in prosecuting applications for patents, extensions, interferences, &c.; and whereas it having been clearly proved in this case that he is an unsuitable person to be trusted with the files in this office, it is further ordered that hereafter said Marcus P. Norton shall not be permitted to have personal access to any of the files, drawings, or models in the Patent Office, for any purpose

whatever. When necessary, in the transaction of business connected with his own personal interests, to know the contents of documents on file in the office, he must call for certified copies, or make examination by attorney.

III. The examiners and other employés of the Patent Office will take cognizance of and enforce the above orders.

M. D. LEGGETT,
Commissioner of Patents.

Approved:

C. DELANO,
Secretary of the Interior.

2742 *Complainant's Exhibit (Ransford).—I. B. Ex'r. July 6th, 1878.*

THE U. S. PATENT OFFICE.

To all persons to whom these presents shall come, greeting:

This is to certify that the annexed is a true copy from the files of this office of testimony taken in behalf of T. J. W. Robertson, with notice for taking the same, in the matter of the application for extension of letters patent granted him, dated September 22d, 1857, No. 18249, for "Hand Stamp."

In testimony whereof, I, J. M. Thacher, Acting Commissioner of Patents, have caused the seal of the Patent Office to be hereunto affixed this fifteenth day of November, in the year of our Lord one thousand eight hundred and seventy-two, and of the Independence of the United States the ninety-seventh.

[SEAL.] J. M. THACHER,
Acting Commissioner.

2743 [illegible] D. C., *August 22d*, 1871.

In the [illegible] for an extension [illegible] matter of the application of T. J. W. Robertson, [illegible] No. 18249. of his patent on hand stamps, dated Sept. 22, 1857, N[illegible]

To Marcus P. Norton:

SIR: You are hereby notified that on Friday, August 25th, 1871, [illegible] at ten a. m., at 37 Congress street, Troy, N. Y., I shall proceed to take the testimony of F. W. Rainsford, C. A. Sherwood, Jacob Shaver

Whitman, W. E. Hagan, James Burden and others, all of Troy, as witnesses in my behalf.

The examination will continue from day to day, until completed. You are invited to attend and cross-examine.

T. J. W. ROBERTSON.

T. J. W. Robertson's application for an extension of his patent on hand stamps.

Dated Sept. 22, 1857.

No. 18249.

Notice of taking testimony.

Service of the within is hereby acknowledged.

MARCUS P. NORTON.

2744 Before the Commissioner of Patents.

In the matter of the application of T. J. W. Robertson, for extension of letters patent, No. 18249, for improved hand stamp, dated Sept. 22, 1857.

Testimony taken in behalf of the applicant T. J. W. Robertson, on this 25th day of August, 1871, at 10 o'clock a. m., at the office of N. B. Sylvester, No. 37 Congress street, city of Troy, N. Y., under and in pursuance of the annexed notice, from which office the examination of witnesses was adjourned, at 11 a. m., to the office of Parmenter Brothers, No. 47 First street, corner of Congress, no one appearing to dissent to such adjournment, and a written notice thereof being left at the office of said Sylvester. F. H. Betts, esq., and A. J. Todd, esq. appeared for applicant. No one appeared on part of contestant.

FREDERICK G. RANSFORD, being by me duly sworn, says:

1. Q. What is your name, age, residence and occupation?

A. My name is Frederick G. Ransford; my age is fifty-six years; my place of residence is in Troy, N. Y.; I am a retired merchant.

2. Q. Do you know T. J. W. Robertson, the applicant in the present case, in person or by reputation; and if so, what connection in business have you had with him, if any?

2745 A. I know him by reputation; all the business I ever had with him is through Mr. Peter Low.

3. Q. Did you know of the assignment made by said Robertson to Mr. Low, on the 17th of April, 1861, of the invention in question in this case; if so, do you know how much said Robertson received for making said assignment?

A. I knew of said assignment; he received the sum of $100; said money went through my hands.

4. Q. Did you know whether or not said Robertson ever made any endeavor to introduce the invention referred to into post-office use; if so, how did you know of such endeavors?

A. In no other way than that I found the stamp in the possession of Postmaster Dix, in New York city; about the year '60 or '61, I went to the post office to show to Gen. Dix a blotter and cylinder canceling stamp for the purpose of getting it introduced, and he then showed me one of Robertson's, which he then had.

5. Q. Do you know Marcus P. Norton, formerly of Troy, and now at Washington; if so, how long have you known him?

A. I became acquainted with Mr. Norton in January, 1858.

6. Q. Were you ever interested with him in the business of making or introducing hand stamps, similar to Robertson's; if so, when?

A. I, in connection with Mr. Peter Low, bought an invention of that character—I in 1858, and Mr. Low and myself in 1859; Mr. Norton made an application in 1858, and it was withdrawn and renewed in 1859, and the patent granted to Ransford and Low the 9th of August, 1859.

7. Q. What knowledge have you of any hand stamps with dating cylinders having been made for Mr. Norton; if you know of any, please state when they were made and what was done with them?

A. I saw the first dating stamps in 1858; I saw two; it was between the months of April and May; the first one I saw, he took to
2746 Washington in company with me to try to introduce into the Post-Office Department; I went to Washington with him; he did not say anything about having made any prior application; from the conversation had at the Post-Office Department at that time, it appeared to them as a new thing and as having been then first presented to their notice; some time subsequent to this visit to Washington, I can't say how long, I took another of these stamps to North Adams, on the Troy and Boston road, for the purpose of getting it introduced as an experiment in that railroad office; Mr. Norton knew of my taking it there for that purpose, and he said nothing to me of ever having introduced any hand stamps on that road previously; I introduced it to Mr. Baker, superintendent of that road, and he gave me a pass to North Adams, to have the stamp experimented with there; he said nothing to the effect that he had ever seen anything of the kind before; I do not know of any more stamps of the kind having been made until some time after this.

8. Q. Did you know from Mr. Norton of Mr. Robertson's having obtained a patent for the stamp in question; if so, when did you first hear of it from Norton?

A. I heard, at the time that Norton made his application in 1858, that he had been rejected on Robertson's patent; I heard it from Norton himself.

9. Q. Did he at that time claim to have made his invention of a hand stamp, prior to Robertson's patent, or did he show any inclination, or give you any encouragement to go into an interference with Robertson?

A. He made no such claim at that time, and showed no disposition to go into any interference.

10. Q. Do you know Marcus P. Norton's general reputation and character for truth and veracity in this community; if so, what is it?

A. It is bad.

11. Q. Would you believe him under oath?

2747 A. I would not, where he was in any way interested.

12. Q. Do you know whether Mr. Low or Mr. Robertson's assignees ever realized anything from the original term of the patent in this case?

A. The assignees never realized a dollar; this has been occasioned by a disagreement among the owners, and for the same reason no suits have been instituted; the owners have been Peter Low, F. G. Ransford, Charles Eddy & Co. and W. B. Hatch.

13. Q. Have you any interest in this application?

A. I have none.

F. G. RANSFORD.

JACOB SHAVOR, being duly sworn, says:

1. Q. What is your name, age, residence and occupation?

A. My name is Jacob Shavor; my age is fifty-five years; I am now living in Troy; am a retired manufacturer.

2. Q. Do you know Marcus P. Norton's general character for truth and veracity in this community; if so, what is it, and how have you become acquainted with it?

A. I do know his character in that respect; it is bad; I have know' him since 1859, and I know his character and reputation from personal experience, and from a large circle of business men with whom he has had dealing, and there is but one opinion, which I have stated.

3. Q. Would you believe him under oath?

A. I would not.

JACOB SHAVOR.

JEREMIAH D. GREEN, being duly sworn, says:

1. Q. What is your name, age, residence and occupation?

2748 A. My name is Jeremiah D. Green; my age is fifty-nine years; my residence is Troy, N. Y.; and my occupation is that of architect, patern-maker and mechanical engineer.

2. Q. Do you know Marcus P. Norton, the contestant in this case? If so, how long have you known him?

A. I do know him, and have known him since about 1855.

3. Q. When did you first hear of his making any hand-stamps with dating cylinders?

A. I think in the year of 1857 or 1858.

4. Q. How did you come to hear about it?

A. By conversing with Mr. Norton and Mr. Ransford, and, I think, with Mr. Low.

5. Q. Did you at that time know from Mr. Norton of his having made any application for a patent for a hand-stamp similar to that of the applicant in this case, or did you hear of any such application of his having been rejected by reason of the patent of Mr. Robertson?

A. I can't say as to the precise date, but I learned from Mr. Norton and Mr. Ransford that the application for a patent on the revolving type was rejected by the Patent Office as being in conflict with Robertson's patent, of New York.

6. Q. Did Mr. Norton at that time make any claim to be able to anticipate Mr. Robertson's patent in the date of his (Norton's) invention?

A. Not at that time, nor for several years afterwards.

7. Q. Were your relations with Mr. Norton and Mr. Ransford such that you would have been likely to have heard of any such claim of Norton's, if he had made any such?

A I often met them; Mr. Norton frequently came to my place of business, and I saw Mr. Ransford nearly every day and frequently heard this subject discussed.

8. Q. Do you know Marcus P. Norton's character for truth and veracity in this community; if so, what is it, and what opportunities have you had for knowing it?

2749 A. His reputation for truth and veracity in this vicinity is very bad; I have learned of his business transactions for a number of years past, much of which was quite disreputable; I have lived here since 1831, and frequently heard his character discussed.

9. Q. With the knowledge which you possess of the man, would believe him under oath?

A If he was interested either directly or indirectly in the event, I would not believe him.

J. D. GREEN.

STATE OF NEW YORK,
County of Rensselaer, ss:

I, LEVI PHILLIPS, commissioner of deeds for said county, duly commissioned and qualified, do hereby certify that on this 25th day of August, 1871, before me came Frederick G. Ransford, Jacob Shavor and Jeremiah D. Green, who signed the foregoing depositions, and made solemn oath that the statements therein contained were the truth, the whole truth, and nothing but the truth.

The foregoing depositions were taken at the request of T. J. W. Robertson, the applicant above named, to be used upon the hearing in the above-entitled matter before the Commissioner of Patents, on the 6th day of September, 1871.

The contestant, Marcus P. Norton, was duly notified, as appears by notice and admission of service thereof hereto annexed, but did not attend, and was not represented at the taking of said depositions.

[L. S] LEVI PHILLIPS,
Com'r of Deeds, Troy, N. Y.

Ex'd.—L. P. H.

Depositions taken 25th day of August, 1871, in the matter of the application for extension of letters patent, &c.

2750 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

On the annexed stipulation, and on motion of George H. Williams, of counsel for the above-named complainant, it is ordered that the final hearing and argument of this cause, on pleadings and proofs, may be by and before Hoyt H. Wheeler, a United States judge in and for the district of Vermont, by his assent, and at such time and place as he may designate, under and according to the terms and conditions
2751 stated in the said stipulation, dated New York, June 4, 1879, and signed Stewart L. Woodford, U. S. attorney for defendant James, by S. B. C., assistant; George H. Williams, of counsel for complainant, Marcus P. Norton, solicitor for complainant, and Charles Eddy, defendant in person. And to this end, and for this purpose, let the clerk of this court send all the papers, exhibits and models on file in this cause in the clerk's office, to Judge Hoyt H. Wheeler, Brooks House, Brattleboro', Windham County, State of Vermont, in season to be used by counsel at the time and place stated in an order made by him on the 6th day of June, 1879, and hereto annexed. The said papers, exhibits and models to be returned to the files of this court, when no longer needed by him, Judge Hoyt H. Wheeler.

Dated New York, this 9th day of June, A. D. 1879.

SAMUEL BLATCHFORD,
Circuit Judge.

And it is herein further ordered that the papers, exhibits and models referred to in the foregoing order be sent to the Brooks House, Brattleboro', Vermont, for the use and purposes stated in said order, and as

stated in an order made by Judge Hoyt H. Wheeler, and dated June 6, 1879, hereto annexed, in the custody and care of Hamilton M. Keeffe, crier of this court, and who shall do such duty there as Judge
2752 Wheeler may desire, while hearing this cause, under the order and stipulation hereto annexed, on condition that complainant or his counsel pay all necessary expenses attending the same.

Dated this 9th day of June, 1879.

SAMUEL BLATCHFORD,
Circuit Judge.

2753 *Stipulation.—June* 4, 1879.

Circuit court of the United States, in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

Whereas the counsel for defendant James in this cause has signified his determination to move to amend the answer of said James, and to open the case for the purpose of offering herein additional evidence which he considers material; and whereas the said complainant, in order to expedite the hearing, and have a full and fair investigation of the facts touching the questions involved herein, consents to the introduction of such evidence; therefore, it is stipulated and agreed between the parties hereto that the final hearing of this cause shall be be-
2754 fore the Hon. Hoyt H. Wheeler, U. S. district judge for the district of Vermont, at such time and place as he may designate, after the 15th of June, 1879, and as soon thereafter as will suit his convenience, and with like force and effect in all respects as though said final hearing were before said Judge Wheeler, holding this court under a legal designation in the southern district of New York, and

It is further stipulated that the said defendant, at such hearing, shall have the right to introduce, by an oral examination then and there, any additional evidence that he may desire to introduce, touching the points of prior invention and prior use, or either of them; and all objections to the competency of such additional evidence, under the pleadings, and on account of the present condition of the case, are hereby waived, the complainant reserving the right to dispute the sufficiency or truthfulness of such additional evidence, and to offer evidence, if he chooses, at said hearing, tending to disprove such additional evidence as defendant may put in; but the defendant shall not be at liberty to put in any evidence of a prior invention or use by persons in respect to whom evidence has already been introduced into the case, and it is further stipulated, that nothing herein shall be construed to prejudice or impair in any respect the right of appeal of any party to this suit, and all orders that may be necessary to secure any such right of

2755 appeal may, at any time, be made by this court, or by the Supreme Court of the United States, and

It is further stipulated that an order in the terms of the annexed draft may be made by the court.

Dated New York, June 4, 1879.

STEWART L. WOODFORD,
U. S. Attorney for Def't James.

2756 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

On the stipulation dated June 4th, 1879, and upon the order of this court, each of which are hereto annexed, and upon a letter signed George H. Williams, of counsel for complainant, and Stewart L. Woodford, United States attorney for the defendant Thomas L. James, dated New York, June 4th, 1879, and hereto annexed; and on motion of Marcus P. Norton, solicitor for complainant, it is ordered that the final hearing and argument of this cause be had at the Brooks House, at Brattleboro', county of Windham, district and State of Vermont, commencing on Tuesday, the 17th day of June, 1879, at 9 o'clock
2757 forenoon of that day, according to said stipulation and the terms thereof, hereto annexed; and under said order of this court, also hereto annexed, when the same shall have been signed by Judge Samuel Blatchford, circuit judge of the United States circuit court in and for the second circuit of the United States circuit courts.

And it is further ordered, that a copy of this order and the order of the said circuit court judge, and of the said stipulations hereto annexed, be each served upon each of said defendants or their solicitor or their counsel in this cause, at least five days befors the said 17th day of June, 1879, and after this order and each of said stipulations and the said circuit court order shall have been filed in this court, in the clerk's office in the city of New York.

Dated at Jamaica, Vt., this 6th day of June, 1879.

HOYT H. WHEELER.

JOHN I. DAVENPORT, *Clerk.*

2758 OFFICE OF THE UNITED STATES ATTORNEY
FOR THE SOUTHERN DISTRICT OF NEW YORK,
New York, June 4, 1879.

Hon. HOYT H. WHEELER,
Jamaica, Vt.:

SIR: We have entered into a stipulation for the final hearing of the case of Campbell vs. James, before you, on the 17th instant, or at such time and place as may suit your convenience after the 15th instant. Your letter to Mr. Norton indicated that you would be willing to hear the case at Brattleboro' on the 17th instant, and consequently we have fixed upon that day, and will be there at that time to argue the case, unless you notify us that you prefer some other day. It is proper to say that the defendant proposes to offer some additional evidence upon one or two points at the hearing, to which the complainant has consented, in order to obtain an early hearing, but it is understood that there is very little of the new evidence, and that the taking of it will consume but little time. We will furnish a stenographer to take it down as delivered. We hope you will allow us to do this, as it will be a great accommodation to the parties, and enable you to judge better of the value of the testimony.

We feel greatly obliged for your kindness in consenting to hear the case under the circumstance, and will try to make your labor in the matter as light as possible.

GEORGE H. WILLIAMS,
Of Counsel for Complainant.
STEWART L. WOODFORD,
U. S. Attorney for Def't James.
By S. B. C., *Assistant.*

2759 U. S. circuit court, southern district of New York.

CHRISTOPHER C. CAMPBELL
v.
THOMAS L. JAMES AND CHARLES EDDY.

Before Hon. Hoyt H. Wheeler.

BRATTLEBORO', VT., *June 17th*, 1879.

The following testimony on behalf of the defendant, put in before the court at the hearing, pursuant to stipulation dated June 4th, 1879, and the order thereon.

Complainant's counsel stipulates that, when written out by the stenographer, the same may be filed as a part of the record in this case.

JOHN P REES, called on behalf of the defendant, sworn:

By Mr. CLARK:

Q. Where do you reside?
A. At Philadelphia, Pa.
Q. What is your occupation?
A. I am at present employed at 904 Chestnut street, attending to their collections and banking business.
2760 Q. What is your age?
A. I am in my sixty-third year.
Q. Were you ever employed in the Philadelphia post-office?

A. I was. I was appointed there under Col. Page, in the early part of Gen. Jackson's term as President.

Q. Col. Page was postmaster?

A. Yes.

Q. How long did you continue in the post-office at that time?

A. I remained there until the appointment of Mr. White, under President Taylor.

Q. Did you go out immediately then?

A. No; I was there two or three years before I resigned. I think it was previous to 1851.

Q. You went out before a successor was appointed to Mr. White?

A. Yes, sir.

Q. When did Mr. White leave?

A. I don't know.

Q. What was your work in the office?

A. When I first went in, I was a general clerk. I worked around at the box windows, assisted in assorting letters, and after Dr. Lehman came in, I was appointed second clerk.

Q. What President appointed Dr. Lehman?

A. I can't say whether it was Pierce or Polk. He was appointed under a Democratic President.

Q. What did you do when you were general clerk?

A. I assisted in marking letters at the table where the letters were deposited, and did general duty all through the office.

Q. What did you do when you were second clerk?

A. Then I had charge of one of the sides. The employes were divided into two sets. The chief clerk had one part of the mail, and I the other, and we would come on on alternate days, and go off when the southern mail was received and assorted.

2761 Q. Can you tell us whether there was any instrument used in the office for putting the postmark on when you first went in there, when Gen. Jackson was President?

A. Yes; there was a large stamp used, with the words "Philadelphia, Pa." on it.

Q. It had no date?

A. No. My impression is it had no date and no year. That was a subsequent improvement.

Q. Look over these exhibits and see if you find any like the one used?

A. The stamp in use was something of that size, but with no date in it; it didn't have that attachment. (Referring to Defendant's Ex. 135 Powers, Feb. 14, 1878.)

Q. You say the instrument used for postmarking was the same as that, except there was no attachment?

A. Yes; just "Philadelphia, Pa."

Q. At that time, how did they indicate the amount of postage due?

A. They marked them with a pen and ink—25, 18¾, 12½, and 6¼ cents.

Q. Those were the rates at that time?

A. Yes, sir.

Q. Did the rating come to be done by a stamp at any time?

A. There was no change until a change was made in the rates of postage—from 25 to 20 and 15, 10 and 5 cents, instead of 18¾, 12½ and 6¼. I think that was in 1845.

Q. At that time there was that change in the rate of postage?

A. Yes, sir.

Q. You say there was a change made in the method of indicating the rate of postage?

A. Yes, sir.
Q. Describe that change?
A. To facilitate business we had an attachment made to that stamp that I speak of. It had a figure "5" screwed on here.
Q. Screwed on one side?
A. Yes.
Q. That is a block of metal, on whose face was a figure 5?
A. Yes, sir.

(Here follows diagram, marked page 2762.)

Q. Attached by a screw?
A. Yes; that was owing to the fact that there was a greater
2763 number of the 5-cent stamp postage than all the rest put together.
Q. More letters to be rated 5?
A. Yes, sir.
Q. That is when it was to be paid at the place of delivery?
A. Yes, sir.
Q. About what size was it?
A. That was about the size of the figure 5. (Referring to drawing.)

By Mr. WILLIAMS:
Q. Who made that drawing?
A. Mr. Platt.

By Mr. CLARK:
Q. Mr. Platt made this under your instruction?
A. Yes, sir.
Q. What does figure 1 represent?
A. The face of the stamp. This was the handle, and here is where the figure "5" was attached.
Q. In figure 2 what does A represent?
A. The piece screwed on with the figure "5" at the end.
Q. What does B represent?
A. The body of the stamp.
Q. On all those that were used as far back as Jackson's time, the handle was wood with a metal cylinder?
A. Yes, sir.
Q. What does C represent?
A. The handle.
Q. In figure 1, A represents what?
A. The acting face.
Q. B represents what?
A. The face of the postmark.
Defendant's counsel offers in evidence drawings, Figs. 1 and 2, marked Deft's Ex. 202, Rees, June 17, '79.
Q. This stamp having an attachment to the side with the figure "5" on its acting face, was made about the time of the reduction of postage?
A. Yes.
Q. You think that was about 1845?
A. Yes, sir.
2764 Q. Who did the work of having it done?
A. I did.
Q. Did you do the work?
A. I had it made. Mr. Binney made it, under my instruction.
Q. Who was he?
A. A die sinker, at the corner of 3d and Carter's alley.

Q. Is Mr. Binney living?
A. No, sir.
Q. How old was he at the time?
A. Sixty-five or 70 years old at that time.
Q. He made this thing according to instructions given by you?
A. Yes.
Q. You had that attachment put on there to save the labor of writing with a pen and ink?
A. Yes.
Q. Was that ever put into use in the office?
A. Yes.
Q. Used right along?
A. Yes.
Q. Did all the clerks have an opportunity to see it?
A. Yes.
Q. No concealment about it?
A. Not at all.
Q. Did you show it to the postmaster?
A. Yes; it was on the marking table, and was generally used.
Q. It lay on the table where the other stamps were used?
A. Yes, sir.
Q. Did there anything happen about that time which fixes this matter in your recollection?
A. There was a case being tried in Washington, called the Van Ness case, in January, 1849. I was subpœnaed as a witness. Mr. Henry D. Gilpin and Robert C. McMurphy were counsel. They got the information of a certain envelope or letter, which had the stamp on, which the plaintiff a leged was put into the post office at a certain time. Envelopes were not in general use at that time.
Q. They didn't always use envelopes, but folded the letter and sent it?
2765 A. Yes. We were talking the matter over, and I mentioned the fact of this alteration, and I told them if I could get a sight of the envelope, or if it had that figure "5" on it, we could establish the fact that it was not put in until a considerable length of time after they alleged it was. I had been sent to Washington four or five different times to see that envelope, but did not succeed. On January 2d, 1849, or previous to that, I got a letter stating that my wife was about being confined, and requested to go home. She was confined on the night of January 2d, 1849, and gave birth to a boy. Mr. Gilpin said, in case it was a boy, "I will take him in my office to study law when he is old enough." Mr. Gilpin died before he was old enough. The morning after I arrived, Mr. Brent came up, under the impression that I was in Washington. I am not positive whether the lady's name who was suing was O'Neil or O'Donall, but I think it was O'Neil. I was in the postmaster's office, and Mr. Brent came in, making some inquiries about some alteration that had been made. I was in there, and he pulled the back of this letter out, and the figure "5" was covered up with a blotch of ink. I remarked to Mr. Gilpin and McMurphy, at the time this alteration was made, that Mr. Binney let the stamp fall, which struck the foot of the vise and made a dent opposite to where the figure "5" was. I was satisfied that the letter had not been put in for a considerable length of time after they alleged it was. I saw McMurtrie that evening and told him. I went to Washington the next day. I was called on the stand, and Mr. Gilpin made mention of the facts, and while in court

they sent out and got some potash and put over the blotch of ink, and cleared it off, and there was the figure "5."

Q. Potash would remove the writing ink, but not the printing ink?

A. Yes.

Q. You fix this date accurately by the birth of your son?

A. Yes.

2766 Q. The transactions referred to related back to some years before 1849?

A. Yes. The case came on—she commenced her suit in 1849. I don't know how long the governor had been dead. We proved a fraud, or an attempted fraud, on their part, and the case went against them.

Q. The matter was in relation to an alleged marriage?

A. Yes, sir. This letter was said to be one making an appointment to meet the governor at a certain time before the marriage ceremony was performed.

Q. Some time before it could have been postmarked with the figure "5?"

A. Yes, sir.

Q. How long should you think that combination was used in that form in that office?

A. It was used until we commenced using postage stamps.

Q. What were their denominations?

A. Five and 10 cents. Then of course we had no further use for that, and we had stamps with a canceller. The stamp we used subsequently a date in it—not the year, merely the month.

Q. Was there any other form of stamp, except this one represented by Figure 1, which was used, and which would also print the figure "5"?

A. Not at the same time that was being used.

Q. But did any succeed it?

A. Yes.

Q. You saw that made?

A. Yes; this one. (Figs. 3 and 4 of the drawing.)

Exhibit 202, Rees, offered in evidence.

Q. B represents the iron part, the same as before, and C the handle?

A. Yes.

Q. Figure 3 represents an impression made by this stamp, Fig. 4?

A. Yes.

Q. The figure "5" was made inside?

A. Yes, sir.

Q. As there represented in Fig. 3?

A. Yes.

Q. Stamps in that form were furnished the office and used?

A. Yes.

2767 Q. In regard to figures 1 and 2, the stamps made in that form, who paid the expense of having that made?

A. It was paid by the Philadelphia office—by the postmaster.

Q. The stamp represented by Fig. 2, having an attachment on which the figure "5" was engraved, was used from the time that the rates were reduced to the time the postage stamps were introduced?

A. Yes.

Q. This stamp, having the figure "5" inside of the ring of the postmark, was used about that time?

A. Yes.

Q. And succeeded that?

A. Yes; some time previous to the introduction of the stamps.

Q. State whether before you left the post-office, while Mr. White was

postmaster, any instrument was used for the cancellation of the postage stamp.

A. We had a separate canceller.

Q. Do you see anything here that is about the size of it?

A. It was something of that size, but all iron. (Referring to Def'ts' Ex., No. 139, Zevely.) It was not attached, but a separate instrument.

Q. But the same shape of the postmark—wooden handle and metal cylinder?

A. Yes.

Q. That was used after postage stamps were introduced?

A. Yes, sir; at the time the postage-stamps were introduced, we had such an instrument as that. That was previous to 1851.

Q. State whether previous to 1851, at the time you left the post-office, there was any instrument in use which would postmark a letter apart from the postage stamp—to one side of it—and cancel the postage stamp at the same blow?

A. Yes; there was an attachment screwed on similar to this.

Q. You remember seeing that in use?

A. Yes, sir.

Q. You used it yourself?

A. Yes, sir.

2768 Q. Was there any concealment about the use of that instrument?

A. No.

Q. Was it publicly used in the office?

A. Yes. It laid on the marking table, a table as long as this, and at that end was a place where the letters were dropped in by the citizens, and on that side were boxes, and after they were marked they were thrown in, separated.

Q. Do you know Mr. William M. Ireland?

A. Yes, sir; he was appointed to a clerkship under White.

Q. Do you know whether he used that combined instrument or not?

A. Yes; he was the junior clerk, and I guess had more to do with rating letters than any other clerk.

Q. In regard to this attachment of the figure "5," was that attachment secure and strong?

A. Yes.

Q. Mr. Binney did his work well?

A. Yes.

Q. And the attachment of the canceller, was that secure?

A. Yes, sir.

Q. Can't you fix the date when you left the post-office—where did you go when you left?

A. I moved to Camden, N. J. Soon after I moved there, my wife gave birth to a boy, who is now in his 28th year.

Q. When was he born?

A. I don't remember. It was in 1851. I had left the office before that time.

Q. Had 3-cent postage-stamps been introduced before you left the Philadelphia office?

A. I think they had; I am not sure.

Q. You are sure it was before 1851, or at least not later than 1851, that you left?

A. Yes. My second son was born January 2d, 1849, while this trial was going on, and my third son was born after we moved to Camden.

2769 Q. You are perfectly clear about the recollection of these facts, about the birth of your children and about the Van Ness case?
A. Yes.

Cross-examination by Mr. WILLIAMS:

Q. You left the office when Mr. White became postmaster?
A. Not immediately. I was there some time after that. He was appointed the latter part of 1849, and I left in 1851.
Q. Can you state when White was appointed postmaster?
A. The latter part of 1849.
Q. Is that as definite as you can fix it?
A. Yes.
Q. When did Mr. Ireland come into the office?
A. He was one of his first appointments—I think in 1849.
Q. When was this instrument, with the canceller attached, introduced into that office?
A. That was after Mr. White's appointment.
Q. Specify the date.
A. I can't give the month. I know it was soon after White's appointment.
Q. Can you give the year?
A. It was the latter part of 1849, I think.
Q. Who made that?
A. I don't know. My impression is, Mr. Binney did it, from the fact that he had been doing all that work.
Q. Do you know who had it made?
A. No.
Q. How many of them were there in the post-office?
A. I don't recollect but one at that time.
Q. How was it made?
A. The attachment was screwed on similar to that, Fig. 2, except the stamp was round.
Q. Was there any impression on the face of the canceller?
A. Yes, sir.
Q. What was it?
A. I think they were crosses.
Q. What was it made of?
A. Iron or steel.
Q. Was that in the office when you left?
A. Yes.
2770 Q. Was it generally used?
A. Yes.
Q. Were all the letters stamped with the instrument in the office?
A. I can't say whether they were all stamped or not. I presume they were, the most of them.
Q. Were there other stamps in the office?
A. Yes.
Q. Were there separate cancellers in the office?
A. I think there was.
Q. Didn't the government furnish separate stamps, separate postmarkers, and separate cancellers for the use of the office?
A. I have no recollection whether they did at that time or not.
Q. You don't know whether the government did then or not?
A. No.
Q. What was your business there in 1851 and afterwards?
A. Previous to that I had been second clerk, but some time before I

left I was put on night duty in charge of the money packages that came in, and I remained there some time, and then I was put on the last part of night duty, in charge of the sealed bags, and soon after that I resigned and went into the drug and medicine business.

Q. You had nothing to do with the stamping of letters?

A. Not after I went on night duty, except in taking my packages over and stamping them, and it was then when I more particularly used this stamp with the attachment.

Q. After the canceller was attached, you had nothing to do with postmarking and stamping letters?

A. No, sir.

Q. How many clerks were there in the office at that time?

A. Fifteen or twenty. I am not positive of the number.

Q. How many were engaged in stamping letters?

A. Frequently all would take a hand. There was no particular one appointed for that business. When I was second clerk I used fre-
2771 quently to mark and stamp letters, and I think I have seen the chief clerk do the same thing.

Q. When did you first communicate this information, and to whom, that you have given here?

A. Mr. Brown asked me something about it some time ago; I don't recollect the time. He asked me if I had any recollection about the stamps.

Q. How long ago?

A. Two months or six weeks ago.

Q. Who is Mr. Brown?

A. He is employed in the Philadelphia office.

Q. Have you seen Mr. Parker, the special agent?

A. I saw him once.

Q. When did you see him?

A. Three or four weeks ago.

Q. He came to see you as to what you knew about this matter?

A. Yes, sir.

Q. Had this subject ever been before your mind since the time you mention in 1851 up to the time you were questioned about it particularly—I mean in reference to the attachment of the canceller?

A. No; I don't know that it was.

Q. The matter was never recalled to you?

A. I have no recollection of it ever having been. I recollect it particularly, because it was the first thing of the kind we ever used in the office.

Q. What did Mr. Brown say he wanted you to state in the case?

A. Nothing. He merely asked me if I had any information of it.

Q. Asked you if you recollected anything of an attachment at that time?

A. I don't know that he mentioned particularly about the canceller, but whether I had any recollection about the stamps that was used at that time.

Q. Did he mention the dates?

A. I don't know that he did.

2772 Q. Did Mr. Parker ask you anything about the dates?

A. I am not positive whether he did or not.

Q. Didn't he or Mr. Brown tell you it was necessary to prove that this canceller was attached before 1854 or 1853?

A. No, sir.

Q. Didn't you understand that?

A. No, sir. I don't think either of them said anything about the time it should be proved, or anything of the kind.

Q. Are there any other men in the office there who were in when you were there?

A. Mr. Brown and Mr. Stearns, but Mr. Stearns was employed principally in the newspaper department. He would not be where any of these were used.

Q. Any other clerk in the office who was there in 1851?

A. I don't think there is.

Q. Nobody but Brown and Stearns?

A. That is all. Whether Mr. Wonder was there in 1851, or not, I can't say.

Q. How old were you when you went into the post-office?

A. I was quite young. I don't think I was more than 13 or 14 years old.

Q. What did you do there then?

A. I was general clerk under Col. Page. I was principally employed at the box windows, but I took a hand in the general business. A portion of the time I copied the sheets of mails received.

Q. Do you know what became of that instrument with the canceller attached?

A. I do not.

Q. Do you know whether its use was continued in the post-office at Philadelphia from that time forward?

A. I do not.

Q. Don't you know that it was not?

A. No, sir; because I was not in the office after that time.

Q. You received letters from there and posted letters?

A. Sometimes.

Q. You know nothing about what took place in the office after you left?

A. No, sir; I had no occasion to go inside.

2773 Q. How do you fix the date of the attachment of the canceller, in what way do you fix it in your memory?

A. It was just previous to my leaving the office. It was in use then, or rather in 1849, after White had come in—between 1849 and 1850.

Q How do you fix the date in your mind as to the time it was introduced?

A. There were postage stamps used at that time.

Q. Postage stamps used when?

A. I think they were first used in 1847.

Q. How do you fix the date in your mind when this canceller was attached to the postmarker—is there any way that you fix the date?

A. Nothing further than this, that it was not used until after White came in the office. It was not used before.

Q. You are sure it was used after he came in, before you left?

A. Yes, because I recollect distinctly of using it myself.

Q. I understood you to say you did not use it?

A. Oh, yes, I did. When I was on night duty, stamping these packages of money. I remember that I used it then—money packages sent in by brokers.

Q. Had you any knowledge of any claim for this stamp, before this matter was brought to your attention by Mr. Brown?

A. No. I don't think that he even mentioned then anything about it.

Q. What did you tell Mr. Brown?

A. I told him that I had some recollection of the stamps, and I mentioned particularly about this alteration in Fig. 2. I supposed it referred particularly to that.

Q. You referred to that in your conversation with him?

A. Yes.

Q. Did you refer to the other in your conversation with him?

A. I don't know that we did.

Q. Did you in your conversation with Parker, the special agent, refer to that?

A. I am not positive whether I did.

2774 Q. What did Parker say to you when he came to see you about it?

A. He asked me if I had any recollection about the stamps, what kind we used.

Q. What did you tell him?

A. I mentioned the fact about these stamps, about the canceller. I think I mentioned about this canceller being used, but I am not positive about it.

Q. You don't know whether you did or not?

A. No, sir.

Q. You don't know whether you mentioned it to Brown or not?

A. No.

Q. Had you mentioned it to anybody before your testimony here today?

A. I don't think I had.

Q. Hadn't you and Ireland talked it over together?

A. No, sir.

Q. Had no conversation about it?

A. No, sir.

Q. One way or the other?

A. No, sir.

Q. Or with anybody else?

A. No, sir.

Q. Haven't talked with Mr. Clark about it?

A. No, sir.

Q. Nobody knew what you were going to testify to on that subject until you were called here this morning?

A. No, sir,

Q. You are positive of that?

A. Yes.

Q. Give the date of the time when this rating stamp was attached.

A. That was attached when the change took place in the rates of postage. I think that was in 1845.

Q. Do you know whether it was in 1845 or 1847?

A. It was previous to the introduction of postage-stamps, and the reason why that "5" was put there was because there were more of that denomination than any others.

Q. There were different rates of postage?

A. Yes, sir.

Q. And the figure "5" was made because there was more letters paying 5 cents than any other, and it was attached to the postmarker?

A. Yes.

Q. How was it attached?

2775 A. By a square piece, hollowed out a little to fit the stamp, and the figure "5" was at the bottom of that.

Q. That was all the stamp that was made?

A. That was all at that time.
Q. How many of them?
A. At that time there was but one.
Q. What became of that?
A. I don't know.
Q. Didn't you say it was worn out?
A. It was considerably worn.
Q. And thrown aside, wasn't it?
A. I presume it was.
Q. If after that single stamp, where the rater was attached to the postmarker—after that was worn out and used up—if separate raters and separate postmarkers were not used in the office?
A. Yes, sir.
Q. How long were they used after that was laid aside?
A. They were used up to the time that White came in.
Q. How long from the time that this was laid aside up to the time White came in?
A. It might have been a year, more or less, before White came in the office. I am not positive about the time.
Q. When was that made, with the rater attached?
A. In 1845, when the change took place in the rate of postage, from 6¼ to 5 cents.
Q. You are sure it was made after the rate of postage was changed from 6 to 5 cents—after that it was made?
A. Yes, it was made to be used after the rates of postage was changed.

By Mr. CLARK:

Q. Soon after, you say?
A. Yes. As soon after as we could have it done.

By Mr. WILLIAMS:

Q. Why was the rate attached?
A. As a matter of convenience, to save time. We had to make
2776 but one impression, whereas if we had two we had to strike twice. That is the reason why I had it done.
Q. You say you had it done?
A. Yes, it was made by my instructions.
Q. Were you engaged at that time in marking letters?
A. I assisted. I was second clerk at that time.
Q. It was not your business?
A. No, but we had no one appointed particularly at that time to rate letters.
Q. Did the government furnish separate raters at that time?
A. I don't recollect.
Q. Do you know where the postmarking stamps and the rate stamps were procured by the post-office at Philadelphia?
A. I do not.
Q. All the means you have of fixing that date in your mind is this alleged suit that took place?
A. Yes, and the fact of the change in the rates of postage, it was made then, on that account, to take the place of the 6 cents; it being rather an unhandy figure to make, we adopted that plan.
Q. Was that because more letters were posted after the postage was reduced?
A. Yes; there was not only more, but there was more of this rate than all the rest put together.
Q. How long after that stamp, with the rater attached, was discon-

tinued until the use of the stamp with the canceller attached—how long was that time?

A. I should think at least a year, if not more; I have no means of fixing it. I know this stamp, Figs. 3 and 4, was used after the other was discontinued. On this one we had no year or day of the month.

Q. That is the separate postmarker which you refer to?

A. Yes.

Q. Then there was a separate canceller used?

A. We had no occasion for a canceller until after the postage-stamps. We had a separate canceller to this one with the attachment.

2777 Q. After this with the rater attached was discontinued, didn't you use a separate canceller?

A. That is my impression.

Q. How long was that separate canceller used in the office?

A. I could not say how long; they were in use at the time that White was appointed postmaster.

Q. Then this stamp with the rater attached was discontinued before White became postmaster?

A. Yes.

Q. Then this separate stamp and the separate canceller were used how long after White came into the post-office?

A. I could not say how long.

Q. You have sworn, as I understand you, that nobody knew what you would state on this subject until you testified here to-day?

A. It was talked over. I don't know that anything special—I would not say positively that there was nothing said about it.

Q. Didn't you say positively that nobody knew what you would testify to on the subject of this attached canceller until you came in here as a witness?

A. I don't know; I may have said something to somebody.

Q. Do you know whether you did mention it to anybody or not?

A. The matter was talked over.

Q. Talked over with who; can you make any other answer to the question than you have made?

A. No, sir.

Q. When you instructed Mr. Platt, here, to make that drawing, was there anything said about your testimony—what you were going to state—that was done outside of the court-room?

A. Yes.

Q. When you instructed him how to make that, was there anything said about what your testimony would be on the subject?

A. I don't think there was. I was merely giving him my idea about the stamps.

2778 Q. Did you state on your direct examination that you remained in the office until White was appointed?

A. Yes, I was in the office when he was appointed.

Q. Did you convey the idea that you left when he was appointed?

A. I left sometime after he was appointed.

Q. You didn't leave at the time he was appointed?

A. No; I was in the office sometime after he was appointed.

Q. How long after?

A. I don't remember; I left there sometime previous to 1851.

Q. You left before 1851?

A. That is my impression.

Q. How long before 1851?

A. I could not say positively. I moved from there to Jersey, and

that enables me to fix the time. My son was born in Jersey, and he is now 28.

Q. You left before your son Thomas was born?

A. Yes. He was born soon after we moved into Jersey.

Q. How long before your son was born did you leave the office?

A. Three or four or five months.

Q. Then you left there pretty nearly 29 years ago?

A. Yes.

Q. I don't quite understand in reference to this suit. How did you refresh your recollection about this attachment of a rating stamp, in that suit?

A. My son Harry was born January 2d, 1849, and this attachment was not made until a change took place in the rate of postage. That is one of the reasons which enables me to recollect, and the time that this suit was going on.

Q. What was the question in that suit as to the letter?

A. They alleged that it had been put in the office some considerable time after it was—previous to when it was. The fact of this alteration established the fact that the letter was not put in until a con-
2779 siderable length of time after they alleged it was. They wanted to make it appear that it was put in a considerable time previous to its having been put in the office. Owing to this alteration, the fact was established that it was not put in until a considerable length of time afterwards.

Q. When did they allege it was put in the office?

A. I don't recollect the time. It was previous to the alteration being made; how long, I could not say.

Q Was the envelope procured in that case?

A. I am not positive whether it was an envelope or letter written on a sheet of paper; but I saw the back of the letter, with the dent that I spoke of as being made at the time the alteration was made, which was directly opposite the figure "5," which had been covered up with a blotch of ink.

Q. And that was uncovered, and you found the figure "5" there?

A. Yes.

Q. When did you make that discovery?

A. In Washington, some time during the month of January, 1849. That is my impression.

Q. When this blotch was removed, what was found there?

A. The figure "5."

Q. Subsequently, you say, the figure "5" was introduced into the body of the stamp.

A. Yes.

Q. When was that done?

A. I can't say positively. It was some time afterwards, owing to that stamp being worn out. It was used continuously, and the only one, right along; they were getting stamps every once in a while.

Q. When do you say you were appointed in the post-office?

A. Under Col. Page.

Q. What year?

A. In the early part of Jackson's administration; I am not positive what year.

By Mr. CLARK:

Q. I understood you to say that down to the time you left, about 1851, there was no regular stamping clerk?

A. No, sir.

2780 Q. Now one clerk would do it, and now another?

A. Yes.

Q. And you would do it off and on?

A. Yes. When there was a particular rush, I would take it the same as the rest.

Q. You did it down to the time you left?

A. The latter portion of my time I was on night duty 6 or 8 months.

Q. You say the stamp having the rater with the "5" attached was laid aside because it was worn?

A. The thing that succeeded it had the day of the month; the other had nothing.

Q. And the one that succeeded it also had the "5" inside of the circle?

A. Yes.

Q. Did you say that separate raters, with the "5" on, were used also, as well as that combined—did you use a separate rating stamp having a "5" engraved on it, independent of the combination?

A. I don't recollect that. I think there was, but I am not certain about that.

Q. Was the impression on the letter or envelope in the Van Ness case made by this combined rater and postmarker?

A. It was made by this one with a figure "5" attached on the outer rim of the stamp.

Q. Your second son was born during the progress of that trial?

A. Yes; on January 2d, 1849.

Q. You have stated that separate cancellers were used after the introduction of postage-stamps?

A. Yes, sir.

Q. As well as this combination?

A. Yes, sir.

Q. You had some conversation with me last night?

A. Yes.

Q. Did I ask you anything about your testimony, as testimony?

A. No.

Q. Did I ask you anything as to what was said in the office?

A. Yes. I had said nothing to anybody what I was going to testify to.

Q. My questions related to what was done in the post-office back of that time?

A. Yes.

2781 Q. Do you recollect whether I asked you anything in regard to whether a combined canceller and postmarker was used?

A. I don't recollect.

By Mr. WILLIAMS:

Q. Didn't you swear that you had told nobody what your testimony would be here before you testified here to-day?

A. I had not had any conversation with anybody as to what I was going to testify to.

Q. I asked you if you had communicated to anybody the substance of your testimony here to-day, and you denied that you had, didn't you?

A. I hadn't told anybody what I was going to testify to.

Q. What do you mean by that? Do you mean that you haven't told

anybody that you knew of the existence of this canceller attachment, or what do you mean?

A. Not in so many words. I didn't state to anybody what I was going to testify to.

Q. You stated positively that nobody knew what your testimony would be, on that subject, before you came on the stand here to-day?

A. I imagine not. I didn't say to anybody what I was going to testify to.

Q. And you never mentioned the subject to anybody?

A. We talked the matter over, but I didn't tell anybody what I was going to testify to. I mentioned to Mr. Brown what my recollection was in regard to stamps, more freely than to anybody else; but I didn't mention to him what I would testify to.

Q. You expected to testify, if you told him the truth, to testify to what you told him?

A. Of course.

Q. Didn't he inquire for the purpose of ascertaining whether you could be a witness or not in this case; didn't he come to you for information?

A. No; I was in the office, and he merely asked me if I had any recollection, knowing that I had been there longer than anybody else.

2782 Q. Where was this conversation with Brown?

A. In the Philadelphia post-office.

Q. Didn't you know that he asked you that question with a view of having you as a witnesss in some case?

A. There was nothing said at the time. I went there to see Mr. Brown on another matter, for the purpose of getting information of a party who wanted to purchase goods, and it was then that he asked me if I had any recollection of these stamps. There was nothing said about my being a witness, and I had no idea of anything of the kind until some time afterwards.

Q. When afterwards?

A. Two or three weeks afterwards.

Q. How did you come then to know you were to be a witness?

A. Somebody came up to the store.

Q. Who?

A. Mr. Bingham was one.

Q. Who is he?

A. Assistant postmaster in Philadelphia.

Q. Did you see Parker?

A. I really don't know the gentleman by name, but I saw a gentleman at the Philadelphia post office. Whether it was he or not, I don't know.

Q. Bingham and somebody came to see you about being a witness in this case?

A. I didn't see him. I was not in the store, and I went down to the post-office afterwards.

Q. You met them there and talked the matter over about being a witness?

A. No. I didn't know that I would be a witness until afterwards.

Q. When did you find out afterwards that you were going to be a witness?

A. Two or three days ago I was told that I would be wanted to come as a witness—not at the time I was there.

Q. What do you mean when you said that you didn't know you were

to to be a witness in this case until Bingham and somebody called on you?

A. They called on me, and I was not in, and I went down and saw them.

2783 Q. When you saw them at the post office, what was said and done there about this matter?

A. I think the gentleman I saw there remarked that I might be called on, but didn't say positively that I would, and I didn't know that I would until two or three days before I came.

Q. Who told you then, two or three days ago?

A. I don't recollect whether it was Mr. Bingham or the special agent.

Q. What did he say to you then?

A. That probably I would be called as a witness.

Q. When were you called on as a witness; how do you happen to be here?

A. I came here with those gentlemen.

Q. Who invited you to come?

A. Mr. Bingham and the special agent.

Q. That was two or three days ago?

A. Yes.

Q. What did they say about it?

A. Merely mentioned the fact that I would be called on as a witness.

Q. You were not subpœnaed?

A. There was no subpœna.

Q. They told you that they wanted you to come as a witness?

A. Yes.

Q. Do you say that was the first time you ever knew that you were going to be a witness?

A. Yes, because I hadn't been subpœnaed.

Q. You don't remember what was said between you and Bingham and the other gentleman, at the time you were at the post-office, about this matter?

A. Merely asked me if I had any recollection of the stamps used at that time.

Q. He repeated the same question to you that the first gentleman did?

A. Mr. Brown was the first one I had any conversation with, and I afterwards went to the office and saw Bingham, and I think the postmaster was in the office at the time. I was there but 4 or 5 minutes.

2784 Q. Who is the postmaster now?

A. Gen. Hartranft.

Q. Bingham has been postmaster there?

A. No; he is a brother of the postmaster.

Q. How long has this assistant postmaster been in the office?

A. He was appointed under Gen. Bingham.

Q. How long ago?

A. Ten or twelve years ago. I don't recollect whether Bingham was there 4 or 8 years.

Q. Have you been acquainted with Bingham long?

A. Only since he has been in the post office.

Q. How long ago was it Brown called on you about this?

A. He didn't call on me. I went to the office for some information. I can't say exactly the time—four or five weeks ago.

Q. You say Brown has been in the post office a long time?

A. Yes; he was there when I was there.

Q. He knew that you had been a clerk in the post-office?

A. Yes.

By Mr. CLARKE:

Q. In saying that Brown and Mr. Stearns are the only people who were there in 1849 and 1850, you mean they are the only ones you recollect?

A. They are the only ones I recollect.

WILLIAM M. IRELAND called on behalf of the defendant. Sworn.

By Mr. CLARKE:

Q. What is your age?

A. 45.

Q. Where do you reside?

A. Washington City at present.

2785 Q. Your occupation?

A. Pension and patent attorney, and secretary of two or three organizations.

Q. Have you been employed in the Philadelphia post-office?

A. Yes.

Q. When first?

A. In the spring of 1849 I was appointed. I don't know the date. I think about the 1st of May or the last of April.

Q. How long did you continue uninterruptedly?

A. I remained there until some time in the fall of 1855.

Q. Who appointed you?

A. Mr. White.

Q. He was appointed by President Taylor?

A. Yes.

Q. What sort of an instrument was used for postmarking letters at that time?

A. We had a stamp something like that, without the burr on the side (referring to Def't's Ex. 135 Powers). That was the general shape and size of it, and the material was metal of some kind. There was a mortise for the day and month, and there was a figure "5" down in the bottom, on the face of the postmarker, and we had one with a figure 10 in it, and one without any rate, which was used where there was high rates of postage. For the 5 cents letters we would use the "5"; if there was 15 or 20, whatever the high rates might be, we would put the plain one on, and have an extra stamp for those. I remember distinctly the 20 cent separate rater.

Q. Wasn't postage stamps used?

A. Yes, they were used then.

Q. When they were used you would not use these stamps with the figures?

A. There was no occasion for them unless there was extra postage due.

Q. Postage stamps that were used were of what denomination?

A. 5 and 10 cents.

2786 Q Do any of the figures in Ex. 202 Rees, correspond with the postmarkers then in use?

A. Figure 3 corresponds with the one that was in use, and 4 being the upright, and this the face of it. Then if you take the figure "5," in the centre, off, would correspond with another one. Without the attachment figure 1 would represent another one of the postmarkers, that being the plain one.

Q. Didn't that other one have a date?

A. Yes. It does not perfectly represent it—a general idea.

Q. Were there separate cancellers for the postage stamps which you say were used?

A. Yes.

Q. What was their construction?

A. It was very similar to the postmarking stamp, except smaller; it had a wooden handle with a piece of metal attached to it, about an inch long and about the size on the face of it of a 5 cent nickel—about the size of the canceller in Def't's Ex. 135. The face of it was exactly like that—barred.

Q. What were your duties?

A. General duties. In those days the office was organized entirely different from what it is now. We all would take a hand here and there and perform all kind of duties. There were four parties, two having charge of the day work and two night parties. One of the day parties was under the charge of the chief clerk, and the other was under the second clerk, and we had what was called long and short days. One set would go on duty at five o'clock in the morning and remain until breakfast, and the other party come on at eight and they would go off at three, and the other remain on until seven in the evening, and that is the way I fix the time by having to get up at five o'clock in the morning.

2787 Q. Did you do any stamping?

A. Every day, more or less.

Q. What did you do most?

A. I don't know but what I did more stamping for a short time after I went in than anything else. Subsequently I was transferred to different places to learn the different branches of the business so we could take one another's places when one was sick.

Q. State whether any instrument was used which would postmark an envelope and cancel a postage-stamp at the same blow.

A. There was one some time after I went in.

Q. How long after?

A. No great length of time, 5 or 6 months, I think it was in the fall of 1849, there was one made.

Q. How was it made?

A. It was one of the postmarkers with a canceller stamp, it being detached from the handle and then screwed on to the side, so that when it came down it would make the two blows.

Q. In stamping letters you always strike the ink pad and then the letter?

A. Yes, the usual method is to strike the pad every time.

Q. You say that combination was attached by screws?

A. Screws or rivets.

Q. Was it held tight and strong?

A. Yes, it did its work.

Q. Do you know who made that instrument?

A. No, I remember it was taken to a shop in some alley near the post-office, but I don't recollect the name of the party.

Q. Who had it done?

A. I had it done.

Q. It was done according to suggestions you gave?

A. I gave the man the idea of what I wanted done, and he fixed it up. I took the two pieces and told him I wanted to get the two fixed

2788 together in some way, and he put in the rivets or screws and fastened them together side by side.

Q. You took a separate canceller and a separate postmarker?

A. Yes.

Q. They were stamps that had been used in the office?

A. They were.

Q. Was that thing so put in use in the office?

A. Yes.

Q. No concealment about its use?

A. No, we would use it and throw it down.

Q. Where anybody could see it?

A. Yes. All the stamps were lying on the table, and sometimes on a little rack above the table, and whoever would go to the table would take that up or any other stamp and use it.

Q. While this was used, was the separate cancellers and separate postmarkers in use?

A. Yes, they were all lying around there.

Q. This you used when you were stamping?

A. Yes, sir, and have used the others. I have seen other clerks use that, and when I have gone to help stamp, I have picked up anything that was convenient.

Q. Was the postmarker ever used to cancel the postage-stamps?

A. Yes, I have seen it used.

Q. And the separate canceller also?

A. Do you mean at the time that this combination was in use?

Q. Yes.

A. No, not at that time, they didn't use this, but they used a separate canceller and a separate postmarker; they didn't put the name of the office over the postage stamp.

Q. Was there any rule against it?

A. I think there was a rule against it at that time; I so understood it. I was instructed not to do it.

Q. You saved yourself the trouble of striking twice, making this combination?

A. Yes.

Q. That combination was put into use there and used?

A. Yes.

(Here follows diagram marked page 2789.)

2790 Q. For how long?

A. I don't know.

Q. Was there any change made in it?

A. There was a change. The first one was close up against the postmarker—the cancelling part was close on to the side of the postmarker, and that was changed by inserting a little piece of metal between the two—a little piece of metal concave on both sides, so as to put the canceller a short distance from the postmarker—perhaps 1 8 or 1-4 of an inch apart.

Q. In that fashion?

A. Yes; figure 1 of the drawing shows it.

Q. Explain what figure 1 means.

A. That shows the acting face of the combined instrument after it had been altered.

Q. What is figure 2?

A. That is the upright view—the vertical section of the same instrument.

Q. What do the letters mean?

A. A represents the postmark device. B the cancelling device. C C C the three rivets or screws by which the two were united, and D a piece of metal separating the two.

Defendant's counsel offers paper in evidence, marked Def't's Ex. 203 Ireland, June 17, '79.

Q. Was that thing put in use—this second combination?

A. Yes.

Q. Did you use it?

A. Yes.

Q. Used publicly, like the other—in the office, openly?

A. It was openly done. I take it for granted it was used. I could not say that any particular clerk used it, but I used it.

Q. And at the same time were these separate cancellers also used?

A. Yes; they were all being used together.

Q. How long do you remember the existence of that instrument in that form?

A. I can't fix the time—it laid around there. I can say positively that I didn't see it after 1853.

Q. How do you fix that date?

2791 A. Because at that time I was put in charge of the registered-letter department, where I had no particular occasion to be at the stamping table.

Q. You don't remember to have seen it since that time?

A. No, sir.

Q. You say the first combination without an intervening piece was made some time in the fall of 1849?

A. I think so, as near as I can fix the date. It might have been along towards the winter of 1849 and '50.

Q. This second combination came right in and took the place of the other?

A. Yes.

Q. And did the other continue about the office until 1853?

A. I presume it did.

Q. How late did you use it any?

A. I could not say positively. I have no doubt I used it up to some time in 1853

Q. It was around there for use?

A. Yes.

Q. In regard to both of these combined instruments, was the work well done—did it postmark and cancel?

A. It did. I thought it did it first-rate.

Q. Did it do it as well as when you used the separate instruments?

A. Yes, sir.

Q. You say you left the post-office in 1855?

A. Yes.

Q. Were you employed there again?

A. Yes. I left on account of a severe spell of sickness that I had in 1855. In the spring of 1861 I was induced to go back to the office again by Postmaster Walborn, appointed by Mr. Lincoln.

Q. And continued there how long then?

A. Until they transferred me to the department in Washington, in

1864. I then went to the department in Washington, and in the winter of 1864 I went back again to the Philadelphia post-office.

Q. How did you find the postage stamps were cancelled when you went back into the office under Walborn?

A. About the same way as before—with the two instruments.

2792 Q. The separate instruments?

A. Yes; and frequently they were being cancelled then with the postmarker, in 1861. There was no combined instrument at that time.

Q. Was there any combined instrument made while you were there, between 1861 and 1864?

A. There was about the time they moved the post-office from one building to another. At that time I was the assistant chief clerk of the office, and we got up one very much like the first one—a little different manner of putting it together, but the idea was the same; the canceling-stamp was fixed to the side of the postmarking stamp. In talking to one of the clerks one day—Mr. M. C. Bogia—I told him I thought if he would get up something that I would describe to him he would save trouble and labor. I gave him the idea, and he went somewhere and had the instrument made, and I have seen that used.

Q. You told him what you had done?

A. Yes. I told him that I thought he could save himself a great deal of trouble and labor, and save his arm a great deal of wear and tear, if he would get up something I would describe to him. I then told him that I had made a thing years before, and told him just what it was, and suggested certain changes, and took a paper and made a rough sketch of what my idea was; and he took it away and brought back the stamp, made as I had told him, and that he used and others used—everybody used it, I guess—that was the only stamp that was used.

Q. Did the department begin to furnish combined stamps during Walborn's term of office?

A. Yes.

Q. How constructed?

A. That is the general shape; there was a handle and cross-bar and two pieces; it was a metal stamp. (Referring to Def't's Ex. No. 2, J. A. S., Ex'r.)

Q. It was like that, except the canceller was made of solid metal?

2793 Q. Yes; it didn't have that piece of rubber on it. These two pieces were fastened to the cross-bar by a screw on top.

Q. That was after you had described this matter to Bogia?

A. Yes.

Q. What difference was there between this, which was made in Walborn's term of office, and the one you made under Mr. White?

A. In the first one, the screws or rivets went all the way through the cancelling stamp, and on the other one there was a part of the cancelling stamp cut away, so to give a square surface to the head of the screw or rivet to go in.

Q. Were the screws in a line?

A. No; they were made in a triangle, two below and one above.

Q. Did those screws hold it tight and strong?

A. I believe they did.

Q. There was no trouble or difficulty about it?

A. I don't know of any.

Q. At the time that you described that one to Bogia, and he had this combination made, state whether you ever had seen or heard of any other combined postmarker and canceller.

A. I never had.

Q. Never seen or heard of one?

A. Never had seen or heard of anything of the kind, any other than my own.

Q. You got your idea from no other source?

Q. No, sir.

Q. You hadn't forgotten what you had done in Mr. White's term of office?

A. No.

Q. You remembered that stamp distinctly?

A. I remembered it because I made this one from it, and described it to Mr. Bogia.

Q. About what time was the removal of that post-office, by which you fix the date?

A. We moved in February, 1863. My impression is, it was about Washington's birthday.

2794 Q. Were the first combination that you speak of, and the second, with the additional piece between the canceller and the postmark, made before or after the 3-cent stamps came into use?

A. Long before. It was made during the time of White, when 5 and 10 cent stamps were used.

Q. Do you remember when the law was passed relating to 3-cent stamps?

A. I think it was in the winter of 1850 and '51. January, February, or March, 1851, they changed the rate from 5 and 10 and the multiples thereof to 3, 6 and 10 cents, and made prepayment compulsory.

Q. And it was before that that you made this combination, and about that you have no doubt?

A. I am as clear as I can be of anything, that I used that on the 5 and 10 cent stamps that went out of use in 1851.

Q. Do you recollect Mr. Rees being a clerk in the office when you were there?

A. Yes, he was there when I went there first.

Q. How do you fix the date when you went there—how old were you?

A. I was 15 in March, and I received the appointment shortly after that, and was sworn in. There was considerable talk about my being under age; 16 was the age for any one to be employed in the U. S. service, but I was a good-sized boy, and no one asked me my age. There was something in the newspapers about it afterwards.

Q. That fixes 1849, as the year you went in?

A. Yes.

Q. The third machine made under Walborn did its work?

A. Yes.

Q. As well as the separate instruments?

A. Yes.

Q. So far as you know, it did its work well?

A. Yes.

Q. Look at this piece of metal marked Def't's Ex. 204, Ireland, June 17, '79, and state what that is.

2795 A. That is one of the old postmarking stamps that was used in the Philadelphia office, and it is one that had that last attachment, to the best of my knowledge—at least, that is the way it shows. I don't recollect that particular thing, but that was the way that attachment was made, the canceller put on there and riveted on through those three holes. That is one of the postmark stamps of Philadelphia; there is no doubt about that.

Article offered in evidence and marked as above stated.

Cross examination by Mr. WILLIAMS:

Q. How do you know that is an old Philadelphia stamp?

A. From its general appearance. It certainly is fixed up just the way that I had that one—the holes show the way in which the holes were bored.

Q. You don't know when this was made, or when those holes were made. in this particular one?

A. No, I do not.

Q. Prior to 1851, it was optional with persons posting letters to pay postage in money or put on stamps?

A. Yes, or sending them unpaid—three ways. They could pay in money, put on a postage stamp, or send it unpaid.

Q. How long before 1851 did the people have that option?

A. They had it when I went into the office in 1849. In the office I was in before I went into the post office, I know I used to take letters down, and sometimes I would prepay them in money and sometimes I would send them unpaid.

Q. What proportion of the letters do you think were postage-paid with stamps prior to 1851?

A. I could not say.

2796 Q. How were the rates put on the letters when you went into the office?

A. If it was a letter only weighing the one rate, we used the stamp which I have described with the figure "5," corresponding with No. 3 on Ex. 202. If it was a 10-cent rate, we used a stamp similar to that, and in place of the figure "5" there, there was a "10." If it was above that, say 20 cents, or even up to 90 cents, we had the plain stamp without any figure in, and put on the figure with a separate stamp. That was the way we indicated how much postage was to be collected at the other end of the line.

Q. Were there any separate rating stamps in the post-office while you were there?

A. Yes, I remember distinctly a "5" and "10" cent one, and a "20" cent.

Q. Were they never used?

A. Frequently used.

Q. Then it is not correct to say that that was the way you indicated the rates of letters altogether?

A. If you put the word "altogether" in, it is not correct, but I didn't say that.

Q. I asked you how the rates of the letters were indicated in that post-office?

A. I went on and described two or three ways. I don't want to be understood as saying that was the only way, because we had a separate stamp—a "5," which we put on.

Q. Then there were separate rating stamps that were used at that time?

A. Yes, sir.

Q How long were those used, this one with the rate inside the stamp and the separate raters used, before there was another instrument introduced?

A. I suppose it was six or eight months—within a short time after I went into the office another instrument came into use.

Q. What instrument was that?

A. The one that I described with the cancelling instrument attached to the postmarker—the first one, where they came close together.

Q. That was to cancel postage-stamps?

A. Yes.

2797 Q. How were the rates indicated on the letters?

A. They were indicated with one of these loose stamps or one of those stamps with the rate. If a letter had a postage-stamp on it, and that stamp was sufficient to carry the letter to its destination, they didn't put the rate on, because the postage-stamp indicated the rate. This stamp that I speak of was only used where the postage-stamp was on the letter. The rates were indicated by these other stamps where there was no postage-stamp.

Q You say you caused that canceller to be attached to the postmarker?

A. Yes, sir. I took one of the postmarking stamps and one of the cancellers that had been used, took the handle off the canceller and had the two put together.

Q. Was that generally used in the office after you had it made in that way?

A. I presume so. I don't know what other clerks did: it was lying on the table.

Q. There was separate postmarkers and separate cancellers used at the same time?

A. Yes, they were all there; I would not say whether the separate ones were used or whether that was used altogether. I could not say what was done when I was not at the table.

Q. You only know that this was made and laid on the table?

A. Yes, and that I used it.

Q. Did you use it altogether, when you stamped letters?

A. I don't think I did; I have gone to the table and found somebody else using it and I would take up some other stamp and use it, because that was the only one there was.

Q. Was that continued in that way until 1855, when you left—what became of that one that you made?

A. I don't know.

Q. When did you last see it?

A. I hadn't seen it since 1853.

2798 Q. But you were in the office for two years after?

A. Yes; but I could not say positively having seen it after that time.

Q. You were in and about the stamping-room?

A. No; I was in the registered letter department. I had no occasion to go to the stamping table except when I would go to the table to stamp my letters.

Q. The duties of the office at that time had been devolved upon different clerks?

A. Yes.

Q. So there had been a change in the business?

A. Yes; there were changes constantly made.

Q. When did you return to the post-office?

A. In 1861.

Q. When you went back they were using separate postmarkers and separate cancellers?

A. They had, and they were using also just the plain postmarking stamp for cancelling the stamps.

Q. They used the postmarker for cancelling—that is, they impressed on the postage-stamp the name of the city and the date?

A. Yes.

Q. Wasn't that a common way of cancelling stamps at that time?

A. I would not like to say that it was or was not.

Q. Any stamps indicating the rates at that time?

A. If a letter was overweighted, they had a stamp "due 3" or 6, or whatever it might be.

Q. They had the rating stamps for other matter besides letters?

A. They used the old post-marking stamps; no printed matter could go until the postage was paid.

Q. How long did the practice continue that was in operation when you went back into the business in 1861?

A. Of cancelling the stamp with the postmarker; is that what you mean?

Q. With the separate canceller?

A. It continued until 1863, when we made this other arrangemet, but about half the time they were cancelling with the postmarker and didn't use the separate canceller at all. They were stamping the postmarker on the letter.

2799 Q. What time in 1863 was this made?

A. It was shortly after we moved; I can't fix the time; sometime after we got located in the new office; perhaps two months after; I called Mr. Bogia's attention to the matter and he had this one made.

Q. You had been there two years—from 1861 to 1863—and this idea of economy had never struck you until about February, 1863, I understand?

A. No, sir; don't understand me that way.

Q. You didn't suggest anything?

A. No; I didn't suggest anything. It was not because it didn't strike me at all. Perhaps there was a reason for that. Prior to removing the office, my desk, being the assistant chief clerk, was far removed from the marking table. When we got up to the other office the marking table was right in front of me, and I could not help seeing them.

Q. Did the government furnish postmarkers and cancellers in 1863 to the Philadelphia office?

A. I believe they did.

Q. Separate ones?

A. I believe they did. I have no recollection of our having any made ourselves.

Q. How long did the practice of cancelling the postage-stamp by the use of a postmarker continue in that office?

A. Up to about 1863. It prevailed right along, unless we got a wrap from the department about it, and then they would go for a while, and then take it up again.

Q. When did you leave the office the second time?

A. I was taken to Washington in the summer of 1864—I think in July.

Q. How long did you continue in Washington?

A. Until December, 1864, when I went back to the Philadelphia office.

Q. How long did you stay there then?

A. Until the latter part of 1866.

Q. Where did you go then?

A. I went outside and looked after my own business, and in 2800 1867 went to Washington again. They called me there as chief

clerk. I was chief clerk of the 3d Assistant Postmaster A. N. Zevely.

Q. When did you and to whom did you first communicate these facts that you have stated here to-day as to your making these instruments in 1849 and 1863?

A. The first one I communicated to Mr. Bogia. Of course I have no doubt I told the clerks and showed them the one I first made in 1849. I was proud of what I had done, and in 1863 I told it to Bogia. In 1867 I told it to Judge Norton in Washington, and laughed and joked with him about it. He made my acquaintance by coming into my room there.

Q. Anybody else?

A. I talked around in the department pretty generally—laughed and talked about it. I didn't make any concealment of it.

Q. Can you name anybody else?

A. No; I could not name any one. Zevely, I could name him.

Q. Do you remember the correspondence that took place between Zevely and Mr. Norton?

A. No, sir; I know there was correspondence, but I never saw it.

Q. Do you remember any correspondence that took place between Zevely and the postmaster in New York?

A. No; I know there was, but I never saw it.

Q. You knew that Mr. Norton was there in Washington while you were a chief clerk applying to the Postmaster-General for compensation for the use of this stamp, didn't you?

A. I understood so; I didn't know it.

Q. Didn't you know that?

A. No; I had no means of knowing it.

Q. Were you there when Mr. Cresswell was Postmaster-General?

A. Yes.

Q. Are you ignorant of the fact that there was an extended examination there before him?

A. No; I am not ignorant of the fact.

2801 Q. Didn't you know that Norton was there at that time applying to the Postmaster-General, and he was examining this case, under a resolution of Congress, in order to determine whether he was to have pay?

A. I believe it, and always did believe it; but I would not swear that I knew it to be so, because I didn't see the papers and was not present at the examination.

Q. You were in the Post-Office Department and knew of the pendency of this claim?

A. I knew there was an examination going on to determine something in connection with Mr. Norton's claim for this patent; what it was, I didn't know.

Q. Did you know of an application before Congress for that purpose?

A. I had heard of one.

Q. You knew there was such an application pending there for years?

A. I had heard of it.

Q. Didn't you know that Congress called upon the Postmaster-General for information and papers in relation to Norton's claim?

A. I didn't know it; I don't know that they did.

Q. Did you know anything about a suit in the court of claims, where the question came up as to compensation for the use of this stamp?

A. I didn't know anything about it. I heard there was either an application to allow the case to go the Court of Claims——

Q. You didn't know that the Postmaster-General and the Assistant Postmaster-General were witnesses in that case?

A. No, sir.

Q. Did you ever claim anywhere to be the inventor of this double-combined postmarking stamp?

A. I always claimed that I was one of the earliest that got it up, if not the earliest; but I didn't claim to be an inventor, because I never took a patent out.

Q. Did you inform the Postmaster-General, while this claim was pending there by Norton, that you had made this instrument
2802 long before his patent was issued?

A. I don't think I ever said a word to the Postmaster General on the subject. I never went to him unless I was sent for, and he never sent for me on that case. I think I told Zevely of it.

Q. Do you know whether you did or not?

A. I think more than likely I did.

Q. Haven't you told Mr. Norton, in Washington, more than once that he ought to have pay from the government for the use of this stamp, and didn't you assist him in trying to obtain papers and evidence for the purpose of establishing his claim?

A. No; I never assisted him. He came to me once to ask me to assist him, and I went to the Post-Office Department to introduce him to some of the clerks, and he said he wanted to employ me to assist him; but that was the last I ever saw of Mr. Norton. I was willing to be employed if it was necessary, but I was not employed, and I never did assist him.

Q. When was that?

A. About two years ago this summer.

Q. You didn't say to him, then, that you were satisfied that the Post-Office Department were trying to keep the papers away from him?

A. No, sir.

Q. Do you say you went and introduced him?

A. He came and asked me, and we went over there and I did introduce him to one gentleman he didn't know before.

Q. To whom?

A. Mr. Morton, my successor in office. I supposed he was the acting 3d assistant at the time.

Q. Referring back to the time when a claim was pending before the Post-Office Department for compensation for the use of this stamp by the government, did you then give Mr. Norton any encourage-
2803 ment or any assistance in procuring this claim?

A. I never gave him any assistance in prosecuting it.

Q. You didn't say to him you thought he ought to have pay from the government for the use of this stamp, or something to that effect?

A. I would not be surprised if I said, what I have always said, that whoever was the inventor of that stamp ought to have something, and I was out of it because I hadn't got any patent. In answer to your question in regard to compensation, I want to say that I never knew about the claim for compensation. It was a claim as to the ownership of the patent that I heard so much about. It was for that that they took testimony.

Q. When did you first hear of the pendency of the present suit?

A. I read it in the newspapers about the time it was started, I think.

Q. About two years ago?

A. About that time.

Q. Do you know Mr. Parker?

A. Yes; have known him for years.

Q. He is special agent of the Post Office Department?

A. He is a special agent.

Q. You know he is engaged in getting up this evidence that has been produced here to day?

A. I do not know it.

Q Did you ever have any communication with him upon the subject?

A. Yes.

Q. When?

A. Four or five weeks ago.

Q. How did that happen?

A. He met me one evening; I was sitting on my door-step and he passed, and after passing he turned around and came back and asked me if I knew anything about the stamp canceller, and I told him some little about it in general terms. We talked the matter over.

Q. Was he the first person to whom you spoke upon the subject since this suit was commenced?

2804 A. I think about the first time I read it I made comments about it to different people. I would be very apt to.

Q. You don't know whether you did or not?

A. I would not say that I did or did not.

Q. Have you had any communication with Parker on the subject since that conversation?

A Yes; several times, when I would meet him we would talk about it.

Q. You are here by his request?

A. He communicated to me personally—asked me if I would come. I presume he was sent to ask me to come.

Q. You don't know whether he was sent or not?

A. No.

Q. At any rate you are here by his request?

A. He was the means of communicating a desire to have me here.

Q. When was that?

A. Four or five days ago; since I saw you in Washington.

Q. Any arrangement between you and him about coming?

A. What do you mean about "arrangement"?

Q. Don't you understand what "arrangement" means?

A. He asked me whether I could come, and I fixed my business, and when I found I could come, I told him I would.

Q. That is all?

A. So far as the coming here was concerned?

Q. Who is to pay your expenses?

A. I presume the government will have to pay my expenses; nothing said about it yet.

Q. When you went from the post-office in Philadelphia to Washington, in 1864, what position did you take there then?

A. Chief clerk of the 3d Assistant Postmaster-General, Mr. Zevely.

Q. When Zevely retired, who took his place?

A. He was succeeded by Gen. Terrell.

Q. Did you continue to be his chief clerk.

A. Yes.

Q. Who succeeded him?

A. Mr. Barbour.

2805 Q. Did you continue in the same position?

A. Yes, up to the time I left the department, the last of October, 1876.

Q. Don't you know that Postmaster Creswell referred the examina-

tion of this case to Mr. Terrel at the time the matter was pending before him?

A. I do know that the Postmaster-General referred something in connection with the postmarking and cancelling stamp to Gen. Terrel for investigation, but what the specific object of the investigation was I don't know. I was not present at any of the interviews.

Q. You were not present?

A. No, sir; I was managing the business of the bureau while Terrel was taking this testimony.

Q. Did you write any of the letters that were written by Zevely or Terrel in reference to this stamp?

A. I may have done so. My duties as chief clerk might have required me to have written letters. The records of the department will show.

Q. You never before have been a witness anywhere in reference to this combined stamp, have you?

A. No.

Q. Do you know Mr. Wheeler, of Cleveland, who set up a claim to be an inventor?

A. Mr. Charles E. Wheeler? Yes, sir.

Q. You know he claimed to be an inventor?

A. So he told me.

Q. I wish to call your particular attention to the time when Mr. Norton was proceeding with the investigation before Postmaster-General Creswell, and ask you if you had any conversation with Mr. Norton at that time about the stamp?

A. I might have done so.

Q. Do you know whether you did or not?

A. I don't know whether I did or not.

Q. You have testified that you informed him that you had made this stamp, or something of the kind. Did you tell him when you had made it?

2806 A. Yes; but it was long before that time when I told Mr. Norton.

Q. Did you tell him, in the conversation you had with him, when you had made this instrument?

A. I think likely I did.

Q. Do you know whether you did or not?

A. I would not like to say positively whether I had told him the time.

Q. When did you have that conversation with Mr. Norton?

A. When I first got acquainted with him. I think just after I went to the department, in 1867, I made Mr. Norton's acquaintance.

Q. What was he doing there?

A. I never knew. He happened to come around Zevely's room, and I think he introduced me to him.

Q. Wasn't he there at that time on his business for obtaining compensation from the department for the use of his stamp?

A. Not to my knowledge.

Q. How did it happen that you and he had this conversation about the stamp, if he was not there for that?

A. I didn't say he was not there for that.

Q. How did you happen to make this communication to him at that time?

A. Mr. Wheeler was in my room, I think, at the time Mr. Norton came in, and he introduced the subject of stamps, and we all talked about the stamps, and I said to him then that I was one of the early

makers of that stamp, and he laughed about it and said, "Why didn't you"—or somebody asked why I didn't take a patent out; and my remark was, I was a boy, and didn't know enough about patents to do it.

Q. Did you state the year in which you made it?

A. I think I told him just as I have stated here to-day, as to the time I made it—1849, or thereabouts.

2807 Q. Did I understand you to say that in 1849 they were using separate instruments in cancellers in the post-office at Philadelphia?

A. I said that they had the separate instrument there, and used them.

Q. And continued to use it while you were there, more or less?

A. Yes.

Q. When that was used, where was the letter postmarked?

A. When the separate instrument was used for cancelling the stamp, we tried to put the postmark about the centre of the top.

Q. Separate and apart from the stamp?

A. Yes; that was when the separate instrument was used.

Q. When did the government commence to furnish this combined stamp to the office in Philadelphia?

A. I think it was in 1863, because it was after we moved up into the present location, and we moved there early in the spring of 1863, and it was after that that this double stamp came it.

Q. Can you fix the time?

A. I cannot fix the exact date.

Q. When can you fix the time when you suggested the construction of that stamp?

A. That was almost immediately. I think it was within a month.

Q. And it was soon after that that the government commenced furnishing them?

A. I don't say soon; it was some time after that.

Q. How long?

A. Six or eight months; but it was within that year I am confident, because in the summer of 1864 I left, and I know the stamps had been in use for some months before I went away.

Q. You say you never had seen or heard of any such combined stamp prior to the time you had that one constructed in 1863, except the one you had made in 1849?

A. The two that I had made in 1849—the first one and the second one—were the first and only ones I had ever seen or heard of until I made the one in 1863.

2808 Q. There never was one in the Philadelphia post-office?

A. I never saw one.

Q. Could there have been one there, and been used, without your knowledge?

A. I don't think it could, though it might have been.

Q. Do you remember anything about the order from the Postmaster-General as to the separate cancellation of the stamp, and postmark the letter at a different place—postmarking the letter off the stamp?

A. I remember that we were continually being reprimanded for cancelling the postage stamp with the postmark, and not using the canceller for that purpose. Some office would report the fact to the department, and we would be reprimanded.

Q. You don't remember any distinct order made by the Postmaster-General on the subject?

A. I can't recall any.

Q. Who was postmaster at Philadelphia when you left the post-office at the first time?

A. Mr. Miller, in 1855.

Q. Mr. White was postmaster when you went in?

A. Yes.

Q. Was Mr. Brown there at that time?

A. Yes, sir.

By Mr. CLARKE:

Q. In regard to Ex. 204, that is the postmarking part of an instrument such as you made during Mr. Walborn's term?

A. Yes.

Q. Judge Norton, you referred to on your cross-examination, is Marcus P. Norton?

A. Yes.

Q. Do you say that you told Col. Parker about what you had done years ago, before this suit?

2809 A. Yes, when I got acquainted with him first. It was at the time the army was in the neighborhood of Washington, I think, in 1864. He was mail carrier between the army and Washington, and we entrusted him with postage stamps to sell to the soldiers, and he used to come up, and we would give him $1,000 or $1,200 worth of stamps, and he would sell them and bring back the money, and that brought him into the office in which I was connected, we having charge of the postage stamps, and I talked with him then.

Q. Was that the reason that Colonel Parker spoke to you about it this last time?

A. Yes; he told me that was the reason.

Q. In regard to the first and second combined canceller and postmarker, made during White's term of office, what am I to understand as to the use by others than yourself, that you cannot identify any particular person, or that you don't know whether it was used by any one?

A. That I can't particularize any person that used it.

Q But as to whether other clerks did use it?

A. To the best of my knowledge and belief, they did.

Q. As to your conversations with Mr. Norton, how are we to understand as to whether you are sure as to telling him the date of making this?

A. I am pretty confident that I told him. I know I told Mr. Wheeler, because he was telling me about what he had done, and I recollect very distinctly the remark that Mr. Norton made in regard to the patent business, about my taking out a patent, and he used to often joke after that, and he would come into my room and talk a good deal about it.

Q. You say Mr. Norton made some proposition for employing you, at the time this suit began?

A. It was about two years ago, he came into my office and
2810 talked about the stamp case—I don't mean this particular suit—and he said he wanted copies of papers from the Post Office Department, and I understood him to say that they would not allow him to have them; but he thought I, having been there so long, and was so well acquainted, that I could get the copies for him. I don't mean surreptitiously; but he asked me to go over to the department, and I took him over and introduced him to my successor in office. I supposed all the papers were in his custody, and he said in the department, to this gentleman, that Mr. Ireland would perhaps come over and make some copies of papers for him. I understood that the department had agreed

to let him have the copies of the papers, but he must furnish somebody who was acceptable to them to make the copies, so they would not go outside of the department, and he said he wanted me to go there to do it. I held myself in readiness, but he didn't come back and I didn't do it.

By Mr. WILLIAMS:

Q. You know nothing about this Ex. 204, except that you see it here. Can you give to the court any reason, if there was a canceller riveted on to that instrument, why it should have been removed?

A. No; except on the general principle, after it was used, and the other stamps came in, it was thrown into the waste-box of old stamps. I had one of them myself, years after, and took it apart and had it in my room, and showed it to Mr. Norton—one exactly like this, with the canceller attached—one that I had made.

Q. Can you give any reason why the canceller is not now attached to this stamp?

A. No, sir.

Q. You don't know that any canceller was ever attached to that?

A. Not to that particular one. I know nothing about it.

2811 Q. What did you do with that stamp that you speak of exhibiting to Mr. Norton?

A. I didn't do anything with it. It disappeared out of my desk in the department. I kept it there in an open desk, and it was in one of those pigeon holes, and I kept it there as a matter of curiosity.

Q. When was that?

A. I had it after the double stamp came in, in 1863, and I took that, and it was one of those that I made in 1863 that I had with me. The face of it was pretty well worn out, and it disappeared from my desk.

Q. You didn't take the canceller off of that one, did you?

A. I have no recollection of having ever taken it apart.

Q. You say you exhibited that to Mr. Norton?

A. Yes.

Q. Did you exhibit it to anybody else?

A. Mr. Wheeler saw it.

Q. Anybody else?

A. Mr. Zevely saw it, and perhaps everybody that I talked to. It was no secret matter at all.

Q. You represented that you made that in 1863?

A. Yes.

Q. That was what you told Mr. Norton when you presented that to him?

A. Yes, sir.

Q. Wasn't that all you told him—did you tell him anything about the one you made in 1849?

A. Yes; I think I did.

Q. Are you sure?

A. I am as confident of it as I am sitting here, that I did, because I was showing that I went further back than Wheeler did, and he goes beyond that.

Q. Beyond what?

A. Beyond that 1863 one.

Q. Did you understand that he went back to 1853?

A. I don't know. I won't say that he went back to 1853, but I understood that he went back of 1863.

Q. You don't know how that was?

A. I could not say.

2812 MATTHEW C. BOGIA, called on behalf of the defendant, sworn.

By Mr. CLARKE:

Q. You reside in Philadelphia?
A. Yes.
Q. You are employed in the post office now?
A. Yes.
Q. What is your age?
A. Between 45 and 46.
Q. When were you first employed in the post office?
A. In the spring of 1861.
Q. Who was postmaster?
A. C. A. Walborn.
Q. Have you been there ever since?
A. No; I was out about 1865 or 1866.
Q. Between 1861 and 1865, you were there?
A. Yes, sir.
Q. What were your duties?
A. From the first or second month that I was in the office, up to the time that I went out, in Johnson's administration, I was in the stamping department.
Q. During those four years you were a stamper?
A. Yes.
Q. When you went in there what did they use for postmarking?
A. They used the single canceller and the single postmarker.
Q. The postmarker was like what?
A. The metal part of it was like "Ex. 204, Ireland"—about that size.
Q. And there was a separate canceller?
A. Yes.
Q. Of the same shape the other witnesses have testified to?
A. Yes.
Q. Was the postmarker sometimes used to cancel stamps?
A. As a general thing it was used in the department after the war commenced; about 1861, we had such a rush of letters that we had no other means to do it but stamp them over the face of the postage-stamp. This being of a given size, it was rarely you could not
2813 tell where it came from, with the postage stamp off. Part of the mark would be on the envelope and part on the stamp.
Q. And the reason for doing that was largely on account of the soldiers' mails?
A. Yes; and to get rid of the matter. About that time they began to put men on permanently in that position to stamp all the time.
Q. Was there any combined postmarker and canceller made?
A. I don't remember of seeing any until 1863.
Q. What part?
A. The spring of 1863, within from one or two months after we moved into the new office.
Q. You moved on Washington's birthday, was it?
A. I believe it was, as near as I can recollect.
Q. Explain about the circumstance of making that combination.
A. I was called up by Mr. Ireland, who gave me a diagram of a stamp that he wanted made. He wanted a cancellor fastened on the outside of the postmarker. He said, "I want you to understand that

this is mine." He asked me to get that made something in that order, in having the canceller fastened on to the day stamp, or what we call the post-office stamp; and he gave me the drawing, and I had it made similar to the drawing that he gave me, so as to get this canceller fastened on the postmarker, saying that it would do the work in one blow, of cancelling and marking the stamp where it came from. This stamp was carried out fully with what he had drawn out. It was not altered much. I didn't add any ideas to it further than lightening the stamp up. I had a man make it by the name of Louis Schaible. He kept his place in 2d street, between Chestnut and Walnut. He is now at 202 South 2d street. That was the first stamp I ever saw in
2814 use as a double canceller. I cannot tell how long we used them, but I know there were two on what they call the drop-table, where the letters are cancelled. They may have been used five months or seven months. I can't fix the date when we got the small double stamps from the department, as we supposed, and we were glad to get them, as they were lighter, and the handle being in the centre. The other was a heavy jar on the wrist. They were made very heavy. I had an iron shank put in there to suit an India-rubber handle that I invented, with a pin running up into it. I had to get them bored out and had a thread of a screw put in, as on Ex. 204. When the double stamp was brought in I had that altered before it was used. I had the old pin taken out and a new one inserted, which came up an inch and a half longer than the other one, and put on one of my rubber handles.

Q. Your rubber handle was an improvement?

A. Yes, to save the jar on the arm, and it made a better impression.

Q. You never knew or heard of any combined postmarker or canceller until Ireland gave you the information?

A. I never knew of anything of the kind. I thought it was a good idea, because we were pressed for hands, and the postmaster was distinct about our putting the postmark on the letter and not on the stamp. He wanted good work and clean work, and was going to have it.

Cross-examination by Mr. WILLIAMS:

Q. Do I understand you that the handle on the stamp, that was sent to you by the department in 1863, was on one end?

A. No, in the centre.

Q. The stamp that you made according to the direction of Mr.
2815 Ireland, the handle was right over the stamp, and the canceller was on one side, and when you struck down it turned?

A. Yes, unless you were practiced in it. I could stamp just as good with that as anything else; but this being of so heavy a nature it was twice as heavy as the stamp the department sent us. It had an iron body and the pin came up; and with an India-rubber handle it made it pretty heavy.

By Mr. CLARKE:

Q. Do you recognize Ex. 204 as a part of one of the combinations that were used?

A. I recognize this as one of the stamps, or in this style or shape.

Q. Can you say whether that Ex. 204 was one that was used in the combination?

A. I could not say. I see my own ideas and my own hand work in it, but I can't say that was the identical article.

Q. Is that another one of them?

A. That looks like one.

Offered in evidence, and marked Defendant's Ex. 205.

Q. You don't know whether that is one of them or not?
A. I have every reason to believe it is one of those.
Q. This piece that you screwed into the top is what you had bored out in order to lighten it?
A. Yes.
Q. And those screw-holes on the side is where the attachment was?
A. Yes, sir.

By Mr. WILLIAMS:

Q. Were those alterations, to which you have referred, made before the government furnished its stamps?
A. Yes.
2816 Q. After that you used the government stamps?
A. Yes, sir.

DUDLEY W. BURCHARD, called on behalf of the defendant, sworn.

By Mr. CLARKE:

Q. You are a clerk in the Philadelphia post-office?
A. Yes.
Q. How old are you?
A. Forty-three.
Q. How long have you been employed there?
A. Since the 1st of July, 1858.
Q. You are acquainted with Mr. Bogia and Mr. Ireland?
A. Yes.
Q. Do you recollect the introduction of the combined postmarker and canceller?
A. Yes.
Q. Look at Ex. 204 and 205, and state whether those are the postmarking parts of two of the combined instruments.
A. They are.
Q. You recognize them as being the identical postmarker parts?
A. Yes, sir.
Q. Explain how they came in their present condition, and how they came to be here.
A. I took them—I took three or four of our old stamps that was in the rubbish box, and took them home to make chucks for a small lathe I had. The others had no screw in here, in the end where the part is screwed in, in Ex. 205, and I had that bored out and tapped, and that fitted the screw in the lathe.
Q. You recognize those as having that attachment on the side?
A. Yes, I took the attachment off myself on Ex. 204 and 205.
Q. On Ex. 205 I notice a cut around what was the acting face before the lettering was removed. What is that ring?
A. That is a mark made with a graver tool, to see whether it is centered in the lathe.
2817 By Mr. WILLIAMS:
Q. These are the parts of the stamps that were made in 1863?
A. Yes; shortly after we moved the office.
Q. How many of them were there in the office?
A. I can't say; I am positive of three.
Q. These were the first stamps of the kind that you had seen?
A. Yes, sir.

MARCUS P. NORTON called by complainant and sworn.

By Mr. WILLIAMS:

Q. You may state when you first became acquainted with Mr. Ireland.

A. I think I first became acquainted with him in 1862 or 1863, in Washington, in the Post-Office Department. I am not positive about the year.

Q. It was after he became chief clerk that you met him?

A. Yes.

Q. State if you were at the Post-Office Department frequently, while he was there as chief clerk of the 3d assistant.

A. I was; from that year during every year for 10 or 12 years after that; sometimes several times during the year.

Q. Did you have any business with the department relative to the stamp in question; and, if so, what?

A. I did a good deal of business with the Post-Office Department, and particularly so with the branch of which he was chief clerk, known as the 3d assistant department.

Q. Did you ever have any conversation with him about the stamp in question?

A. A great many; how many I cannot tell.

Q. Do you know whether he was advised of your business there in the department?

A. He knew all about it. I have talked with him about it when
2818 there transacting business, and there were two or three hearings there that I positively know that he was present at. There was one in the winter of 1870 and 1871, under a special act of Congress, which by Mr. Creswell was referred to Mr. Terrel, then 3d assistant, to inquire into under that act. Mr. Ireland was then Mr. Terrel's chief clerk, and he was present several times during that trial, to my positive knowledge. It was held in Mr. Terrel's room, right opposite Mr. Ireland's, with a hall running between the two. That was an investigation that extended through three or four months' time; very thorough, and a very extensive one.

Q. State if any question as to this stamp was before Congress at any time, whether or not the Post-Office Department was called upon for any information or papers in relation to it.

A. It was before Congress in the years 1864, '5, '6, '7, '9, 1870, '1, '2, '4, and '5. Distinct reports were made by committees of Congress on this subject during those years.

Q. Whether during that time any call was made by any committee upon the Post Office Department?

A. Every one of those committees made calls upon the Post Office Department for information concerning this matter, made in writing, and also verbally. I went several times with the subcommittee, too.

Q. The petitions that were made to Congress were for compensation from the government for the use of this stamp by the government?

A. Yes, sir.

Q. Was there any question before the Post Office Department as to compensation for the use of this stamp?

A. Yes, sir.

Q. What was the object of the investigation before Mr. Creswell?

A. It was a matter authorizing the Postmaster General to continue to use in the postal service this invention, and to make compensation for it; and, also, to inquire into any other claim that might be made by any person.

2819 Q. State the nature of the claim before the Postmaster-General.

A. It was for compensation.

Q. Can you state whether or not Mr. Ireland knew the nature of this claim that was before the Postmaster-General?

A. Of my own personal knowledge, I can state that he did; that we talked it over together repeatedly; he knew all about it.

Q. Did he ever say anything to you, one way or the other, as to whether or not you or anybody else ought to have pay for the use of that stamp?

A. He told me more than once that the government ought to pay me for this invention, and that I most undoubtedly would be paid some time.

Q. State if he ever said anything to you about having anticipated your invention by making a stamp with a canceller attached.

A. He never did, in any form or manner whatever.

Q. State when you first heard that Mr. Ireland made such a claim.

A. The first I knew anything about a claim of that kind was in a letter that I received a few days ago from you.

Q. Do you remember of seeing a stamp that he had in the office, which he exhibited to you?

A. He never exhibited to me a stamp in the world, of any kind, of any form or shape, in the Post-Office Department, or anywhere else.

Q. Was your claim as an inventor to this instrument contested during these investigations in Congress and elsewhere?

A. It was contested in Congress before the committees in the Post-Office Department; in the circuit court of the United States in 1864, and in the Court of Claims in 1867 or '68.

Q. Did Mr. Ireland, during that time when these investigations and proceedings were going on, appear at any time as a contestant?

A. He never did, to my knowledge.

Q. Or as a witness?

A. Or as a witness.

2820 Cross-examination by Mr. CLARKE:

Q. You don't say that Mr. Ireland knew about your suit of Shavor & Corse against Hoole?

A. Mr. Ireland knew about that suit, and about the suit in the Court of Claims. I had to have certified copies of papers from his department, which were used in the suit.

Q. You mean that you told him; that is the way you know he knew it?

A. That is the only way.

Q. From the information you gave him?

A. Yes; I don't know whether he knew otherwise, or not.

Q. That you had told him about these things, and you think he knows from what you told him?

A. I should think he would be apt to know when we talked the matter over, and I was getting papers to use.

Q. Within two or three weeks, didn't you tell Judge Williams, after you were informed by us that we proposed to put in new evidence in relation to the Philadelphia office, didn't you say to him it probably had some connection with Mr. Ireland, and didn't you ask Judge Williams to see Mr. Ireland?

A. I said something to Mr. Williams, that it related to the Philadelphia post-office, and I had heard from somebody that you wanted to open the case in reference to that, and I asked him if he had not better

see Mr. Parker and Mr. Ireland in reference to it, because Mr. Ireland was chief clerk, and also the clerk in the Philadelphia office, and if it had been used in the Philadelphia office, I thought Mr. Ireland would be apt to know,

Q. Judge Williams' letter in regard to Ireland's knowledge was subsequent to this time that you say you never heard of Ireland making this statement until two or three days ago?

2821 A. Yes, sir; I think so; I knew that Ireland had been in the Philadelphia post-office, because he told me so, and I heard it was in relation to the Philadelphia office, and I said Mr. Ireland would be apt to know about it, and I asked Judge Williams to see Mr. Ireland—not that I knew that Mr. Ireland knew a thing about it, but I thought he, having been in the office, would be apt to know something about it.

Q. Mr. Ireland never showed you that stamp; you heard his testimony?

A. Not about that.

Q. He never showed you that combined stamp?

A. No, sir; never in the world.

Q. Do you know of any other source of knowledge that Ireland had of the nature of your claim and of the nature of the proceedings before the committees, etc., except what you told him?

A. Only from what he told me; from his conversations with me, I knew he must know.

Q. You are not sure that your first acquaintance with Ireland was in 1862 or '63—if he didn't go there until 1864, it was not until then?

A. It was not until after he became chief clerk of that department that I knew him, if I remember right. He was there two different times, I think, as chief clerk.

Q. Was it at the investigation before the 3d Assistant Postmaster-General Terrel that Mr. Ireland was present two or three times?

A. Yes.

Q. In what way was he present?

A. He was in the room.

Q. Listening?

A. I can't say that.

Q. What was he doing in the room?

A. I could not say.

Q. Was he attending to the case at all?

A. That I can't say.

Q. Was he sitting down?

A. I can't say that.

Q. You don't know that he knew what was going on?

A. I didn't ask him if he knew what was going on.

2822 Q. Can you say it was anything more than his passing through the room?

A. I had conversation with him in his office in reference to that transaction.

Q. I am referring now to the sessions of the investigation.

A. I don't say that he had any business in there to do with the case.

Q. Do you know that he knew what was going on before Mr. Terrel? Can you swear that Ireland knew what was going on?

A. We talked it over in his own room, what was taking place in that room, and I supposed from that that he must have known.

Q. You can't say how long he was in there—one minute or two?

A. I can't say anything about it. My recollection is of having seen him there several times while that investigation was in progress.

Q. Where was that investigation held?

A. In the 3d Assistant's room in the Post-Office Department—a little room adjoining his room.

Q. You mean the room that was labeled over the door 3d Assistant Postmaster-General?

A. I don't know how that is. It is in the corner of the Post-Office Department towards the Executive mansion on the Pennsylvania avenue side, in the second story.

Q. Were any sessions held in the 3d Assistant's main office?

A. Yes; in both rooms.

Q. Now in one and now in the other?

A. Yes.

Q. How many people were present there?

A. There was quite a number—6 or 8 persons sometimes.

Q. As to the question of compensation that was before the department, and it was not in reference to title?

2823 A. Yes; that was the main question, and also the question as to anybody's claim. That is in the resolution of Congress of July 14th, 1870.

Q. You say you told Mr. Ireland that the question was as to compensation?

A. We talked it over. I don't say that I told him using that word, but we talked the matter over and I think he must have known it was for compensation.

Q. Didn't you have disputes with the Green party, Ransford and Lowe, in reference to title?

A. Yes.

By Mr. WILLIAMS:

Q. Reference has been made to conversations between you and I. When it was announced in New York that this examination was to be in reference to the post-office in Philadelphia, did not you tell me that you believed that Mr. Ireland would prove that no such instrument was ever used in that office?

A. Yes, sir.

Q. That was what you suggested that Mr. Ireland, having been a clerk in the office in Philadelphia for a long time, would know the fact that there never was such an instrument used there?

A. Yes, sir; that the object of my asking you to see him.

WILLIAM M. IRELAND recalled:

By Mr. CLARKE:

Q. You have heard what Mr. Norton said about your being several times in the 3d Assistant Postmaster-General Terrel's room while the investigation was going on there. What can you say about that?

2824 A. When Gen. Terrell was conducting that investigation I had, as chief clerk, to attend to the business of the bureau, and it happened that I had gone into the room to get his signature to a paper—a requisition—walk in and ask him to sign it, and go out. I was not present at any time during the hearing of testimony, and I never heard one word of the testimony nor read it after it was taken down.

Q. Did you know what was going on before him at the time?

A. I knew there was some examination of witnesses; there were several lawyers there, and I guess it is more than likely I knew it was a

case in regard to Mr. Norton's stamp; but as to the precise nature of it, whether it was to give him a thousand dollars or whether it was for anything else, I can't say positively. I always believed, however, it was in regard to the question between the claimants as to the ownership of patents.

Q. Is it true that you never told Mr. Norton about your making those stamps?

A. It is not true.

Q. Is it true that you never showed to Mr. Norton the combined instrument which you say was made in 1863?

A. It is not true. I did show it to him because we laughed and joked about it time and again. It was in a friendly way that I did it.

Q. Has there ever been any quarrel between you?

A. No, sir.

Q. Have you any hard feelings against him?

A. Not in the least.

Q. Did you ever tell Mr. Norton that the government ought to pay him something?

A. I have said that the government ought to pay the owner of it, whoever he was.

Q. Did you ever tell Mr. Norton that the government ought to pay him?

2825 A. No; because I knew it was undecided as to who really was the proper owner of the stamp, and I always said, and I say now, that the government ought to pay somebody, whoever it is.

By Mr. WILLIAMS:

Q. You say you have believed that this matter of the stamp was referred to the Postmaster-General to determine the question of title?

A. I said I believed it was referred to the 3d Assistant Postmaster-General. I didn't know what was referred to the Postmaster-General, but I believed that Postmaster-General Creswell was to determine the question of title; that is, who really owned the patent.

Q. The question of title there was examined, was it not, for the purpose of ascertaining who was entitled to compensation from the government for the use of this stamp?

A. I presume it was, but not being present I don't know what the examination was.

Q. Upon what ground did you make the statement that you believed it related to title and not to compensation?

A. Naturally the first one was one of title, then the question of compensation. But when you ask me if it was referred to fix the amount of compensation I would say no; I didn't believe it was. My belief was that it was an investigation as to who was the proper owner of the patent.

Q. Another question was referred to Terrell?

A. That was as I understood it.

Q. You swear, do you, that you didn't know at that time that Mr. Norton was claiming compensation for the use of this stamp from the Postmaster-General? Do you swear that you did not know at that time that he was claiming from the government compensation for the use of this stamp?

A. Of my own knowledge? What do you mean by knowing?

2826 Q. I mean, whether you understood it to be so in any way?

A. I have heard it talked of that Mr. Norton wanted compensa-

tion for a stamp; but whether it was at that time, or previous or subsequent, I cannot answer.

Q. So you will not swear that you did not know at that time that he was claiming compensation?

A. No, sir.

Q. You never had any conversation with Terrell on that subject?

A. Not that I recall. I might have had, being his chief clerk, but I can't remember anything.

By Mr. CLARKE:

Q. Was there any reason why you did not tell broadly to Congress, and to the Postmaster-General and to the world, what you had done in 1849 and '50 in the way of combining post-markers and cancellers?

A. I don't know of any special reason. I didn't consider that I had any hooks on the thing. I made the thing for my own use. I didn't get a patent for it, and when this thing came up I knew that I could not interfere with any other person on that question.

By Mr. WILLIAMS:

Q. You did tell Mr. Parker, several years ago, about it?

A. We talked about it in a general way. There was the stamp lying right in my office, and I talked to Wheeler and Mr. Zevely the same way.

Q. Will you swear that you told 3d Assistant Postmaster-General that you had made an instrument that would postmark a letter and cancel a stamp at the same blow in 1849?

A. No; I won't swear that, because I might have told him only about the 1863 one.

2827 Q. You would not swear that you told Mr. Wheeler about the 1849 stamp?

A. Yes; I would. I will swear that I told Wheeler that I had made a machine in 1849 and also in 1863.

Q. When did you tell Wheeler that?

A. Some time during some of his visits in Washington.

Q. Didn't you know that Wheeler was contesting the claim as an inventor of this patent?

A. I never knew that he was contesting any claim. I knew that he claimed that he was an original inventor, but never had taken a patent out. I don't know at this time that Wheeler was a contestant.

Q. I don't mean contesting before the Patent Office, but that he was claiming publicly that he was the inventor and that Norton was not?

A. I knew that he was claiming to be an early inventor of it. I knew it from his lips; that is all the knowledge I had.

By Mr. CLARKE:

Q. When you told this to Parker he was not a special agent, he was connected with the Army?

A. That is as I recollect it.

JOHN P. REES recalled.

By Mr. WILLIAMS:

Q. When was Mr. Lehman appointed postmaster in Philadelphia?

A. I can't recollect the date. I recollect that he was appointed under a Democratic President, but whether it was Pierce or Polk, I can't recollect.

Q. Who was President when you were appointed?

A. Jackson.

2828 Q. You say you made this attachment of a rating stamp on the post-marker in 1845?

A. Somewhere along there, about the time the first alteration took place in the rates of postage.

Q. The first alteration in what?

A. A reduction from 6 to 5. I think it was in 1845.

Q. You state that you didn't attach that rating stamp to the post-marker until the postage was reduced to 5 cents?

A. That is my impression.

Q. Was the postage on all domestic letters reduced to 5 cents before you made that attachment?

A. I think the act was passed before—not on all letters.

Q. You know what I mean by domestic letters?

A. It was regulated by the distance. It was still 20, 18¾. I think the 12½ was reduced to 10. I am not clear when as to the year.

Q. Then the 5-cent postage related to what letters?

A. To a particular distance. That took the place of those that were previously marked 6¼ cents.

Q. Was it all the letters that were circulated in the same State?

A. My impression is, in the State and within a certain number of miles.

Q. Then there were other letters at the time that paid 10, or 18, or 20?

A. Yes. In regard to the "5," it was impressed on my mind because I had it made at the time.

Q. The party in that suit to which you referred claimed that the letter was put in the post-office before 1845?

A. Before this alteration was made, but I am not clear as to the date. It was previous to this alteration being made, and the suit was brought in 1849.

Q. Did the party in that suit claim that the letter was put into the post-office before 1845?

A. Before this alteration was made. I can't recollect the year, but it was sometime before January, 1849, but how long I can't say.

2829 Q. You don't know whether the party claimed, or not, that the letter was put into the office before 1845?

A. I have no recollection as to that.

By Mr. CLARKE:

Q. There is no doubt but what the woman in that case claimed that her letter had been mailed at a time before the reduction in the rates of postage?

A. They claimed to have put it in some considerable time before it was deposited.

Q. And the time must have been before the reduction of the rates of postage?

A. Yes, sir, whenever that was; but I don't recollect the year.

Testimony closed.

It was stipulated by the respective parties that the signing of the testimony by the witnesses be waived, and any disagreement that may arise in reference to the testimony shall be settled by counsel before the court.

2830 At Brattleboro', Vermont.

At a stated term of the circuit court of the United States of America

for the southern district of New York, in the second circuit, held at the United States court-rooms on Tuesday, the 17th day of June, in the year of our Lord one thousand eight hundred and seventy-nine.

Present, the Honorable Hoyt H. Wheeler, judge.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust, &c.,
vs.
THOMAS L. JAMES, POSTMASTER AT NEW York, and Charles Eddy. } In equity.

The above cause coming on for final hearing upon pleadings and proofs—

Mr. Samuel B. Clark, assistant U. S. attorney, reads to the court certified copy of stipulation and order in regard to the admission of further oral testimony on part of the defendants.

Evidence for defendants:

John P. Rees ..... Affirmed.
William M. Ireland ..... "
Matthew C. Bogia ..... "
Dudley W. Burchard ..... "
William M. Ireland ..... Recalled.

Evidence for complainant:

Marcus P. Norton ..... Affirmed.
John P. Rees ..... "

Evidence closed.

Mr. George H. Williams opens the case on part of the complainant.

Court adjourned to 9 a. m. 18th instant.

THOMAS L. JAMES ET AL.

The above cause being still on hearing pursuant to adjournment, Mr. Williams concludes his argument in behalf of the complainant. Curia advisari vult.

2838 *Opinion of and decision by the court, Hon. Hoyt H. Wheeler, on final hearing.*

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

APRIL TERM, 1879.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

WHEELER, J.:

This suit is brought for relief against alleged infringements of letters patent for an improvement in post-office, post-marking, and cancelling hand stamps, originally granted to Marcus P. Norton on the fourteenth day of April, 1863, and reissued to Jacob Shavor and Albert C. Corse on the twenty-third day of August, 1864, to Marcus P. Norton on the third day of August, 1869, and to Helen M. Ingalls on the fourth day of October, 1870, in "Division A," numbered 4143. The principal defences set up and relied upon are that Norton was not the first inventor; that there was no patentable invention involved; that it was in public use more than two years before the application, and with his consent and allowance; that the reissue in suit was not for the same invention; that the plaintiff has no title; that the defendant is a public officer, and that he does not infringe in fact.

2839 There is much controversy as to when, in fact, Norton first produced this invention. The application was made Jan. 5th, 1863; but that is not early enough to anticipate knowledge and use of the invention by others; therefore, it rests upon the complainant to establish prior invention by Norton. It clearly and satisfactorily appears from all the evidence that he produced it before May 4th, 1859. By letter dated that day, Horatio King, First Assistant Postmaster-General, authorized the postmaster at Troy, N. Y., to use for post-marking letters at that office, for the term of three months, one of Norton's improved stamps. Norton was an inventor of other improvements in such stamps; and there is a question as to whether the stamp referred to in that letter was this one, or some other. King's testimony and correspondence settle it that this is the one. After he went out of office he was employed by Shavor and Corse to assist them about obtaining com-

pensation for the use of his stamp, and was kept familiar with it all the while; and his testimony is, that this is the one.

General John A. Dix was appointed postmaster at New York early in 1860. In August of that year he wrote to King about a similar contrivance which he had got up, and in a reply directed by King was warned that there was a prior invention, which might subject that office to a heavy charge, if his contrivance was used. This enables King to testify, with positiveness that entitles it to credit, that he had correspondence with Norton about this stamp before that time. One form of this instrument had a canceller made of cork. Norton permitted it to be used at the New York office to test it. Its use commenced there soon after the correspondence of Dix with the department in 1860, and it was found there when Abram Wakeman became postmaster in 1861, or thereabouts, as is shown by his letter to the Third Assistant Postmaster General, dated Jan. 3, 1863. This correspondence, which does not depend upon mere memory for dates and circumstances, identifies
2840 this stamp very clearly. The complainant claims that the invention was made in 1853 or 1854, and described in an additional description of a caveat filed about Aug. 7th, 1854. This additional description produced from the caveat files does not appear to have ever been officially filed under the hand of any custodian of the records, and is admitted to be a copy made in 1868, said to have been put into the files by mistake, in place of the original, which is not produced. The defendant has put in evidence the record of proceedings by the Commissioners of Patents, disbarring Norton as solicitor of patents, and adjudging that copy to be no part of the files, and claims that this destroys the effect of it as evidence. No evidence on which the Commissioner acted, nor any showing the misconduct of Norton, is produced. Norton testifies that the original was duly filed and afterwards copied, and the copy returned to the files, by mistake, as he supposes. The plaintiff claims that the action of the Commissioner legitimately shows nothing on this question, and that Norton's testimony is all the evidence there is properly bearing upon the subject. The defendant has introduced a letter from Norton to Wakeman, postmaster at New York, dated Feb. 6th, 1864, when Norton was interested in this patent as part owner, stating that "the double cancelling stamp now used by you in your post office is my invention as far back as the year A. D. 1856, as I can most fully and satisfactorily prove. It was patented to me in the early part of the year 1863, upon an application made by me a long time before then. I had several such stamps made in 1858, as I can prove by the person who made them," for the purpose of impeaching the testimony of Norton as to the caveat. The caveat as such, long before the application for the patent, ceased to be operative, because not followed up. The only use the copy found can be is as a piece of evidence. The judgment of the Commissioner, as such, extended only to the exclusion of Norton as solicitor, and not to the effect of the paper as evidence en pais
2841 (act of July 8th, 1870, sect. 17, 16 U. S. Stat. at Large, 200; Rev. Stat. U. S., sect. 487), although its effect upon the instrument as a caveat of record might be greater. (Robertson v. Secombe Manufacturing Company, 10 Blatch. C. C. R., 489.) What the weight of the evidence produced, and legitimately bearing upon the question, as to whether there was, in fact, an original paper of which the one now in the files is a copy, is not now considered, because it does not appear to be material. This letter of Norton's and its connection is stated, however, because, in connection with the evidence before stated, as to when he actually produced the patented article, it does appear to be somewhat

material. It was introduced by the defendant as evidence. The part relied upon was that inconsistent with what Norton and the plaintiff now claim. But, when so put in, it was legitimate evidence, according to what should appear to be its just weight, as well as to those parts in favor of as to those against them. This is a well-settled rule in respect to evidence of admissions. (Stead v. Heaton, 4 T. R., 669; Davies v. Humphreys, 6 Mees & Welch, 153; 1 Green Ev., § 201; Wright v. Williams, 47 Vt., 222.) The letter tends to show that Norton actually had such stamps made in 1858. It was written before there was any controversy as to this fact, and is strongly corroborative of the correctness of the finding, that the invented and patented instrument was brought forward before May 4th, 1859.

The defendant has introduced evidence tending to show that what is claimed to be the same invention was made by various other persons, and put into use at several post-offices prior to that date even. The most prominent are at the Philadelphia office, by William M. Ireland, in 1851; at the New York office, by James J. Riley, in 1852; at the Cleveland office, by Charles E. Wheeler, in 1853; and, of these, that at the Cleveland office seems to be most confidently relied upon. If the question in respect to use at this office was to be determined upon a fair balance of proof, and upon the parol evidence alone, the bal-
2842 ance might turn in the defendant's favor; but the evidence to defeat the patent by showing an invention prior to a clearly established one of the patentee ought to be as clearly established, to the extent at least of removing all fair and reasonable doubts. There is in the case important written evidence up n this point, and the whole is to be weighed together. Wheeler himself, on the twenty-eighth day of November, 1863, wrote to A. N. Zevely, Assistant Postmaster-General, that he made the invention about the first of July, 1861, and that an order from the department then issued led to it. On the seventh day of May, 1864, E. Cowles, postmaster at Cleveland, by whom Wheeler was employed, at his instance, wrote to the Postmaster-General that the invention was made immediately upon the receipt of an order issued by Postmaster-General Holt. That order was issued at about the time of the invention stated by Wheeler in the letter, and could not have been issued long before. These deliberate statements, made by two persons separately, and at so near the time of the transaction in question, and giving circumstances accompanying it which in fact existed as they stated, and made with a claim of first invention which would interest them to state that the invention was made as early as the facts would warrant, and made in writing now produced, far outweigh in reliability statements made wholly from memory fifteen years later and farther from the transaction. Taking the whole into account, the defendant has not shown by the requisite measure of proof that Wheeler invented what he did before Norton did what he did.

The direct testimony as to what Riley invented is contradictory and unsatisfactory. Riley testifies that the instrument which he invented was made by Mr. Hoole, who is understood to be the manufacturer of stamps for the New York office. Hoole was sued by Shavor and Corse for infringing this patent, pleaded to the action, and a trial, verdict, and judgment against him were had. He did not show this in-
2843 vention of Riley, which, according to Riley, he must have known of, in that defence. This goes strongly to show that Riley's statements are not correct.

Ireland was a boy fifteen years old in the Philadelphia office in 1851. He was also there in the same employment in 1861. He doubtless did

do in 1861 what he says he did in 1851. At this distance of time he may have carried back in his mind what he did with the association of 1861, to the same associations existing in 1851. When he made it in 1861, he remarked to others that it was his, without stating that he had made it previously. It is manifestly difficult to distinguish occasions in memory after so great a lapse of time.

Prior to 1860, there was nothing to call the attention of those employed in post-offices, imperatively, to the necessity of such an invention; while, in the latter part of that year, the strict requirements of the department about cancelling postage stamps separately, and the increased use of the mails consequent upon the war in 1861, brought the subject sharply up. This brought out contrivances for the same purpose in post-offices in various parts of the country, and more probaby gave rise to those particularly mentioned, as well as to others about which evidence was given, but which have not been particularly discussed here.

There is another consideration bearing upon this branch of the case, which is, that none of the things produced by these persons, if they produced what they say they did, were the same as this patented invention; nor were any of them the equivalent of it in all material respects. The discovery was not that letters could be postmarked and the postage-stamps cancelled at one blow; and, if it had been, that mere idea would not have been patentable; and if that had been patentable to the first discoverer, it would have been anticipated by two prior patents—one of Aug. 9, 1859, and the other of Dec. 16, 1862, issued to Norton.

2844 But the patent is for a machine or instrument that will do both of these things at one blow; and the question is, whether the other machines were like it. In this the two faces which make impressions are connected by a cross-bar fixed in the middle to a brad-awl handle, on which both are balanced, so that a blow with it will bring both faces to the surface to be stamped, although not aimed so as to strike precisely perpendicularly; in those a cancelling face was added to the side of a stamp made to be used alone, with the handle all upon that, and nothing to bring the other face down, unless the blow should be so aimed as to bring it to its place. This difference is shown by the evidence to be, as it is plain it would be, quite material. The stamp of the patent of August 9th, 1859, was in form open to that objection, as well as to the objection that its canceller was a cutter, which made it undesirable. In the patent of Dec. 16, 1862, the postmarking and cancelling faces were balanced upon the handle, like those of the patent in suit; but the canceller there was a cutter, and the instrument could not be safely used. The invention in controversy combined the advantages of a safe and effective canceller, well balanced on the same handle with the postmarker, for the first time.

The nearest invention to this is Berri's English patent of April 24th, 1860, sealed Sept. 27th, 1860. That seems to embody all the material parts of this one, but was subsequent to it.

The patent of Ezra Miller, dated March 22, 1859, had the acting faces of the stamps balanced in the same way as this; but the handle was like that of a hammer, and the instrument, as a whole, quite different from this.

Upon the whole case, it appears that, in fact and in law, Norton was the original and first inventor of this patented invention.

That its production did involve the exercise of inventive faculties and skill is apparent from the various steps, trials, and tests by which it was reached, from the fact that so many other patents have been

2845 granted upon attempts approaching the same object without ac-

complishing it, and from the fact that the patent has sustained a suit for infringement of it against a party using the invention in fulfilment of a government contract.

This patent was granted while the act of 1836, and that of 1839, in respect to the defence of public use and sale of the invention were in force. By the provisions of the Act of July 4th, 1836, sect. 15 (5 U. S. Stat. at Large, 123), it was only public use, or being on sale, with the consent and allowance of the patentee, before the application for a patent that would defeat the patent. The 7th section of the act of March 3d, 1839 (*Id.*, 354), did not change the character of the public use, or being on sale, that would defeat a patent, but provided that no patent should be held invalid by reason of them, unless "such purchase, sale, or prior use, has been for more than two years prior to such application for a patent." (Andrews v. Carman, 13 Blatchf. C. C. R., 307; Elizabeth v. Pavement Co., 97 U. S., 126) No use shown, except at the New York office, was with the knowledge even of the patentee. The application was filed Jan. 5th, 1863, so that a sale or use to defeat the patent must have been prior to Jan. 5th, 1861, while General Dix was postmaster there. It is not very clear upon the evidence that this invention actually got into use there before that time; and this defence, like others of the same class, ought to be made out by clear proof. But whether it was so in use before that time or not, it is quite clear, from all the circumstances attending the use, whenever it was had, that it was not a public use within the meaning of the statute, but a private use for testing the invention, and informing the inventor as to its perfection and usefulness, with the design on his part, all the while, to procure a patent for it, if it should prove to be ripe for that purpose. (Elizabeth v. Pavement Co., 97 U. S., 126.) The correspondence between the inventor and the postmasters, and between them and the post-office departments, abundantly show this.

2846 If the reissues are for any other, or substantially any different, invention from that described in the original, they are unquestionably void. That the specifications or claims of the patent are different, the invention or discovery remaining the same, is of no consequence. The very object of the reissue is to correct the patent so as to make it conform to the invention. The principal objection to these reissues is the specification of a metal canceller in the combination, as well as cancellers of wood, cork, or other elastic material. If a metal canceller had not been mentioned nor alluded to, it might well be said that it did not enter into, nor form any part of, the conception of the inventor; but it was mentioned in the original. It was mentioned as not being so useful or desirable in the combination as an elastic one; but nevertheless it was mentioned as forming a part of an arrangement not patented or desired. The inventor or owner, when the reissues were applied for, desired it; the invention comprehended it; and the patent was made to cover it. The original patent also mentioned a canceller of any suitable material as a part of the combination.

It is said that the title to the reissue fails, because Norton did not own the patent when it was surrendered by, and reissued to, him on the third day of August, 1869. This fact is sought to be made out by showing that the instrument of reassignment from Shavor and Corse to him was forged by him, by placing it before, and attaching it to, the genuine execution by them of another and different instrument unknown to them. Much testimony and argument have been bestowed upon that question. Whether the instrument was so constructed or was genuine, it afterwards came to the knowledge of Shavor and Corse, and they

settled all their claims to the patent with those persons claiming title to it by virtue of that instrument upon the basis that the instrument should stand as if valid. This ratified and confirmed it, as to them, as good from the beginning, upon just and well-settled principles.
2847 But this was not done until after the reissue; and it is argued that the title at the time of the reissue had not become Norton's, and that the Patent Office had no jurisdiction to reissue it to him; and that the plaintiff cannot now be allowed to show title in that way because he has alleged title by force of the instrument itself, and not by ratification of it. It is doubtless true that a reissue of a patent to a person not the owner would not affect the title of the owner. The reissue and title should go together to make a good title to the reissue, or at least the reissue should be consented to by the true owner. Here the title followed the reissue, and became the same as if it had preceded it, and was consented to by the true owner, whether Shavor and Corse or Norton.

This would seem to make the title to the reissue good to Norton in any event. (Potter v. Holland, 4 Blatchf., C. C. R., 214.) This makes it unnecessary to determine that question of fact which involves a charge of the commission of a high crime, that cannot be well tried in this collateral way without danger of doing injustice.

As the instrument became as if good from the beginning, it was well set up and alleged as good, without stating in detail what made it so.

Norton conveyed this and other patents to Helen M. Ingalls. She, for a nominal consideration, conveyed the legal title to them to William W. Secombe in trust for herself, her sister, and her sister's children, with power of management and sale, the net proceeds to be divided, two-fifths to himself, and the remainder to be paid over to them, according to a declaration of trust referred to in the deed. Secombe was president of the Secombe Manufacturing Company, which in some way held title to some other of Norton's patents. The Secombe Manufacturing Company and Secombe, president, subsequently made conveyance of patents to Ingalls. The plaintiff derives title from her; and no other conveyance from Secombe to her is shown. The defend-
2848 ant claims that Secombe's title would not pass by that deed, and that if it would, the description of the patents conveyed does not include this one.

The deed recites the issuing of the patents, her desire to purchase, and that she has purchased of the Secombe Manufacturing Company, and of William W. Secombe, president, the patents, and declares that in consideration of one thousand dollars and other considerations, the said Secombe Manufacturing Company, and William W. Secombe, president, do sell, assign, and convey them to her; and it was executed by the signature of the Secombe Manufacturing Company with seal, and by William W. Secombe, president, and another seal. It is obvious that there were intended to be, and were, two grantors in that deed. One was the company, and the other was Secombe. The execution for the company in the name of the company was good for the conveyance of its interest. The execution by Secombe, although the addition to his name of "president" was made, was a good execution of the deed for himself, and good for that only, and not good to convey any interest for the company, even though that had been the intention. That execution made the instrument his deed, and it would carry whatever title he had in the subject of the conveyance. (Combes's case, 9 Co. Rep., 75; Clark v. Courtney, 5 Pet., 319; sham v. Bennington Iron Co., 19 Vt.,

230; Miller v. R. & W. R. R. Co., 36 Vt., 452; Brinley v. Mann., 2 Cush., 337.)

The description of the subjects of the conveyance is very general and broad in some of its parts. It commences by reciting that "at various times, and under several and different dates, letters patent were issued upon the application of Norton for 'improvements in hand printing and dating stamps, post office post-marking stamps, internal-revenue dating and cancelling stamps, and for other improvements not necessary here to name; among which were letters patent of the following date, to wit, Jan. 14, 1862, Dec. 16, 1862, Aug. 4, 1865,
2849 and also during the years 1870 and 1871." It then refers to the deeds of assignment from Norton to Ingalls, among others, for a more full description of the patents conveyed, and ends by adding, "Meaning to convey, and we do hereby convey, unto her, the said Helen M. Ingalls, each and every claim, right, title, and interest we now have or can or would have in any of said inventions, improvements and letters patent by means or reason of any contract between us or either of us, and said Marcus P. Norton and Helen M. Ingalls, or either of them, in, to, or for the said inventions and said letters patent or either of them," &c. The reference to the patent by stating the inventions covered includes this one, and it is quite obvious, from the sweeping character of the instrument, that this and all other patents upon those subjects were intended to be included.

It may be that as the conveyance was wholly in trust, upon the evidence carefully examined, such refusal to perform the trust would appear as to cause the title to revert, and it may be that the interposition of a court of equity would be necessary for that purpose. But that subject has not been examined here, for the reason that the reconveyance appears to be amply sufficient.

The defendant also objects that the plaintiff acquired no such right, by the deed to him from Ingalls, as authorizes him to maintain this suit. The conveyance was expressly in trust, upon condition that the plaintiff should have the sole management of the trust until a fair, just, and reasonable settlement should be had with the United States for the use of the invention in the postal service of the United States by the Post-Office Department. It is argued that the conveyance was for the purpose of such settlement and no other. The operative words of the conveyance include the whole legal title to the patent, and all claims for the past use of the invention in the postal service of the United States. The limitation is one of time upon the extent of the con-
2850 veyance in that direction, and not upon its purposes. No settlement has been made with the United States, and the limitation in that respect has not expired. She has no legal title to the patent now. The plaintiff's right is the only one being infringed. He holds this right in trust, and may be liable to account for the proceeds of his management; but whether he shall so account or how, is not the question here. The question is merely whether he has sufficient right to maintain the suit at all, and it appears that he has—certainly for the infringement since he has held the title; and the bill does not appear to be framed to cover anything else.

Probably Ingalls would be a proper party, plaintiff, with the orator in this suit in equity, and perhaps a necessary party, if there were any objection on account of that non-joinder; but no such objection has been made, and as she has been a witness, and testified that the suit is brought with her approval, there is no occasion for the court to interfere to secure to her an opportunity to assert her rights, as is sometimes

done in the discretion of courts to guard the rights of cestuis que trust, which it is the peculiar province of courts of equity to protect.

One ground upon which the defendant claims he does not infringe is, that, in all he has done, he has acted as the officer of the government in the performance of his duties for the benefit of the government, and that the monopoly granted, in granting the patent, did not extend to nor cover any use by the government. But the exclusive use of the invention granted to the patentee is property; and this property is now owned by the plaintiff. The grant saved nothing for the use of the government; it was exclusive absolutely throughout the United States. It was granted by express law of Congress, pursuant to the Constitution, without which it could not exist. But all property is upheld by law, either expressly or impliedly enacted or adopted, all of which is
2851 the law of the land, the same as the statutes upholding patents are. This property, like all other private property recognized by law, is exempt from being taken for public use without just compensation by the supreme law of the land (Cons. U. S. Am., Art. V.); nor can it be so taken by any officer, at will, in time of peace, leaving the owner to seek compensation. (Mitchell v. Harmony, 13 How., 115.) The property in a patented invention stands the same as other property in this respect. (United States v. Burns, 12 Wall., 246; Cammeyer v. Newton, 94 U. S., 225.)

The defendant also claims that he does not use the patented invention. The answer hardly denies that he does; but the plaintiff has so far treated it as being denied as to put in some evidence of infringement. The instruments shown by the evidence to have been used have the postmarking and cancelling faces connected by a cross-piece, and balanced upon a brad-awl handle, substantially like those of the patent. In one, the cross-bar is circular, and large enough to cover both stamps, and, in the other, the canceller is not tubed. But these things do not vary the principle of their action, nor affect their substantial identity with those patented.

This cause has been presented by counsel with great thoroughness of preparation, and faithfulness; and many points have been made that have not been specifically mentioned in what has been written, because none of them, in view of the facts upon which they rest, as found upon the evidence, or of the law as considered to be applicable, would be to a sufficient degree controlling of the conclusions reached upon the questions which have been mentioned, to warrant treatment of them in detail.

The complainant has expressly waived taking a decree for an injunction, and therefore a decree for that purpose is not to be entered.
2852 Let a decree be entered that the patent is valid, that the defendant has infringed it, and for an account of profits and damages with costs.

Marcus P. Norton and George H. Williams, for the plaintiff.

Stewart L. Woodford, district attorney, and Samuel B. Clarke, assistant district attorney, for the defendant James.

2853 *Decree by the court on final hearing.*

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

This cause having been brought to a final hearing, and heard upon the bill of complaint herein and the answer thereto, the replication of the complainant to such answer, the exhibits and proofs upon the oral, documentary, and written evidence, each duly taken and filed in said cause, and the case having been duly argued before the court by counsel for the respective parties, namely, George H. Williams for complainant, and Samuel B. Clarke for said defendant Thomas L. James:

Now, therefore, in consideration thereof, it is ordered, adjudged, and decreed, and the court doth now and hereby order, adjudge, and decree, as follows:

First. That the letters patent, Division A, numbered 4143, and reissued to Helen M. Ingalls Oct. 4, A. D. 1870, being for letters patent numbered 38175, granted and issued on the fourteenth day of
2854 April, A. D. 1863, to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, and conveyed to Jacob Shavor and Albert C. Corse, reissued to them, and numbered 1748, and dated Aug. 23, A. D. 1864, and by them reconveyed and reissued to said Marcus P. Norton, numbered 3386, and dated Aug. 3, A. D. 1869, are good and valid.

Second. That the said Marcus P. Norton was and is the original and first inventor and discoverer of the "new and useful improvement in post-office postmarking and cancelling hand stamps," described and claimed in said letters patent and in the several reissues thereof and the specifications thereto attached, as hereinbefore stated and set forth.

Third. That Christopher C. Campbell, the complainant herein, is the exclusive owner in trust of the said reissued letters patent numbered 4143, as hereinbefore described, and of the "new and useful improvement in post-office postmarking and cancelling hand stamps," described and claimed in the said reissued letters patent numbered 4143, subject to the rights of said Helen M. Ingalls and of Charles Eddy thereto, if any.

Fourth. That the said defendant Thomas L. James has infringed upon the said reissued letters patent numbered 4143, hereinbefore described, that is to say, by causing to be manufactured, and by using, and by causing others to use, the said "new and useful improvement in post office postmarking and cancelling hand stamps," as specified and charged in the said bill of complaint.

Fifth. That an account be taken of the profits, gains, and advantages which have in any wise been received or made, or which have arisen or accrued, on account of the infringements aforesaid, and also of the damages in addition thereto, if any, which the said complainant has sustained by reason of the infringements aforesaid.

Sixth. That the said complainant do recover of the said defendant, Thomas L James, his costs, charges, and disbursements to be taxed.

2855 Seventh. That it be referred, and the same is hereby referred,

to Kenneth G. White, of the city of New York, to ascertain and take and state and report to the court an account of the gains, profits, and advantages which the said defendant, Thomas L. James, has in any wise received or made, or which have arisen or accrued, on account of the infringements aforesaid, and also of the damages in addition thereto, which the said complainant has sustained by reason of said infringements.

Eighth. That the complainant on such accounting shall have the right to cause the said defendant, Thomas L. James, his agents, clerks, and employees, to be examined as witnesses; and also to require the production of the pertinent books, vouchers, and documents in said defendant's possession or under his control; and that said defendant Thomas L. James, his clerks, agents, and employees, and each of them, shall attend for such purpose before such master as he, the said master, may or shall require.

HOYT H. WHEELER.

Dated this first day of September, A. D. 1879.
Marcus P. Norton, solicitor for complainant, Troy, N. Y.
George H. Williams, of counsel for complainant, Washington, D. C.

(For defendant's solicitor, attorney, and counsel, see next page.)

2856 Stewart L. Woodford, United States attorney, and of counsel for defendant Thomas L. James, New York.
Samuel B. Clarke, assistant United States attorney, and of counsel for defendant Thomas L. James, New York.

Admission of service of this decree.

Personal service of the foregoing decree, dated the first day of September, A. D. 1879, is hereby admitted this second day of September, A. D. 1879, by a true and correct copy of the same, and by exhibiting to me this original decree at the same time of serving said copy by complainant's solicitor, Marcus P. Norton, on me.

STEWART L. WOODFORD,
U. S. Att'y for Def't James.
By S. B. C., *Ass't.*

2857 In the circuit court of the United States, in and for the southern district of New York. Second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT, and assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

Hearing before Hon. Kenneth G. White, master under decretal order dated September first, A. D. 1879.

COMPLAINANT'S TESTIMONY AND PROOFS UNDER THE ABOVE-NAMED DECRETAL ORDER.

N. Y., *October 23d*, 1879—11 a. m.

Appearances: Marcus P. Norton, solicitor for complainant; George H. Williams, of cousel for complainant; Mr. Samuel B. Clarke, assistant U. S. attorney, and of counsel for defendant, Thos. L. James.

2858 ANTHONY YEOMAN, a witness called on behalf of the complainant, being duly sworn and examined by Mr. WILLIAMS, counsel for complainant, testified as follows:

1. Q. State your age, residence, and occupation.

A. I am forty-seven years of age; am general superintendent of the third division of the New York post-office, and I reside in the city of New York, at No. 306 West Fifty-third street.

2. Q. How long have you been connected with the New York post-office?

A. I think about twenty-six years, sir.

3. Q. Have you at any time had direct connection with the business of postmarking and stamp cancelling?

A. Originally, I was a stamper in the New York post-office.

4. Q. When?

A. I think that was about in 1854 or 1855, may be 1853; the first year I was in the office I was a stamper.

5. Q. How long did you continue to be a stamper?

A. Perhaps a year.

6. Q. What position did you occupy after that time?

A. I then went as clerk on the South table; at that time we had it divided, South, North, East, and West; we have changed it very materially now; at that time I was at the South letter table.

7. Q. Did you subsequently become in any way directly or indirectly connected with the business of stamping in the office?

A. Yes, sir; ever since I was there I have been connected with it in some form.

8. Q. How are you now related to that business in the office?

A. I have general supervision of the whole of it now.

9. Q. How long have you had such general supervision?

2859 A. Well, I think ten years, perhaps.

10. Q. Can you state about how many clerks altogether are employed in the New York post-office?

A. Well, I could give you a general idea; do you mean the lower office or the whole city?

11. Q. I mean all the clerks in the post-office, including stations, subordinate as well as the main office.

A. You don't mean carriers?

12. Q. No, sir.

A. I should judge between four and five hundred; perhaps five hundred.

13. Q. Referring now exclusively to what is called the domestic department in the office?

A. Perhaps you mean the distributing department?

14. Q. I mean the department distinguished from the foreign; I was referring to what is known as the domestic department of the post-office. Can you make an estimate with any degree of accuracy as to the average number of letters that pass through that department in a day which are postmarked and the stamp cancelled in the office?

A. Well, I could give a rough estimate.

15. Q. I want your best judgment.

A. I should judge about two hundred and fifty thousand.

16. Q. Exclusive of foreign matter?

A. Yes, sir.

By Mr. CLARK:

17. Q. Does that include the stations?

A. Yes, sir; that includes all of them; about 250,000 I should judge.

Mr. WILLIAMS, resuming:

18. Q. State, if you can, how many clerks and employees in the post-office in New York, inclusive of stations, are engaged in and about the postmarking and cancelling of stamps?

2860 A. I could only give you one division, sir.

19. Q. What division?

A. That is the third division, of which I am general superintendent.

20. Q. Please explain what you mean by divisions.

A. I am general superintendent of the third division; the third division cancels all letters going out of town mailed in New York. Of course, as to the stations I don't know how many cancellers they have. That would be under Mr. Gayler's supervision. As far as the distribution is concerned I could give you some figures.

21. Q. I understand you to mean then that you know about the letters that are put into the main office and distributed from that office?

A. Yes, sir.

22. Q. And as well as those sent in the mails, also those distributed in the city?

A. I don't know anything about the city.

23. Q. Your knowledge is confined to those letters sent abroad from New York in the mails from the general post-office?

A. Yes, sir.

24. Q. How many divisions are there having connection with the stamping?

A. Well, there are two.

25. Q. What are they called?

A. Third and fourth divisions.

26. Q. You have charge of the third?

A. Yes, sir.

27. Q. Who has charge of the fourth?

A. Mr. Gayler.

28. Q. He is now a clerk?

A. He is general superintendent over there now.

29. Q. State then as to the number of clerks and employees that are connected with the stamping of letters and the cancelling of postage-stamps in your division?

A. I should judge there were twenty throughout the twenty-four hours.

2861 30. Q. Don't you know exactly?

A. Twenty; you see it is a business where we have to fetch in men not altogether doing that business; we can employ them at other business. At busy times we have to take men off other business and put them to stamping, and I should judge there are twenty men at work at that during the twenty four hours.

31. Q. Do you mean to be understood as saying that it takes the labor of twenty men twenty-four hours to do the stamping business in your division?

A. Yes, sir.

By Mr. CLARKE:

32. Q. You mean twenty men, each working the twenty-four hours?

A. Yes, sir.

33. Q. So that if they have relays of eight hours, it would require sixty men?

A. No, sir; I mean twenty men during the twenty-four hours.

Mr. WILLIAMS, resuming:

34. Q. Suppose you take the time from nine o'clock in the morning until twelve o'clock at noon of a certain day, how many men are ordinarily engaged in that business?

A. There is not over five.

35. Q. At one time?

A. Yes, sir.

36. Q. You mean to be understood as saying that there are only five at one time?

A. Yes, sir; at those hours you have just mentioned; the work of the New York post office is done at different hours.

37. Q. Well, then, from twelve o'clock to five?

A. There might be about ten.

38. Q. Then from five to twelve at night?

A. From five to seven to eight we have the whole twenty going full blast.

2862 39. Q. Then from that time forward during the night?

A. We would have a less number.

40. Q. You were there at the time the letters were stamped before the combined post-marker and stamp-canceller was used?

A. Yes, sir.

41. Q. Separate instruments were then used for post-marking and cancelling the postage-stamp?

A. No, sir; the post-marking stamp done the cancelling and put the date on.

42. Q. When it was put on the postage-stamp?

A. You asked me when I was there the original stamping——

43. Q. (Interrupting.) Subsequently to that time the practice was changed, and the post-mark was put on the letters apart from the postage-stamp and the postage-stamp cancelled separately?

A. Yes, sir.

44. Q. At that time there were two instruments used until a combined post-marker and stamp-canceller was used?

A. I think it was about one day in our office.

45. Q. Not longer than one day?

A. I don't think it was.

46. Q. Didn't you testify in this case that it was considerably longer? From the time an order was made by the Postmaster-General, to which reference has heretofore been made, up to the time that a combined post-marker and stamp-canceller was used, wasn't there more than one day?

A. I don't think there was more than one day; it might have been two.

47. Q. Do you remember the circumstances under which those separate instruments were used?

A. I don't exactly understand your question.

48. Q. Why were they used?

A. Why, it was to save time.

49. Q. I say, why was there two instruments used instead of one?

2863 (Objected to by defendant's counsel as irrelevant.)

50. Q. Do you remember that time?

A. Yes, sir.

51. Q. Do you remember why there were two instruments used instead of one?

A. On account of an order from the Postmaster-General ordering us to do it.

52. Q State how the letters were post-marked and the stamps cancelled after that order was issued, and before the combined stamp was used?

(Objected to.)

By Mr. WHITE. After the order was issued to use the combined stamp?

Mr. WILLIAMS. After the order was issued not to stamp the postage-stamp by putting the stamp, the post-marker, on the postage-stamp, some time in 1860. Prior to that time the postage stamp was cancelled by impressing upon it the name of the city, date, &c. An order was made by the Postmaster-General that that should not be done, but that the post marking should be on the letter, and that the postage-stamp should be otherwise cancelled, and now I inquire, after that was made, after the system was changed in pursuance to that order, how was the stamping done and how were the postage-stamps cancelled?

(Objection overruled. Exception taken.)

A. I think the first day we had a canceller soldered on to the side of the post-marking stamp, because we got that order, and we prepared for it, and before it went into effect we soldered a piece of iron to the post-marking stamp.

2864 53. Q. That is not an answer to my question. Before you soldered anything to that stamp and after the order was issued, I asked you how the letters were post marked and the postage-stamps cancelled—you say for a day or two the business was transacted without a combined stamp?

A. Because we did not obey the order right directly; we went on the old system.

54. Q. You have stated that for a day or two after that order was made and before the combined stamp was used the postage-stamp was cancelled separately from the post-mark on the letter?

A. You misunderstood me.

55. Q. How did you do it?

A. You stated when the order was issued we went on the old way. The first that was done was a piece of iron soldered.

56. Q. Do you mean to swear that there was no time in that post-office that the postage-stamp was cancelled by one instrument and the letter post-mark' by another instrument?

A. Yes, sir; to the best of my knowledge and belief I do say we never could have done it.

57. Q. Do you remember the letter that General Dix wrote to the department, which is in evidence here, that that was done, and that the letters were detained in consequence of that?

A. No, sir.

58. Q. Do you remember that you testified before in this case?

A. I do.

59. Q. That you testified that there was a time when the letters were post-marked by a separate instrument and the postage-stamp cancelled by a separate instrument?

A. I don't think I gave such testimony.

60. Q. You say it could not have been done; please state why.

A. They did not have the force to do it.

2865 61. Q. How much of a force would it have taken to post-mark the letter and cancel the postage-stamp?

A. At that time?

62. Q. Yes, sir.

(Objected to by Mr. Clarke as irrelevant.)

Mr. WILLIAMS. I simply ask him in reference to the answer he made to my other question; however, I waive the question and will ask him this:

63. Q. How many more men would it take to do the business of postmarking and postage cancelling, in your division, if separate instruments were used for that purpose, than is taken now by the use of the combined instrument?

A. I think it would take about nine, sir.

64. Q. That would make about twenty-nine men in all?

A. Yes, sir.

65. Q. Do you know what pay these clerks, who are engaged in stamping the postmarks and cancelling the postage stamps, receive?

A. Well, different salaries; we most generally put young boys at that work now. I suppose they would average, perhaps, seven hundred dollars a year.

66. Q. You are not informed particularly on that subject?

A. I could get you the record; that is my average; I think it would be a fair average—seven hundred dollars a year.

67. Q. Suppose the letters handled in your division were postmarked and the postage stamp cancelled by separate instruments, would there be any difference in the dispatching of the mails?

A. Yes, sir; I think we could not do it as quick as we do now; that is, at certain times of the day, because there would be perhaps the handling of letters and passing from one to another, which would make some little delay.

2866 68. Q. Do you not think that you can dispatch a given number of letters in your division—say two hundred and fifty thousand letters—twice as quick now as you could if your clerks were compelled to use separate instruments for postmarking and cancelling?

A. Not twice as quick.

69. Q. Could you do it very much quicker?

A. Yes, sir.

70. Q. Can you give an estimate of the time?

A. No, I could not, because I never saw it done—the amount of business we are doing to-day.

71. Q. Suppose that two instruments were used as I have suggested, would it be quicker to have those two instruments used by one clerk, or to have one clerk use one instrument and another clerk use the other instrument? I mean this, would it be quicker to have one clerk use the postmarker, one instrument, and then take and use the stamp canceller, another instrument, or would it be quicker to have one clerk postmark the letter and then pass it over to another clerk to cancel the postage-stamp?

A. Well, that would be about as broad as it is long. We could arrange our men so that it would not make a great deal of difference. This is my opinion of course. I am only giving you my opinions now on this matter. I would not like to give my opinion on that; I don't know.

72. Q. Suppose there were a thousand letters on the table, and they were to be postmarked and the postage-stamp cancelled by separate instruments, would it not take one man twice as long to do that work with these two separate instruments as it would take a man to do the work with the combined instrument now used?

A. No; because you can cancel a stamp much quicker than you can put a postmark on a letter. They have got to look whether the postmark is put on properly; but in cancelling they have just got to cancel the stamp, and for that reason it would only take nine men more
2867 than the twenty to put the postmark on, the same way we cancel our circulars where the postmark don't have to go on; but if you go to put the postmark on, you have got to put it on so that it can be read.

73. Q. Isn't the principal part of the time consumed, not in actually putting the stamp on, but in handling the letter; it would require two handlings if there were two separate instruments used, instead of one handling?

A. That would be a question. We would have to see which would be the best to do, whether the man would put the postmark on and then cancel, thus handling them twice for the same row of letters.

74. Q. How are these clerks, who are employed in postmarking and cancelling stamps on letters, arranged in the post-office, in your division?

A. How do you mean arranged?

75. Q. With reference to their situation to each other?

A. They are standing right in a row to a long table, about fourteen stamp blocks I think it is; fourteen, as near as I can recollect.

76. Q. How far are they apart?

A. Well, about three feet. I am only giving you a rough guess. It is just enough room for a man to stand at his block and stamp.

77. Q. That space would extend then forty or fifty feet long?

A. Yes, sir; I should judge it was a table about forty or fifty feet in length; it is quite a long table.

78. Q. Do these same clerks stamp circulars?

A. Sometimes; they do not, as a general rule. We have separate people for that—boys.

79. Q. Can you state how many persons are engaged in stamping circulars?

A. No, sir; we fetch them from almost any table, and get them to stamp circulars. We may have one or two men doing it all the time; but when we have a great quantity of that kind of matter,
2868 everybody goes in and stamps. Those stamps are merely killed with a cork; combination stamps are not used on them at all; we are not required to put postmarks on circulars.

80. Q. The combined postmarker and stamp-canceller has been used continuously since Mr. James became postmaster, up to the present time?

(Objected to by Mr. Clarke, on the ground that it is immaterial and irrelevant. The bill, as I understand it, is so framed to entitle them to recover only from the time of the assignment to Mr. Campbell, and that was in January, 1877; and on the ground that the complainant is not entitled to recover for any infringement prior to the time of the assignment to him. Objection overruled. Exception taken.)

A. Yes, sir.

81. Q. Subsequent to April 1st, 1873, when Mr. James admits that he became postmaster in New York, up to January, 1877, can you state generally what number of clerks were employed in your division in postmarking and cancelling postage-stamps?

A. I think it was just the same as I have already stated.

82. Q. So that you will make the answers that you have heretofore given apply to the entire time from 1873 down to the present time?

A. 1877, you said.

83. Q. No, 1873?

(Former question repeated.)

A. Well, I don't think there were more than fifteen.

84. Q. During that time?

A. Yes, sir; 1873 the business increased about fifteen, I should judge.

85. Q. In 1873?

A. Yes, sir.

2869 86. Q. Did that number increase any during that period up to 1877?

A. In 1877 I think they reached about the same as they do now.

87. Q. Suppose there were fifteen clerks employed in your division with the stamping, using the combined instrument, how many more than fifteen would it take to do the same work with a separate instrument to post-mark the letter and a separate instrument to cancel the stamp?

A. Well, I think about six.

88. Q. How many stations did you say there were in the city?

A. I think there are nineteen, sir.

89. Q. Are the city letters, which are deposited in these stations or collected at these stations, post-marked, and the postage stamp cancelled there?

A. Yes, sir; a great deal of it. As a general thing they cancel their own stamps.

90. Q. Do you understand that there is a clerk at each one of these stations for the purpose of post marking and cancelling stamps?

A. I don't know that there is any regular clerk; but I know there are clerks who do that business.

91. Q. But you are not able to state how much of the time it keeps them employed?

A. No, sir; I am not familiar with the station work, it not being in my division, and I don't want to state anything about it.

92. Q. I understand that in 1873 there were about fifteen men employed, and they increased from that time?

A. They had about fifteen up to 1877, I should judge.

93. Q. To be clear, your testimony is confined to your division of the domestic letters?

A. Domestic letters going out of town; yes, sir.

94. Q. You don't include the letters that are posted and distributed in the city?

A. No, sir.

95. Q. You don't include the foreign letters?

2870 A. No, sir.

96. Q. Will you be good enough to give me the name of the superintendent of the foreign stamping?

A. Mr. Dwight A. Lawrence.

97. Q. Who is the man who has charge of the city letter division?

A. Mr. James Gayler. He has charge of the fourth division of city matters both of the post-office and of the stations. Perhaps he would not have it as fine, but he has charge of that.

94. Q. If nine more clerks were employed in post-marking and stamp-cancelling in your division, the table would have to be about twenty-seven feet longer?

A. I don't know. We would have to see practically how that could be done; we might do it on the same table; we might arrange to do it on the other side.

99. Q. Is the table upon which this stamping is done an open table standing in the middle of the room?

A. Yes, sir. We could knock out spaces on the other side and have a man over there and pass the letters over, and that is the way I should do if I was going to do it to-morrow. Or on the other hand the same men might do it—have a canceller and do it right there.

100. Q. Are all the clerks now engaged in post-marking and stamp-cancelling arranged on one side of the table?

A. Yes, sir.

101. Q. Side by side?

A. Yes, sir.

102. Q. What is on the other side of the table?

A. If you know our arrangement over there—we have drops for each State, and we have pigeon-holes to throw these in alphabetically, arranged from Alabama to Wisconsin.

103. Q. It is then necessary for the transaction of business?

2871 A. No, sir. We started that way, but it did not work, so we could use that room for any other purpose if we wanted to. That system works very well for big cities.

104. Q. Do you use it now for that purpose for the other side of the table?

A. Yes, sir.

105. Q. You say it don't work well?

A. No, sir; for large cities it does; cities like Philadelphia, Boston and Baltimore, it works very nicely; but when you come to States it does not work well. That is what I had reference to.

106. Q. Still you have not adopted any other system?

A. No, sir.

107. Q. How long has that system been in vogue?

A. Ever since we have been up to the new office here.

Cross-examination by SAMUEL B. CLARKE, counsel for defendant:

108. X Q. Some of the clerks who do the stamping are paid as small a sum as thirty-five dollars a month, are they not?

A. Yes, sir.

109. X Q. Any of them more than sixty dollars a month?

A. I think we have some.

110. X Q. You don't know for sure?

A. No.

111. X Q. Who will be likely to know about that?

A. Our record will show that.

112. X Q. Who has charge of the squad of men who do the stamping?

A. We have three different men—eight hours each, you know—a man named Steel, Van Pelt, and Mays.

113. X Q. Do you know what about they receive?

A. I don't know with them, but we have a pay-roll; most of our stampers of late years have been young boys, who make the best stampers. Of course I have averaged it.

2872 114. X Q. Is that a large or small average?

A. It is a fair average.

115. X Q. Suppose that you had the nine additional men, and that the letters were post-marked and the postage stamps cancelled by separate instruments, do I understand you to say that the twenty-nine men cannot do the work with the two separate instruments as rapidly as the twenty men could do with the combined instrument?

A. Well, about the same; I put it down that it would take really nine additional men.

115½. X Q. To do the work up as promptly as it is now done?

A. Yes, sir; about nine men.

116. X Q. Could one man use the separate post-marker—use that instrument any more rapidly than one man could use the combined instrument?

A. It would be about the same. The impression has got to be put on, and he could do just about the same—well, not quite as fast. The cancel and stamp together I think he could post-mark a little more than with the combined instrument.

117. X Q. Owing to the greater weight there is a greater necessity of striking accurately?

A. Yes, sir.

118. X Q. When you cancel you cross them to make it strike into part of the letter?

A. Yes, sir.

119. X Q. If you didn't have to cancel you could put the post-mark anywhere on the envelope?

A. Yes, sir.

120. X Q. You say that some of these twenty men stamp circulars sometimes?

A. Yes, sir.

121. X Q. When there is not a great press of letters?

A. Yes, sir.

122. X Q. So that the whole twenty men are not at all times engaged?

A. No, sir; sometimes we take them off and have them boxing up letters.

2873 123. X Q. Is there other things they do?

A. Yes, sir; and there are certain hours of the day it will take the whole of them.

124. X Q. About how many hours out of the twenty-four?

A. I think from five to seven; at the time that everybody is mailing their letters. Mind you, we don't use the whole twenty at any one time.

125. X Q. But between the hours of five and seven you would have them all on?

A. No; we would have about fourteen. If I said twenty men at one time that is a mistake. I said from between five and seven we use the most of the men. We have not got room for them; we cannot use them. We only use about fourteen of the twenty men. What I have stated here is for the twenty-four hours.

126. X Q. Well, to make things clear, suppose that you go over the twenty-four hours and let us know how many men usually are employed during each hour; begin at 12 o'clock noon?

A. Twelve o'clock noon up to five I should judge about ten men. Then from five to seven o'clock I should judge about fourteen men. Then from seven to twelve at night I suppose there would be about twelve men; but they were the same men. Then from twelve to eight or nine the next morning there will be only about two or three men.

127. X Q. And from eight in the morning until twelve, how many?

A. I suppose we have got six men stamping.

128. X Q. These are general estimates?

A. Yes, sir.

129. X Q. I think you have stated that one man using two separate

stamps would not take twice as much time as the same man using the combined stamp?

A. Oh, no; because you can cancel much more rapidly.

2874 Redirect examination by Mr. WILLIAMS:

130. Re D. Q. Is it not true that a more accurate post-mark can be put upon a letter with this combined stamp than with a single stamp?

A. I don't know. No, I hardly think so. If a man only has got a postmark to look after I think he can do that as well. I don't think there is much difference. He has not got to look at the stamp.

131. Re D. Q. Isn't there more danger in striking a blow with a small surface, that you may strike one edge and so make a fainter impression, than there would be if there was a larger surface to bring down square on the paper?

A. No, sir; I don't think so.

132. Re D. Q. What is your opinion as to whether or not a postage-stamp is more effectually cancelled now than it was before the combined stamp was used? Going back to the time before the combined stamp was used and considering the manner in which you then cancelled a postage-stamp, and then considering the manner in which that stamp is cancelled now by the combined intstrument, is not the stamp more effectually cancelled now than it was then?

A. Yes, sir; decidedly so.

133. Re D. Q. What is considered in the post-office here an efficient day's work—how many hours—is there any rule on that subject?

A. Generally eight hours; still we have to hold them often over that time.

134. Re D. Q. Eight hours would be considered a day's work if a man was employed for a day's work. If a man was employed for a day in the post-office he would be regarded employed for eight hours?

A. Yes, sir.

135. Re D. Q. So if a man worked twenty-four hours he would be working officially three days?

A. Yes, sir.

2875 Recross-examination by Mr. CLARK:

136. Re X Q. The stampers are divided into three tours?

A. Yes, sir.

137. Re X Q. On an average there is six and two-thirds men on a tour?

A. Yes, sir.

138. Re X Q. That is the average as it is now run?

A. Yes, sir.

139. Re X Q. When you say that the postage-stamp now, when the combined instrument is used, is much more effectually cancelled than it was, what time do you mean?

A. Than when we put just the postmark on the postage-stamp.

140. Re X Q. How long ago was that?

A. 1860, I believe.

141. Re X Q. About nineteen years ago?

A. Yes, sir.

142. Re X Q. When you say that the postage-stamp is now more effectually cancelled than it was prior to nineteen years ago, what is that due to?

A. One thing is that the cancellation stamp we are now using has a cross-bar, numbers, &c., on it.

143. Re X Q. Is it due at all to the mere fact that the cancellor is combined to the marker?

A. No, sir.

144. Re X Q. So that the efficiency of the cancellation is not due to the combination?

A. No, sir; not a bit.

Redirect examination by Mr. WILLIAMS:

145. Re D. Q. That is all conjecture; you never tried that?

A. Yes, sir; this is all my opinion.

146. Re D. Q. I have asked you to make a comparison between what has actually been done in the office, and you state, as I understand you, that up to 1860, or about that time, the postage-stamp was can-
2876 celled by an instrument struck upon the postage-stamp. Then the combined stamp came into use, and you say since the combined stamp has come into use the postage-stamp has been more effectually cancelled?

A. Yes, sir.

147. Re D. Q. You mean by that, it is more difficult now than it was then to use the stamp a second time?

A. Yes, sir; I think so. I think it is harder to wash them or anything like that.

Mr. YOUMANS recalled and examined by Mr. WILLIAMS.

148. Re D. Q. Can you state from your knowledge of the business, about how many letters a competent man can handle, postmarking and cancelling the postage-stamps upon them, in a minute, half hour, or hour?

A. Before Mr. James came there we were not so careful about the postmark, and I have seen them do a hundred and sixty a minute, but since Mr. James has been there he has made a specialty of seeing that the postmarking is done properly, and I suppose they are doing now on an average one hundred and twenty-five.

149. Re D. Q. A minute?

A. Yes, sir. Now the postmark is better and distinguishable. It is sufficient cause for removal now if a man don't put it on plainly.

2877 JAMES GAYLER, being duly sworn on behalf of the complainants, and examined by Mr. WILLIAMS, t'stified as follows:

1. Q. State your age, residence, and occupation.

A. I am 51 years of age; I reside in Ridgewood, New Jersey, and my occupation is general supervision of the fourth division of the New York post-office.

2. Q. State, if you please, how long you have been officially connected with the post-office in New York.

A. With the New York post-office since 1872, the first of April. With the department some time longer. I have been connected with the Post-Office Department twenty-five years altogether.

3. Q. What has been your business since 1872 in the post-office?

A. General supervision of the delivery business of the city delivery. For one year it was confined to the carrier delivery, then I was superintendent of the carriers' department, as it was then called. In 1873 I was made general superintendent of the entire delivery, including the box delivery, the carrier delivery, down town, and entire delivery through the different stations throughout the city.

4. Q. State what letters are postmarked and the postage-stamps cancelled in your division.

A. All city letters for the city delivery which are deposited in the post-office building, or are brought in by the collectors from city boxes in that district which includes the city below Canal street, and the stations. All the letters are brought in by the collectors at those districts, and are stamped at those stations with the postmark of the station.

5. Q. Can you give an estimate of the average number of letters which are received in the post-office building which are postmarked or upon which the stamps are cancelled within your division?

2878 A. Yes, sir; I can give that—they run from thirty to forty thousand a day.

6. Q. Exclusive of stations?

A. Yes, sir; exclusive of stations; I am including letters and postal cards.

7. Q. How many clerks or employees in your division are c ncerned in postmarking and cancelling postage-stamps on letters?

A. There are three concerned in it, but they are not all engaged at it all the time. One is, however. I have one man who throughout the day does nothing else. He is assisted by a boy during part of the day, and at night there is a man who puts in three and a half or four hours' work of that kind.

8. Q. Has the combined postmark and stamp canceller that is now used, been used in that office since 1872, in your division?

(Objected to by Mr. Clarke as irrelevant and immaterial. Question allowed. Exception taken.)

A. My impression is that it has in some way or other either with the cork canceller or some other way—cork, rubber and various devices.

9. Q. Supposing that a letter was postmarked and the stamp cancelled by separate instruments, so far as the letters are concerned that are received in the post-office building in your division, how many more clerks would it take than there are now employed for that purpose?

A. Well, I think we can get along with one more clerk—three altogether.

10. Q. Making three altogether?

A. Yes, sir.

11. Q. I understood you to say you have three now.

A. Yes, making four altogether. I made a mistake. There is one man on regular all the time doing that. These other two are em-

2879 ployed at other duties throughout the day, and the other men might be more steadily employed than they are, but one more man, I think, might be able to fill the bill. It is a much more rapid process to cancel the stamps than to affix the postmark. There is not so much care required for that.

12. Q. Suppose there is a letter upon the table to be postmarked and upon which the stamp is to be cancelled. By the instrument now in use that can be done by a single blow, as quick as a man can strike the ink-pad and strike it on the letter, can it not?

A. Yes, sir, he can. It depends somewhat upon who the man is. If he is an expert stamper he can stamp it very fast and affix the postmark at the same time. Perhaps I don't understand your question.

(Former question repeated.)

A. Yes, sir; it can be done as quickly as that, but to make a distinct postmark it has got to be done with some little care. It requires a knack—a knack has got to be acquired to make a legible postmark to be affixed with the stamp.

13. Q. Cannot a man, assuming him to be competent to do the busi-

ness, take this combined stamp and strike it on the ink-pad and then strike it on the letter just as quick as he could take a separate canceller and strike it on the postage-stamp?

A. Yes, sir; he might do that, but in cancelling stamps it would not be necessary always to do that. A cancelling arrangement could be made, and has been made and used there, so you can take up enough ink on the cork to cancel half a dozen without taking more ink. You cannot do that with a steel cancelling die. You have got to take ink every time.

14. Q. Is that the usual way of stamping and cancelling the postage-stamps, to strike the canceller on several stamps with one inking?

A. Yes, sir; we cancel now what are known as the unpaid postage-stamp by means of a circular stamp, bearing several dies of the
2880 same sort, and circles, and they have been stamped in that way—matter which don't have to be postmarked.

15. Q That doesn't quite answer my question. Is it the usual practice in the office to cancel several postage-stamps on several different letters by one inking of the canceller?

A. Not on letters, sir.

16. Q. (By Mr. CLARKE.) Because the combined instruments are used?

A. Well, I don't know.

Mr. WILLIAMS. Isn't it desirable, particularly desirable in the post-office, to effectually cancel a postage-stamp so that it may not be used a second time?

A. Yes, sir.

17. Q. Could that be done, do you think, supposing the separate canceller to be used—by cancelling several stamps with one inking of the canceller?

A. Oh, yes.

18. Q. You think it could be done effectually?

A. Yes, sir.

19. Q. How many stamps do you think that separate canceller could destroy with one inking?

A. I don't know. I have not done any of that work myself or seen it done for some time.

20. Q. So you are simply relating your conjectures?

A. No; I have seen stamps cancelled before. I have seen it when the cork cancellers were used. I have seen three or more cancelled with one application of ink.

21. Q. That cannot be done with a steel canceller, you think?

A. No, sir; it would not absorb the ink.

22. Q. Has the steel canceller or metal canceller been adopted in place of cork because it is supposed to be better—a more effectual canceller?

A. I don't know that.

2881 23. Q. Can you state about how many times a man can use the combined instrument now in use in a minute or in an hour, supposing him to be a competent person?

A. No, sir; I am not prepared to give you the figures now. I have not as yet had but one man on that, and he is an extraordinary fast stamper. I have known how many he has stamped in a minute, but I don't remember now the best he has done. I know he can stamp very fast.

24. Q. You don't remember the number?

A. No; not at present.

25. Q. I would like to know that fact.

A. I will get it for you.

26. Q. Can you state how many letters upon an average on each day are postmarked with a postage-stamp canceller in the city stations?

A. I cannot give you those figures now, sir; I can procure them, however.

27. Q. Is there anything done with these letters in the post-office building after they receive them from the different stations, except to put them in the mails?

A. Yes, sir.

28. Q. What is it?

A. I am speaking now of the letters in my own division. I have nothing to do but with the city letters. The city letters received at the post-office from the stations are postmarked on the back with the hour of receiving them, except at the stations on the first morning mail. They have not then time; it is a heavy mail, but after that throughout the day and night all they receive they stamp on the back, denoting the hour at which they were received.

29. Q. Are letters postmarked with a stamp cancel' at each of these city stations?

A. Yes, sir.

30. Q. How many stations are there in the city?

A. There are nineteen now.

2882 31. Q. Are the letters postmarked and the postage-stamps cancelled in the same way in the stations as in the main post office?

A. Yes, sir.

32. Q. You say they are stamped in the same way as in the post-office?

A. Yes, sir.

33. Q. Can you state about how many letters are postmarked and the postage stamps canceled in any one of these stations? Take the one which receives the largest number of letters.

A. No, sir; I cannot now. I would not like to make an estimate.

34. Q. Do you know how many clerks are employed in these different stations in the aggregate or in each station? Can you state anything on that subject?

A. I know that in some of the stations—stations A, D, and E, there are twelve persons. All have a pretty good force of clerks for services.

35. Q. What pay does that regular rapid stamper in your office receive?

A. It is $1,080 a year.

36. Q. Is there any time during the day when you are crowded with this business of stamping and postmarking of letters?

A. Yes, sir; the latter part of the day merchants are beginning to post their letters, sending their boys with their city and other correspondence to the post-office, and they come in quite fast then.

Cross-examination by Mr. CLARK:

37. X Q. Can a combined postmarker and canceller be used as rapidly as a separate canceller?

A. No, sir; I think not.

38. X Q. Give the reasons; all that you think of.

A. Because a separate canceller can be arranged so as to cancel several stamps without going to the ink pad for fresh ink. No postmarker that could last could be used in that way.

2883 39. X Q. Can the combined postmarker and canceller be used as rapidly as a separate postmarker?

A. It can by an expert; yes, sir.

40. X Q. Doesn't it require some little time to adjust the aim when the combined stamp is used so as to make the canceller hit the postage-stamp, which would not be required if the separate instrument was used?

A. I cannot speak as an expert on that point. I never used it myself.

41. X Q. Separate cancellers are now used in the post-office for certain purposes, are they not?

A. Yes, sir.

42. X Q. Are they made of wood, metal, or cork?

A. I have seen them made of all sorts of things, rubber, cork, etc.

43 X Q. Rubber and cork is chiefly used now for separate cancellers?

A. I won't say what are chiefly used now. That I cannot speak of. I am speaking of what I have seen used in this post-office and other post-offices.

44. X Q. In your division is there any cancelling done with a separate instrument at all?

A. No, sir; not that I am aware of.

45. X Q. You don't cancel stamps on the circulars?

A. Yes, sir; there are some; on third class and fourth-class matter we have a separate canceller, which is made of roller composition—of glue and molasses.

46. X Q. I understand you roll that over several papers at a time?

A. I have not seen that used for several years. It is a canceller that bears a New York postmark—no number or letter indicating at which station it is used, to tell where the matter originated.

47. X Q. You say you pay $1,080 a year to the man who works on it all the time?

A. Yes, sir.

48. X Q. What does the boy get who helps him in the daytime?

A. $300.

2884 49. X Q. What does a man get who works three or four hour at stamping—not altogether?

A. He is employed for other purposes. I don't know what his salary is.

50. X Q. Who pays these men?

A. The postmaster.

51. X Q. Where does he get the money?

(Objected to by Mr. Williams, on the ground that it is a matter of no consequence where the man gets the money. It is immaterial where Mr. James gets the money, and in the second place it is impossible for the witness to know, except from hearsay, where the money does come from. If the witness personally knows where he gets the money, then he can give it subject to my objection.)

WITNESS. I know it from having seen the letters from the Postmaster General, awarding Mr. James a certain allowance for clerk hire. That is the closest knowledge I have in regard to it. You see that there is a certain annual allowance for clerk hire, and I have seen the letter making that allowance.

(Mr. Williams objects to the answer, on the ground that there is better evidence of the facts than this witness gives.)

Redirect examination by Mr. WILLIAMS:

52. Re D. Q. When I asked you if the combined stamp has been used

in 1872, you say it has, excepting as to rubber and cork, etc. You mean by that, as I understand, simply that the material of the canceller has been changed during that time from cork to rubber, metal, and so on?

A. Yes, sir.

53. Re D. Q. And so you mean?

A. Yes, sir.

2885 Recross-examination by Mr. CLARKE:

54. Re X Q. There have been other changes, too, haven't there?

A. In the stamp?

55. Re X Q. Yes, in the combined instrument?

A. Yes, sir, in the face of the cancellor—they are all uniform now—there have been changes of that kind in the impression they make on the stamp.

56. Q. They have been changed in other parts of the instrument also?

A. Yes, sir; changes in the manner of inserting the type, changing the dates. They are now put in form beneath instead of above, and kept in by a screw entering the side of the instrument.

57. Re X Q. There has been a cross-bar used and a cup?

A. Yes, sir; there had been, but now they are made of one piece of metal.

58. Re X Q. And that is screwed in a sort of a cup?

A. Yes, sir.

59. Re X Q. And that is screwed in the cross-bar?

A. Yes, sir.

Redirect examination by Mr. WILLIAMS:

60. Re D. Q. You speak of third and fourth class matter as stamped in your division—some stamping of that kind done there. Is there much of it done?

A. It has only been recently that that sort of marking I described has been affixed to them, and all the third and fourth class matter deposited in the stations, the stamps have been cancelled there always by separate instruments.

61. Re D. Q. Separate cancellers?

A. Yes, sir.

62. Re D. Q. They are not postmarked?

A. No, sir, they are not. This device that I speak of just now is not perhaps distinctly a postmark; it simply gives New York or
2886 M B O, or a number down at the office to show to the origin of the matter.

63. Re D. Q. Is that made by a two-faced instruments?

A. A single face.

64. Re D. Q. And that is put on the postage-stamp?

A. Yes, sir.

65. Re D. Q. Are these persons to whom you refer, those three persons who make those stamps or stamp those parcels?

A. No, they are the persons who stamp the letters and postal cards.

Mr. GAYLOR recalled.

By Mr. WILLIAMS:

66. Q. Mr. Gaylor, you proposed to inform the master as to the number of clerks that were employed in the different stations in the city for postmarking and cancelling all letters received at the stations, and will you give that information now?

A. (Producing a paper.) I have here a memorandum made by myself from reports received from all stations except two unimportant ones—Spuyten Duyvil and Kings Bridge. I have the average number of letters postmarked daily at each station. (Reading from paper.) I have the average number of letters, &c., postmarked daily at each station, the number of clerks employed at each, the time consumed daily in stamping and postmarking, and remarks as to the number of clerks employed in that duty, and the number of hours that are employed by each of them in that duty.

(Memorandum offered in evidence and marked Exhibit No. 1, K. G. W., Master, and of which the following is a copy:

2887 EXHIBIT No. 1.—*K. G. W., Master.*

Station.	Average No. of letters, &c., postmarked daily.	No. of clerks empl'd.	Time consumed daily in stamping.		Remarks.
A	75 to 80,000	14	30½		By 6 clerks in tours, average 5 h. 5 m. each.
B	15,822	8	8 hrs.	40 m.	1 clerk.
C	7,750	8	2		5 clerks employed in postmarking as required.
D	50 to 55,000	13	10	40	4 clerks, 2 h. 40 m. each.
E	40,000	10	12		2 men, 6 hours each.
F	15,382	9	4		4 clerks postmark, 1 hour each.
G	902	6	3		5 " " as may be required.
H	18,000	6	3		2 men, 1½ hours each.
K	3,510	2	4		1 man.
L	4,639	3	1	15	All clerks postmark as may be required.
M	350	0		45	All work performed by superintendent.
Morrisania	2,326	1	3		
Tremont	168	0		10	All work performed by superintendent.
Fordham	376	0		10	" " " "
Woodlawn	50	0		5	All work performed by superintendent.
Spuyten Duyvil					
Riverdale	175	0	About 1 hour		
Kings Bridge					
West Farms	85	0	About 30 min.		
			84 hrs. 45 min.		

2888 67. Q. You said you would ascertain how many letters that rapid clerk in your office could postmark and cancel in a minute; you spoke of him as an expert man. Have you ascertained that fact?

A. He can postmark from 180 to 200 when he is at his best.

68. Q. Using the combined stamp?

A. Yes, sir.

69. Q. How long has that skillful stamper in your office been in that business in the office?

A. Well, I remember him as such for seven years. Before that time I would not be likely to know whether he was stamping or not.

By Mr. CLARKE:

70. Q. In this exhibit the column headed "Number of clerks employed," means the whole number of clerks at all the duties of the office?

A. Yes, sir.

71. Q. And the column headed "Time consumed daily in stamping"?

A. Means whole time consumed.

72. Q. By all employed at stamping?

A. Yes, sir.

73. Q. And the column headed "Number of letters postmarked

daily," does that mean upon which a combined postmark and canceller are used?

A. Yes, sir; I would state that there might be one exception there, in the case of Woodlawn. I am not quite certain whether they use the combined stamp there or not. When it was a post office it had only an ordinary postmark, but when it was made a station I don't know whether they used the combined instrument. They may have done so, but I don't know.

By Mr. WILLIAMS:

74. Q. Take Station A; average daily receipt of letters, as you
2889 have stated here, is from seventy five to eighty thousand; number of clerks employed, fourteen; time consumed in each day in stamping, thirty hours and a half. Do you mean by that the aggregate number of hours?

A. I think you will find the explanation in the remarks.

75. Q. That, then, is the aggregate amount of time which all the clerks use?

A. Yes, sir; sometimes more than one are stamping, but it would make up the thirty hours.

76. Q. Suppose that this stamping in these different stations was done with one instrument, that is, the postmarking and the cancellation of the stamps done with another, so that two operations and two handlings of the letters was necessary, would you say or not that it would take more time?

A. Yes, sir; it would take more time.

77. Q. Well, how much more time do you think?

A. Well, take station A as an example of 30½ hours, it would take ten more hours more work in a day divided among the clerks.

78. Q. In a day of twenty four hours?

A. It would take ten additional hours.

79. Q. You mean by that, that instead of 30½ hours to dispose of the letters it would take 40½ hours?

A. Yes, sir.

80. Q. Then according to your estimate this stamping—this double stamping—only saves a third of the labor?

A. It might possibly take more than that; it might take twelve hours; but I am not very competent in my own opinion about that, because I don't have immediate supervision of any of that work.

81. Q. But don't you candidly think, Mr Gayler, that if it was necessary for two men to handle these letters, one using the separate instrument for postmarking these letters and the other using the cancelling instrument for cancelling the postage-stamp, it would take more than ten hours in addition to the 30½ hours now employed?

2890 A. I would not be positive about ten. The postmarking could be done more quickly with nothing but a postmark, and the cancelling could be done much more quicker with nothing but a canceller.

82. Q. You have a man in your office that you say can with the use of the combined stamp, postmark and cancel postage stamps on letters at the rate of 180 to 200 a minute. Now, I would like to have you state how many letters he could postmark, supposing he used nothing but a simple postmark.

A. I cannot say how many more, but he could stamp a considerable number more.

83. Q. Do you think so?

A. Yes, sir; in putting on a postmark alone, the only thing he is

obliged to give his attention to, is to see that he makes a postmark without obliterating the address, for he can strike it on any place of the envelope, whereas with the combined stamp he has got to put it in a place where the stamp will be cancelled at the same time.

84. Q. Now suppose he wants to use the cancelling instrument, doesn't he have to take care in the use of that—doesn't it take him just as much time to put that on the postage-stamp as it takes him now?

A. The double instrument on the letter? No, I think not.

85. Q. Why?

A. He has merely got to strike the stamp, and as long as he makes an effectual cancellation it don't matter. He does not have to see that the postmarker and canceller both give two impressions, but has to see to nothing but the canceller.

86. Q. But he has to watch his blow when he applies the canceller to the ink-pad and then applies it to the letter, it just takes as much time to watch the blow and see that the postmark goes on the letter as it takes now to see that the canceller goes on the postage-stamp, don't it?

A. Well, but he does not; in using the postmarker and canceller he has to see about both.

2891 87. Q. Well, then, it becomes, as I understand from the answer given, a matter of skill in applying the double instrument so as make a good postmark, and at the same time to effectually cancel the postage stamp?

A. Yes, sir; the stamps could be cancelled as well by various means. If I was obliged at the stations or any of the offices to do the cancellation separate, I should arrange myself to do it much more quickly, and in a great many cases where a good many letters come in together, I could have them done by a roller where a hundred could be done in a second.

88. Q. But you have to arrange the letters to apply the roller, and do you know that cancelling those stamps by means of a roller, without inking the roller frequently, would cancel letters as effectually as the present system?

A. Yes, sir. Same thing in case of circulars.

89. Q. But you don't know they are as effectually cancelled that way as now?

A. I have seen them as effectually cancelled. Of course the postmark is not as nice, but the cancellation is as effectual.

Cross-examination by Mr. CLARKE:

90. X Q. In saying that you should think that perhaps ten hours additional work would be required in station A to cover the separate cancelling and postmarking, and the arrangement of the letters, going over the letters twice, do you say that upon the theory that the letters would be faced up, drawn down by one man and postmarked, and then faced up again, and then drawn down by another man and cancelled?

A. Only one facing up for the two operations.

91. X Q. Facing up letters, arranging the letters so as to get as nearly as possible all the postage-stamps in one place?

A. Yes, sir. All, of course, faced up.

92. X Q. That is, with the superscription and the postage-stamp uppermost?

2892 A. Yes, sir. They don't undertake to face them so that the stamp is on the right-hand side. They just strike it and then go on.

93. X Q. So that the only difference in the use of two stamps would be that the bundle of letters already faced up would be first gone over

and passed over to another man, and he would draw them down again, they being already faced up, and cancel them?

A. Yes, sir.

94. X Q. Wouldn't it be feasible for a man to use a separate postmarker to cancel with, and then with another blow with the same instrument put the postmark off to one side?

A. It would be feasible, but it is forbidden by the regulation of the department.

95. X Q. The regulation forbids it?

A. Yes, sir.

96. X Q. But leaving that order out of account, it would be feasible?

A. Yes, sir.

97. X Q. Perfectly feasible?

A. Yes, sir.

98. X Q. Would that require ten additional hours if it was done in that way?

A. No.

99. X Q. All that a man would have to do in cancelling that way would be to strike two places on the envelope and one on the ink-pad?

A. Yes, sir.

100. X Q. Now he strikes two places, one on the ink-pad and one on the letter?

A. He would have to go a second time to the ink-pad after cancelling the stamp.

101. X Q. Four places in all?

A. Yes, sir; two on the ink-pad and two on the letter.

102. X Q. In that case there would not be any time lost in passing the letters along hand to hand, and that might be done if it was not for this order?

A. Yes, sir.

2893 103. X Q. I understand that a postmaker effectually cancels a stamp?

A. It could be made so.

Q. You do use on circulars a canceller that also has New York and the date on it?

A. Yes, sir.

105. X Q. Do you know of any complaints as to the efficiency of that cancellation?

A. No, sir; it has not been in use long enough.

Redirect examination by Mr. WILLIAMS:

106. Re D. Q. How many hours constitute a day's work?

A. Usually eight hours, although in some of the stations they are obliged to work longer for lack of sufficient force.

107. Re D. Q. When you hire a man as a clerk to do stamping or other business, it is understood that he hires to work eight hours out of twenty-four for the salary which he receives?

A. No, sir; there is no understanding. It is understood that he shall work as long as he may be required.

108. Re D. Q. You don't work any one more than twenty-four hours?

A. No, sir.

109. Re D. Q. Isn't that the common understanding?

A. Yes, sir; that is the rule at the lower office. There are three tours of eight hours each.

110. Re D. Q. When one set of men work eight hours they go off and another comes on, and so on?

A. Yes, sir; but the stations are not open all night.

111. Re D. Q. There are times I suppose in the Post-Office Department when a great many of the clerks are not employed for a little time of the day; portions of the day when the collecting clerks and distributing clerks are not employed all the time?

2894 A. I never saw, except at lunch time, when any of them appeared to be at leisure. They are pretty well worked.

2895 Mr. DWIGHT A. LAWRENCE, a witness called on behalf of the complainant, being duly sworn and examined by Mr. WILLIAMS, testified as follows:

1. Q. State your age, residence, and occupation.

A. My age is twenty-six; occupation, general superintendent of the foreign department of the New York post-office; residence, No. 127 West 20th street, New York City.

2. Q. How long have you been so occupied?

A. I have been general superintendent of the foreign department about three years, I should judge—going on three years; I guess three years this month.

3. Q. Who was your predecessor in office?

A. George F. Hopper,

4. Q. Where is he now?

A. He is night superintendent of the post-office now. I took his position, and he took mine. I was night superintendent before that; prior to that I was night superintendent.

5. Q. The question is: Prior to the time you became superintendent of the foreign division, had you any means of knowing about the stamping—

A. (Interrupting.) I was night superintendent, and I have occupied various positions.

6. Q. I want to know simply how long you have been there, to know about the stamping.

A. I have been there since 1873, and before that; but I resigned from the post-office.

7. Q. State, if you know, how many clerks were employed in he foreign department mails of the New York City post-office in and about the postmarking and stamp cancelling in 1872 and 1873.

A. I could not tell you, sir. I was not employed in the Post-Office Department in 1872; I had resigned then.

8. Q. To what period back does your knowledge of those facts, if you have such knowledge, extend?

2895 A. The last three years in the foreign department.

9. Q. State, then, if you please, the number of clerks that have been employed in and about postmarking and cancelling of postage-stamps upon letters in that department the last three years.

A. Well, for parts of the time in the day I will have one, sometimes two, and sometimes three clerks stamping. I have no men regularly employed stamping.

10. Q. Are there times when you have all three employed at the same time?

A. There are times, sir; but not during each day. It occurs sometimes just before the closing of a steamer. A steamer may go Tuesdays, Thursdays, and Saturdays, while there are none Mondays and Fridays.

11. Q. Can you make a statement of the average number of letters passing through your department daily?

A. I cannot.

12. Q. You cannot approximate with accuracy upon that subject?

A. No, sir; I cannot.

13. Q. You use in your department the combined postmarker and stamp-canceller?

A. Yes, sir; on the drop letters, that is, the letters dropped in the drop at this office, and those collected by the carriers and brought in. The letters that come from the stations have the postmark of the station is put on, and the order of this department is the stamps are cancelled with the canceller without the postmark. None on foreign letters.

14. Q. Then there is no postmark on a foreign letter?

A. Yes, sir. The station puts the mark of the station on it.

15. Q. And that is the only postmark that a letter has?

A. Yes, sir.

16. Q. You don't put on any mark in your office?

2897 A. It is not the rule to do it, just simply to obliterate the stamp.

17. Q. (By Mr. CLARKE.) You do obliterate the stamp at your office?

A. Yes, sir. The orders are not to do it at the stations.

18. Q. So that a letter directed to a foreign country comes from the station to your office with simply the station mark upon it, and the stamp is perfect?

A. Yes, sir; and the stamp is obliterated at our office as a general thing.

19. Q. And without any post-mark?

A. Yes, sir; as a general thing, that is the rule.

20. Q. But when they are dropped in here it is otherwise?

A. Yes, sir; because the clerks at the office may not know the various rates of foreign postage.

21. Q. Is the work in your department of the post-office done any quicker with the combined stamp than it would be if you used separate instruments for post-marking the letter and cancelling the postage stamp?

A. Oh, yes.

22. Q. How much quicker?

A. Well, that would be pretty difficult for me to tell. I have never seen the other tried, except that I have just seen men use the canceller, and they cancel very fast; but I have never seen them cancel and put the post-mark on separately. That is my recollection of it.

23. Q. Well, do you know of any reason why a man may not with this combined instrument post-mark a letter and cancel the stamp just as quick as he could post-mark the letter with an instrument simply adapted to that purpose, without canceling?

A. Well, I don't know why a man could not post-mark—an

2898 expert could not post-mark and cancel a letter about as quick as he could to post-mark it alone.

23. Q. Then if he could, all the time and labor that would be taken to make a separate cancellation of the post mark would be saved?

A. Yes, sir; except that they can cancel the postage stamps very quickly. I have seen a roller used, and appliances with a sponge, where they would rub along. That is on circular matter.

24. Q. You don't understand that that practice is adopted in the post-office for the purpose of canceling three-cent postage stamps?

A. Not on letters, no, sir.

25. Q. It is a very desirable object, as I understand, to so cancel stamps that they cannot be used a second time?

A. Yes, sir.

26. Q. Therefore the cancellation should be very decided and clear?

A. Yes, sir.

27. Q. Whenever these cancellations are made by rolling along from stamp to stamp, it is necessary before doing it to take time and arrange the letters so that the roller can be used?

A. Yes, sir, it would be necessary to do it very rapidly, so that the stamps would be on the same corner, and the letters so arranged that they could be rubbed down with the hand.

28. Q. But if the stamps are on different parts of the letter then it would be impracticable to use it?

A. No; I don't know that.

29. Q. Is it your opinion, that if you were using in your department separate cancellers and separate post-markers, that you would require another hand to help?

A. That would be a difficult thing to say. My department is a small department. I have only a small number of men anyway. I should hate to force the men up to any more than they are doing now,
2899 yet I suppose I could do it. I have only a small number of men—the smallest in the post office.

30. Q. You don't think, as I understand you, that your present force would be able to handle the letters?

A. I should say I should want one more man, and I should make the application for it.

31. Q. Have you any idea as to how much the persons who are engaged in post-marking and stamp cancelling are paid in your department?

A. I have no men in my department that are really assigned to duties as stampers as the other departments have.

32. Q. What are your clerks' range of salaries?

(Objected to by Mr. Clarke as immaterial.)

33. Q. Let me be understood. You have stated that you have three persons, more or less, concerned in post-marking and stamp cancelling in your department—do you know what salaries those three men receive?

A. I cannot answer that either. It is this way: As a general thing a clerk getting sixty dollars a month, or from that to seventy dollars, might be set to stamping; but it is just as liable to be one that is getting one hundred and ten dollars. One of these three men I speak of I borrow from Mr. Gayler's division.

34. Q. Then I misunderstood you, because you stated, as I understood you, that you had three men engaged more or less in this business. Now, take the twenty-four hours altogether, how many days' work of eight hours per day does the whole amount, the whole time occupied in post-marking and cancelling stamps upon the letters, aggregate?

A. I cannot answer that, sir.

35. Q. Can you give your opinion on that subject?

A. I cannot give you any opinion.

36. Q. All the time consumed would be more than the continuous labor of one man for twenty-four hours, wouldn't it?

2900 A. I don't think it would, sir; not for the whole twenty-four hours.

37. Q. Well, would it be equal to the continuous labor of one man for sixteen hours?

A. No, sir, I should not think it would be that. If you will allow me to explain. The work varies. Now you take it from four o'clock until half past six o'clock, the drop here might be quite heavy, and one man might be able to keep the drop up. But say, for instance, to-day a

steamer closes at 11:30; from 11 o'clock to a quarter of 12 I might require three men to get up that drop. Most of our letters come in just before the closing. The supplementary mail is a separate thing.

38. Q. I didn't know but what you might aggregate?

A. No, I cannot, because steamers close at all hours. It may close at five o'clock in the morning, and I may have to bring my whole force down then. It is a very small department in comparison with the others.

Cross-examination by Mr. CLARKE:

39. X Q. I understand you to say that three men are sometimes employed in stamping and cancelling. These are not any particular three men of the whole force in your department?

A. No, sir.

40. X Q. They are one and another out of the whole force?

A. Yes, sir.

41. X Q. Sometimes you borrow a man from the domestic department?

A. Yes, sir; and the city department. I may borrow men out of the three.

42. X Q. Is that department now pretty full or pretty scantily supplied with clerks?

A. I have got all I want. Of course, at times I need more, and sometimes I have not got work enough for what I have got.

2901 43. X Q. Did I understand you to say that in your opinion you think the postmarking and cancelling with the combined instrument can be done as rapidly as postmarking with the separate instrument?

A. By an expert I think it could.

44. X Q. Is not some time occupied in aiming at the stamp when the combined instrument is used that would not be required with the separate instrument?

A. No, sir; I don't think the killing portion.

45. X Q. But when the combined instrument is used, of course the whole instrument has got to be aimed pretty near the postage-stamp; but if a separate instrument is used, you can put the stamp on anywheres?

A. No, sir; I think the same care would have to be used then so as not to obliterate the address.

46. X Q. About what proportion do the foreign letters that come from the stations bear to the whole number sent off?

A. I cannot tell that; but I should say a small proportion; for most of them are dropped in at the general office.

47. X Q. Can postmarking and cancelling by a combined instrument be done as rapidly as cancelling a postage-stamp with a separate instrument?

A. Oh, no, sir.

Redirect examination by Mr. WILLIAMS:

48. Re D. Q. Why not?

A. For the same thing that Mr. Gayler has given. I have seen men take a roller and roll a lot of circulars; just give one rush of the arm; and I have seen men take a piece of sponge and fill it with ink and put it in a brass socket and sweep it along.

49. Re D. Q. Do you understand that it is necessary, and I think you have so expressed yourself, that postage-stamps should be effectually cancelled so that they cannot be used again?

2902 A. Yes, sir.

50. Re D. Q. I understand you to say that this practice, by which you say you have seen the stamps cancelled by rolling an instrument over them—I understand you to say that that is not applied in general practice to three-cent postage-stamps and higher postages on letters?

A. Not applied; no, sir.

51. Re D. Q. Now, let us suppose. Suppose you take a letter that bears upon it a postage mark of three five, or fifteen cents, and you want to postmark that letter and cancel the postage-stamp, you would not do that by the use of that roller; but if you were compelled to use separate instruments for the postmarking and cancelling, you would cancel the stamp with a separate instrument. Now, can a man use that separate instrument in cancelling that postage-stamp any quicker than he could with this combined instrument cancel and make a postmark at the same time?

A. In reference to my department, I think it could, sir. There are letters on my desk, sometimes a great number of five cent stamps, other stamps and other denominations, and a man can roller them across quicker than to take a killer.

52. Re D. Q. You say you don't stamp with a roller, you stamp with a separate canceller?

A. Yes, sir.

53. Re D. Q. Can a man use that separate canceller and cancel five-cent postage-stamps any quicker than he can make a blow with the combined stamper and canceller at the same time?

A. Yes, sir; he could.

54. Re D. Q. Why?

A. Because it does not require any care to use the canceller where it does in using the postmarker. A man is held to accountability in using the postmark.

55. ReD. Q. It is necessary that the operator should be accurate when he cancels the stamp; when he puts the cancellation on the stamp?

2903 A. Yes, sir; it is simply to destroy the stamp so that it cannot be used again.

Adjourned for half hour.

2904 Mr. SAMUEL P. KITTLE, being duly sworn on behalf of the complainant, and examined by Mr. WILLIAMS, testified as follows:

1. Q. State your age, residence, and occupation.

A. My age is 54 years; residence, Tremont, city of New York; occupation, manufacturer of spring mattrasses and bedding; and I also act as mechanical expert in patent cases.

2. Q. You have heretofore been examined as a witness in this case?

A. I have.

3. Q. Have you examined the patents and the exhibits and other matters in this case, which enabled you to give your opinion as an expert?

A. I have; and have given my opinions quite freely in the record of the case.

4. Q. You know what is understood by a separate postmarker, and a separate stamp canceller, and a combined postmarker and stamp-canceller, as heretofore referred to in this case?

A. I do.

5. Q. Have you seen among the exhibits in this case an instrument for postmarking a letter alone, and also one for cancelling postage-stamps, and also an instrument for postmarking and cancelling the stamps at the same time?

A. I have; I think several instruments where the postage-stamp canceller and the postmarker were combined.

6. Q. Supposing it takes twenty clerks to postmark and cancel the postage-stamps upon the letters received in the third division of the New York post-office in a day, with the combined postmarker and stamp-canceller as now used, how many clerks, in your opinion as an expert, would it take to do the same work, provided a separate postmarker and a separate stamp canceller were used for such purposes?

2905 (Mr. CLARKE. I object to that question on the ground that the witness is not shown competent to give an opinion on the subject; whereupon Mr. Williams offers so much of the deposition or depositions of the witness heretofore given in this case as relates to his qualifications as an expert, and upon that he insisted upon an answer. Question admitted. Exception taken.)

A. Just about as near double the number as you could imagine; there would be very little less than double the number, if any.

7. Q. You can give your reasons?

A. In the first place, if any care is required in the use of the combined instrument over the ordinary or separate instrument, it only has reference to the guiding of the cancelling face on to the postage-stamp, and I don't think there is any more care required for that than there would be in the guiding of the postmarker without the cancelling attachment. Indeed, I think there would be less care required in using the combined instrument, if there was any difference, than would be required in making two strokes with the separate instrument, for the location of the cancellation and the other location of the postmark. As regards the operation, I have been several times in the post-office since I was first called in this case, and witnessed the operation of marking and cancelling at one stroke, and whether the men worked at their usual speed or at an unusual speed, I cannot say; but I don't see how men could handle a single instrument much more rapidly than they did the combined instrument. It is my opinion that to produce and give clearness of imprint of the postmark, date, &c., carried in one side of this instrument, there is no more care required than there would be required with a separate instrument for that purpose, having no cancelling device attached. The effort is so little more to carry the combined
2906 instrument than it would be to carry the single instrument by the operator that it is not worth being mentioned.

8. Q. Referring to the times when you were in the post-office and saw the combined instrument there used, state how it was used and how the letters were handled upon which it was used.

A. The letters are placed with the postage-stamp uppermost, or all on one side in a pile together, and are carried down to a point where they are stamped and cancelled one after another by one hand of the operator; while the instrument is carried in the other hand, is struck upon the ink-pad for ink (illustrating). So that its face is inked by one blow, being directed so that the cancelling face of the device will strike upon the postage-stamp, and the postage-mark will be imprinted at the left of the postage stamp, and as rapidly as the operator is able to strike the face of the instrument on the ink pad and transfer the ink to the postage-stamp and the envelope, so rapidly is the operation of postmark-

ing and postage-stamp cancelling carried on, which I should judge would be at least one hundred to two hundred per minute.

9. Q. What did the stamper do with the letter after he used his stamp upon it?

A. The letters thus stamped, as they accumulated in front of the stamper, he, by lots, passed them off further to the left on the table.

10. Q. Suppose that at the times that you were in the post office and saw this operation, these letters had been taken in the first place by a man with a separate stamp cancelling instrument, and he had cancelled the postage-stamp, and had then passed the letter to another man for the purpose of putting on it the postmark with another instrument, and they were then disposed of as they disposed of the letters at the time you were in the office, would or not any time be consumed in that operation in addition to the actual time that it took the two men to put their stamps on these letters?

2907 (Same objection raised by Mr. Clarke as before, and also as immaterial and incompetent. Objection overruled, and exception taken.)

A. It certainly would take additional time.

11. Q. Have you any means of knowing how many persons are actually employed in postmarking and cancelling postage stamps in the third division of the New York post office, under the supervision of Mr. Youman; and, if you know, please state it.

A. That is, the general mail?

12. Q. Yes.

A. I have means of knowing by personal observation and by information given by the direction of Mr. James and his subordinates to me. I visited the post-office this morning for the purpose of ascertaining the number of tables used for the purpose of cancelling postage stamps and postmarking the letters at the same operation, and by actual count I found in one row on the Broadway side of the main room of the post-office, a long table, on which there are sixteen divisions, with sixteen ink-pads and sixteen places for postmarking and stamp cancelling devices, and where, I was informed, there were sixteen men employed every day.

Mr. CLARKE. I object to his information, and would like to cross-examine him before he goes on further on that point. Testimony admitted. Exception taken.)

The WITNESS. There, I was informed by Mr. Charles L. Steele, who told me he was in charge of that department——

(Mr. CLARKE. I object to what Mr. Steele informed him.)

13. Q. Did Mr. James in directing you to go into the post-office to make this examination, refer you to Mr. Steele for information on the subject?

2908 A. Yesterday Mr. Norton called with Mr. Campbell and myself on Mr. James, Norton having previously called on Mr. James, as I was informed, and told him that we were there now and would like to go down in the office and go through those examinations of which he had spoken. I supposed, and Mr. James made the reply that he had arranged for that this morning, and we said, "Very well, we will come in the morning." That ended that interview. This morning we presented ourselves, and Mr. James said in a moment he would arrange to send us down into the post-office, and told his colored servant to take these men down; and in pursuance with that, I was taken down and introduced to Mr. Charles L. Steele.

By Mr. CLARKE:

14. Q. Did Mr. James refer you to Mr. Charles L. Steele? Can you say that?

A. I cannot say that.

15. Q. He gave you permission to examine things there?

A. Yes, sir.

Mr. WILLIAMS resuming:

16. Q. To whom did you address yourself, and what did you say when you went into the post-office to make this examination?

A. I addressed myself to Charles L. Steele. I asked him if he would show me all the tables.

(Mr. CLARKE. I object to what the witness said as immaterial. Objection overruled. Exception taken.)

17. Q. Well, state what you said.

A. I said I wished him to show me all the tables on which the combined instrument for postmarking and postage-stamp cancelling was used in his department.

18. Q. I want what you said to him first, distinctly.

2909 A. I asked him if there were not other tables than the row which he pointed out to me, where that work was done.

19. Q. Did Mr. James understand that you went into the post office for the purpose of making an examination with reference to the subject matter of this suit?

Mr. CLARK. I object to what Mr. James understood. Let him state what he said.

(Objection overruled. Exception taken.)

20. Q. State what was said.

A. I have already stated that.

21. Q. Could you have made any satisfactory examination there in the post-office without some inquiries of persons in charge?

A. No; I should think not.

22. Q. State how you ascertained that fact, for what purposes these sixteen inking places and stands were used, of which you referred to.

A. Well, there was postmarking and postage stamp cancelling going on in some of the divisions of this long table while I was there. In the next place I saw the instrument for postmarking and postage-stamp cancelling in the place for them in each of the sixteen divisions of the table; and the ink pads; besides Mr. Steel informed me——

(Mr. CLARK raises the same objections to what he was informed. Testimony admitted and exception taken.)

Witness continuing: Mr. Steel told me that on that long table of sixteen divisions some part of each day sixteen men were employed in postmarking and postage-stamp cancelling of letters preparatory to making up a mail, and at other times a less number were employed. I asked him how many men he employed in that department regularly, and he said sometimes more and sometimes less. He had had as many

2910 as twenty-three men at work at postmarking and postage-stamp cancelling at one time; but this did not occur often, and in such cases he improvised tables, showing me where he placed his men at the tables not regularly used for that purpose; that he had employed less men in the early part of the day (I cannot remember the number) than he did in the latter part of the day, from three to seven o'clock, when his force was most busy, and that he worked his men also nights but not in so great a force. I cannot remember the number. I inquired of him if there was any other tables where they regularly used the com-

bined face postage-stamp canceller and postmarker. He said not in his department. I think I made that inquiry two or three times of him. I then measured the size of this table and ascertained the room it occupied and the room necessary for the men who operated upon it. He informed me the space was only sufficient for convenient working. The table from front to rear was five feet four inches. The space in front was two feet eight inches, and the back space two feet three inches. Between the table and something else. Each division of the table was about forty inches. It would average that with a little variation, and there were sixteen of these divisions, making the length of fifty three feet. Mr. Steel then took me around and introduced me to Mr. Richards, whom he said employed the postage marker and postage stamp canceller combined instrument in the city department. Mr. John Richards informed me and showed me a square table including a column with a space on two of its sides, six feet five inches on one side, six feet three inches on another side, and on two sides were ink pads and places containing the stamp canceller and postage marker combined instrument, and two men were at the table, one at work, and I think part of the time the other while I was in the office. I inquired of Mr. Richards if these were the only tables on which this work was done by this combined instrument, and he informed me that they were in his de-
2911 partment. He showed me other tables where single stamps were used for other purposes and Mr. Steel brought me a combined instrument for the reception of European mails. It was used on the back of the envelope; one side of the die bearing the name of the person using it, and the other side the steamer by which the mail came. I was informed by this gentleman I had seen all the tables where postage-stamps were cancelled and the post-office mark put upon the envelope at the same blow in operation by set of combined instruments in that office.

Mr. Richards informed me that he employed two or three men most of the time at the table last described, and that he worked them there at night. That he employed this force so as to have some of them present continuously, as I understood it, night and day—one or more of them. I made an estimate of the room occupied by these tables, and the room necessarily used by the operators or stampers, and I have allowed a little less than Mr. Steel gave me as the requisite and necessary room, and it amounts to, on both sides—the Broadway and Park Row sides—of the post office to six hundred square feet, seventy of which is for the Park Row side.

23. Q. Taking that long table as it was situated there, was it convenient or practicable for another row of stampers and cancellers to work on the other side of it?

(Objected to by Mr. Clarke, on the ground he is not shown to be competent on that point. Question admitted. Exception taken.)

A. No; I think not in the way it was constructed. I have given you the working side.

24. Q. How are the letters put upon this stamping table?

A. As I have before described them.

25. Q. Where from? How do they get on the table? Somebody must have brought them.

2912 A. Yes, sir; somebody brought them. The stampers themselves brought them in one case, and in another case it was not. They were brought and laid there by either the stampers or some other person.

26. Q. State the reason why, if you know, another row of stampers

could not work on the other side of the tables as conveniently as they do on the side where they are occupied?

A. Well, I would have to make a diagram to make it intelligible.

27. Q. Suppose that nine more clerks were employed in doing the work that was done on the long table than were now employed in that work, would it take more room and space in the post-office department than is now occupied by the sixteen?

A. It would increase the space nine-sixteenths of the present amount on the Broadway side.

28. Q. Suppose that sixteen were employed?

A. That is it, nine-sixteenths more than the present amount.

29. Q. And, of course, if it took sixteen more men than is now employed, it would take double the amount of space?

A. Certainly. That is to say, if I understand you. If I understand the necessity of the office, they actually require on the general mail department, or the Broadway side of the post-office, sixteen stampers several hours each day to do the work of the office at the present time. Now, if the office work increases, they have got to increase them at just that ratio. The room has got to be increased with a ratio of men. For instance, if they require twenty-five per cent. more work—twenty men, then they would require twenty-five per cent. more table room, or more tables.

Adjourned to October 24th, at 10 o'clock.

2913 N. Y., *October 24th*, 1879—10 a. m.

Present, counsel as before.

Direct examination of Mr. KITTLE continued by Mr. WILLIAMS:

30. Q. Give your judgment, if you have the means of forming one, as to the rental value of room in the post-office in this city.

(Objected to by defendant's counsel as immaterial and irrelevant, and on the ground that he is not shown to be competent to express an opinion on that subject. The master reserves his ruling as to the admissibility of the evidence until he makes his report.)

A. I have taken pains to ascertain the value of room immediately opposite the post-office on the west side of Broadway, and immediately opposite the post-office on the east side of Park Row. The first building on the east side of Broadway, below the post-office, to wit, the New York Herald building, I have seen the parties, and ascertained the rent they were paying in those different premises, and from the information obtained it is my opinion that the rental per square foot on the first floor of the post office building is worth about four dollars per annum, and on the estimate which I have made, that there were at least six hundred square feet employed on that floor for the postmarking and postage-stamp cancelling, that would amount to about twenty-four hundred dollars per annum. I have also taken the pains to ascertain the rental value of the first floor of a store opposite the old post office, in Nassau street, and the rental value of the corner of Nassau and Liberty streets, first floor, and the rental value of the premises on the south side of Cedar street, Liberty and Cedar streets being the bounding streets of the old post office, and I find that about the same valuation of rental per square foot would rule in the old post-office.

2914 31. Q. The old post-office is in the immediate neighborhood now occupied by the new post-office?

A. Oh, no; that is in Nassau street.

32. Q. How far is that from the new post-office?

A. Four or five blocks. It is two blocks from Wall street. I took that course to arrive at my conclusion in preference to another course, which I thought equally just, to wit, to ascertain the value of the ground and building of either of the post-offices, and to adopt the rule, which I believe to be very general, if not universal, of allowing one-half of the whole value to pertain to the first floor and basement as a rental value; that is, allowing ten per cent.

Cross-examination by Mr. CLARKE:

33. X Q. Mr. Kittle, did you ever buy or sell any real estate in the neighborhood of the new post-office building, on Broadway or Park Row?

A. No, sir.

34. X Q. Did you ever rent any real estate or buildings in that neighborhood?

A. No, sir.

35. X Q. Did you ever either rent or buy or sell any real estate or buildings in the vicinity of the old post-office building on Nassau street?

A. No, sir.

36. X Q. Your opinion as to the rental value in those neighborhoods was derived from what you were told on inquiries made for this special case in those neighborhoods?

A. Yes, sir. Some of the parties said they were willing to come here and testify to what they had said.

37. X Q. Were you ever a real estate broker or agent in this city, or in the lower part of the city?

A. No, sir.

2915 38. X Q. On your direct examination you gave certain figures as figures that you had obtained by measurement, or had been told by employees in the post-office. How do you recollect those figures?

A. I took them down.

39. X Q. You took a note of them?

A. I noted them down.

40. X Q. And you read them from your note-book?

A. Partly, and partly from recollection.

41. X Q. Did you take down the smaller figures or the larger figures?

A. What do you mean by larger or smaller?

42. X Q. Well, you said yesterday, as I understood you, that Mr. Steele, I think it was, told you that sometimes, but rarely, there were as many as twenty-three men employed at once at stamping, and another time a less number?

A. Yes, sir.

43. X Q. Did you take down that less number?

A. Yes, sir.

44. X Q. What was that less number?

A. Five; sometimes in the night, I believe, none at all at that work.

45. X Q. You were in the post-office yesterday making examinations you referred to on your direct testimony?

A. Yes, sir.

46. X Q. How long did you stay there at that time?

A. Well, I should say a half hour; may be three-quarters.

47. X Q. Did you ever before that examine the business as transacted in the New York post office?

A. I have examined the stamping business.

48. X Q. How many times before?

A. Two or three times.

49. X Q. How recently?

A. Last week once I was in the office.

50. X Q. When were the other occasions?

A. Some weeks ago; perhaps some months ago.

51. X Q. How long did you stay in the office to make your examination on those occasions?

A. Only a very little while.

52. X Q. A half hour?

2916 A. No; only about fifteen minutes.

53. X Q. Did you make any examinations at any other times except these two or three times?

A. No accurate examinations, only to see the stamping process.

54. X Q. Do you have any knowledge of the stamping process, except what you saw there, as it is practically carried on in the New York post-office?

A. Nothing more than observation.

55. X Q. At these times?

A. I think I have seen them stamping at other times, but have never paid any particular attention to it.

56. X Q. And you have no practical experience?

A. Not at all.

57. X Q. You have no practical knowledge from experience?

A. No, sir; I never acted as clerk, employee, or otherwise in the post-office. I never stamped any letters myself to my recollection and knowledge.

58. X Q. Your business is what, now?

A. Well, a large part of my business at the present time is acting as mechanical expert.

59. Q. What besides that?

A. Spring mattrass, bedding, etc.

60. X Q. You know of no particular connection between the business of mattrasses and bedding and the stamping of letters in the post-office?

A. Not at all, sir.

61. X Q. You say you found, I think, two stamping-tables in the post-office?

A. Yes, sir.

62. X Q. One of which, you said, was about six feet square on the Park Row side?

A. Yes, sir.

63. X Q. That had some ink-pads and stamping blocks on it?

A. Yes, sir.

64. X Q. How many?

A. Two.

65. X Q. You found sixteen on the other?

2917 A. Yes, sir. I also saw other stamping tables; not where the cancelling or postmarking was done, however. I was informed that the combined stamp of postmarking and cancelling was not done on those other tables. When speaking awhile ago in reference to the rental value of property, I meant this: Supposing a building to be worth twenty thousand dollars—the building and the land—then I would consider its rental value two thousand dollars, ten per cent., so that you may ascertain by the value of the property what its rental value would be.

66. X Q. From your observation of men who were stamping, could you tell how many letters were stamped in a minute?

A. Not accurately; only by guess.

67. X Q. Could you distinguish otherwise than by a guess between one hundred a minute and two hundred a minute?

A. Only by guess; I did not count.

68. X Q. Suppose that sixteen men are employed for stamping now, and the exigencies of the office, in case separate cancellers and markers be used, should require nine additional men for the twenty-four hours, I don't understand that unless all those nine men were at work at the same time, and the exigencies of the office should require it, that nine sixteenths more space would be needed; would there?

A. Yes, sir; as I understand, there are portions of every day in which the exigencies of the office require sixteen stampers at work. Now, if the increase should be such as to require nine-sixteenths addition to the force of men, I cannot see how nine-sixteenths additional room would not be required. I think the room and tables would be in the same proportion as the increase of men for hours when a full force are at work.

69. X Q. But it all depends upon the exigencies of the office, and in fact upon what number are required towork at a time by the exigencies of the office?

2918 A. Not necessarily.

70. X Q. It all depends upon the exigencies of the office requiring that these additional men should all work at once?

A. Yes, sir.

Adjourned for one hour, and subsequently adjourned to October 25th, 1879, at 10 a. m.

2919 N. Y., *Oct. 25th*, 1879—10 a. m.

Present, counsel as before.

CHARLES L. STEELE, a witness sworn in behalf of the complainant, and examined by Mr. WILLIAMS, testified as follows:

1. Q. State your age, residence, and occupation.

A. My age is twenty-nine; my residence, 50 Bergen avenue, Jersey City heights; occupation, assistant superintendent of the distributing department of New York post-office.

2. Q. Does your occupation in the post-office make you acquainted with the business of postmarking and postage-stamp cancelling?

A. Yes, sir.

3. Q. State, if you know, how many clerks are employed for that purpose in the main building of the New York post-office?

A. I could not answer that question any further than my own division, which includes all letters except New York City.

4. Q. Then state as to your division, that you know about.

A. Do you mean the number used about all the time, or those employed only at that purpose?

5. Q. Give me the highest number of clerks employed at any one time in that business in your division using the combined instrument?

A. Sixteen.

6. Q. Are there any times when business there requires the employment of an additional number in the stress of business at any time when you were compelled to employ any additional number with the combination stamp?

A. We have not the facilities to use any more.

7. Q. How often do you think sixteen men are employed at the same time; how much of the time?

A. Between five and seven in the afternoon, if busy, they use sixteen stampers, if they have men handy. It is absolutely necessary to
2920 do it for the first ten days of the month for the six or seven busy months, which would be from early fall to late spring.

8. Q. Are you acquainted with the salaries that are paid these clerks?

A. Pretty generally.

9. Q. What is their compensation?

A. Stampers running all the way from thirty dollars to seventy dollars. I think that is the highest a month—$360.00 to $840.00 a year.

10. Q. Are they hired by the month or year?

A. They are paid by the month, but the schedule is generally made out a yearly salary.

11. Q. How many letters will a man ordinarily handle in a minute with the use of this combined instrument?

A. An ordinary man? I have never tested that. I can only give you an approximate answer to that question. I should say somewheres in the neighborhood of eighty to ninety. There is a great difference in men. Some men won't do as much as that, and possibly some men may do more.

12. Q. Will you state briefly the process of postmarking and stamp cancelling as used with the combined instrument?

A. (Illustrating.) Supposing this to be the stamping block (pointing to one corner of the table); in the rear of it, immediately back of the man, there is another flat table. The letters, as they go into the drops or windows, are faced up and placed on the table in the rear, and on the stamp-block is another shelf for the lamp-post letters, and if the stamper desires to stamp collections, he takes them from in front of him, those that are on the shelf in front of him; and if it is the drop, he takes from a table behind him or from one of the drops. There is a table at each section of drops, and he places them in front of him on the rubber pad, covered by leather, and then he postmarks and dates them, and puts them in front of him on the shelf, and there a man takes them to put them out in circulation.

2921 13. Q. When the man who postmarks the letters and cancels the postage stamps with this instrument now in use, and applies it to the letters, does he ordinarily do it as quick as he can?

A. He is supposed to do so. Yes, sir.

14. Q. At times they are pushed harder than at other times?

A. Yes, sir.

15. Q. Suppose the instrument that he uses was simply a postmarker; that is, suppose its office was simply to put upon the letter the name of the post-office, date, etc., and not cancel the stamp, could he use that single instrument any quicker than he now uses the combined instrument?

A. I think he could.

16. Q. Why?

A. Because he does not have to direct his aim so carefully, and the instrument is lighter. There is only a circle to strike where now he has an oblong shape to hit; but how much quicker I cannot say; but I am satisfied that the man who stamps the single stamps stamps more rapidly than the double stampers. We use it on our transient matter now; but there are things that I have not tested.

17. Q. Suppose he would use a single stamp for the purpose of cancelling the postage-stamp, could he use that any quicker?

A. He could do that a great deal faster; there is no care required for that.

18. Q. You have just stated that the reason he did not use the double stamp so quick was that he has to direct it to the postage-stamp?

A. But he has got to pay no attention with regard to getting a good date.

19. Q. So when he applies the canceller to the postage-stamp he has to be particular about the date, and when he applies the date he has to be particular about the cancelling of the postage-stamp?

A. I don't understand that.

2922 20. Q. Well, I don't understand your answer. I should like to have you state how it is that a man holding a stamp in his hand with two faces cannot strike it on an ink pad and strike it on the letter just as quick as he can a single faced stamp?

A. I don't say he can stamp any faster with a single faced marking-stamp; but with the cancelling-stamp I say he can stamp considerably faster, and that is what I endeavored to state.

21. Q. What reason do you give why he can cancel quicker?

A. He does not have to make any printed impression; he does not have to make any clear type; it is merely blotting. When he postmarks he has to show an impression of the date, hour, and year.

22. Q. But in using a canceller he has to be particular to strike it on the stamp?

A. Yes, sir; hit the stamp.

Cross-examination by Mr. CLARKE:

23. X Q. Didn't you say that a separate postmarker could be used somewhat more rapidly than the combined instrument, for the reason that so much care in the aim is not required?

A. Because the operation is more simple and easier done.

24. X Q. That is, you can put the postmark, if the canceller is not attached, anywhere on the envelope as they are usually addressed, can't you?

A. I am not prepared to say they could do that part any quicker. I thought you referred to the canceler.

25. X Q. Wouldn't that make some difference in time?

A. I don't know that that would make a great deal of difference.

26. X Q. It would make some?

A. It might; my impression is we could do faster work with the single stamp; make a greater number of impressions in a given

2923 amount of time with the single than with a double stamp; but how great the difference would be with the postmarking-stamp I cannot say.

27. X Q. You say you do use for certain sorts of work separate cancellers?

A. Yes, sir.

28. X Q. And the work is done more rapidly?

A. Yes, sir.

29. X Q. That is a fact?

A. That is the way we look at it.

30. X Q. How many men are employed in your division for using a combined postmarker and canceller during the twenty-four hours, and who do nothing else in the office?

A. About ten men.

31. X Q. Then, as I understand you, there are six others who are sometimes put at stamping, and also work at other business?

A. More than that; somewheres in the neighborhood of twenty men who stamp part of the time.

32. X Q. During other parts of the day these men are working at other things?

A. Yes, sir.

33. X Q. Do you ever employ more than sixteen men at a time for cancelling postage-stamps and postmarking letters with the combined instrument?

A. No, sir; not to my knowledge.

34. X Q. Did you tell Mr. Kittle you sometimes, but rarely, employed as many as twenty-three for that purpose?

A. No, sir.

35. X Q. You never told him that?

A. No, sir; not with the combination stamp.

36. X Q. You say that the letters that come from the drop are arranged in one place, and letters brought in from the lamp posts in another; is any different stamp used to postmark and cancel these different sorts of letters?

A. Same kind of stamp, but with different numbers. The
2924 same stamper will have a drop stamp and a collection stamp; same instruments, but different numbers.

37. X Q. Those numbers indicate that the letter was a drop letter or a collection letter?

A. Yes, sir.

38. X Q. I think you stated, on your direct examination, you had not facilities now for more than sixteen stampers at work at one time?

A. We have sixteen stamping blocks or pads.

39. X Q. On the long table?

A. Yes, sir.

40. X Q. Suppose that nine or ten additional men, or sixteen additional men, were employed for stamping, could you accommodate them without increasing the amount of room that is assigned to your department?

A. I think we could.

41. X Q. Could you use the other side of that table without inconveniencing the business?

A. It would inconvenience the business some.

42. X Q. In what way?

A. It would make it bad for a man to have to reach over another; it would be better to extend the table.

43. X Q. Practically you would prefer the table longer, so that the men who carry away the letters that have been stamped and postmarked would not have to get in the way?

A. Yes, sir.

44. X Q. There is room to extend the table to accommodate as many more?

A. Not as many more. I think I could accommodate from ten to twelve more.

55. X Q. That would not inconvenience the business?

A. No, sir.

46. X Q. Suppose that it was required to postmark the letters and cancel the postage stamps with a separate instrument in the New York office; I suppose you could do the postmarking with your present force easily?

2925 A. The postmarking, yes, sir.

47. X Q. How many additional men should you think it would need to do the cancelling?

A. About eight or nine.

48. X Q. Not more than that?

A. No, sir; not more than that. I am speaking only of our division.

49. X Q. And how much would you have to pay men?

A. Well, their salaries run from thirty-five to seventy dollars a month.

50. X Q. Well, couldn't you hire men more cheaply to use the separate canceller?

A. It would not require as skilled labor, and I should prefer boys.

51. X Q. How cheap could you hire them?

A. Well, I have never employed any, but we have got them at thirty and thirty five dollars.

52. X Q. Can you state a sum by which you would be willing to take that contract to do that separate cancelling for a year?

(Objected to by Mr. Williams, whereupon the question was changed.)

53. X Q. Give us your opinion?

(Objected to by Mr. Williams. Consented by counsel that the answer go in, the master reserving his ruling until he makes his report.)

54. X Q. To pay the additional help that would be needed to cancel the postage stamps with a separate instrument effectually and without loss to yourself as contractor?

A. I should not hesitate to take it at five thousand a year.

By the MASTER:

55. X Q. Do you in your estimate take into consideration any
2926 bond or surety which you might be required to give on the part of such employees as you might employ, to the government?

A. No, sir; I would take them on the same plan as other clerks are taken; that is, merely sworn into the service, and give no surety for their honesty.

Redirect examination by Mr. WILLIAMS:

56. Re D. Q. What did you tell Mr. Kittle when he was there about having seen, when there was a pressure of the European mail, as to the number of clerks employed at one time?

A. I told him I had used myself more than the sixteen men when I had a steamer's mail; but they used a different stamp entirely.

57. Re D. Q. What number did you tell him?

A. I said there might be twenty or twenty-three busy. I don't know that I could cite a case when that occurred; but I think one or two years ago it happened. That is merely a dating stamp on the back.

Mr. CLARKE:

58. Re D. Q. But it is not a combined postmarker and canceller?

A. No, sir.

Mr. WILLIAMS, resuming:

59. Re D. Q. Now, sir, do you know whether or not it is desirable that a postage stamp should be effectually cancelled so that it may not be used a second time?

A. It certainly is.

60. Re D. Q. Very well; then I will ask you if inefficiency or carelessness or neglect in making an effectual cancellation of a postage-stamp is not injurious to the public service, by exposing the stamp to be used a second time?

A. Certainly.

61. Re D. Q. If that be so, can you give any reason why you prefer boys to men for that purpose?

2927 A. They are much quicker.

62. Re D. Q. Do you mean to swear here that the boys in your department do more work than the men who have been there for some time and have had experience and become skilled in the business?

A. I mean to swear that the boys there on the stamping blocks do more work, quicker and better than any man I have on the stamping block.

63. Re D. Q. What is the age of the boys?

A. Sixteen to twenty-two.

64. Re D. Q. And you call them boys? How long employed in the office?

A. Some two or three years.

65. Re D. Q. What do you have to pay those boys?

A. Thirty, thirty-five, forty, forty-five, and I think there are not any of them getting over fifty five.

66. Re D. Q. How long has a man got to be in the service to do less work than a boy; when does he cease to be a boy and become a man, so that his work is not as good as a boy's work?

A. I have stated that on the stamping blocks my boys were the quickest and the best.

67. Re D. Q. Well, I want to know at what age the men after working several years cease to be the quickest and the best.

A. I have not had enough experience to decide that question. The men that I have got on the stamping block were there when I came there.

68. Re D. Q. Do you wish the master to understand that experience, practice, and skill in the use of these stamps is of no advantage to a man?

A. No, sir; I do not wish him to understand anything of the sort, because when a boy comes in there it takes two or three weeks for him to become a good stamper. But sometimes you cannot make a first-class stamper of him at all; but if they turn stampers, they are in six or eight weeks, and he is as good as a man. The men have not got the quick motion that the boys have got with their hands and arms.

69. Re D. Q. Do you use a stamp yourself?

2928 A. No, sir.

70. Re D. Q. What is your business in supervising that?

A. I have general supervision of the entire operation the letter goes through, from the time it arrives in the wagon until it leaves the office.

69½. Q. What is your salary?

A. $1,800.00.

2929 WILLIAM H. WAREING, a witness, being duly sworn on behalf of the complainant, and being examined by Mr. WILLIAMS, testified as follows:

1. Q. State your age, residence, and occupation.

A. My age is forty-two; am assistant general superintendent of the third division of the New York post-office; my residence is Sixty-ninth street, near Tenth avenue.

2 Q. State, if you know, how many instruments there are now in the New York post-office, including the stations, by which a letter can be post-marked and the postage stamp thereon cancelled at the same blow?

A. There are ninety-two at present in use.

3. Q. Going back, say to 1872, has the number of those instruments increased in the post-office in proportion to the increase of business in the office?

A. Naturally there has been quite a number of changes, so that we used a good many more now than we did even two years ago.

4. Q. Is your knowledge upon the matter sufficient to enable you to state the exact number that were in the post-office, including the stations in the year 1872?

A. Well, I cannot say exactly; not from my own knowledge.

5. Q. Suppose you estimate?

A. I think there was about twenty-five in use in 1872, as near as I, can recollect.

6. Q. How many in 1873?

A. I don't think there was any change in 1873.

7. Q. In 1874?

A. I don't think there was any addition then; work was done about the same then. I don't think any in 1874.

8. Q. 1875?

A. In 1875 there was a change. The English stamps were introduced in the office in 1875.

9. Q. How many were added?

2930 A. There might be one or two; I don't think there was any material change in 1875. I think the English stamp was introduced, and then we had more of them.

10. Q. How many more?

A. Well, I think we had fifteen additional stamps.

11. Q. What was the reason that the number was increased in 1875, by the use of what you call the English stamp, from twenty-five to forty?

A. Then we had certain numbers to designate the drops from the collections.

12. Q. That was for that purpose that the number was added?

A. Yes, sir.

13. Q. Well, then, in 1876?

A. I don't think there was any material change in 1876.

14. Q. 1877?

A. There was a great change then. All the stations were put in the same category. Then they changed, and the up-town stations were added to the office of the city department. At first the drop stamp was only used by the distribution department, and all through the office and its branches were put under the same rules.

15. Q. Then the number was increased?

A. To about ninety or ninety-two.

16. Q. About the same number you have now?

A. Yes, sir.

Cross-examination by Mr. CLARKE:

17. X Q. I understand, Mr. Wearing, that you have now a different instrument for the letters that are dropped into the boxes at the post-office, and for the letters that come from the lamp-post boxes?

A. Yes, sir.

18. X Q. A different number?

A. A different number.

19. X Q. Imprints a different number?

A. Yes, sir.

2931 20. X Q. And that number tells whether the letter was a lamp-post letter or a drop letter in the main office?

A. That applies to the main office only.

21. X Q. Do you sometimes receive letters to be stamped from the stations?

A. Yes, sir; I believe there is one collection late at night.

22. X Q. Now do you have a separate set of instruments in the main office to distinguish the letters from the stations?

A. Yes, sir; they have the station letters with the bars running horizontal or perpendicular in the cancellation.

23. X Q. According to whether it is a drop letter or a collection letter?

A. Yes, sir.

24. X Q. The reason why so many stamps are needed is to indicate the different sources from which the letters are received?

A. Yes, sir.

Redirect examination by Mr. WILLIAMS:

25 Re D. Q. Take the sixteen stamping blocks in the third division; is not there more than one instrument on one of those blocks?

A. Yes, sir; there is always two.

26. Re D. Q. That would make thirty-two instruments there on the blocks?

A. Yes, when they are all in use.

Recross-examination by Mr. CLARKE:

27. Re X Q. Only one man can work at a block at a time?

A. Yes, sir.

28. Re X Q. And there are little racks at which there are at least two of these stamps?

A. Yes, sir.

28. Re X Q. And some have three or four in them?

A. Yes. sir.

30. Re X Q. But there are other stamps there?

A. Yes, sir.

2932 MARCUS P. NORTON, a witness called on behalf of the complainant, being duly sworn and examined by Mr. WILLIAMS, testified as follows:

1. Q. You are the Mr. Norton spoken of in the pleadings and papers in this case as the inventor of the combined post-marker and stamp canceller, are you?

A. I am.

2. Q. Do you know Helen M. Ingalls?

A. I do.

3. Q. Since 1870 where has she generally lived?

A. In my family.

4. Q. State if Miss Helen M. Ingalls, since the reissue of the patent in question to her in 1870, has ever sold any of these combined post-marking and stamp cancelling instruments; whether she has ever licensed anybody to use them, or whether or not she has ever fixed or received any royalties from any source for their use?

A. She has never sold any stamps of the kind you inquired of; she has never fixed or received any royalty for any, and never received a dollar from any source as compensation for the use of the stamp or otherwise.

5. Q. And licensed anybody?

A. Never granted any license to anybody.

Cross-examination by Mr. CLARKE:

6. X Q. How do you know this, Mr. Norton?

A. Well, I know it as well as I know anything. I know it to be a positive fact.

7. X Q. You are familiar with everything she has done during these years about this patent?

A. I am.

8. X Q. Did she consult you about having issue taken in the matter?

A. I consulted her, and she does nothing, and has done nothing, without consulting me.

9. X Q. You have been her attorney during these years with regard to the management of the patent?

A. Yes, sir; agent and attorney.

2933 CHRISTOPHER C. CAMPBELL, the complainant, being duly sworn in his behalf, and examined by Mr. WILLIAMS, testified as follows:

1. Q. Are you the complainant in this suit?

A. I am.

2. Q. Since the assignment of the patent to you by Miss Ingalls, you may state if you have ever sold any of these combined post-marker and stamp cancellers; ever granted license to anybody to use any, or ever fixed or received any royalty for their use?

A. I have never sold any; I have never received any royalty, and I have never granted any license to anybody.

Cross-examination by Mr. CLARKE:

3. X Q. Has Mr. Norton been your agent since the assignment of the patent?

A. He has been solicitor in this case.

4. X Q. Has he been your agent generally?

A. As solicitor he has been my agent.

5. X Q. And that is all?

A. Yes, sir.

6. X Q. He was authorized by you to begin this suit against Mr. James?

A. Yes, sir.

Mr. WILLIAMS. I understand by the reference of this case to the master that necessarily the pleadings and the evidence were before him; but if that be not so, I now offer the pleadings and the evidence to be considered by the master in determining the questions that arise upon this accounting, and I will endeavor now to refer to such portions of them as I think directly pertinent, and presume I shall not have occasion to refer to any other points. But I don't wish to be precluded by what I do now, if I deem it necessary, from referring to the other portions of the evidence. I wish to call the attention of the master, 2934 in the first place, to the pleadings in the case. Upon the question of profits and damages, I refer to page 23 of complainant's first proceedings (reading and proceedings), to show that there is a claim of $30,000 a year set up in the bill for the use of this combined instrument, and I would also refer you to page 26.

I call attention to these allegations, and I refer to the answer of Mr. James, which is found on pages 71 to 87 of the complainant's first volume, and shows that the defendant has in no way denied or questioned the amount of profits or damages as alleged in the bill, but has omitted to take any notice whatever of those allegations, and so on the pleadings in this case there is no issue made on that question at all by the defendant. He does not say that Mr. Campbell has not sustained $30,000 damages per year. He doesn't say anything whatever concerning it, and the master, in considering the case, will give whatever value he may choose to that state of the case.

I call your attention now to pages 168 to 175, including the testimony

of Mr. James, the defendant, Mr. Youman and Mr. Lawrence, for the purpose of showing that the Exhibits A and B, which are on file in this case, are the stamps, or post marking and stamp-cancelling instruments similar to Exhibits A and B, have been used in the New York post-office from the time Mr. James became postmaster down to the present time. Their testimony identifies the Exhibits A and B as the two post-marking and postage-stamp canceling instruments that have been in use in the post-office since Mr. James has been postmaster.

I don't know whether or not these papers which I now refer to are proper evidence before the master. They are in this case, and
2935 were before the court, but in what light he considered them, or what value he attached to them, I don't know, but I refer to documents found on page 96 of complainant's second volume, report of Mr. Ferry, committee on post-offices and post-roads of the House.

I next refer to page 106 Senate report of Mr. Ramsey on the subject. I then refer to page 116, which is a report from the Postmaster-General to Congress with reference to this stamp. I refer now to page 219, letter from First Assistant Postmaster St. John B. Skinner to the postmaster in New York. I refer to a letter from Abraham Wakeman, postmaster of New York, found on page 220. I refer to the letter on page 222, from Mr. Denison, Postmaster-General, to Callamer. I refer to page 226, letter from Alexander W. Randell, Postmaster-General, to Alexander Ramsey. As to the preceding letter, I don't care whether it is considered or not. This second is a repetition of that. I wish to direct the attention of the master to one point in connection with these papers, if he considers them as evidence, and that is this: they all uphold the doctrine that there was not and cannot be a perfect cancellation of the letters without the use of this instrument, and shows that the single cancellation about which they talk was an imperfect mode of doing business, and that it is much better accomplished by this combined instrument.

By the MASTER. As I understand you, Judge Williams, these papers you are now offering you offer as most of them, especially from Postmaster-Generals, as admissions upon the part of the government officials of the utility of this invention; but there is nothing in them which you claim shows the amount of profit which the government has actually derived from them.

2936 Mr. WILLIAMS. No; they only say generally that there is a great saving of labor. I offer them in this way. I understand that it is competent in any case between any parties, where the evidence is pertinent, to give in evidence a certified copy of any document that is on file in any of the departments of the general government; a certified copy of a letter on file in the Post Office Department of the United States; a copy certified to by the Postmaster-General, and offered in evidence, is always competent for any purpose for which the original would be admissible as evidence.

I refer to letter of General Dix, on page 217 of the second volume; letter of the 8th of August, addressed to Hon. Horatio King. I offer letter on page 217. I refer to document on page 101 of the second volume, a report of Van Winkle.

Mr. CLARKE. I object to all this as incompetent and immaterial, and on the same grounds stated when these several papers were offered in evidence.

Ruling of the master reserved in the same manner as above.

Complainant rests.

Adjourned to Monday, Nov. 3d, 1879, at 10 o'clock a. m.

2937 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

Hearing before Hon. Kenneth G. White, master under decretal order dated September first, A. D. 1879.

DEFENDANTS' TESTIMONY AND PROOFS UNDER THE ABOVE-NAMED DECRETAL ORDER.

NEW YORK, *Nov. 10th*, 1879.

Mr. Marcus P. Norton, for complainant.
Mr. Samuel B. Clarke, for defendant.

2938 Mr. THOMAS L. JAMES, the defendant, being duly sworn and examined by Mr. CLARKE, testifies as follows:

1. Q. You are the defendant in this case?

A. I am.

2. Q. State whether you have ever personally made or received any profits or advantages whatever from the manufacture or use of the combined instruments which have been used in the New York city post-office for postmarking letters and cancelling postage-stamps thereon, since you have been postmaster.

(Objected to by complainant's counsel as being immaterial, irrelevant and incompetent.)

A. I have not.

(Motion made by Mr. Norton to suppress the answer, and strike it from the record for the reasons given, as objections to the question.)

3. Q. You have made no personal profits whatever by the use of the combined instruments?

(Same objection as before, and also on the ground that neither the Government of the United States, nor its agent, the defendant, can pilfer away the secured and established rights and property of a citizen by any combination or conspiracy of the kind indicated by the question, under the patent laws and decisions of the courts.)

A. No, sir.

(Answer objected to, and same motion as before made to suppress it and strike it from the record, on the grounds stated as objections to the question.)

2939 4. Q. Did you ever use or manufacture, or cause to be manufactured, or use any combined postmarker or canceller except as postmaster of the United States?

(Objected to by Mr. Norton as immaterial and irrelevant.)

A. I have not.

(Same motion made, to strike out answer, on same grounds as before.)

5. Q. Who has paid for the combined stamps that have been used since you were postmaster?

(Objected to by Mr. Norton as incompetent and immaterial, whether they have been paid for or not; that is not a question to be considered here.)

A. The Post Office Department of the United States.

(Same objection as before, and motion made to suppress the answer and strike it from the record.)

6. Q. State the procedure by which new stamps are obtained, and where they are obtained, by the New York office.

(Same objection as before.)

A. We make a requisition for the desired stamp. The department authorizes us to secure it and pay for it, and upon that authority the account is audited.

7. Q. Who pays the salaries of the clerks who are employed at stamping in the New York post office?

(Same objections as before.)

2940 A. The Post-Office Department.

(Same motion, on the same grounds, to strike out answer.)

8. Q. If, say, twelve more men were necessary as clerks in the New York post-office, would any more room be needed to accommodate them?

A. No; there is plenty of room.

9. Q. Did you notify the Postmaster-General of the commencement of this suit at the time it began?

A. Yes, sir.

10. Q. At whose expense has the defense been conducted?

A. At the government's, I suppose; not at mine.

11. Q. When the subpœna to appear and answer was served upon you, who served it?

A. Mr. Norton.

12. Q. Mr. Norton was present at the time the subpœna was served?

A. He was.

13. Q. Did you have any conversation with him at the time in regard to the use of the combined postmarker and canceller in the New York post-office?

A. I did.

14. Q. State what was said.

(Objected to as immaterial.)

A. Mr. Norton said he had selected me to prosecute, but it was not a suit against me, but a suit against the department, and that was the reason he had selected me, for the reason I was postmaster of the largest office in the United States. I asked Mr. Norton if I should cease using the stamp, and he said no, go right ahead. Mr. Norton was extremely courteous and civil, as he always is.

2941 Cross-examination by Mr. NORTON:

15. X. Q. Do you mean to be understood as saying that I served upon you the writ of subpœna in this case, or a copy of the bill of complaint as filed?

A. You served the papers upon me.

16. X Q. What do you mean by papers?

A. The complaint.

17. X Q. You do not mean to be understood as saying that I served the writ of subpœna?

A. I can hardly distinguish between them, but I know a paper citing me to appear was served on me by the marshal.

18. X Q. Now, in reference to your interview, or my interview with you, of which you speak, in which you say that I said that you could go ahead, did I not also inform you in substance that the complainant did not wish to needlessly embarrass you in your official duties, or the government in the transaction of its business, but simply to assert and maintain his rights under the patent?

A. No; I don't remember you saying that, Mr. Norton.

19. X Q. Did you suppose for one moment that you were obtaining a right to use this invention, of which you had at that time been sued as an infringer?

A. I supposed, as you stated, that the suit was not brought against me at all, and you didn't wish me to cease using it. That it was brought against the government to force them to settle it, and you gave me license to use it, for I asked you explicitly, for I was a little alarmed to have a suit brought against me.

20. X Q. Now for what purpose did you suppose you were sued?

A. I just stated the reason, that you could sue me and you could not sue the Postmaster-General.

21. X Q. You have used in the New York post-office the invention, consisting of a postmarking device so arranged and combined with
2942 a postage-stamp cancelling device as to postmark the letter and cancel the postage-stamp at one blow of the instrument, have you not?

A. Well, I have some doubts myself whether I have or not used the instrument that you claim to be the patentee of, since we have used that English stamp, and I think that it is not a part or parcel of your invention.

22. X Q. Now which do you suppose knows the best about that, you or Judge Wheeler?

A. I think I do.

23. X Q. Now, I ask you to produce on this occasion a stamp of the kind you are now using and have used since you have been postmaster in the city of New York?

A. You can have that, of course, but I cannot produce that now.

24. X Q. Will you do so?

A. I have not got it with me.

25. X Q. [Handing witness two envelopes.] I now show you two envelopes addressed to Marcus P. Norton, number 7, Bowdoin square, Boston; look at them, and state whether those envelopes were postmarked and the postage-stamps cancelled in the New York City post-office.

A. I think they were.

26. X Q. Have you any doubts about it?

A. Not the slightest.

(Envelopes offered in evidence and marked respectively Exhibits 2 and 3, K. G. W., master.)

2943 27. X Q. Now were those done at one blow of the instrument?

A. Yes, sir.

28. X Q. And the instrument consisted of the postmarker, having the name of the office, the date and the year, and a postage-stamp canceller combined with it?

A. Yes, sir.

29. X Q. Designate the part there that is done by the cancelling device.

A. The postage-stamp.

30. X Q. Those two are combined together and do the work at one blow?

A. Yes, sir.

31. X Q. And that is the work you have been doing in the post-office since you have been postmaster?

A. Not with that stamp.

32. X Q. Is that the form substantially?

A. No; I don't remember you saying that, Mr. Norton.

19. X Q. Did you suppose for one moment that you were obtaining a right to use this invention, of which you had at that time been sued as an infringer?

A. I supposed, as you stated, that the suit was not brought against me at all, and you didn't wish me to cease using it. That it was brought against the government to force them to settle it, and you gave me license to use it, for I asked you explicitly, for I was a little alarmed to have a suit brought against me.

20. X Q. Now for what purpose did you suppose you were sued?

A. I just stated the reason, that you could sue me and you could not sue the Postmaster-General.

21. X Q. You have used in the New York post-office the invention, consisting of a postmarking device so arranged and combined with
2942 a postage-stamp cancelling device as to postmark the letter and cancel the postage-stamp at one blow of the instrument, have you not?

A. Well, I have some doubts myself whether I have or not used the instrument that you claim to be the patentee of, since we have used that English stamp, and I think that it is not a part or parcel of your invention.

22. X Q. Now which do you suppose knows the best about that, you or Judge Wheeler?

A. I think I do.

23. X Q. Now, I ask you to produce on this occasion a stamp of the kind you are now using and have used since you have been postmaster in the city of New York?

A. You can have that, of course, but I cannot produce that now.

24. X Q. Will you do so?

A. I have not got it with me.

25. X Q. [Handing witness two envelopes.] I now show you two envelopes addressed to Marcus P. Norton, number 7, Bowdoin square, Boston; look at them, and state whether those envelopes were postmarked and the postage-stamps cancelled in the New York City post-office.

A. I think they were.

26. X Q. Have you any doubts about it?

A. Not the slightest.

(Envelopes offered in evidence and marked respectively Exhibits 2 and 3, K. G. W., master.)

2943 27. X Q. Now were those done at one blow of the instrument?

A. Yes, sir.

28. X Q. And the instrument consisted of the postmarker, having the name of the office, the date and the year, and a postage-stamp canceller combined with it?

A. Yes, sir.

29. X Q. Designate the part there that is done by the cancelling device.

A. The postage-stamp.

30. X Q. Those two are combined together and do the work at one blow?

A. Yes, sir.

31. X Q. And that is the work you have been doing in the post-office since you have been postmaster?

A. Not with that stamp.

32. X Q. Is that the form substantially?

A. No, sir; that canceller is not.

33. X Q. Now, in what respects, if any, do they differ; whether in form or in substance?

A. In form.

34. X Q. Is the substance substantially the same?

A. Substantially the same.

35. X Q. When you first went there you used cork for cancelling?

A. A cork on a bar and a postmark at the other end of the bar.

36. X Q. Now you use a steel canceller?

A. Yes, sir.

37. X Q. And ever since you have been postmaster you have postmarked letters and cancelled postage-stamps in the way substantially as shown by those envelopes exhibits, have you not?

A. Yes, sir.

38. X Q. Do you think it right and just that the government, through you as its agent, or you, as the agent of the government, should take the property of a citizen, convert it to your use or the use of the government without a just compensation?

2944 (Objected to by Mr. Clarke. Objection sustained.)

39. X Q. Mr. James, the railway postal system—is that connected with your post-office in any way?

A. Well, yes; but I have nothing to do with it; it is a separate branch of the service.

40. X Q. None of your clerks go out on the cars?

A. No, sir.

41. X Q. You said on your direct examination that you have not personally received any profits; what do you mean by that?

A. It is no benefit to me what stamp I use.

42. X Q. Somebody has been largely benefitted by its use, have they not?

(Objected to by Mr. Clarke.)

A. I don't know but very little about it. My duty is to see that letters are properly postmarked.

Redirect examination by Mr. CLARKE:

43. Re D. Q. The combined stamps that have been used since you have been postmaster are of the sorts that you presented when you were examined in the case originally, i. e., Exhibits A and B?

A. Yes, sir.

Recross-examination by Mr. NORTON:

44. Re X Q. And they are the same which the court has declared to be an infringement upon this patent in suit?

A. Yes, sir.

N. Y., *Nov.* 14*th*, 1879—11 a. m.

Present, plaintiff's counsel.

Adjourned to Nov. 15th, 1879, at 11 o'clock a. m.

2945 N. Y., *Nov.* 15*th*, 1879—11 a. m.

Present, respective counsel.

Mr. JAMES recalled by Mr. WILLIAMS.

45. Q. Mr. James, are perfection and clearness of impression in postmarking letters and cancelling postage-stamps valuable adjuncts to the transmission of the mails?

A. Yes, sir; they are very important.

46. Q. Is expedition in the handling of the letters in the post-office, also a valuable adjunct to the transmission of the mails?

A. It is.

47. Q. Are economy, saving of time and labor also valuable adjuncts?

A. Yes, sir; they are of vital importance.

48. Q. You became postmaster of the New York post-office, I think you say in your answer, on the first day of April, 1873?

A. Yes, sir.

49. Q. When you took possession of the office you found there certain instruments that had been used for postmarking the letters and cancelling the postage stamps, did you not?

A. I did, sir.

50. Q. You commenced at that time to use those instruments?

A. Continued to use them.

51. Q. Commenced to use them and continued to use them?

A. Yes, sir.

By Mr. CLARKE:

52. Q. You mean you continued their use in the office?

A. Yes, sir.

Mr. WILLIAMS, continuing:

53. Q. You hadn't received any instructions from the Postmaster-General prior to the time you became postmaster, had you?

2946 A. Yes, sir; I received instructions to receipt for all this property.

54 Q. Instructions to receipt for the property that came into your hands?

A. Yes, sir.

55. Q. How long did you continue to use the stamps of the form in which you found them in the post office?

A I think about two years.

56. Q. You then adopted what has been called by the witnesses here an English stamp?

A. The stamp in use in the London office.

57. Q. Called by the witnesses in their testimony the English stamp?

A. Yes, sir.

58. Q. How came that to be adopted here in the post-office?

(The witness gave a long explanation in reply to this question, requesting the stenographer not to take it down.)

59. Q. That was adopted here, as I understand, in place of the old stamp, in pursuance of your judgment that it was a preferable stamp?

A. Yes, sir.

60. Q. Where, and by whom, have the stamps by which the letters are postmarked and the postage stamps cancelled been manufactured since you have been postmaster?

A. I don't know who makes the stamps; the assistant postmaster can tell, or the auditor, or Mr. Yeomans; I don't know who the man is.

61. Q. Have you any idea as to the number of stamps that have been manufactured?

A. SINCE that time?

62. Q. Yes, sir.

A. I think Mr. Yeomans can answer that question definitely; I cannot.

63. Q. They were manufactured here in New York?

2947 A. Yes, sir.

64. Q. Have you any idea as to the amounts of money which you have paid for those stamps which have been used in the post-office?

Mr. CLARKE. I object to going into this part of the case. They rested their case, and if they are going on to show any advantage of cheapness in construction, it is opening a new case here.

(Objection overruled. Exception taken.)

A. No, sir.

65. Q. Is there anybody in the post-office who can furnish that information?

A. Oh, yes.

66. Q. Who?

A. I think Mr. Yeomans can, and also Mr. Waring, the general superintendent.

67. Q. Will you send them over when you go back to the office?

A. I think that that stamp costs eighteen dollars (referring to Complainant's Original Exhibit B—the English stamp).

68. Q. Mr. James, when did you first see an instrument like Master's Exhibit No. 4, which I now show you?

A. I don't remember that I have ever seen that before.

69. Q. Have you ever seen any instrument constructed like that Master's Exhibit No. 4 before this time.

A. I don't know that I have ever seen that before, or anything like that. I know all about the English stamp; but that I don't remember seeing. (Examining Master's Exhibit No. 4.) Yes, I did; I was down in the office one day, and they were stamping with a stamp like that.

70. Q You never had seen or heard of a stamp used in a post-office constructed like this Master's Exhibit No. 4 before this suit, had you?

2948 A. No, sir.

71. Q. You have referred to a conversation between yourself and Mr. Norton in your former examination. Suppose that Mr. Norton had stepped into your office and said to you, I command you not to use any longer in the post-office in New York a combined postmarker and stamp canceller, would you have obeyed him?

(Objected to by Mr. Clarke as immaterial.)

Mr. WILLIAMS. It is legitimate cross-examination. He has testified on his direct examination to a conversation he had with Mr. Norton, and has undertaken, as will be claimed, as I suppose, that there was some sort of a license given. Now, I want simply to know how much it amounted to; what was said at that time in respect to it.

(Question allowed. Exception taken.)

A. I should have instantly telegraphed to the Postmaster General for instructions, and should have followed those instructions, of course.

72. Q. You would not have acted upon Mr. Norton's say so about it or any other man's say so?

A. I should have referred the whole matter to the Postmaster-General, and would have done as he directed me to. I am required to do that by law.

73. Q. You had no facilities in the office for going on with the postmarking and stamp cancelling without the use of the combined postmarker and stamp-canceller?

A. I could have done it.

74. Q. By the use of single instruments?

A. Yes, sir; we have single instruments that we cancel circulars with, and I would have used those.

75. Q. Were they all prepared for letters?

A. All I would have to do would be to take the cork canceller off, and use it separately.

76. Q. And cancel and postmark with a separate instrument?

2949 A. Yes, sir.

77. Q. You could have done that?

A. Certainly I could.

78. Q. Suppose that an injunction had been obtained at any time during the progress of this suit, commanding you no longer to use a combined postmarker and stamp-canceller, what would you have done in that case?

A. I should have notified the Postmaster-General and obeyed his instructions.

79. Q. You don't mean to say, I presume, that you would have disobeyed the injunction of the court in order to obey the instructions of the Postmaster-General?

A. No, sir.

80. Q. Suppose that on the first day of last September an injunction had been served upon you at that time, commanding you not to use any longer, in New York post-office, a combined post marker and stamp-canceller; I ask you if that injunction would not have produced disarrangement, confusion and delay in your office?

A. Most assuredly—more or less delay.

81. Q. If you had been compelled to separate these instruments, and use the post-marker by itself and the postage-stamp canceller by itself, it, of course, would have required additional labor?

A. Certainly.

82. Q. Have you examined the subject sufficiently to form an estimate as to the amount of saving in labor, in the New York post-office, by the use of the combined post-marker and stamp-canceller in place of a separate stamp-canceller?

A. Yes, sir; I have thought the thing over.

83. Q. You can state it, if you please.

A. I think I have stated that in my direct examination.

84. Q. No, sir; you did not state that.

2950 A. It would cost from seven to nine thousand dollars more a year to cancel separately and post-mark separately.

85. Q. You expect, Mr. James, that if a judgment is recovered in this case that the United States will pay it, don't you? You hope or expect it?

A. They undoubtedly will, if there is any judgment collected.

86. Q. I say, if there is a judgment recovered?

A. Yes, sir; most assuredly.

87. Q. Then, if the United States Government should pay the judgment which is recovered here, the profits upon the use of this instrument would be paid by the party who receives the profits?

Mr. CLARKE. I object to assuming that there are any profits.

Mr. WILLIAMS. I don't assume there are, if there is any judgment.

A. If there has been any saving, at the present time, I am estimating it at between seven and nine thousand dollars. Six years ago it would have been done cheaper, because the work in the office now is almost double.

88. Q. You stated that you expected or thought if a judgment was recovered here it would be paid by the United States. I understand you to state that the profits, or if there was any profits, they did not come directly to you, but to the United States; then if the United States

pays the judgment, the parties who receive the profits are to pay the profits?

(Objected to by Mr. Clarke.)

A. There are no profits in the matter; it is entirely a saving to the government.

89. Q. That is always called profits.

2951 Redirect examination by Mr. CLARKE:

90. Re D. Q. You say, Mr. James, that the English stamp was adopted because, in your judgment, it was preferable to the old one?

A. Yes, sir.

91. Re D. Q. Where did you get the stamps that you used down to the introduction of this?

A. I presume it was the same man who made this stamp.

92. Re D. Q. Didn't the department furnish you with stamps?

A. We write to the department for a requisition for the stamp, and they order us to procure it, and then that order accompanies the voucher for the stamp.

93. Re D. Q. That was the same before and after the introduction?

A. Yes, sir.

94. Re D. Q. If an injunction had issued against you, wouldn't you have used stamps constructed on the principle shown in Master's Exhibit No. 4, if you had been advised by counsel that that did not come within the judgment?

A. I don't like that stamp; I don't think I would. So far as this attachment is concerned, it is well; but that thumb-screw don't amount to anything.

95. Re D. Q. When I say on that principle, I mean constructed on this principle, with a handle that is not balanced on the post-marker and canceller, if you were advised that that did not come within the injunction?

A. Yes, sir; I would have used such stamps.

2952 DUDLEY W. BURCHARD, a witness called on behalf of the defendant, being duly sworn and examined by Mr. CLARK, testifies as follows:

1. Q. Tell us your age, residence, and occupation?

A. I am very nearly forty-four years of age; I reside in Philadelphia, and am a clerk in the Philadelphia post-office.

2. Q. You were examined before in this case?

A. Yes, sir; I was examined in Brattleboro', before Judge Wheeler, at the final hearing of the case.

3. Q. With reference to the combined post-markers and cancellers, in which the canceller was attached to one side of the post-marker and the handle directly over the post-marker, which instruments were used in the Philadelphia office before the introduction by the department of the cross barred instruments; state whether those instruments made as perfect impressions for the post-mark and cancellation mark as the cross-barred instrument after it was introduced.

(Objected to by Mr. Norton as immaterial and irrelevant. Objection overruled. Exception taken.)

A. Yes, sir.

4. Q. In regard to the cross barred instruments, the handle, I understand, was midway between the canceller and post-marker, so that they were balanced?

A. Yes, sir.

5. Q. After the introduction of the cross-barred instruments, were any fewer men used to cancel and post-mark letters than were employed when the instrument having the canceller on one side was used?

A. No.

6. Q. Then I understand that the instrument having the canceller on one side made as perfect impressions, and the work was done with
2953 substantially the same rapidity as with the cross barred instrument, where the canceller and post-marker were balanced on the handle?

A. Yes, sir.

7. Q. You are a stamper in the Philadelphia office?

A. I have been a stamper. I do a good deal now.

8. Q. How long a time were you a stamper?

A. Well, I was never regularly employed at stamping; but I took my turn at stamping.

9. Q Covering what period?

A. From 1858 to 1864; and I very frequently go there now and do it.

10. Q. And since that time you have done considerable stamping?

A. I do a good deal of stamping in my own department now—the foreign department.

11. Q. Suppose that the balanced combined instrument now used in the Philadelphia office were substituted by an instrument having the canceller on one side of the postmarker and the handle directly over the postmarker, what is your opinion as to whether any more clerks would be needed to do the cancelling and postmarking which is now done there?

A. Need no more.

12. Q. Do you say that generally—in regard to any post-office?

A. I say it with regard to our office, and I presume the same rule would work in any other office.

13. Q. That is your opinion?

A. Yes, sir.

Cross-examination by Mr. NORTON:

14. X Q. Are you employed in the New York post-office?

A. No, sir.

15. X Q. Are you employed in the Philadelphia post-office?

A. Yes, sir.

2954 16. X Q. What is your salary there?

A. At the present time $1,500 a year.

17. X Q. How has it averaged for the last eight years?

A. It was $1,300 in 1871.

18. X Q. And it has averaged about how much during this time?

A. Just before Col. Snowden, our postmaster, went out; since then I have been getting two hundred dollars more. It was thirteen hundred dollars from 1869 to 1878.

19. X Q. And now how much is it?

A. $1,500.

By the MASTER:

20. X Q. Why was it that this combined postmarker and stamp-canceller was substituted in the Philadelphia office in place of the one you speak of?

A. That I don't know, only that the department sent it to us.

21. X Q. Was it by direction of the Post Office Department?

A. That is my impression. The other one was our own manufacture.

By Mr. CLARKE:

22. X Q. Made at the expense of the office?

A. Yes, sir.

23. X Q. And these others were sent by the department, taking nothing out of the allowance of the office?

A. Taking nothing out of the allowance.

Continuation of the cross-examination:

24. X Q. Now I show you two envelopes (master's Exhibits Nos. 2 and 3) having a postmark on the envelope and a postage-stamp cancelled, as there shown. Suppose the postmarking was required
2955 to be done separately and the cancellation done separately, would it not require just twice the amount of work to do it?

(Objected to by Mr. Clarke as not within the scope of the direct examination. Question admitted. Exception taken by Mr. Clarke.)

A. Well, it would require twice the amount of work, but not twice the amount of time to do it in.

25. X Q. Now, if it requires in the post-office twice the amount of work to perform the postmarking and cancelling of postage-stamps, in case it were done separately, it would require twice the amount of room to do it?

A. No, sir.

26. X Q. Can two men stand in the same place at the same time doing different kinds of work?

A. No; I suppose not.

Redirect examination by Mr. CLARKE:

27. ReD. Q. If a separate canceller were used, would it take as much time to cancel the postage-stamps on a given number of letters as it would to cancel those stamps and put the postmark on with the combined instrument?

A. No, sir.

28. ReD. Q. If a separate postmarker was used, would it take less time to postmark than to put the cancellation mark on the stamp with a separate canceller?

A. No, sir.

By the MASTER:

29. ReD. Q. What would be the difference, in your judgment?

A. It would not require more than half as many more men.

2956 Recross-examination by Mr. NORTON:

30. Re X Q. Now, this combined instrument can be used just as rapidly as though it were a separate instrument, can it not?

A. Not to make a good impression, it cannot.

31. Re X Q. Now, why not?

A. In using the united day and cancelling stamp, you have to be more particular in stamping. You have got to strike the letter so that the canceller will strike the stamp and at the same time make an impression with the day-stamp; but with the stamp already cancelled, then you can stamp the letters anywhere with the day-stamp. When they are together, you have to strike in one particular place, so as to cover both at once.

32. Re X Q. Your point, then, is that there is some time occupied in directing the stamp towards the postage-stamp?

A. Yes, sir.

33. Re X Q. How much time is occupied in that, for you say it re-

quires time to direct your eye to the postage-stamp in the cancellation of it. Now, how much time is needed for that?

A. I could not measure it, but it counts in the aggregate.

34. Re X Q. Suppose you were to cancel the postage-stamp without the postmarker, would you require anything to guide your eye to that?

A. Not as a rule, because the majority of postage stamps were right along in the same place.

35. Re X Q. Are the letters arranged any differently now for the use of this combined instrument than they were when a single one was used; are they not arranged substantially the same?

A. I think so.

36. Re X Q. No difference in that respect?

A. I don't know of any.

37. Re X Q. Now, a postage-stamp is of the size sufficiently to be readily seen?

A. Yes, sir.

2957 38. Re X Q. It does not require much tact or talent to direct a blow to the postage-stamp?

A. No, sir.

39. Re X *R*. It don't require much time to do it?

A. Some.

40. Re X Q. About as much time as it would to look at the sun?

A. I don't know how long it takes to look at the sun. I only know by my own experience it takes longer to do it.

Mr. BURCHARD recalled by Mr. CLARKE:

41. Q. I understand you to say, Mr. Burchard, that from your own experience you know that separate post-markers and separate cancellers can be used more rapidly than a combined post-marker and canceller. Am I right? Do you mean to do the same amount of work in less time?

A. Yes, sir; certainly.

Cross-examination:

42. Q. You mean to say that when a man uses the post-marking and cancelling device combined in one, it takes him as long to do the work as it would if he used separate instruments?

A. No, sir.

43. Q. Which can you do it the quicker with, the two single instruments or the combined instrument?

A. The combined instrument.

(Recess of an hour.)

2958 MATHEW C. BOGIA, a witness, being duly sworn on behalf of the defendant, and examined by Mr. Clarke, testifies as follows:

1. Q. Give your name, age, residence, and occupation.

A. Was born in Philadelphia; am between forty-six and forty-seven years of age. My occupation is chief clerk of the Philadelphia post-office, and have been there since 1861; went there during the administration of Abraham Lincoln.

2. Q. You have done some stamping since you have been there?

A. Yes, sir; I was a stamp clerk—part of my early career as clerk.

3. Q. And you do some stamping now?

A. Once in a while; not of any account; only to test the thing.

4. Q. You were examined at the final hearing before Judge Wheeler, at Brattleboro', Vermont, in this case?

A. I was.

5. Q. With reference to the instrument having a canceller fastened to one side of the post-marker, and the handle over the post-marker, which was used in the Philadelphia post-office before the introduction by the department of the combined instrument having a cross-bar? State whether the impressions of the post-mark and the cancellation mark made by that prior instrument were as perfect and good as those made by the cross barred instrument?

(Objected to by Mr. Norton as immaterial, incompetent and irrelevant; and further, that the patent in this suit covers the identical arrangement suggested in the question, and the court has declared the patent to be good and valid.)

A. They were as good as are made at the present day. They could not be any better.

2959 6. Q. And those cross-barred instruments had a handle in the middle of the cross-bar, and the canceller and the post-mark balanced?

(Same objection raised as before by Mr. Norton.)

A. Yes, sir.

7. Q. After the introduction of the cross barred instruments having the handle so balanced, were any fewer men employed for stamping?

A. There were not.

8. Q. So substantially the work was done as rapidly with the instrument having the canceller on one side?

A. The same.

9. Q. Suppose that in place of the instrument having the canceller and post-marker balanced on the handle, an instrument was introduced having a canceller on one side and the handle over the post-marker, is it your opinion that in any office any more men would have to be employed in stamping?

(Same objection.)

A. *A.* I do not think so.

Cross-examination by Mr. NORTON:

10. X Q. Are you in the Philadelphia post-office at this time?

A. I am.

11. X Q. Are you the stamper there?

A. No, sir; I am night superintendent.

12. X Q. Have you ever been stamper there?

A. Yes, sir; I took great interest in it.

13. X Q. When?

A. In 1863, '64 and '65.

14. X Q. What salary did you have at that time for that business?

(Objected to as immaterial,)

2960 A. I think from eight to nine hundred dollars a year.

15. X Q. During all that time?

A. Yes, sir.

16. X Q. You were one of the four witnesses that went from Philadelphia to Brattleboro' to aid in breaking down the patent that is the subject of litigation in this suit?

A. I was called there to give my testimony as I knew it.

17. X Q. You are one of the four witnesses that went up there to testify?

A. Yes, sir.

By Mr. CLARKE:

18. X Q. State whether the postage-stamps were cancelled as effectually with the instrument having the canceller on the side, and the handle over the post-marker, as of the instrument having them balanced on the handle?

A. Yes, sir; they were cancelled fully as well as with the cross-bar.

2961 WILLIAM H. WAREING, recalled on behalf of the defendant, and examined by Mr. CLARKE, testified as follows:

30. Re D. Q. Mr. Wareing, in regard to the ink that is now used for the purpose of postmarking and cancelling in the New York post-office, is that any different or any better ink, or worse, than it used to be?

A. The ink is better than it used to be.

31. Re D. Q. Now, in regard to the effectiveness of the cancellation at present, is that any better than it used to be?

A. Yes, sir.

32. Re D. Q. What do you assign as the reason for that?

A. The reason is we used to use rubber killers, and now we use steel.

33 Re D. Q. How is steel different?

A. I think it breaks the fiber of the paper, or takes hold of the enamel of the stamp better than the rubber killer.

34. Re D. Q. Well, how far back were you employed?

A. I have been fifteen years in the office.

35. Re D. Q. The steel killer has been used since about 1876, somewhere along there?

A. I think in 1875; until the English killer came.

36. Re D. Q. In regard to the class of men that are employed for stamping in the office; are they young or old men?

A. Principally young men.

37. Re D. Q. The policy of the office is to have young men, isn't it?

A. When a young man is first appointed we usually put him on the stamp-block, and we keep him there until he gets to be an expert in handling letters, then we advance him to the separating cases.

38. Re D. Q. That is the usual course of advancement in the office?

2962 A. Yes, sir.

39. Re D. Q. Most of the men in the office who do the stamping and nothing else are principally boys?

A. Yes, sir; boys and young men; they are over sixteen years of age.

40. Re D. Q. Have you caused any experiment to be made in the office with reference to the several capacities or uses of the instruments having cancellers on one side, and the handle over the postmarker?

(Objected to by Mr. Norton as immaterial, incompetent, and improper, as to whether any experiment has been made or not. The question is not what may or might have been done, but what was done during the time of the infringement.)

A. Yes, sir.

41. Re D. Q. Those instruments having the canceller on one side of the postmarker, and the handle over the postmarker, have been used?

A. Yes, sir.

42. Re D. Q. Was the cancellation mark made as well on the postage-stamps?

A. Yes, sir; equally as good.

43. Re D. Q. Made as well as with the instrument having the handle balanced on the postmarker and canceller?

A. Yes, sir.

44. Re D. Q. How many men have you had in use there?

A. Three men.

45. Re D. Q. And those are good competent men?

A. Yes, sir; fair men.

46. Re D. Q. And was the postmark made well?

A. The postmark was made very good.

47. Re D. Q. Do you know any pecuniary advantage in using the stamper having the postmarker and canceller balanced on the
2963 handle over one where the canceller is attached to the side of the postmarker?

A. No, sir; I do not.

48. Re D. Q. That is your opinion from your knowledge of the business of the post-office, that there is no pecuniary advantage?

A. Yes, sir; I see none now.

49. Re D. Q. (Handing witness a stamp which is subsequently marked Master's Exhibit 4.) Is that one of the stamps that have been tried?

A. Yes, sir.

50. Re D. Q. And you say the postmarking and cancelling as done by that instrument was done well?

A. Yes, sir; very well.

51. Re D. Q. So far as the types are concerned in the postmark relative to the English style?

A. That is not as good.

52. Re D. Q. That way of fastening in the type is not as good as the other way?

A. No, sir.

53. Re D. Q. Why?

A. The other sets in the case (illustrating).

54. Re D. Q. You say the cancellation mark was well done by that?

A. Yes, sir.

55. Re D. Q. And your general opinion is that such an instrument as that can be used in place of one where the parts are balanced on the handle, without any money difference in value of the use?

A. Well, I don't know what you mean by money difference. Do you mean that they can do it as quick by that as they can by the other—as fast? The impression is equally as good by that.

56. Re D. Q. Well, about the rapidity?

A. They are not as fast—it is too heavy.

57. Re D. Q. Comparing that with Master's Exhibit No. 5, which I claim is the patent stamp, can they work No. 4 as rapidly as they can No. 5?

A. Yes, sir.

2964 58. Re D. Q. But they cannot do it as rapidly as the stamp now in use?

A. No, sir.

59. Re D. Q. The so-called English stamp?

A. No, sir.

60. Re D. Q. But the impressions are equally as good?

A. Yes, sir.

61. Re D. Q. Is that another of the instruments, Exhibit No. 6? [Handing witness a stamp.]

A. Yes, sir.

62. Re D. Q. How does that work?

A. That works faster.

63. Re D. Q. Than the English stamp?

A. Yes, sir.
64. Re D. Q. Now in use?
A. Yes, sir.
65. Re D. Q. What is the reason of that?
A. Because it is lighter.
66. Re D. Q. That works faster than either No. 4 or No. 5?
A. Yes, sir.
67. Re D. Q. And also faster than the other English stamp?
A. Yes, sir.
68. Re D. Q. And the difference is due to the weight?
A. Yes, sir.
69. Re D. Q. That is the reason you give?
A. Yes, sir.
70. Re D. Q. Now, to make the thing clear, this Exhibit No. 6, which has the same way of fastening the type in as the other English stamp, I understand?
A. Yes, sir.
71. Re D. Q. I understand the way of fastening the type as illustrated in Exhibit No. 6 is the same way, and has an advantage over the method of fastening the types, as shown in Exhibit 4 and 5, by a set screw?
A. Yes, sir.
72. Q. So far as the excellency of cancellation is concerned,
2965 they do well, and equally well, as I understand?
A. Yes, sir; so far as I have watched it.
73. Q. And the matter was intrusted to you to look after?
A. Yes, sir.

Cross-examination by Mr. NORTON:

74. X Q. Give the names of those persons that made these experiments under your direction.
A. The stampers, you mean?
75. X Q. Certainly, whoever made the experiment.
A. One is named William Beach, William Magee, and I think the other is named Estee.
76. X Q. About how much time was occupied in the business of experimenting with those different devices?
A. All this week. I think it was a week ago on Saturday that they were given to me.
77. X Q. Were those persons competent and expert in that business?
A. They were good stampers.
78. X Q. Were they infants, boys, or men?
One of them is married; they cannot be very young.
79. X Q. What salaries do they get?
A. I think one of them gets four hundred dollars; another, four hundred and eighty; and I think the other gets six hundred; but I won't be sure whether it is six hundred, or seven hundred and twenty dollars. I don't recollect the pay.
80. X Q. Did you take any part in the experiment yourself?
A. No, sir.
81. X Q. Now, who made these stamps?
A. I could not tell you.
82. X Q. I mean the exhibits to which you refer.
2966 A. I could not tell you. I know who makes all our stamps in the office, and I presume he made those.

83. X Q. Give the name and residence of the person who makes all your stamps.

A. Mr. Bruner, in Gold street, I think. I cannot give his residence.

84. X Q. Look on that plate and see if that is the name (handing witness the stamp, and referring to the name stamped on it).

A. (Witness reading). "F. Bruner; 78 Fulton street."

85. X Q. He makes all the stamps for that office?

A. Yes, sir; all of that kind.

86. X Q. How long have those men who have made experiments been in business in the post-office here?

A. I dont think they have been there a year; about a year, or less than a year; one of them possibly a little longer.

87. X Q. Now, you say, do you not, that each one of these exhibits make clear and distinct postmarks, with dates, and also cancels the postage-stamps distinctly and permanently, do you not?

A. I do, sir.

88. X Q. In that way you postmark your letters and cancel your postage stamps in that office, do you not? in a thorough and complete manner?

A. That is our endeavor.

89. X Q. The instruments that have been used there for that purpose since Mr. James has been postmaster have been of that kind and character—that is, to do that work in that way, have they not?

A. Yes, sir.

90. X Q. You think that the lighter this device for postmarking and cancelling is constructed, the easier and the greater rapidity of the work can be obtained, do you not?

A. I don't think so; it can be made too light.

91. X Q. As well as too heavy?

A. Yes, sir.

2967 92. X Q. Does the ease and rapidity by which they are operated depend upon the weight to a considerable degree?

A. Well, if it is very heavy, of course they cannot use it or handle it so rapidly.

93. X Q. You have said something about devices being balanced on the handle. What do you mean by that?

A. Well, as I understand it, the handle is in the center of the two markers; that is, the postmarker and the canceller.

94. X Q. That is all you meant in reference to the construction of it?

A. Yes, sir.

95. X Q. The gravity of the thing has nothing to do with it, has it?

A. Well, I don't know as I understand what you mean.

96. X Q. Now, who brought those stamps to you to be tested in the New York post-office?

A. The assistant postmaster.

97. X Q. What is his name?

A. Mr. H. G. Pierson.

98. X Q. What did he tell you he wanted you to do with them?

A. He told me to test them.

99. X Q. How, and for what purpose?

A. He didn't tell me for any particular purpose, that I recollect.

100. X Q. You never knew until Mr. Clarke asked you questions what was wanted by those experiments, did you?

A. Well, I didn't know what they were for; I knew that I was to test them, and that is all I did know.

101. X Q. And the result of the test is, that you found the Master's

Exhibit No. 6 works more easily and with more rapidity than the Master's Exhibit No. 5, or his Exhibit No. 4; is that it?

A. Yes, sir.

2968 102. X Q. And all that you attribute to the form and construction of the one being lighter than the other; is that it?

A. I do.

103. X Q. There is no difference in the character of the work performed by either of them?

A. I think not.

104. X Q. They operated first rate in making postmarks and cancelling the postage-stamps at one blow of the instrument?

A. Yes, sir.

105. X Q. They all use ink for postmarking and cancelling?

A. Yes, sir.

106. X Q. Where do you get your ink?

A. It is made by Von Linden & Co.

107. X Q. Does the government furnish it?

A. Yes, sir.

108. X Q. Now, the one that is regularly in use in the New York post-office for the purposes you say those were used for, is it heavier or lighter than this?

A. It is a little heavier than Exhibit No. 6.

109. X Q. Then you would recommend the postmaster, from experiments that you have made, to reduce the weight of that a little, so as to make it operate a little more easily and rapidly?

A. Yes, sir; I should prefer that now.

Redirect examination by Mr. CLARKE:

110. Re D. Q. In regard to Exhibits Nos. 5 and 6, somebody weighed them. Do you know whether they are about the same weight?

A. I don't; I didn't weigh them.

111. Re D. Q. Supposing that the combined instrument, having a postmarker and canceller balanced on a handle, now in use in the New York post-office, was replaced by instruments constructed on the principle shown in Exhibits No. 4 and 6, would any more clerks be needed to perform the work?

A. No, sir; I think not.

2969 112. Re D. Q. When you say that the clerks that have used these stamps have been employed about a year or less, is you' recollection clear on that point? They would know better than you on that point, wouldn't they?

A. Yes, sir; but I could tell by looking at the records. Possibly one of them may have been more than a year.

113. Re D. Q. If there is any advantage, not pecuniary, in balancing the stamp in the middle, what do you consider it to be?

A. I don't think there is any advantage.

Recross-examination by Mr. NORTON:

114. Re X Q. Counsel has called your attention to Master's Exhibit No. 6. Suppose that the cancelling part of that was separated and put on a separate handle, and they were used separately, would that require more clerks to postmark the letters and cancel the postage-stamp than they do with this combined instrument?

A. Most assuredly.

115. Re X Q. Do you know anything about the Philadelphia post-office?

A. No, sir.

116. Re X Q. Nothing about the stamps used there?
A. No, sir; except the postmarks I see.

2970 Mr. CHARLES O'CONNER, a witness called on behalf of the defendant, being duly sworn and examined by Mr. CLARK, testified as follows:

1. Q. Please state your age, residence, and occupation.
A. I am 33 years of age, and am chief clerk in the distribution department——
2. Q. Of the New York post-office?
A. Yes, sir; and my residence is 34 Macdougal street.
3. Q. How long have you been employed in the New York post-office?
A. A trifle over seven years.
4. Q. Do you have the supervision of the clerks who do the cancelling and postmarking?
A. Yes, sir.
5. Q. Is it part of your duties to see whether they make fair impressions?
A. Yes, sir.
6. Q. Have you ever done any stamping yourself?
A. Nothing more than directing stampers, but not as a stamper.
7. Q. It is your duty to oversee their work?
A. Yes, sir.
8. Q. Have Master's Exhibits 4, 5, and 6 been tried in your department?
A. Yes, sir.
9 Q. Was the cancellation mark and the postmark done by them well done?
A. Yes, sir.
10. Q. Was the cancellation mark done by them all equally as well?
A. Yes, sir.
11. Q. And as well as by the stamp that is constantly in use?
A. Yes, sir.
12. Q. As to the postmark and the date, is that well done now all the time?
2971 A. Yes, sir; there is one stamp there, I believe, which postmark was a little more clearly defined than the other.
13. Q. In what particular?
A. In the "New York"—post-office; not in the figures.
14. Q. In the date particularly?
A. (Witness taking Exhibit No. 4.) This stamp would make a very fine postmark. The difficulty was in the figures. They were not set properly with a set screw.
15. Q. Any more difficulty in that respect than there was in Exhibit No. 5?
A. No, sir; no more. About the same.
16. Q. It was not so much in the case of Exhibit 6, and the stamps that you have been using in the office?
A. No, sir; this one, No. 6, seemed to give no difficulty.
17. Q The only difficulty was in Exhibits 4 and 5?
A. And that was in the date and figure.
18. Q. The men who tried or tested these stamps, were they good stampers?
A. Three about the best we have, I should say.
19. Q. Do you know any pecuniary advantage in using the instrument having a postmarker and canceller balanced on the handle, over using

one where the canceller is on one side, and the handle is directly over the postmarker?

A. No, sir.

Cross-examination by Mr. NORTON:

20. X Q. How long have you been superintendent there?

A. I am not superintendent; I am chief clerk. I have been there about a year and a half.

21. X Q. What is your salary?

A. $1,200.

22. X Q. Your business is to inspect letters to see they are properly postmarked and the postage-stamps properly cancelled?

2972 A. Part of it.

23. X Q. A large part of it?

A. Yes, sir.

24. X Q. You never stamp any letters yourself?

A. Well, I stamp letters, but I have never been in the position of a stamper to make a business of it.

25. X Q. All the letters since you have been there are postmarked and the postage-stamps cancelled by an instrument so combined and arranged as to do it by one blow?

A. Yes, sir.

26. X Q. Some of them used have been lighter and larger than others?

A. I have never noticed that.

27. X Q. Now, the cancellers that have been used in that office are constructed about the size of a postage-stamp, are they not?

A. A little longer than that.

28. X Q. It is done so as to hit some part of the postage-stamp when the postmark is put upon the letter, is it not?

A. Yes, sir.

29. X Q. Do not you think that a man with one eye can possibly postmark letters and cancel the postage-stamp with this combined instrument?

A. Yes, sir.

30. X Q. It does not require any great skill or intellect to look at the postage-stamp?

A. I think the skill can be obtained by practice.

31. X Q. You think that boys and small children are just as good for that purpose as the counsel on the other side would be?

A. Well, I don't know; children couldn't do it.

Adjourned to November 11th, at 11 o'clock.

2973 N. Y., *Nov.* 11*th*, 1879—11 A. M.

Present, Mr. Marcus P. Norton, for complainant; Mr. Samuel B. Clarke, for Mr. James.

Mr. WM. S. MAGEE, a witness called on behalf of the defendant, being duly sworn and examined by Mr. CLARKE, testified as follows:

1. Q. Give us your name, age, residence, and occupation?

A. I reside at 350 West 51st street; my age is twenty; and I am a stamper in the New York post-office; my name is Wm. S. Magee.

2. Q. How long have you been stamper in the New York post-office?

A. About a year. A little over.

3. Q. How rapidly can you stamp and postmark, cancel postage-

stamps, and postmark letters with the combined instrument—letters or postal cards?

A. Well, on an average, a hundred a minute. A little over.

4. Q. How rapidly have you postmarked and cancelled the stamps on five thousand postal cards, or fifty-five hundred?

A. I have done fifty-five hundred in fifty-five minutes.

5. Q. You are in the Third Division?

A. Yes, sir.

6. Q. And employed at the long table where there are sixteen places?

A. Yes, sir.

7. Q. Are there any other stampers at that table who make more rapid time than you do?

A. No, sir.

8. Q. Do all of them make as rapid time?

A. Not all of them.

9. Q. Of those who are employed at that table?

A. Yes, sir.

10. Q. Look at Master's Exhibit, Nos. 4, 5, and 6, and state whether you have used those three instruments in the New York post-office?

2974 A. (Examining the Exhibits Numbers 4, 5, and 6.) Yes, sir.

11. Q. Now, with reference to perfectness of impression, both of the postmark and cancellation mark, did you find that any one of them had any advantage over the others in that respect?

A. Well, yes, I think this is about the best (referring to Exhibit No. 4.)

12. Q. What is the best?

A. Exhibit No. 4.

13. Q. That one makes the best impression of all of them?

A. Yes, sir.

14. Q. How about the date held in by the set screw?

A. That is not as well, because it requires more time to change them.

15. Q. That is, you cannot set them so accurately as you can in Exhibit No. 6?

A. No, sir.

16. Q. But you can as in Exhibit No. 5?

A. It is just the same as Exhibit No. 4.

17. Q. In respect to the dates?

A. Yes, sir.

18. Q. You say you think as a whole Exhibit No. 4 makes the best impression; but do they all make good impressions?

A. They all make good impressions.

19. Q. Impressions that passed persons who inspected them at the trial?

A. Yes, sir.

20. Q. You tried them when?

A. From the first to the seventh of this month.

21. Q. Did you try them long enough to give them sufficient trial in your judgment?

A. Yes, sir.

22. Q. Have you got the knack of using all of them?

A. Yes, sir.

2975 By the MASTER:

23. Q. Do you now actually use them in practice?

A. Not since the 7th.

24. Q. Since these were introduced in the post-office, have you been using them?
A. No, sir.

Mr. CLARKE, continuing:

25. Q. You have a large stock of others on hand?
A. Yes, sir.

By the MASTER:

26. Q. These were used experimentally?
A. Yes, sir.

Mr. CLARKE, continuing:

27. Q. Now, in reference to rapidity of use, did you find any of the three had any advantage over the rest?
A. Yes, sir; No. 6.
28. Q. Could you use that as rapidly as you do the English stamp that is in use in the office?
A. Yes, sir, I think a little more so.
29. Q. Why?
A. On account of the lightness.
30. Q. That makes a difference?
A. Oh, Yes.
31. Q. Now, as between Exhibits numbers 4 and 5, with regard to rapidity of use, did you notice any difference?
A. Yes, sir; Exhibit No. 4 is better than Exhibit No. 5.
32. Q. I that regard?
A. Yes, sir.
33. Q. Is the difference practically of much account?
A. Well, yes, I should think so. You cannot get as much work out of it.
34. Q. What is the reason of that?
A. Well, that cannot be explained. I don't think it seems in the construction of the stamp.
2976 35. Q. Was it in the height of the handle?
A. I think it is the height of the construction here—the post-marker.
36. Q. That is the fact, that the canceller and the post-marker and the cross-bar make the whole arrangement higher?
A. Yes, sir.
37. Q. That is, makes a slight difference?
A. Yes, sir.
38. Q. Do you know whether Nos. 4 and 5 are of the same weight?
A. No, sir; well, I don't know.
39. Q. Do the men all hold the stamps in stamping in the same way?
A. Oh, no.
40. Q. Then do all men like precisely the same form, that is, does the same form and construction suit all equally alike?
A. Oh, yes.
41. Q. They can all get used to them?
A. Yes, sir.
42. Q. Do you think there would be any difference between No. 4 and No. 5, supposing that the canceller and postmarker were cut down no higher than No. 4?
A. I don't think there would be much difference then, that is, for rapidity.
43. Q. Suppose that the stamp now used in the New York post-office,

in which the canceller and postmarker are balanced on the handle, were replaced by a stamp constructed on the principle shown in Exhibit No. 4, in your judgment would any more clerks be needed to do the stamping?

A. Oh, no; no, sir.

44. Q. I mean on your table?

A. Not on my table.

By the MASTER:

45. Q. In Master's Exhibits Nos. 4, 5, and 6 there is but one handle, is there?

2977 A. The handles are all the same—that is, the wooden handles.

46. Q. And attached to that handle at the bottom is a combined postmarker and stamp-cancelling device, is there not?

A. Yes, sir.

47. Q. And the postal mark and the cancellation of the postage-stamp are both done at one blow, are they not?

A. Yes, sir.

Cross-examination by Mr. NORTON:

48. X Q. Look at Master's Exhibits numbers 2 and 3, and state in what office, if you know, were the postmark upon those envelopes and the postage-stamp cancelled, made.

A. (Examining Exhibits Nos. 2 and 3.) Well, from the looks, I should judge they were made in the New York post office.

49. X Q. What is the date?

A. (Reading the postmark.) September 19, 5 p. m., 1879.

50. X Q. Have you any doubts about where they were made?

A. And one is 2 p. m.; one the 17th, and one the 19th of September.

51. Q. You have no doubt about that?

A. I don't think anybody but a stamper could do it.

52. X Q. Now, the letters and postal cards and other mail matter that have postage-stamps requiring a postmark and cancellation of the postage-stamp in the New York post-office—since you have been there—have been substantially the same as appears on these envelopes?

A. Yes, sir, except with this three.

53. X Q. Now, those two marks, the postmark on the envelope and the cancellation marks upon the postage-stamp have been—since you have been there—all done by one instrument, containing two

2978 devices for that purpose, and by one blow of it, have they not?

A. Yes, sir.

54. X Q. Now, has ink been used with them for that purpose?

A. Yes, sir.

55. X Q. The cancellation of the postage-stamp and the postmarking on the envelope has been done by one blow of the instrument in ink?

A. Yes, sir.

56. X Q. Now, you say you have stamped about a hundred letters in a minute in this way?

A. Yes, sir; I have averaged that.

57. X Q. You will average that?

A. Yes, sir.

58. X Q. That is, you will make the postmark and cancellation of the postage-stamp on one hundred letters in one minute?

A. Yes, sir.

59. X Q. Now, suppose the cancellation device were not used at that time, how many could you postmark in a single minute?

A. Well, I don't know that I could do a hundred, because it is more difficult to use a single stamp.

60. X Q. Now, how many letters with a separate canceling stamp could you cancel the postage stamp in a minute by striking the blow upon it?

A. Just upon the postage-stamp?

61. X Q. Yes, sir.

A. Well, it is easier to use the canceller.

62. X Q. Answer my question, please.

A. Well, I cannot tell.

63. X Q. You could cancel a hundred in a minute?

A. Yes, sir.

64. X Q. About the same as you could postmark in a minute?

A. No, sir; I could not postmark as many as I could kill.

2979 65. X Q. You could strike with greater rapidity a postmarker three fourths of an inch in diameter than you could a postage-stamp canceller of the same diameter?

A. No, sir.

66. X Q. It requires about the same time for the separate operations where the operating stamp is in the hands by the downward motion?

A. No, sir; the killing you could do more rapidly than the postmarking, because it takes more time to make a good impression of the postmark.

67. X Q. Now, please explain to the master the difference in striking the stamp down and making a postmark and then in striking a stamp down and making the cancelling marks by the separate instruments.

A. I cannot do that because I never tried it.

68. X Q. Well. I do not want any speculation about the matter.

A. Well, I think if I could stamp one hundred postmarks singly, I could do one hundred and twenty cancellations afterwards.

By the MASTER:

69 X Q. You have stated that by the combined instrument you can stamp the postal mark and cancel the postage-stamp on fifty-five hundred letters in fifty-five minutes. Suppose now that you use a separate instrument for stamping the postmark and a separate instrument for cancelling the postage-stamp, how many letters could you thus stamp in an hour with the separate instruments?

A. Well, about half that number.

Mr. NORTON continuing:

70 X Q. Now, suppose that you were to postmark all the letters separately, and then, after that had been done, you were to take the same letters and cancel the postage-stamp in the same manner that you did the postmarking—that is, with a separate instrument, how many more tables would be required for that purpose in that office?

2980 A. Well, I could not answer that question.

Redirect examination by Mr. CLARKE:

71. ReD. Q. Mr. Magee, if you use a separate postmarker, can you use it more or less rapidly than you use the combined postmarker and canceller?

A. No; I don't think so.

72. ReD. Q. Don't think what?

A. I don't think I can use it as well as the combined postmarker and killer.

73. ReD. Q. If you use a separate postmarker simply on a handle, with which you can put the impression anywhere on top of the envelope, why can't you use that as rapidly?

A. Because the base of it being so small you have to take more time to make an impression.

74. ReD. Q. Have you ever tried it?

A. Yes, sir; I tried it this morning for the first time.

75. ReD. Q. You never used that until this morning?

A. Not to work with it.

76. X Q. You never used a separate postmarker except this morning?

A. I have used it, but never regularly.

77. ReD. Q. What instrument did you use, then?

A. I used what we call the "transit" stamp for stamping letters on the back.

78. ReD. Q. How long did you use it this morning?

A. Well, I should say for an hour.

79. ReD. Q. Have you ever used separate cancellers at all?

A. Yes, sir; on circulars.

80. ReD. Q. Can you use them more or less rapidly than you can the combined instrument?

A. Oh, yes; you can use them more rapidly.

2981 Recross-examination by Mr. NORTON:

81. Re X Q. You say you can use a separate canceller more rapidly than one combined with a postmarker; why?

A. I have used them on circulars.

82. Re X Q. I say why?

A. I cannot tell you why.

83. Re X Q. How many have you conversed with in your office, and how frequently, as to the course to be pursued to reduce the recovery of damages in this case?

A. I have not conversed with anybody. I don't know what the case is or the names or that Mr. James is connected with it, only that this gentleman (referring to the master) read the names; I didn't know what the case was.

84. Re X Q. Nobody ever said anything to you about the case?

A. No, sir; only to try these stamps and that I would be called as a witness to give my opinion.

85. Re X Q. Your opinion on what?

A. Which was the best of these stamps.

86. Re X Q What are your conclusions about that?

A. That number six is the best.

87. Re X Q. Why?

A. The reason it is better I don't know.

Mr. MAGEE recalled by Mr. CLARKE:

88. Re D. Q. What salary do you get?

A. Sixty dollars a month.

89. Re D. Q. Is there a clerk named Estee employed on your table?

A. Yes, sir.

90. Re D. Q. Did he use these stamps?

A. I didn't see him use them; I don't think so.

2982 WILLIAM G. BEACH, a witness called in behalf of the defendant, being duly sworn and examined by Mr. CLARK, testified as follows:

1. Q. Give us your name, age, residence, and occupation.

A. My name is Wm. G. Beach; I live at 319 East 27th street; am eighteen years old, and my occupation is a stamper in the New York post-office.

2. Q. How long have you been a stamper there?

A. I have been a stamper in the third division of the Post-Office very nearly a year.

3. Q. You stamp at the same table that Mr. Magee does?

A. The same table.

4. Q. The long table?

A. Yes, sir.

5. Q. How rapidly do you use the combined instrument?

A. Well, I make an average of about a hundred a minute.

6. Q. Of those who are employed at that table, do all do as well as that?

A. Not all.

7. Q. Are there any who do better than that?

A. None, so far as I know.

8. Q. Have you used the Master's Exhibits Nos. 4, 5, and 6?

A. (Examining the exhibits.) I have.

9. Q. You tried them when?

A. I commenced November the 1st.

10. Q. And tried them during last week?

A. Yes, sir.

11. Q. Now, with reference to the impressions for postmarking and cancellation with which they make, state whether one has any advantage over the others in that respect?

A. (Examining them). Well, I could put on the best impression with this stamp.

12. Q. Which is that?

2983 A. Exhibit No. 4.

13. Q. Were the impressions all good?

A. Yes, sir.

14. Q. All passed muster?

A. Yes, sir.

15. Q. None sent back on your hands?

A. No, sir.

16. Q. Did you give the stamps what you considered a fair trial?

A. Yes, sir.

17. Q. And you got the knack of using them?

A. Yes, sir.

18. Q. And letters marked with these stamps were actually sent out just the same as those marked with the other stamps?

A. Yes, sir.

19. Q. Now, with reference to rapidity of work, did you find that any one of those stamps had an advantage over another?

A. I could do more rapid work with No. 6.

20. Q. Why?

A. It is a light stamp, and that has a good deal to do in stamping.

21. Q. Now, in reference to Nos. 4 and 5?

A. Of those two No. 4 was the most rapid.

22. Q. Can you tell why?

A. This stamp No. 5 is high and it is more awkward to use; you cannot hold it as well.

23. Q. If it was cut down, so as to be the same size, do you think there would be any practical difference between those two?

A. I don't know; I could not say.

By the MASTER:

24. Q. The ones which you actually use in the Post-Office, which you have used before you tried these, how were they relatively in height to these three exhibits?

A. I think I cannot state; from what I have seen they seemed to feel as though this was the same height, No. 6.

2984 25. Q. Those that you used, then, were about the height of Exhibit No. 6?

A. Yes, sir.

26. Q. Then Exhibit No. 6 is higher than the ones you have been accustomed to using in the post-office?

A. Yes, sir.

Mr. CLARKE continuing:

27. Q. Can you use Exhibit No. 6 as well as the English stamp in use?

A. Yes, sir.

28. Q. You notice no difference?

A. I notice no difference.

By the MASTER:

29. Q. I suppose that Exhibit No. 5, the handle or wooden part of Exhibit No. 5, was made shorter, so as to be of the same length as that shown in Exhibit No. 6; would there then be any difference in the rapidity or speed?

A. The metallic part should be shortened; it would do no good to shorten the handle.

30. Q. Suppose the metallic part was shortened?

A. I could not say whether it would improve it or not; it might.

Mr. CLARKE continuing:

31. Q. Difference in weight makes a difference; did you find that?

31½. Q. I found out that weight does make a difference.

Cross examination by Mr. NORTON:

32. X Q. How long have you been in the New York post-office?

A. I have been on the stamping-block nearly a year, but I have been in the post-office longer than that.

2985 33. X Q. Describe the device for postmarking and cancelling postage-stamps that you have used in that office since you have been there?

A. Well, it is a stamp about the size of Exhibit No. 6. This killing part is fastened on in the same manner as this Exhibit No. 6. The difference is this: Exhibit No. 6 the handle is over the date, while the stamp that is used in the New York post-office the handle was in the centre.

34. X Q. The one that you have used since you have been there has a postmarking device and cancelling device combined, so as to do the work of the two; that is, postmarking the letter and cancelling the postage-stamp by one downward blow of the instrument?

A. Yes, sir.

35. X Q. That has been used ever since you have been there?

A. Yes, sir.

36. X Q. And you know it was used there before you were on the stamping block?

A. Yes, sir.

37. X Q. It is a very valuable arrangement for that purpose?

A. It is a very good thing for that purpose, but I don't know about its value.

38. X Q. The instrument that you have used has cancelled all your postage stamps in a very perfect way?

A. Yes, sir.

39. X Q. There has been no complaint from any source that you know of, on account of the postage-stamp not being thoroughly cancelled?

A. No, sir.

40. X Q. And the post mark is made equally as good?

A. Yes, sir.

41. X Q. Giving the name of the office, date, and time?

A. Yes, sir.

42. X Q. No complaints from any source in reference to that, as you know?

2986 A. No, sir.

43. X Q. You use ink with that stamp?

A. Yes, sir.

44. X Q. The better the quality of ink is, the better the stamp will work?

A. The darker will be the impression.

45. X Q. Your stamp wants to be clean, of course?

A. Yes, sir; clean.

46. X Q. Did you ever have a single stamp for postmarking letters?

A. Not for postmarking but for stamping on the back. It is a receiving stamp showing what time the letter is received in the office.

47. X Q. It takes you as much time to put that postmark on the back as it would to put the postmark and cancellation on the front?

A. Yes, sir; just the same.

48. X Q. So you give the postmark and cancellation mark in the same time as you give the postmark with the separate instrument?

A. Yes, sir.

49. X Q. Now, about the tables; how many tables do you use in that business?

A. In the third division where I am, there is one long table with sixteen blocks on it. Every man has a block.

50. X Q. How much spare room have you in that post-office?

A. I have not seen any spare room.

51. X Q. Not an inch?

A. There is an inch, maybe.

52. X Q. Not much more than that?

A. No, sir.

53. X Q. You want more room in that building for the proper management——

A. I am no judge of that.

54. X Q. Now, another thing; do you keep your mails open so as to receive letters up to within how long a time before you commence to transfer them to the cars?

2987 A. I don't know how long. Every mail goes out at a certain hour.

55. X Q. You keep postmarking letters and cancelling postage stamps up to the very hour?

A. Yes, sir.

56. X Q. So there are no mails kept back for want of time in postmarking and cancelling postage-stamps?

A. No mails kept back at all. Stamping for 2 p. m. is for whatever mail comes in before two o'clock; after that we change our stamp.

57. X Q. After the time for the mail to go out you change the hour of your stamp?

A. Yes, sir.

58. X Q. Then you go on making up the next mail to go out at another specified time?

A. Yes, sir.

Redirect-examination by Mr. CLARKE:

59. Re D. Q. How much have you used the receiving postmarking stamp?

A. I used that in the fourth division. I used it one or two months; then I was transferred to the third division, and since that time I have used this combined stamp.

60. Re D. Q. Was that your first stamping on that?

A. I first stamped with the single stamp in the fourth division.

61. Re D. Q. You did no stamping before that?

A. No, sir.

62. Re D. Q. How long does it take to get a green hand well used to stamping?

A. Well, he could get so he could put on a good impression in three or four days; but not rapid work. It might take him a month to do rapid work. It depends upon the skill he possesses. Some people have an aptitude for it.

2988 63. Re D. Q. When you say that there is no spare room in the post office, do you think you are a good judge of that?

A. I think I am.

64. Re D. Q. Do you think you are a better judge than Mr. James on that?

A. No, sir.

65. Re D. Q. Couldn't the long table you now use be extended, couldn't it come down in front of Mr. Steel's desk?

A. It could come down there.

66. Re D. Q. That space is not used for anything specially?

A. No; it is only a way for the elevator there.

67. Re D. Q. Couldn't the other side of that table be utilized for stamping blocks; the side opposite from which you now stamp?

A. That is where the stuff is put out. It could be used for that; stamps could be put there.

68. Re D. Q. What salary do you receive, Mr. Beach?

A. Thirty-five dollars a month.

Recross-examination by Mr. NORTON:

69. Re X. Q. Now, suppose that you were to take the table that was in there and have stampers on each side of it, what would you do with the matter you postmarked and cancelled?

A. I would do what I was told; I don't know.

70. Re X. Q. It would be in the way.

A. I could get it out very easily.

71. Re X. Q. How?

A. They could arrange it some way.

72. Re X. Q. How wide is that table?

A. I cannot form any idea.

73. Re X. Q. It is wider than this table, (referring to the table upon which the testimony was taken in the master's office.)

A. I think it is.

74. Re X. Q. If you put stampers on both sides you would have to make the tables wider?

2989 A. I don't know.

75. Re X Q. What is the opposite side used for?

A. We shove the matter out in the little slots in the middle.

76. Re X Q. Now, what would you do with the matter on that side of the table if you were to put stampers there?

A. As I said before, I would do whatever the superintendent told me to do. He would undoubtedly find some way to put it away.

77. Re X Q. You occupy that side of the table now necessarily in making up your mails?

A. We don't make up any mails on that table at all.

78. Re X Q. You postmark there?

A. Yes, sir; we throw it out in boxes.

79. Re X Q. Now, I ask you what the opposite side of that table is used for in the post-office?

A. On the side where the stamping is done in the middle of the table or right beyond where the stamping is done is the shoots where the stuff is put out after it is stamped, and beyond that is a space where the stuff is picked out of the shoots and laid in this space and given to the separators from there.

80. Re X Q. Both sides of the table are occupied now?

A. Yes, sir; utilized now.

81. Re X Q. One for the stampers and the other to receive the work?

A. Yes, sir.

82. Re X Q. Now, that is necessarily occupied in that office for that purpose?

A. Yes, sir.

83. Re X Q. How many other tables are there besides this long table with sixteen blocks to it used in that office?

A. For stamping purposes?

84. Re X Q. Yes, sir.

A. I don't know.

2990 By the MASTER:

85. Re X Q. Is any other table used besides that for the combined stamper?

A. Not in our department.

Mr. NORTON continuing:

86. Re X Q. That is sixteen blocks for sixteen stampers?

A. Yes, sir.

87. Re X Q. You say, in answer to a question by Mr. Clarke, that the table could be extended. Now how far could it be extended?

A. I don't know how many feet it could be extended; but some little distance up.

88. Re X Q. It could be run out into the street if necessary.

A. I suppose so, if the postmaster wanted to do it.

89. Re X Q. The longer the table and the more space occupied the more difficulty there would be to get around it?

A. I don't know. If they had to extend the table they could do it.

89. Re X Q. You think that some special Providence would be interposed for that purpose?

A. There would be some special ingenuity interposed I suppose.

Redirect examination by Mr. CLARKE:

90. Re D. Q. You have nothing to do with the arrangement of the tables in the office?

A. No, sir.

91. Re D Q. No responsibility?
A. No responsibility; my work is to stamp.
92. Re D Q. You do what you are told?
A. Yes, sir.

2991 CHARLES E. ANDREWS, a witness called on behalf of the defendant, being duly sworn, and examined by Mr. Clarke, testifies as follows:

1. Q. Give me your name, age, residence, and occupation.
A. Charles E. Andrews; about thirty-five; residence, 144th street, near College avenue, and am a post-office clerk.
2. Q. How long have you been a post-office clerk?
A. About twelve years.
3. Q. In the New York post-office?
A. Yes, sir.
4. Q. What part of the business of the post-office do you do?
A. I am a stamper.
5. Q. In which division?
A. I am in the city department, the fourth division.
6. Q. In which Mr. Gaylor is superintendent?
A. Yes, sir.
7. Q. Have you been a stamper all these twelve years?
A. Except for a few months.
8. Q. You are a stamper now?
A. Yes, sir.
9. Q. How rapidly do you stamp, postmark letters, and cancel postage stamps? Have you ever tried an experiment how long it took you to postmark and cancel the postage stamps, say on 5,000 postal cards?
A. I killed five thousand postal cards in twenty-three minutes.
10. Q. Postmarked with the combined instrument?
A. Yes, sir.
11. Q. In twenty-three minutes?
A. Yes, sir.
12. Q. Are there any others who do work as rapidly as that in the office?

A. I suppose there might be, but not as I know of. I have
2992 never seen any of them test themselves. Some of the boys have practiced handling a hundred letters, but what time they did it in I cannot say. I don't know.

13. Q. You don't know of any that do as rapid work as you do?
A. Not that I know of. Of course there may be, but not to my knowledge.
14. Q. Look at the Master's Exhibits Nos. 4, 5, and 6, and state if you have used those instruments.
A. I have.
15. Q. Used them recently?
A. I have, recently, during the last week.
16. Q. Now, with reference to the impression, the postmark and cancel which these instruments make, state whether, in regard to that matter, you found any difference between them.
A. In the impressions I did not.
17. Q. How was it as to the dates in the Exhibits Nos. 5 and 4, which are held in by set screws?
A. You want to know the difference between these two?
18. Q. Between Nos. 6, 4, and 5 altogether, in regard to the date.
A. Well, I have more trouble with Nos. 5 and 4 than I have with this other stamp No. 6—I mean of the setting of the dies. I can set the

dies in No. 6 more even and make a more legible stamp than I can with Nos. 4 and 5.

19. Q. But otherwise in regard to the affixed part which makes an impression, they all make good impressions, do they not?

A. Yes, sir; they all make good impressions.

20. Q. And with the exception of the dates, do they all do as well as the English stamp, so far as the impression goes?

A. Yes, sir.

21. Q. Now with reference to rapidity of use of those three instruments, did any one of them have any advantage over another in that respect?

A. Oh, yes; I can stamp more rapidly with No. 6.

2993 22. Q. Why?

A. It is a lighter stamp. I can use it better and I have more control over it.

23. Q. Now with reference to Nos. 4 and 5 with respect to rapidity of work?

A. I can stamp faster with No. 5 than with No. 4.

24. Q. The instrument having the cross-bar you can use more rapidly?

A. Yes, sir; No. 4 is too heavy on the side.

25. Q. Are the weights of Nos. 4 and 5 about the same?

A. Well, I should judge there was very little difference in the weight as they stand. I should not say any difference in the weight, not much if any, not that I can tell in using them. I would not feel the difference.

26. Q. Now, for ordinary stamping—the ordinary run of stamping, can you use one as rapidly as the other?

A. Yes, sir.

27. Q. If you do very rapid work you say you find an advantage in No. 5?

A. Yes, sir; No. 5.

28. Q And the reason of that is?

A. Because it is more evenly balanced—not so much on one side.

29. Q. And the weight, I understand you to say——

A. Well, the weight don't make much difference. I can use No. 6 better than either of them.

30. Q. You can use No. 6 better than either of them because it is lighter?

A. Oh, yes.

31. Q. But you think for very rapid work No. 5 is better?

A. Yes, sir.

32. Q. No doubt about it?

A. No, sir; I can use this No. 5 a great deal better for rapidity, for the reason I have better control over it.

33. Q. That is, for very rapid work?

A. Yes, sir.

2994 34. Q. Now, suppose that the weight of these two instruments, Nos. 5 and 4, were reduced, the construction remaining the same, would the difference in rapidity between them continue to be the same, or would they diminish with their weights?

A. You mean if I diminish the weights of Nos. 5 and 4. What do you mean by diminishing, do you mean lessening the same as No. 6?

35. Q. [Counsel explaining to witness.]

A. By cutting them down I could use Nos. 4 and 5 as well as No. 6.

36. Q. Then I understand you to mean that in your opinion that the advantage derived from balancing the post-mark and canceller diminishes if you decrease the weight?

A. Yes, sir.

By the MASTER:

37. Q. Suppose that Master's Exhibits Nos. 4, 5, and 6 were made of the same weight and with the same length of handle, which one, in your judgment, could be used to perform the work of postmarking and cancelling postage-stamps with the greatest rapidity and with equal efficiency?

A. No. 5.

Mr. CLARKE, continuing:

38. Q. Suppose that the weight of the three instruments was the same as we see in Nos. 4 and 5, there would be then, I understand you, a practical advantage in balancing the instrument?

A. I think so.

39. Q. Suppose the weight was the same as in No. 6, would there then be a practical advantage?

A. I think there would be a small advantage.

40. Q. Would it be as great as it would if the weight was the same as Nos. 4 and 5?

A. No, sir.

41. Q. That is, the advantage of the balancing diminishes with the weight?

A. Yes, sir; that is my candid opinion.

2995 By the MASTER:

42. Q. Then, in your opinion, Exhibit No. 5 is not capable of being used as rapidly or with the efficiency, because it is made too heavy; is that so?

A. Yes, sir.

By Mr. CLARKE:

43. Q. Is that so, also, of Exhibit No. 4?

A. Also the same case.

By the MASTER:

44. Q. Then the practical advantage of No. 6 is the fact that it is made lighter?

A. Yes, sir; but No. 6 could be made heavier than it is. It is a little bit too light. I could use it heavier and with better advantage than the way it is at the present time.

Mr. CLARKE, continuing:

45. Q. The cross-bar instruments you used before the introduction of the English stamp were about that weight?

A. Yes, sir; except that I never used any since I have been there with the brass. I was compelled to make my own killers of cork or rubber. I introduced the rubber myself; the corks wore out too fast.

46. Q. Now, suppose that the stamp, having the handle balanced on the postmark and canceller now used in the office, were replaced by one constructed on the principle shown in Exhibit No. 6, do you think any more clerks would be needed to do the work?

A. I should think not.

Cross-examination by Mr. NORTON:

47. X Q. You have been in the post-office for twelve years or more?

A. About that.

2996 48. X Q. Your business has been that of postmarking letters and cancelling stamps?

A. Yes, sir.

49. X Q. Now, since you have been in that business you have used the combined instrument, consisting of a postmarker and a postage-stamp cancelling device, so combined and arranged with a handle as by one blow to leave a postmark on the envelope and cancellation marks on the postage-stamp?

A. I have.

50. X Q. And that has been done with ink, has it *it* not?

A. Yes, sir.

51. X Q. And that has been the system and the plan of doing that kind of work since you have been there?

A. Yes, sir.

52. X Q. And the device used has been of that character, that kind of construction?

A. Ever since I have been in the office they have used one like No. 5, or the one they are using now.

53. X Q. Will you state the difference, if there be any difference, between the stamp device you refer to as having been used in the New York post-office by you for postmarking letters and cancelling postage-stamps at the same time and with one blow of the instrument, and Master's Exhibits Nos. 4 and 5 and 6 now before you?

A. I have used all kinds of weights and all kinds of stamps.

(Question repeated.)

A. All the difference in the stamps and No. 5, are on the same principle, except the ones that I am using now are lighter than No. 5. In No. 6 and No. 4, the handle is over the postmark, instead of being in the middle, same as on No. 5; and No. 6 and No. 4 are different from
2997 No. 5, for the reason that these two, Nos. 6 and 4, have the handle over the postmark, whereas No. 5 has it in the middle.

54. X Q. The difference, then, is in the form of the construction?

A. Yes, sir.

55. X Q. In the mechanical construction?

A. Yes, sir.

56. X Q. The functions of all these instruments are substantially the same?

A. Substantially the same—yes, sir.

57. X Q. Now, you have post-marked your letters and cancelled the postage-stamps in that office with a degree of clearness and certainty so that there has been no fault or complaint in that respect since you have been there?

A. Very little. Of course we are liable once in a while to make mistakes. I have not been hauled up but very little.

58. X Q. That is a very rare occurrence?

A. Yes, sir.

59. X Q. And has been since you have been there?

A. Yes, sir.

60. X Q. And postage stamps are perfectly cancelled, and letters post-marked, with the date, year, and time very clearly put on the envelope?

A. Yes, sir.

61. X Q. And that has all been done by this combined instrument?

A. Yes, sir.

62. X Q. How much is your salary there at this time?

A. I don't know whether I ought to answer that question. I get ninety-five dollars a month.

63. X Q. At the present time?

A. Yes, sir.

64. X Q. How much did you receive last year?

A. About the same.

65. X Q. Well, how much did you receive the first year you went in there?

A. I received eighty dollars a month.

2998 66. X Q. How much have you received during each year since you have been there in the office as stamper?

A. I was raised to eighty-four dollars, then to eighty-nine dollars, and then to ninety-five dollars.

67. X Q. So it has averaged from ninety to ninety-five dollars a month for the twelve years?

A. Somewhere near that.

68. X Q. A little more than that?

A. Not over ninety-five dollars.

69. X Q. Now, have those infants and boys in that department ever been handed into your custody for training for this business, as an expert?

A. Oh, yes. I broke a great many of them in.

70. X-Q. You have been the master that directed these youths in the practice of postmarking and cancelling with this combined instrument?

A. I have had all those that came under my supervision.

71. X Q. Now, you say that you have postmarked and cancelled the stamps on postal cards to the extent of 5,000 in about twenty-three minutes. Is that it?

A. Yes, sir.

72. X Q. Suppose those same postal cards were to have been postmarked without any reference to the cancellation of the stamps, how many could you have done in that same time with a single instrument?

A. I don't think I could have done a great many more. I know I can stamp a little more with the single instrument. I can do more with a single instrument if I use it a whole day.

73. X Q. How much more?

A. Well, I say a third more. Not in a short space of time, but stamping all day long, I think I could.

74 X Q. Now, suppose those same five thousand postal cards, which had been postmarked by you in about twenty-three minutes, were
2999 then to be put into your hands to have the stamps cancelled by the separate instrument, having a handle like the one you use for the postmarking, how long would it take to cancel those stamps with that separate instrument of the same size of the postmarker?

A. Well, I could stamp them in a short time, but I could not say how much; but I could use a common cork to kill the stamp quicker.

75. X Q. You can strike the postage-stamp cancelling device on a postage-stamp quicker than you can the same instrument used with the postmarker?

A. Oh, yes.

76. X Q. So that the configuration upon the surface of this device has to do with the rapidity of stamping?

A. Certainly.

77. X Q. If you had an eagle on the lower end of the postmarker, and a wild goose on the lower end of the cancelling stamp, you could postmark faster with the eagle than you could cancel postage-stamps with the goose?

A. I don't know; I never tried to stamp with an eagle.

78. X Q. Now, if you were to use a separate instrument for destroy-

ing the postage-stamp, it would be about the size of the one for post-marking, would it not?

A. Yes, sir; about the size; then it would be much lighter—you would have nothing but a cork. By striking one you could run and strike a half a dozen; you don't have to stop to see where you strike.

79. X Q. You don't have to stop to see where you strike——

By the MASTER (interrupting):

80. X Q. During the time you have been in the post-office have you ever known them to use combined instruments for stamping the postal mark and cancelling the stamp other than those in which the handle was balanced in the middle—except these, which you see, Exhibits Nos. 4 and 6?

3000 A. Not in general use; no.

81. X Q. You say not in general use. For what purpose have they been used?

A. I have seen some brought in to try.

82. X Q. Experimentally?

A. That is all.

83. X Q. That is all?

A. Yes, sir.

84. X Q. But the stamps that have been actually used in the business of the post-office have been those where the handle was balanced on the cross-bar?

A. Yes, sir.

Mr. NORTON, continuing:

85. X Q. How long is it since they have begun to employ boys in that department for postmarking letters and cancelling postage-stamps?

A. I cannot answer that; I don't know, sir.

86. X Q. When did you first see boys in the building there for that purpose?

A. I believe there was some boys in the distribution department. I believe there are some there yet; I don't have much to do with the distribution, unless it is once in a while to run through the department. I have so much to do in my department that I don't get time to go anywhere else.

87. X Q. Have you any assistant in your department?

A. Yes, sir. I have an assistant during the day that I call upon.

88. X Q. What salary is he paid?

A. More than I can tell you.

89. X Q. He is worth as much as you are in this business by the month?

A. I guess not.

90. X Q. How much less?

A. I cannot say that. I am not the postmaster.

91. X Q. He does the work well—what he does?

A. I suppose he does.

3001 92. X Q. If he did not you would not keep him there?

A. That part I have nothing to say about either.

93. X Q. You do not know anything about what has previously been paid for postmarkers and cancellers, then?

A. I haven't the least idea what they are, excepting my own pay. I only see my own check.

94. X Q. You do not think you are paid too much for your services?

A. I should think not.

95. X Q. You think that the salary paid you is fully small enough for the work you do?

A. Yes, sir; if I had anything to say about it I should say that I ought to have more.

96. X Q. Now, how many tables are used in your department for the business of postmarking letters and cancelling postage-stamps by this double or combined instrument about which you have testified?

A. I have two blocks myself, and then there are six blocks on the other side which are used for cancelling letters on the back, and I have four stamps, and in case I am urged I call on their men to do it, and I am liable to use all those six blocks at one time.

97. X Q. With the double instrument?

A. Yes, sir.

98. X Q. Each block means a stamper?

A. Yes, sir.

99. X Q. Now, you say you have four and two are six blocks in your department?

A. I think there are seven blocks that I could use any time I wanted to.

100. X Q. You mean by a block, a place occupied by a person in the postmarking of letters and in the cancellation of postage-stamps?

A. Yes, sir; or used for that purpose.

101. X Q. Now, in your department you say you frequently use all those blocks with the combined instruments?

3002 A. Yes, sir; part of them, not frequently all of them.

102. X Q. How large a part of them?

A. May be one or two besides my two.

By the MASTER:

103. X Q. Do I understand you to say that from the time you were employed in the post-office up to the time that Exhibits 4 and 6 were used, no combined instruments were used for postmarking and cancelling except such as had a single handle in the centre of the cross-bar, or nearly so?

A. I have never seen any except those, except as I told you; some may be brought in there for experiments and tried for a short time and dropped, but not for a long time.

By Mr. NORTON, continuing:

104. X Q. Do you know of any spare space in the post-office that can be dedicated to any purpose?

A. Yes, sir; the post-office is pretty big and I know a place up-stairs where they could put forty places.

105. X Q. I ask you about the first floor—any spare space in the post-office that is not used?

A. I don't doubt, if they would let me, I could put up a dozen more blocks right in my department.

106. X Q. How would you do that?

A. There is plenty of space; I think you could move the tables up close together.

107. X Q. And set them down side by side, the same as you would in a theatre?

A. Oh, no, not as close as that.

Redirect examination by Mr. CLARKE:

108. Re D. Q. Mr. Andrews, taking an instrument of the weight shown in Exhibit No. 6, and suppose that a handle was balanced

3003 on it, can you give us any idea of what the practical advantage is of having it so balanced on an instrument of that weight over Exhibit No. 6; how much?

A. It would be more practical if that were in the centre; I could use it to a better advantage, I am sure of that. Then I would be more positive in regard to it, but the difference would be slight.

109. Re D. Q. But if the weight was the same as in Nos. 4 and 5, can you give an idea of what the amount of the practical difference there would be?

A. Oh, there would be quite a difference between them two. I don't think much of this stamp No. 4 at all for rapid work. For slow work it is very good. I could get along with it very nicely. When I am to kill about ten thousand letters an hour, I don't think I could do it as well. I should want some other stamp that I could be more positive about.

110. Re D. Q. Taking the weight you see in Nos. 4 and 5, couldn't you give us an idea of what the advantage would be in having the postage-stamps balanced during the hours when you need to work very rapidly?

A. I cannot tell you what the real difference would be, but I know there would be some. I could not tell you exactly how it is, because I never stamped a great deal with it, only to know what it is. If I have any heavy work I don't use it, because I never have any time to use it; but there is a difference, there is no doubt, about it.

111. Re D. Q. For rapid work?

A. For rapid work. But if made lighter the difference would become less.

Adjourned to November 12th at 11 o'clock a. m.

3004 NEW YORK, *Nov. 12th*, 1879—11 *a. m.*

Present, George H. Williams, counsel for complainant; Marcus P. Norton, solicitor for complainant; Samuel B. Clarke, counsel for defendant.

JOHN RICHARDS, a witness, duly sworn in behalf of the defendant, and being examined by Mr. CLARKE, testified as follows:

1. Q. State your age, residence, and occupation.

A. Age, 45; residence, Brooklyn, N. Y.; occupation, superintendent of the city delivery of the New York post-office.

2. Q. How long have you been employed in the post-office in New York?

A. Between five and six years.

3. Q. Were you ever employed in any post-office before that?

A. Used to be in the Utica post-office.

4. Q. How long.

A. Nine years.

5. Q. At what time?

A. I left it in 1855; I think it was in 1855.

6. Q. What have been your duties since you have been employed in the New York post-office?

A. I commenced as a clerk and then got to be superintendent.

7. Q. Of the city delivery?

A. Yes, sir; of the post-office delivery, not the letter city delivery.

8. Q. That is the department of which Mr. Gaylor is general superintendent?

A. Yes, sir.

9. Q. Is it part of your duties to superintend the stamping of letters stamped in your department?

3005 A. Superintendent of letters received in the mails from out of town, and all letters mailed here for city delivery.

10. Q. Mr. Andrews is in your department?

A. Yes, sir.

11. Q. How long have you been superintendent?

A. Between three and four years.

12. Q. Look at Master's Exhibits, Nos. 4, 5 and 6, and state whether they have been used by Mr. Andrews.

A. (Examining Exhibits 4, 5 and 6.) Those have been used by Mr. Andrews.

13. Q. Did you inspect the work done by him?

A. Yes, sir.

14. Q. Was it satisfactory—the impressions of the post-mark and cancellation mark?

A. Yes, sir.

15. Q. All of them?

A. Yes, sir.

16. Q. From your knowledge of stamping in the post office—your general knowledge of stamping, that you have derived from your service in the postal service of the United States—can you state whether or not the balancing of a post-marker and a postage-stamp canceller on a handle has an advantage?

A. It has an advantage where the stamp is heavy for rapid stamping.

17 Q. Supposing the stamp is made lighter, does that advantage remain the same, or would it decrease?

A. It would decrease—that is disadvantage—it would not be so great as with the heavy stamp.

18. Q. In the ordinary work of the office, how would a stamp constructed on the principle shown in Exhibit No. 4 work?

A. It would work well enough for ordinary stamping.

19. Q. What is the ordinary rate of stamping in the office?

A. An ordinary stamper will stamp from eighty to one hundred a minute.

3006 20. Q. For very rapid work, you say the balancing of the post-marker and postage-stamp canceller for a given weight has an advantage?

A. Yes, sir.

21. Q. That advantage decreases as you diminish the weight?

A. Yes, sir.

Cross-examination by Mr. WILLIAMS:

22. X Q. You have never done any stamping yourself, as I understand?

A. Yes, I have; yes, I do.

23. X Q. When?

A. Well, I have done the most of it years ago in the Utica office.

24. X Q. How long ago?

A. I quit there in 1855, I think it was.

25. X Q. Never did any stamping in the New York post-office?

A. Not regularly; I have stamped, but not as a regular stamper.

26. X Q. You have not used these stamps yourself, so as to test their respective merits?

A. No, sir.

27. X Q. Is it desirable in a stamp to have it of a particular weight?

A. Well, the lighter a stamp is the quicker it can be used, in my opinion. No particular weight about it.

28. X Q. May not a stamp be made too light to be efficient in post-marking the letter and in cancelling the postage stamp?

A. Well, I cannot say as to that. I can only give an opinion. It cannot.

29. X Q. Cannot be made too light?

A. That is my opinion. I cannot state it as a fact, though.

30. X Q. Is it not desirable in the use of a stamp to make a distinct impression upon the letter, and a distinct impression upon the postage-stamp?

3007 A. Yes, sir.

31. X Q. Well, do you pretend to say that that could be done by a stamp weighing an ounce as well as by one weighing six or ten ounces?

A. Well, as I said before, I can only give you my opinion. I think it could be better done.

32. X Q. Would not the stamper have to strike a very much harder blow?

A. No, sir. It does not require a very hard blow to make a good impression. That is one thing we have to guard against in teaching a man to stamp, not to strike too hard a blow.

33. X Q. So you think that no matter how light a stamp is, the lighter it is the better it is?

A. That is my opinion.

34. X Q. That is your opinion?

A. Yes, sir.

35. X Q. What sort of a stamp has been used in the New York post-office since you have been there?

A. There has been two or three kinds used there. There are several kinds used now.

36. X Q. I mean generally for post marking letters and cancelling postage-stamps thereon?

A. The stamp has been used with the combination of the post-marker and killer.

37. X Q. Like Master's Exhibit No. 5?

A. Not exactly like that, but after that pattern.

38. X Q. Do you think if the post-marker and postage canceller on Exhibit No. 5 were both made of wood that they would operate better than they do made of iron and steel?

A. No, sir, I don't, because they would not wear so long.

39. X Q. They would be much lighter though, would they not?

A. I don't think there is much doubt between wood and steel as to weight.

40. X Q. Can you state how Exhibit No. 5 compares in weight with the stamp that has been generally used in the post-office in New York?

3008 A. I should think it was heavier.

41. X Q. Considerably heavier?

A. Well, I am not able to state that, sir.

42. X Q. Do you know how Exhibit No. 4 compares in weight?

A. I should think that Exhibit No. 5 was a little heavier.

43. X Q. How does No. 6 compare in weight?

A. I should think that No. 6 was lighter.

44. X Q. So that none of these models that have been exhibited here to the master are like the instruments that have been generally used in the post-office?

A. Not exactly like those I have seen there.

45. X Q. You say that No. 4 here will do for ordinary stamping?

A. Yes, sir.

46. X Q. Do you know whether or not it is very desirable in the post-office to postmark and cancel the postage-stamp on letters with great expedition?

A. At certain times it is; not at all times.

47. X Q. Well, do you mean that when it is desirable to do so that that is extraordinary stamping?

A. Well, I don't just understand what you mean by extraordinary stamping.

48. X Q. You have spoken of ordinary stamping?

A. I mean an ordinary rate of speed; the other I should consider an extraordinary rate of speed.

49. X Q. What do you consider an ordinary rate of speed?

A. From eighty to one hundred in a minute.

50. X Q. And what do you consider an extraordinary rate of speed?

A. From one hundred and fifty to one hundred and sixty a minute.

51. X Q. Do you think that a man could stamp one hundred and fifty to one hundred and sixty letters with Exhibit No. 5 as quick as he could stamp eighty or one hundred with Exhibit No. 4?

3009 A. I think he could, being used to the use of both stamps, after having had practice with both of them.

52. X Q. Exhibits Nos. 4 and 6 have been used in the post-office within the last week or so?

A. Yes, sir.

53. X Q. Were those stamps made and used with a view of giving evidence in this case?

A. That I cannot say, sir; I have no knowledge on that subject.

54. X Q. Do you know where Nos. 4 and 6 came from?

A. I know where they came from when they came to us; they came from the distribution department.

55. X Q. Were you not aware of a suit that was pending, of Mr. Campbell against Mr. James, about this post-office stamp?

A. Yes, sir.

56. X Q. Didn't you know that you were called upon to test those two stamps, Nos. 4 and 6, in reference to this suit?

A. Yes, sir.

57. X Q. And they were used in your branch of the business with that view and for that purpose?

A. That was the view I had of it; yes, sir.

58. X Q. Are you not aware, Mr. Richards, that that stamp, like Master's Exhibit No. 5, for the purpose of postmarking and cancelling postage stamps on letters, which has been used in the New York post-office since you have been there—I don't refer to mere difference in form and substance—has been ascertained to be by actual experiments the best kind of a stamp that can be used for such purposes?

A. I don't know that I catch the full meaning of your question.

(Question repeated.)

A. Well, stamps that we have there now I consider better than those like Exhibit No. 5.

3010–3110 By the MASTER:

59. X Q. The ones you have there now are the ones you have used continuously for years?

A. We have used them between one and two years; may be a little longer.

Mr. WILLIAMS, continuing:

60. X Q. Are the stamps, then, that you now use in the New York post-office for postmarking letters and cancelling postage-stamps the best that can be found for those purposes after experimenting on the subject?

A. In my opinion they are the best I have ever seen.

61. X Q. State, if you please, why the stamp that you now use is better than the one that you formerly used more like Exhibit No. 5.

A. I don't remember ever seeing one in the office like Exhibit No. 5, except as to the combination of the two things together. One just like that I never saw anything much resembling it.

62. X Q. Then I ask you this question: Prior to a year or two ago you used a postmarking and postage stamp cancelling instrument in the post-office in New York which postmarked the letter and cancelled the postage-stamp at a single blow?

A. Yes, sir.

63. X Q. A year or two ago you adopted another stamp which was somewhat different in form from the one you had formerly used?

A. Embodying the same principle, but a different kind of a stamp.

64. X Q. Now state, if you please, why the stamp you now use is better than the one you formerly used.

A. It is lighter and more compact; not so bungling as the other was.

65. X Q. That is the only difference?

A. I cannot explain it; it is just about the difference between Exhibits Nos. 5 and 6 in weight and in being compact.

3111 By Mr. CLARKE:

66. X Q. Isn't there a difference in the way of fixing the type in?

A. Yes, sir; there is a difference of fastening the type in, which makes it better. This screwing down on the head of the type makes them come flush with the face of the stamp; while a stamp of the kind of No. 5 is apt to get dirty and make the type set uneven.

By the MASTER:

67. X Q. Has that any name or designation—that piece across there? (Referring to the cross-bar on Exhibits No. 5, that connects the postmarker with the postage-stamp canceller.)

A. There is no name we use in our office.

68. X Q. Take this piece used on here. (Referring to the bottom piece on Exhibit No. 6.)

A. It corresponds with the cross-bar in Exhibit No. 5.

Mr. WILLIAMS, resuming:

69. X Q. Mr. Richards, in the postmarking of letters and the cancellation of stamps upon them, I ask you if perfection of impressions, expedition in the handling of letters, and economy of labor and time and space are not desirable?

A. Yes, sir.

70. X Q. Do you know of any reason, Mr. Richards, why this kind of a stamp, Exhibit No. 4, has not been used in the New York post-office?

A. No, sir.

Re-direct examination by Mr. CLARKE:

71. Re D. Q. Mr. Richards, when you say the lighter the stamp is the quicker you can use it, do you mean by that that a stamp could not be made too light for all purposes?

A. I don't think a stamp could be made too light.

3112 72. Re D. Q. Couldn't it be made so light as not to be strong enough?

A. It could not be made too light and be serviceable.

73. Re D. Q. That is, the lighter the stamp is, consistent with serviceableness, the better it is?

A. Yes, sir.

74. Re D. Q. That is what you mean by saying the lighter the stamp is the better it is?

A. Yes, sir.

75. Re D. Q. What is your judgment as to whether the stamps now used are practically better than the stamp No. 6 for the work done by the greater number of stampers in the post office?

A. I don't understand the question.

76. Re D. Q. What is your opinion upon the point whether the stamps, which I think you call the English stamps, which have been used for the last year or two in the post-office, are any better than No. 6 would be for the use of the ordinary stamping?

A. I don't think they are any better than that.

77. Re D. Q. That is your opinion?

A. Yes, sir.

78. Re D. Q. That is, Exhibit No. 6 being so light that the balancing there for ordinary stamping would not be affected?

A. No, sir.

79. Re D. Q. If Master's Exhibit No. 4 were made of the same weight as the combined stamps of the post-office, could that or could it not be used by the ordinary run of stampers in the office to accomplish the same work they now do with the English stamp?

A. If that weight was reduced, do you mean?

80. Re D. Q. Say same weight as the English patented stamps for the ordinary business of the post-office?

A. It would answer for the ordinary business of the post-office.

81. Re D. Q. For the ordinary stampers?

3113 A. Yes, sir.

Recross-examination by Mr. WILLIAMS:

82. Re X Q. Now, Mr. Richards, do you undertake to swear that a man can use that stamp Exhibit No. 6 in postmarking letters and in cancelling the postage-stamps upon them and always produce as perfect an impression as by the use of the stamp with the handle in the middle?

A. At an ordinary rate of stamping, I think they could.

83. Re X Q. I ask you, if in the use of No. 4, in striking it down upon the letter, if the weight of the postage-stamp canceller would not tend to make the instrument strike the letter first upon that edge of the canceller?

A. I don't think it would after a man had practiced with it.

84. Re X Q. Wouldn't it require more care and more skill to avoid an imperfect impression with Exhibit No. 4 than it would with Exhibit No. 5?

A. I don't think it would require any more care after a little practice.

85. Re X Q. Why not?

A. Because I think they would get in the habit of using that stamp just as handy as they would No. 5.

86. Re X Q. You think there is no advantage whatever in having a handle located exactly on a cross-bar between the postmarker and stamp canceller?

A. Not for ordinary cancelling; no, sir.

87. Re X Q. You think that a man cannot make a more accurate impression with a stamp made like Exhibit No. 5 than he could with a stamp made like Exhibit No. 4?

A. I don't think there would be any difference in regard to that after practice.

87. Re X Q. You don't think so?

A. No, sir.

3114 88. Re X Q. That is your opinion without any knowledge upon the subject of stamping?

A. Well, it is a knowledge upon the stamping, because I have to have a certain knowledge of it to superintend my men.

89. Re X Q. Now, I ask you if there is any man of common sense, to say nothing of experience and skill in stamping, that don't know that ordinarily in using instruments of this description in a post-office that he would make a more accurate impression with a stamp constructed like Exhibit No. 5 than he would with a stamp constructed like Exhibit No. 4?

A. I don't think I am competent to answer that question.

90. Re X Q. You don't claim, then, to be a man of common sense?

A. Yes, I do; but that is not it, as I understand your question.

91. Re X Q. Now, if it is of advantage to have the instrument lighter, can you tell why the instrument that was used with a ferrule having a cork or rubber inserted was not better than the one having a solid body of metal, as it was so much lighter?

A. Well, I should think making it lighter would be an improvement of it.

92. Re X Q. Wouldthere be any difficulty in reducing the weight of a stamp constructed like Exhibit No. 5, so as to make it exactly right in weight?

A. I don't know that I could answer that question, not being an expert in the weight of metals, and whether that could be reduced or not. I have not examined it closely enough to say. (Examining the stamp.) (Question repeated.)

A. The weight of that exhibit could be reduced without any detriment to the stamp, but to make it exactly right in weight, I cannot say what you mean by exactly right; I don't know what the standard would be.

3115 93. Re X Q. When your clerks are employed in postmarking and cancelling the postage-stamps on letters, are they not expected to work as rapidly as they can?

A. At certain times, but not always.

94. Re X Q. For most of the time do you not expect them to do all the work they can?

A. No, sir. I should not think it was over half of the time that they were obliged to do their utmost.

95. Re X Q. Am I to understand you that there are more clerks now employed in the New York post-office in postmarking letters and cancelling postage-stamps thereon than are necessary for that business? Do you wish to be understood in that way?

A. No, sir; I don't intend any such thing.

96. Re X Q. The men so employed have all they can do withthe double stamp?

A. No, sir; because the mails are not always there, and that is when they are not obliged to do their utmost. The work is not there to require them; we have busy and dull times.

Redirect examination by Mr. CLARKE:

97. Re D. Q. You have said that one of the things you have to guard against in teaching a green hand to stamp is to prevent him making too strong a blow. Is the process of stamping giving a hard blow, or a sort of a slant?

A. A short, quick blow.

98. Re D. Q. Like the snap of a whip?

A. Yes, sir; I should think that would convey the meaning as well as anything.

99. Re D. Q. Do you consider that practical stampers and men who have to look after the stamping of letters in the post-office are or are not more competent to judge in reference to stamping than people outside who possess only common sense?

A. I should think a man versed in the workings of the post-office would be the best judge.

3116 100. Re D. Q. When you say that a stamp with a cork in it is an improvement, you mean it is an improvement so far as the weight is concerned?

A. Yes, sir.

101. Re D. Q. There may be reasons, taking the stamp as a whole, to prefer a metal stamp?

A. As for work and actual use the metal canceller would be better, because the rubber and cork soon wears out. The rubber is better while it retains its shape, but it soon wears out.

102. Re D. Q. The metal makes a neater impression than the rubber?

A. Yes, sir; more clear and defined.

103. Re D. Q. There is less daubing of the ink?

A. Yes, sir; and makes an impression that hangs to the stamp better than if made with the rubber.

104. Re D. Q. Metal tends to break the enamel of the stamp more than the rubber would?

A. Yes, sir.

105. Re D. Q. In regard to Mr. Andrews; is he, in your opinion, the most rapid stamper in the post-office?

A. I think he is the most rapid stamper in the post-office.

106. Re D. Q. And the best?

A. Well, I cannot say he is the best, because we have other stampers that make as clear impressions as he does.

107. Re D. Q. But he makes equally as clear impressions on a long run?

A. Yes, sir.

108. Re D. Do you consider his judgment good on the question of stamps and stamping?

A. Yes, sir.

Adjourned to Nov. 13th, 1879, at 11 o'clock a. m.

3117 NEW YORK, *Nov. 13th*, 1879—11 a. m.

Present, counsel as before.

Defendant's counsel announces that he presents to the consideration of the master the following parts of the record used at the final hearing: Depositions of Wheeler, Henry S. Bishop, Cottrell, Coon, Warner, Albinger, Nott, Beardsley, and the depositions of Powers, Anthony, Rupp, Geilfus, Yeomans; defendant's deposition, Ryer's; defendant's deposition, Dix's, Corbett's, Riley's, Miller's, Roberts', John H. Zevely's, Edmond S. Zevely's, Benjamin Chambers', and the exhibits referred to in

those depositions. Also the depositions of John P. Rees, William M. Ireland, Matthew C. Bogia, and W. B. Burchard, and the models and exhibits therein referred to. Also complainant's depositions of Bassett and Cook; also the patent of August 9th, 1859, patent of December 16th, 1862, Berries' English patent, Chambers' patent, Ruggles' patent, Robertson's patent, and Hill's patent, and the models of those patents.

Adjourned to Nov. 14th, 1879, at 11 o'clock a. m.

3118 *Complainant's testimony in rebuttal.*

Mr. KITTLE recalled, and examined by Mr. WILLIAMS:

1. Q. Mr. Kittle, I find on page 224 of complainant's first volume this question put to you by the defendant's counsel (reading): "Look at Exhibit U, and suppose that there were no cross-bar, and that the handle was screwed into the post-marker and was directly above it, and that the canceller were soldered or bolted, or otherwise firmly fixed to one side of the post-marker, would that be anything more than a mere mechanical change of Exhibit U?" Now look at Exhibit U, and state whether, if Exhibit U were changed in the manner supposed in that question, would it be like the Master's Exhibit No. 4?

A. It would.

2. Q. Now, you may read your answer, if you please, to that question and then state to the examiner whether or not you still adhere to the opinion expressed there.

A. My answer to that question, as found in complainant's volume 1, of the record, page 224, commencing folio 895; I have read the answer, and the opinion therein expressed is my opinion to-day; after seeing the Master's Exhibits Nos. 4 and 6 I will state that they represent a construction substantially the same as that which would be represented by the supposititious post-office marker and postage-stamp canceller found in the question to which that answer was made.

3. Q. I find another question here, question No. 105, on the same page (page 224), which is as follows (reading): "Q. Look at Exhibit U, and say whether if the post-marker and cross-bar were to be cast in one solid piece, that would be more than merely a mechanical change"?

A. My answer to that question is: "That that would be all," and I entertain that same opinion now.

3119 Cross-examination by Mr. CLARKE:

4. X Q. You don't desire to alter anything on your cross-examination in the principal case now?

A. Nothing.

3120 Mr. MARCUS P. NORTON recalled by Mr. WILLIAMS:

4½. X Q. Mr. James has referred to a conversation, in his testimony, which he had with you. I ask you if you had any idea of giving him a license to use this stamp without compensation at that time, or during that conversation?

(Objected to by Mr. Clarke as immaterial what Mr. Norton's idea was; if the words are important they speak for themselves. Question allowed.)

5. Q. State the conversation substantially as you remember it.

A. At the time I filed the bill, on the 4th day of June, 1877, I called on Mr. James and handed him a copy of the bill of complaint, and explained to him the reason why I brought the suit against him; I said to him that I had selected the New York post office because it was the

largest in the United States, and the invention was first introduced into that office experimentally, and I wanted a thorough test as to the validity of the patent and of all matters connected with it. He asked me if I intended to move the court to stop the using of it, and I told him no, that I did not wish to put him to any unnecessary trouble, or to interfere with the business of the department or of the government in their post-office business; but what I wanted was a thorough trial upon the patent and pay for that property. I did not give any license, nor undertook at that time to give any; no such thing ever entered into my mind at that time or since. The first suggestion I ever heard of anything of the kind was here by Mr. James the other day.

By the MASTER:

6. Q. You say that that was after the suit was brought?

A. Yes, sir.

3121 By Mr. WILLIAMS:

7. Q. Had you any authority from Mr. Campbell to grant any license?

A. No, sir; if I had, I would not grant any license to any one.

3122 Mr. WAREING recalled by Mr. WILLIAMS:

1. Q. State, Mr. Wareing, if you know where and by whom the postmarking and postage-stamp cancelling instruments used in the New York post-office are made.

A. They are made by Mr. Bruner now.

2. Q. Where is his place?

A. In Fulton street, No. 78.

3. Q. Can you state how many combined postmarkers and postage-stamp cancellers he has made since Mr. James has been postmaster; about the number altogether?

A. I don't know; I cannot tell you all he has made altogether. I know the number we have in use now.

4. Q. Can you form any reasonable estimate?

A. I think I could obtain the records.

5. Q. I want the whole number manufactured since Mr. James has been postmaster, and the prices paid for them.

A. I cannot give you that information now.

6. Q. You cannot give me the prices paid?

A. Well, I think the price of the stamp is six dollars and a half without the letters, and the letters and figures are ten cents each. I cannot tell you the total number he has made.

7. Q. Can you go to the office and send over a paper here containing the number he has made each year and the prices?

A. I don't think there were any records kept before 1875, but since 1875 I could give you the total number made. I know how many have been in use, but I don't know how many have been thrown aside.

8. Q. Will you go and send here that memorandum, whatever your books show about it?

A. All right.

(Mr. Wareing returning from the post-office.)

3123 9. Q. Have you procured and can you produce any memorandum of the purchases of the stamps as heretofore requested?

A. No, sir; it is impossible to obtain it—the actual number of stamps made by Mr. Bruner; the combination stamps.

10. Q. Why is it impossible?

A. We have no record of it.

3124 *Exhibit No. 2.—K. G. W., Master.*

It is understood that the depositions and exhibits contained in the record for final hearing may be referred to on the matters of the accounting, subject to the objections taken in the record for final hearing.

Adjourned to Wednesday, Nov. 26th, 1879, at 11 o'clock a. m.

3125 *Master's report.*

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT, and assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

The above case, referred to the master by the decree dated 1st of September, 1879, is one somewhat peculiar in its character.

It is for the infringement of a patent, and although against the defendant, James, personally, any recovery which may be had against him will be for "gains, profits, and advantages" which have "arisen or accrued," not to him individually, but by his use of it in his official capacity as postmaster of the city of New York. The court has held that the patent, which is the subject-matter of the suit, has been used by him without authority of law, and, hence, that he is personally responsible, the same as any public officer is who takes private property for public use without the authority of the owner.

In the presentation of the case to the master, numerous questions have been raised by the counsel, which it seems necessary to consider and determine, in order that the findings of the master may be intelligible

and reviewable, and that all the points made by the counsel may fully appear on exceptions (if any) which may be taken to the master's report.

It appears to be conceded that this invention is one which can
3126 be used only by, and be of benefit to, the government in the conduct of its general postal service. The court says in its opinion: "Upon the whole case it appears that in fact and in law Norton was the original and first inventor of this patented invention;" and, further, that "the patent is for a machine or instrument that will do both of these things at one blow;" that is, the postmarking of the letter and the cancellation of the postage-stamp. It further appears from the opinion of the court, and from the evidence before the court on final hearing, that by a strict requirement or order of the Postmaster-General, made on the twenty-third day of July, 1860, the postmarking and the cancelling of the postage-stamp were required to be placed upon all letters separately. It appears that previous to that time the postmark was stamped upon the postage-stamp, and thereby in a measure acted as a canceller of it. This requirement or order of the Post-Office Department called for the discontinuance and abandonment of this mode of stamping and cancelling, and required the use of two separate stamps —one for the postmark and the other for cancelling the postage stamp. It seems to have been this requirement or order of the Post-Office Department that brought into use in the New York post-office the combined instrument (see opinion of the court) by which the postmarking and the cancelling of the postage stamp were done by a combined instrument; that is, by a single blow of one and the same instrument, by one and the same hand, instead of by two blows or impressions made by two separate and distinct instruments, requiring two persons, or the double use of the hand of the same person upon the two instruments.

This invention, it appears, was in use in the New York post-office at least as early as 1861, and was found there in use on the first day of April, 1873, by the present postmaster, James, when he was appointed postmaster, and is still in use there. According to the decree of the court, James is an unlawful user of such patented invention, and an infringer.

3127 The decree sets forth:

"First. That the letters patent are good and valid.

"Second. That Marcus P. Norton was the original and first inventor. * * *

"Third. That the complainant, Christopher C. Campbell, is the exclusive owner, in trust, of such letters patent.

"Fourth. That the said Thomas L. James has infringed upon the said letters patent, No. 4143, hereinbefore described," * * * and charged in the said bill of complaint.

"Fifth. That an account be taken of the profits, gains, and advantages which have in anywise been received or made, or which have arisen or accrued on account of the infringements aforesaid, and also of the damages in addition thereto, if any, which the said complainant has sustained by reason of the infringements aforesaid.

"Sixth. That the said complainant do recover of the said defendant, Thomas L. James, his costs, charges, and disbursements to be taxed.

"Seventh. That it be referred, and the same hereby is referred, to Kenneth G. White, of the city of New York, to ascertain and take, and state and report to the court, an account of the gains, profits, and advantages which the said Thomas L. James has in any wise received or made, or which have arisen or accrued on account of the infringements

aforesaid, and also of the damages in addition thereto which the said complainant has sustained by reason of said infringements."

The master having now stated his understanding of the decision of the court, and what is referred to him under the decree based upon such decision, will consider the questions raised before him by the counsel for the respective parties. It is claimed by counsel for complainant—

First. That by the use of the patented instrument one man has been enabled to do the work which it took two men to do before the invention of such instrument.

3128 Second. That more perfect and complete work is done by the use of said patented instrument than was attained by any other instrument known or used before or since the patent was granted; that such instrument makes clearer and more perfect impressions of the postal mark, and also more complete and perfect cancellation of the postage-stamp.

Third. That the use of said patented instrument has greatly conduced to the regular and speedy transmission of letters through the mails.

Fourth. That, by the saving of the number of clerks necessary to be employed, valuable space or room is saved in the post-office. Each and all of these, it is claimed, enter into and make part of the gains, profits, and advantages derived from the use of the invention.

It is claimed on behalf of the defendant, that no gains, profits, or advantages are shown to have accrued to or been received by the defendant, James, personally, from the manufacture or use of the patented invention; that whatever use he has made of the invention has been as an officer of the United States, and in that capacity alone has he infringed the patent, and if any gains, profits, or advantages have accrued, they are for the benefit of the United States and not for his benefit.

Second. That as to any gains, profits, or advantages which have arisen or accrued to the government by reason of the infringement, there can be no recovery, as there have been no sales of the patented invention, and no profits, strictly speaking, have accrued from its use, as the post-office is not a profit and loss concern; that admitting, for argument's sake, that there has been a saving of time by the use of the combined postmarking and postage-stamp cancelling patented instrument, there is no evidence of the pecuniary value of such saving of time offered; that the evidence makes nothing clear except that more clerks would be needed to postmark and cancel the same number of letters in the same time with the separate instruments than with the patented

3129 instruments; that this is not a proper measure of profit; that the salaries of the additional clerks have nothing to do with the question; that the real advantages which the government has received are two:

First. A post-mark on the envelope, distinct and separate from the cancellation-mark on the postage-stamp.

Second. Attaining this result in such time as not to delay the mails.

That there can be no pecuniary value attached to these advantages; that the comparison of the patented instrument with separate instruments is unjustifiable; that combined instruments, in which the canceller was attached to one side of the post-marker and where the two were not balanced on the handle, were open to use during the period of infringement and long before the patent was granted; that if it is proper to make any comparison in this case to ascertain the advantages received by the government by the use of the patented improvement, such comparison should relate to this unbalanced combination.

Third. That the statute which allows damages, in addition to profits,

to be recovered in equity, has been construed to mean that damages in excess of or beyond the amount of profits made by defendant may be recovered; and that no damages, as such, to the complainant, are shown to have been sustained.

Fourth. That the time to be covered by the account of the master should be limited to cover only the infringements that have taken place since the assignment to Campbell (Jan. 2, 1877); that the account should commence with that date.

Fifth. That as to the alleged advantages other than clerk-hire, the evidence does not show satisfactorily that they exist; that no evidence of their pecuniary value has been given, and they cannot be considered in stating an account of profits in equity.

These are substantially all the questions raised before the master on this accounting; and, as counsel for both parties have made a
3130 request of the master that he would, in his report, consider and pass upon each one of them, he will do so.

The first question (the saving in the number of clerks) raised by the complainant's counsel will be considered last.

As to the second question, it seems from the testimony of all the witnesses called, who are employees in the New York post-office, that more perfect and efficient work is done by the patented combined instrument, both in the making of the postal mark and in the cancellation of the postage-stamp, than by any other instrument known or used in the post-office prior to the use of such combined instrument.

As to the third question, it appears that the use of the combined instrument has conduced to the regular and speedy transmission of matter through the mails, assuming, of course, that, had not such combined instrument been used, two separate instruments, one for post-marking, and the other for cancelling the stamp, would have been used, and no additional clerks had been employed.

Fourth. Assuming that an additional number of clerks would be necessary to the proper performance of the work in the post office, there would be, necessarily, more space or room required for them, and, consequently, under certain circumstances, that would be an advantage or saving derived from the use of the invention in question. It has been proved, before the master, that there is a saving of the number of clerks, as will hereafter more fully appear. But such advantage or saving, so far as room is concerned, in the New York post-office, or so far as the defendant James is concerned, does not appear to have any pecuniary value in this case, as the post-office in the city of New York is a building owned by the government, and more space could be provided, if necessary, without any additional cost either to the postmaster or the government.

As to the first question raised by the defendant that "no
3131,3132 gains, profits, or advantages are shown to have accrued to, or been received by the defendant, personally," &c., this question is disposed of by the decision of the court, as already stated in this report.

The second point made by the counsel for the defendant James embraces several questions. The first is, "That no gains, profits, or advantages have arisen or accrued to the government by reason of the infringement, as there have been no sales of the patented invention."

As to the fact of there having been no sales of the patented invention, that, of itself, amounts to nothing, as the claim here is for its use, and it is for such use that any profits made are claimed by the complainant.

Defendant's counsel admits, for argument's sake, that there may have been a saving of time by the use of the combined patented instrument, but that no evidence has been offered of the pecuniary value of such saving of time. This is so. The evidence of saving of time in the making-up and despatch of the mail, as the master understands it, is to show that this is one of the "advantages" derived from the use of the combined instrument, and he is asked to take this into the account in estimating or determining what "gains and profits" have arisen or accrued to the defendant thereby; complainant's counsel claiming that the master is authorized and called upon to fix and report some sum as an amount to be awarded for these "advantages." That there has been such advantage, there seems, from the testimony, to be no question; but, as the pecuniary value of such advantages has not been proven, the master is not authorized, as he understands the decisions of the courts, to merely estimate or conjecture an amount. As to the question raised of the saving of clerks and clerk-hire, that will be, as has been before stated, considered hereafter.

Counsel claims that the real and only advantages which have arisen to the government or to the defendant are:

3133 First. A post-mark on the envelope, distinct and separate from the cancellation-mark on the postage-stamp; and

Second. Attaining this result in such time as not to delay the mails.

That both are great advantages, and that such advantages have been secured to the government by the invention in question, there can be no doubt. It is certified by the order or requirement of the Postmaster-General to be absolutely necessary to the postal service; also by the communications of different Postmasters-General to Congress, and the various reports of successive Congressional committees, all of which appears in the testimony for final hearing in the case, and which is offered in evidence before the master; and also by the testimony of each and all of the witnesses from the New York post office produced before the master. No evidence is produced showing what the actual pecuniary saving by either has been, and hence none can be reported by the master.

It is claimed by counsel for the defendant that what he designates as the balancing of the handle, or the placing of it equidistant between the post-marker and the stamp-ca celler, is a material element of the patented combination, and that if the handle is not so placed in the centre, or equidistant between the two-stampers, such an instrument is no infringment of the patent in question; and he urges that, in the ascertainment by the master of gains, profits, and advantages, comparison should be made between the stamper having the so-called balanced handle, and a stamper where the handle is not so balanced. He has produced before the master two instruments which are marked "K. G. W. Master's Exhibits, Nos. 4 & 6," and which he claims are not within the patent, and which are therefore open and free to be used in the post-office; and has produced witnesses as to their recent trial there.

The answers to this claim, are:

First. That such claim is not warranted by the opinion of the court as the master understands it.

3134 Second. It is not warranted by a proper construction or interpretation of the patent in controversy.

Third. The proofs in the case show, and the decision of the court also shows, that Norton himself was the first and original inventor of such device; that is, a combined stamper and canceller, in which the handle was not placed in the middle, but on one side over the postage-stamper. The use, therefore, of such device, was not open to the defendant or the

government, and for this reason no comparison in the ascertainment of profits can be made between the two. Further, the witnesses who have been produced on the part of the defendant before the master, and who are employed as regular stampers in the post-office, say that the instruments Nos. 4 and 6 are not as efficient for the work to be done in the post office as the instrument heretofore used there, and which the court has declared an infringement, nor does it produce "equally beneficial results."

And the proofs show that such instrument was never used in the post-office, except experimentally, and then only since the commencement of the proceedings before the master, and was made expressly for use upon this reference. The master cannot assent to the claim made by counsel.

It is also claimed that, under the statute which allows damages in addition to profits, to be recovered in equity, no damages as such have been proven in this case or can be allowed. No damages apart or separate from profits, as the master understands it, are claimed. The claim is for the profits made by the defendant, which under the decision of the courts are the same thing as damages, and are called damages. As said by the Supreme Court of the United States, in Mowry against Whitney, 14 Wallace, 653, "Though called profits, they are really damages unliquidated until the decree is made." And in Patent Office Gazette, No. 23, vol. 15, 1879, the court says, "Gains and profits are the proper measure of damages in equity suits." Justice Strong
3135 says, "The rule of damages should be the value of the use of such a machine during the time of the illegal user." Counsel for defendant also claims that the time to be covered by the account should be limited to the time of the assignment to the complainant, Jan. 2, 1877. But there is no such limitation in the decree or order of reference. And the assignment to Campbell shows not only the assignment of the patent, but the assignment of all past profits and damages. The account should therefore cover the entire period of the use of the patent by the defendant James, since he became postmaster; that is, since April 1, 1873.

It now only remains for the master to determine what have been the pecuniary gains, profits, and advantages, which have been derived by the use of the invention in the New York post office, during the term of the present postmaster, Thomas L. James.

Mr. James himself and various or his subordinates have been examined before the master on this question. There is some variance in such testimony as to the actual saving in clerk-hire by the use of the invention, over and above what would be necessary in case the combined instrument was dispensed with, and two separate instruments to perform the same work were used. Mr. James himself says that in his judgment it would require about one-third more clerks than are now employed in the stamping departments. Upon being recalled he is asked:

"81. Q. If you had been compelled to separate these instruments, and use the postmarker by itself, and the postage-stamp canceller by itself, it of course would have required additional labor.

"A. Certainly.

"82. Q. Have you examined the subject sufficiently to form an estimate as to the amount of saving in labor in the New York post-office, by the use of the combined postmarker and stamp-canceller in place of a separate postmarker and a separate stamp-canceller?

"A. Yes, sir; I have thought the thing over.

3136 "83. Q. You can state it, if you please.

"A. I think I have stated it in my direct examination.

"84. Q. No, sir; you did not state that.

"A. It would cost from seven to nine thousand dollars more a year to cancel separately, and postmark separately."

Mr. Yeomans, the superintendent of the third division in the post-office, says that he now employs in his division twenty clerks, and that it would require, in his judgment, nine more to do the same work if separate instruments were used, and that their average would be seven hundred dollars per annum each.

Mr. Gaylor, who is general superintendent of the city department, testifies that he has in his department in the post-office building three clerks engaged in postmarking and cancelling postage-stamps on letters with the combined instruments, and that, if separate instruments were used for the same purpose, he would require one additional clerk. He testifies in relation to the different post-office stations in the city, which are also in his charge as superintendent, that the clerks in those stations are employed, each day of twenty-four hours, eighty-four hours and forty-five minutes in the postmarking and cancelling of stamps on letters. He says that in his judgment it would require one-third more time to do the work if separate instruments were used. Or, taking Station A as an example, where thirty and a half hours are consumed each day, it would take ten more hours in a day, or "it might possibly take more than that; it might take twelve hours; but I am not very competent in my opinion about that, because I do not have immediate supervision of any of that work." He has furnished a statement, which is put in evidence, showing the "average number of letters, &c., postmarked daily," "number of clerks employed," "time consumed daily in stamping."

3137 Mr. Lawrence, who is the superintendent of the foreign department of the New York post-office, says that if he was called upon to use the separate instruments for postmarking and cancelling stamps, "I should want one more man, and should make application for it."

Mr. Steele, who is assistant superintendent of the third division (same division as Yeomans), says he thinks, if separate instruments were used, it would require eight or nine more men.

Mr. Wearing, also assistant in the third division, testifies to the number of combination-stamps used in different years since 1872.

These are all the witnesses called on behalf of the complainant as to the profit or saving arising from the use of the combined instrument; and, as will be seen, all are called from the post-office itself. One other witness (Kittle) was called as an expert to give his opinion as to the use of the combined and separate instruments; and he says that it would "take just about as near double the number as you could imagine" of clerks to do the same work with the separate instruments as it would with the combined instrument.

The defendant has called eight witnesses in his behelf, all to testify as to the use of a combined instrument with the handle placed over the postmarker, and not equidistant between the two stampers. Six of these witnesses used this instrument, or saw it used in the New York post-office, within a few days of giving their testimony. It was used there experimentally for a few days, and solely for the purpose of being used as evidence on this reference. The other two witnesses were from the Philadelphia post-office, and were examined upon the hearing of the case before Judge Wheeler at Brattleboro', and their testimony is dis-

posed of by him. The master, in a former part of his report, has disposed of the question sought to be raised by this testimony.

The testimony of some of these witnesses in regard to the use of the combined instrument, as compared with the single instrument, in
3138 the New York post-office, is important. They are practical stampers there, and, as appears, the most experienced and expert. They are asked by complainant's counsel, on cross-examination, to give their experience, and do so.

Magee says he has postmarked and cancelled with combined instrument 5,500 postal cards in 55 minutes. He is asked how many he could postmark with a single instrument without the canceller in a minute, and says, "I don't know that I could do a hundred, because it is more difficult to use a single stamp."..... He is further asked:

"73. Re D. Q. If you use a separate postmarker simply on a handle, with which you can put the impression anywhere on top of the envelope, why can't you use that as rapidly?

"A. Because, the base of it being so small, you have to take more time to make an impression.

"74. Re D. Q. Have you ever tried it?

"A. Yes, sir; I tried it this morning for the first time."

Beach says, "I put the postmark and cancellation on in same time it would take to put postmark on alone with separate instrument.

"47. X Q. It takes you as much time to put that postmark on the back as it would to put the postmark and cancellation on the front?

"A. Yes, sir; just the same.

"48. X Q. So you give the postmark and cancellation mark in the same time as you give the postmark with the separate instrument?

"A. Yes, sir."

Andrews says he has stamped with combined instrument five thousand postal-cards in twenty-three minutes. He says he could not stamp the postmark much faster with a single stamp for a short time; but might stamp a third more if he used it all day.

It results from the testimony, and the master hereby finds, and reports, that the gains and profits which have arisen or accrued to the defendant James, under the decree, in the saving of salaries alone,
3139 and independent of any advantages which it appears have been derived from saving of time and labor, the better performance of the postmarking, and more complete cancellation of the postage-stamp, and speed in dispatching the mail, are as follows, viz:

The saving of the salaries of six clerks in the third division of the New York post-office from April 1, 1873, to Jan. 1, 1877 (three years and nine months), at an average annual salary each of $700.....	$15,750
The saving of the salaries of nine clerks in the same division from Jan. 1, 1877, to Jan. 1, 1880 (three years), at an average annual salary each of $700.....	18,900
The saving of the salary of one clerk (in the "foreign department"), from April 1, 1873, to Jan. 1, 1880 (six years and nine months), at the annual rate of $700.....	4,725
The salary of one clerk in the fourth division from April, 1873, to January, 1880 (six years and nine months), at the annual salary of $700.....	4,725

The salaries of four clerks in the various city stations of the post-office from April 1, 1873, to Jan. 1, 1880 (six years and nine months), at an average salary each of $700	18,900
Total	$63,000

All which is respectfully submitted.

KENNETH G. WHITE, *Master.*

Dated New York, Jan. 2, 1880.

3140 *Complainant's exceptions.*

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY, ET AL., defendants.

Complainant's exceptions to the report of the master in this cause, Hon. Kenneth G. White, dated the 2d day of January, A. D. 1880, and filed in court by him on the 12th day of same month and year.

EXCEPTION No. 1.

For that the said master, after finding the fact to be that time was saved in the making up and in the dispatch of the mails for transportation by the use of the machine or device containing the said new and useful improvements in post-office, postmarking and cancelling hand stamps "described in the specifications, shown and illustrated in the drawings, and embraced in and covered by the several claims of the letters patent specified and described in the bill of complaint in
3141 this suit as "Division A," dated the 4th day of October, A. D. 1870, and No. 4143, the same being a reissue of the letters patent mentioned in the bill of complaint as having originally been granted and issued to Marcus P. Norton on the 14th day of April, A. D. 1863, held and decided, that he could make no allowance of damages or profits therefor because the pecuniary value of the time so saved was not proven.

Whereas the said master should have made an estimate of the value of such time, taking into consideration all the evidence and circumstances of this case, and allowed the same as damages or profits.

EXCEPTION No. 2.

For that the said master, after finding the fact to be that "more perfect and efficient work is done by the said combined patented instrument, both in the making of the postal-mark and in the cancellation of the postage stamp, than by any other instrument known or used in the post offices prior to the use of such combined instrument," held and decided that he could make no allowance of damages or profits therefor because the pecuniary value of the said superior advantages of the said combined instrument was not proven.

Whereas, the said master, taking into consideration all the evidence and circumstances of the case, should have made an estimate of the

value of said superior advantages, and allowed the same as damages or profits.

EXCEPTION No. 3.

3142 For that the said master, after finding the fact to be that the use of the said machine, or combined instrument, had conduced to the regular and speedy transmission of matter through the mails, held and decided that he could make no allowance of damages or profits therefor because the pecuniary value thereof was not proven.

Whereas the said master, taking into consideration all the evidence and circumstances of the case, should have made an estimate of the value of said advantages and allowed the same as damages or profits.

EXCEPTION No. 4.

For that the said master, after finding the fact to be that the saving of space or room was an advantage derived from the use of the said machine or combined instrument, held and decided that he could not make an allowance therefore because the "New York post-office is a building owned by the government and more space could be provided, if necessary, without additional cost either to the postmaster or the Government of the United States."

Whereas the said master should have allowed the value of said advantage as damages or profits on the evidence produced before him on that subject.

EXCEPTION No. 5.

For that the said master found the gains and profits accruing to said defendant Thomas L. James, in the third division of the New York post-office, from April 1st, A. D. 1873, to January 1st, A. D. 1877, to
3143 be the saving of the salaries of six clerks during said time, at an annual sa ary each of $700, amounting to $15,750.

Whereas the said master should have found the gains and profits during said period to be the saving of the salaries of twelve clerks at an annual salary of $700 each, amounting to $31,500.

EXCEPTION No. 6.

For that the said master found also that the gains and profits accruing to the said defendant Thomas L. James, in the said third division of the New York post-office, from January 1st, A. D. 1877, to January 1st, A. D. 1880, were the saving of the salaries of nine clerks therein at an annual salary of $700 each, amounting to $18,900.

Whereas the said master should have found the said gains and profits during said period to have been the saving of the salaries of eighteen clerks at an annual salary of $700 each, amounting to $37,800.

EXCEPTION No. 7.

For that the said master found as a part of said defendant's gains and profits the saving of the salary of one clerk in the "foreign department" from April 1st, A. D. 1873, to January 1st, A. D. 1880, at an annual salary of $700, amounting to $4,725.

Whereas the said master should have found instead thereof the saving of the salaries of two clerks at an annual salary of $700 each, amounting to $9,450.

3144 EXCEPTION No. 8.

For that the said master found as a part of said defendant Thomas L. James' gains and profits, the saving of the salary of one clerk in the "fourth division," from April, 1873, to January, 1880, a period of six years and nine months, at an annual salary of $700, amounting to $4,725,

Whereas the said master should have found instead thereof the saving of the salaries of two clerks at an annual salary of $700 each, amounting to $9,550.

EXCEPTION No. 9.

For that the said master found as a part of the said defendant's gains and profits the saving of the salaries of four clerks "in the various city stations of the post-office" from April 1st, A. D. 1873, to January 1st, A. D. 1880, a period of six years and nine months, at an annual salary of $700 each, amounting to $18,900.

Whereas the said master instead thereof should have found the saving of the salaries of eight clerks during said period at a salary of $700 each, amounting to $37,800.

EXCEPTION No. 10.

For that the said master found the total amount of said gains and profits to be $63,000.

Whereas he should have found them to be $136,000—one hundred and thirty-six thousand dollars.

3145 EXCEPTION No. 11.

For that the said master found and reported the said $63,000 as gains and profits.

Whereas he should have found the same as damages upon the whole evidence as by law provided.

EXCEPTION No. 12.

For that the said master did not assess the damages of the complainant Christopher C. Campbell at $136,000 or any other sum.

Whereas he should have found and assessed, on the whole evidence, the sum of ($136,000) one hundred and thirty-six thousand dollars, to be the damages of the complainant Christopher C. Campbell, in consequence of the infringements stated in said decretal order of September 1st, 1879.

Dated at New York this 11th day of February, A. D. 1880.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.

GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

3146 *Defendant's exceptions to the master's report, filed in court February the 7th,* 1880.

3147 In the circuit court of the United States, in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY ET al., defendants.

DEFENDANT'S EXCEPTIONS.

The exceptions of defendant James to the report of the master, Kenneth G. White, esq.

And now comes the said defendant, Thomas L. James, and excepts to the report of the master herein filed January 12, 1880, as follows:

I. Said defendant excepts to the master's finding and report, and to his statement of the account on the theory that the time to be covered by the accounting commenced when he, the said defendant, first became postmaster, to wit, in April, 1873, because said master should have found and reported, that under the case stated in the bill of complaint, such time did not begin earlier than the date of the assignment from Helen M. Ingalls to the complainant, to wit, January 2d, 1877.

II. Said defendant excepts to the master's report for that, 3148 whereas it was referred to the master by the interlocutory decree to ascertain and "take and state and report to the court an account of the gains, profits, and advantages which the said defendant Thomas L. James has in anywise received or made * * * * by reason of the infringements aforesaid," the master has failed to make any report on the subject.

III. Said defendant excepts to the master's report, for that the master should have found and reported on the uncontradicted evidence of said defendant, that he, said defendant, has not in any manner received or made any gains, profits, and advantages by reason of said infringements.

IV. Said defendant excepts to the following finding in said report: "The court has held that the patent which is the subject matter of the suit has been used by him without authority of law, and hence, that he is personally responsible, the same as any public officer is, who takes private property for public use without the authority of the owner," for that it was not referred to the master to make any finding or report upon the subject.

V. Said defendant excepts to the following finding in the report: "As to the first question raised by the defendant, that no gains, profits, or advantages are shown to have accrued to, or been received by the defendant, personally, &c., this question is disposed of by the decision of the court, as already stated in this report," for that said question was not so disposed of, and for that it was not referred to the master to determine whether or not said question was so disposed of.

VII. Said defendant excepts to the report for that, whereas it was referred to the master to ascertain, and take, and state, and report 3149 to the court an account of the "damages in addition" which the

complainant has sustained by reason of the infringements, nothing has been reported on the subject.

VII. Said defendant excepts to the report, for that, under the reference recited in the last exception, the master should have reported that no damages were proved to have been sustained by the complainant by reason of the infringements, no evidence of any damages having been put in before him.

VIII. Said defendant excepts to the finding in the report as follows: "Which (to wit, profits made by the defendant), under the decision of the courts, are the same thing as damages, and are called damages," for that profits made by the defendant are not the same thing as damages.

IX. Said defendant excepts to the following finding in the report in answer to defendant's claim, that unbalanced combined instruments were open and free to be used:

"The answers to this claim are—

"1st. That such claim was not warranted by the opinion of the court, as the master understands it.

"2d. It is not warranted by a proper construction or interpretation of the patent in controversy.

"3d. The proofs in the case show, and the decision of the court, also, shows, that Norton himself was the original and first inventor of such device: that is, a combined stamper and canceller, in which the handle was not placed in the middle, but on one side over the postage-
3150 stamper. The use therefor of such device was not open to the defendant or to the government, and for this reason no comparison in the ascertainment of profits can be made between the two."

a. Because such claim is warranted by the opinion of the court.

b. Because it is warranted by a proper construction of the patent in controversy.

c. Because neither the proofs nor the opinion of the court show that Norton was the original and first inventor of such unbalanced combinations.

d. Because the fact (if true) that Norton was such original and first inventor, is immaterial.

e. Because such unbalanced combination is adequate to the work of efficient postmarking and cancelling, at a less expense than would be necessary if separate postmarkers and cancellers were used, and was open to the defendant and to the government to use during all the period of infringement, as appears from the testimony of master's witnesses, Burchard, Bogia, Wareing, O'Connor, Magee, Beach, Andrews, and Richards; and from the testimony as to the unbalanced combined instruments used in the New York, Geneva, Buffalo, Cleveland, Janesville, Cincinnati, and Philadelphia post-offices, made and sold by J. H. and E. S. Zevely, and disclosed in the patent of Aug. 9, 1859, prior to the issuance of the patent in suit.

X. Said defendant excepts to the report, for that if saving of the expense on salaries is or is shown to be by the evidence a proper
3151 measure of gains and profits in this suit (which defendant protests is not the case), the master should have found and reported in lieu of the finding recited in the last exception, on the evidence referred to under E in that exception, that unbalanced combined instruments, adequate to the work of efficient postmarking and cancelling at a less expense than would be necessary if separate postmarkers and cancellers were used, were open and free to the defendant to use during all the period of infringement, and that comparison ought to be made between such unbalanced combined instruments and the infringing ma-

chines, in determining what saving has been made by the use of said infringing machines.

XI. Said defendant excepts to the report, for that, in lieu of the items of saving in salaries reported, the same being based upon a comparison of the infringing machines with separate postmarkers and cancelers, the master should have reported that no evidence of a saving in salaries or expense in using the infringing machines, rather than unbalanced combined instruments, is proved by the evidence to have been made.

XII. Said defendant excepts to the report, for that, in lieu of the items of saving in salaries reported, the master should have reported on all the evidence before him, that no pecuniary gains, profits or advantages were proved to have arisen or accrued by reason of the infringements.

XIII. Said defendant excepts to the finding in said report as follows: "That more perfect and efficient work is done by the patented combined instrument, both in the making of the postal mark and in the cancellation of the postage stamp, than by any other instru-
3152 ment known or used in the post-office prior to the use of such combined instrument."

a. Because it is not supported by evidence.

b. Because it is contrary to the weight of evidence.

c. Because the testimony before the master, of the witnesses, from the New York post-office shows that the improvement in postmarks and cancellation marks is not due to the patented features of the infringing machines, but to other causes.

XIV. The said defendant excepts to the finding and report of the master, "That the gains and profits which have arisen or accrued to the defendant James, under the decree, in the saving of salaries alone, and independent of any advantages which it appears have been derived from saving of time and labor, the better performance of the postmarking, and more complete cancellation of the postage stamp, and speed in despatching the mail, are as follows, viz, &c., &c."

(Here follows the items at the end of the report.*)

a. Because it is not supported by the evidence.

b. Because it is contrary to the weight of the evidence.

c. Because it is not relevant in any of the matters referred to the master by the interlocutory degree herein.

d. Because it is based on estimate, conjecture and guess, and not upon any certain data established by evidence.

3153 *e.* Because the testimony of the defendant James that he has neither made nor received any gains, profits or advantages from the use of the infringing machines, is uncontradicted.

f. Because it was not referred to the master by the interlocutory decree herein, to find and report on the question whether, as matter of law, under the decree, gains and profits (if any) which have arisen or accrued, have arisen or accrued to the defendant.

g. Because under the circumstances of the case as developed by the evidence before the master, the saving in salaries is not a proper or lawful measure of gains, profits and advantages arising from the use of the infringing machines.

h. Because the saving in salaries is not shown by the evidence to be a proper or lawful measure of gains, profits and advantages arising from the use of the infringing machines, there being no evidence to show that the end or purpose accomplished by the use of the infringing machines has a pecuniary value equal to, or greater than, or standing in

any ascertained ratio to the salaries of such additional clerks as would be required to accomplish the same end and purpose by other means.

i. Because the gains and profits itemized in this finding are arrived at (as appears by preceding parts of the report), by considering how many additional clerks would be required to accomplish the same result, if separate postmarkers and cancellers were used in lieu of the infringing machines; whereas, the unbalanced combined instruments
3154 (which, as appears from the evidence referred to under *e* in the ninth exception, were, prior the issuance of the patent in suit, used in the New York, Geneva, Buffalo, Cleveland, Janesville, Cincinnati, and Philadelphia post-offices; made and sold by J. H. & E. S. Zevely; disclosed in the patent of Aug. 9, 1859; and are capable of effective use, for the purpose of postmarking and cancelling, at a less expense than would be necessary if separate postmarkers and cancellers were used), were open and free to be used by the defendant during all the period of infringement.

XV. Said defendant excepts to the report, because the finding that the saving in salaries, itemized and reported, is gains, profits and advantages which have arisen or accrued, is inconsistent with and repugnant to the following finding:

"No evidence is produced, showing what the actual pecuniary saving by either has been, and hence none can be reported by the master"; referring to the two advantages, to wit:

First. "A postmark on the envelope, distinct and separate from the cancellation mark on the postage-stamp," and

Second. "Attaining the result in such time as not to delay the mails," which constitute the end or purpose for the accomplishment of which the infringing machines have been used.

XVI. Said defendant excepts to the finding and report, and to the statement of the account on the theory that by the use of the patented instrument the salary of one clerk has been saved in the foreign department of the New York post-office during all the time between April 1, 1873, and Jan. 1, 1880.

3155 To support this exception, said defendant claims that there was no evidence before the master that warranted this finding; and such finding is inconsistent with Mr. James' uncontradicted testimony. (Master's Rec., p. 116, fol. 375.)

XVII. Said defendant excepts to the finding and report, and to the statement of the account on the theory that by the use of the patented instrument the salary of one clerk has been saved in the 4th division of the N. Y. post-office, during all the time between April 1, 1873, and Jan. 1, 1880.

To support this exception, said defendant claims that there was no evidence before the master that warranted such finding, and such finding is inconsistent with Mr. James' uncontradicted testimony. (Master's Rec., p. 116, fol. 375.)

XVIII. Said defendant excepts to the finding and report and to the statement of account on the theory that the salaries of four clerks have been saved in the various city stations of the N. Y. post-office during all the time between April 1st, 1873, and Jan. 1st, 1880.

To support this exception said defendant claims that there was no evidence before the master that warranted such finding; and such finding is inconsistent with Mr. James' uncontradicted testimony. (Master's Rec., p. 116, fol. 375.)

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

Please to take notice, that on the 13th day of December, 1879, at 11 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard, at the court-house of said court, in New York City, upon the pleadings, evidence, and proceedings in this suit, and upon the papers copies of which are hereto attached, I shall move said court, held by Mr. Justice Wheeler, for leave to take evidence as to the cancellation of the contract dated October 7, 1871, and recorded in the Patent Office January 29, 1872, and found at pages 323-4 of complainant's printed book of exhibit proof, made by William W. Secombe, Albert C. Corse, Charles Eddy, and Jacob Shavor, and that at the same time a motion will be made that Caroline G. Caswell be made a party defendant herein.

Dated New York, Dec. 12, 1879.

EDWARD D. BETTENS,
Solicitor for Charles Eddy.

To MARCUS P. NORTON, Esq.,
Complainant's Solicitor.
STEWART L. WOODFORD, Esq.,
Solicitor for Defendant James.

(Endorsed:) U. S. circuit court. Filed Dec. 18, 1879. John I. Davenport, clerk.

3159 In the circuit court of the United States, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

STATE OF CONNECTICUT,
County of Middlesex, ss:

Charles Eddy, being duly sworn, says that he is one of the defendant's in this suit; that at the time deponent signed the stipulation by which he became a party herein deponent thought, and ever since has thought, that the proper time for introducing further evidence to sustain deponent's claim in said patent would be after or on the coming in of the master's report assessing the damages herein.

That the right to take further evidence was reserved in said stipulation and the order thereon, and in the decree herein said rights are left to be still determined. That deponent's claim rests mainly on an assignment from Marcus P. Norton to deponent, dated October 23, 1869, and recorded October 25, 1869, of a one-third interest in said patent (which assignment is in evidence, and is found at pages 17 and 18 of the printed book of the defendant James' pleadings and proofs).

That the complainant insists that deponent's rights are determined by an agreement dated October 7, 1871, recorded January 29, 1872, and found at pages 323–4 of complainant's printed book of exhibit proofs, and made by deponent and others with one William W. Secombe.

3160 That said Secombe agreement has been duly and properly cancelled in writing, and that said written cancellation is now in the possession of Jeremiah D. Green, of Troy, New York; that deponent desires that said cancellation be proved and admitted in evidence in this case.

CHARLES EDDY.

STATE OF CONNECTICUT,
County of Middlesex, ss:

MIDDLESEX, *December* 9, 1879.

Subscribed and sworn to this 9th day of December. 1879, before me.
[SEAL.] FRED. B. CHAFFEE,
Notary Public.

In the circuit court of the United States, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

STATE OF NEW YORK,
Rensselaer County, ss.:

Albert C. Corse, being duly sworn, says that he is the Albert C. Corse named in the order of this court in this suit filed September 13, 1878; that by said order Charles Eddy was made a party defendant in this suit for himself as well as in trust for Jacob Shavor and Albert C. Corse (this deponent). That it was further ordered in said order, as re-
3161 gards the complainant Campbell and said Eddy, that this cause be

heard upon the pleadings and evidence as they stood at the time said order was made, unless the court should thereafter otherwise direct; that, as regards said Campbell and said Eddy, the material evidence as it then stood was as follows:

(1.) An assignment by Marcus P. Norton to Charles Eddy, in trust, of a one-third interest in the patent dated April 14, 1863, and the reissues; that said assignment is dated October 23, 1869, and was recorded October 25, 1869, and is to be found at pages 17 and 18 of the printed book of defendant James' pleadings and proofs.

(2.) An agreement and assignment dated October 23, 1869, and found at pages 215-220 of said printed book, confirmatory of the above assignment, and by which the said Norton agreed that said Eddy, as trustee for himself, said Corse, and Shavor, was to receive $20,000 out of the first money or moneys paid by the United States for the use of said invention.

(3.) An agreement dated October 7, 1871, recorded January 29, 1872, and found at pages 323-4 of complainant's printed book of exhibit proofs, between said Eddy, Shavor, and Corse of one part, and William W. Secombe, by which the said Eddy, Shavor, and Corse agreed to receive $30,000 for their certain claim against the United States.

That thereafter, and on September 1, 1879, a decree in this suit was filed, and wherein among other things it was decreed that Christopher C. Campbell, the complainant in this suit, is the exclusive owner in trust of said patent, subject to the rights of one Helen M. Ingalls and of Charles Eddy thereto, if any.

That said Eddy did not appear in this suit by solicitor until December, 1879; that the rights of said Eddy in said patent have not been determined by said decree; that said rights remain still to be de-
3162 termined, and that there can be no final decree herein until said rights are determined; that the evidepce now in in said suit is insufficient to determine said rights; that the agreement dated October 7, 1871, has been duly and properly cancelled by all the parties to said agreement, and that said written cancellation is now in the possession of Jeremiah D. Green, of Troy, New York; that said written cancellation ought to be proved and admitted in evidence in this case.

Deponent further says that the said decree ought to be resettled, and that said Eddy, trustee, should be decreed to be the owner in fee of one-third of said patent.

ALBERT C. CORSE.

Sworn to before me this 9th day of December, 1879.

J. M. LANDON,
U. S. Commissioner, N. District N. Y.

In the circuit court of the United States, southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

STATE OF NEW YORK,
Rensselaer County, ss:

Caroline G. Caswell, being duly sworn, says that by an instrument in writing, of which a copy is hereto annexed, all of the right, title,
3163 and interest of Albert C. Corse in and to the patent described in

the pleadings and the decree herein has been assigned to deponent, and that deponent is now the owner of all of said Corse's right, title, and interest therein; that deponent desires and consents to be made a party defendant in this suit.

CAROLINE C. CASWELL.

Sworn to before me December 9th, 1879.

J. M. LANDON,
U. S. Commisssoner, N. District N. Y.

Copy assignment Albert C. Corse to Caroline S. Caswell.

Know all men by these presents that Albert C. Corse, of the city of Troy, county of Rensselaer, and State of New York, party of the first part, in consideration of the sum of one dollar, and other good, valuable, and sufficient consideration to him in hand paid by Caroline G. Caswell, party of the second part, at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sold, assigned, transferred, and set over unto the said party of the second part all his right, title, and interest in and to certain patents of the United States for and improvements in certain postage-stamp cancelling apparatus now in the name of Charles Eddy, trustee, in trust and for the benefit of said party of the first part and others. The same to be held by the said Caroline G. Caswell for her own use and behoof and for the use and behoof of her legal representatives as fully and as entirely as the same would have been held and enjoyed by me if this agreement and sale had not been made.

In witness whereof I have hereunto set my hand and seal this twenty-second day of March, in the year eighteen hundred and seventy-nine.

[SEAL.] ALBERT C. CORSE.

3164 STATE OF NEW YORK,
County of Rensselaer:

On this twenty-seventh day of March, in the year eighteen hundred and seventy-nine, before me, the subscriber, personally came Albert C. Corse, to me known to be the person described in and who executed the within instrument, and who acknowledged that he executed the same.

EDWARD F. LEAHY,
Com. Deeds, Troy, N. Y.

Affidavit in opposition to motion.

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

SOUTHERN DISTRICT OF NEW YORK, *ss:*

George H. Williams, being duly sworn, says that as counsel for the complainant he made the agreement with the said Charles Eddy, dated June, 1878, by which said Eddy agreed to become a party to this
3165 suit, and that said agreement was made and executed and all the agreements and admissions by complainant therein were made

upon the distinct understanding that the assignment or agreement between Secombe, Eddy, Shavor, and Corse, dated October 7th, 1871. was a valid and subsisting agreement; and that at that time neither affiant or complainant, as affiant is informed and believes, had any knowledge or information that said assignment or agreement had been cancelled as alleged in the affidavits filed in support of this motion. And affiant, upon information, states as his belief that said assignment or agreement has never been so cancelled.

Affiant further shows that the alleged claim now made by said Eddy and Corse that said assignment or agreement was then cancelled, is a surprise to and a fraud upon complainant.

Affiant further shows that said Eddy was duly served with a copy of the order under which this case was heard by Judge Wheeler on or about the 20th day of July, A. D. 1879, and signed the stipulation for that purpose, and that he neglected and refused to be represented at such hearing, and that he has so neglected and refused since he was made a party to this suit until the present time; affiant therefore insists that the alleged claims of said Eddy should be determined upon the pleadingss and evidence in the case as they now stand; but affiant says that if said Eddy is allowed to abandon and disprove his admissions in said agreement of June, 1878, for the purpose indicated in this motion, said allowance should be made upon terms, to wit, that said complainant shall not be bound by his agreements and admissions in said agreement of June, 1878; and that the whole question as to the alleged rights of said Eddy shall be open as though no such agreement had been made; and that said allowance shall only be made upon the payment by said Eddy of a reasonable amount of the costs, disbursements, and charges in this case, to be fixed by the court.

And affiant further says that Mr. J. A. Cipperly, an attorney
3166 and counsellor at law, residing at and doing business in the city of Troy, N. Y., was present at the time of the making of said agreement of June, 1878, as the counsel of the said Charles Eddy, and that said Eddy advised with him, said Cipperly, as to the stipulations and admissions contained in said agreement, and that said Cipperly has since notified this affiant, in writing, that he was the counsel of said Eddy in this cause, and that said Cipperly signed his name to said agreement as a witness to the signature of the said Charles Eddy.

Sworn to before me this 13th day of Dec., 1879.

(S'g'd) JOHN A. SHIELDS,
U. S. Commissioner, S. D. of N. Y.

(Endorsed:) Filed in open court Dec. 23, 1879. U. S. circuit court. Filed Dec. 23, 1879. John I. Davenport, clerk.

Circuit court of the United States, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

The motion of the defendant Eddy for leave totake further testimony in respect to the rights of the orator and himself to the patent in suit, respectively, has been heard and considered.

He became a party to the suit by stipulation with the orator, in which it is stated that he claims his right to extend to one-third interest by virtue of an assignment dated October 23d, 1869, and that the orator claims his right is limited by an agreement dated October 7th,
3167 1871, both of which were in evidence when the stipulation was made, and that his right should be determined by the court upon the pleadings and evidence then in the case, unless the court should otherwise direct.

By the terms of the agreement of October 7th, 1871, the right of Eddy was to be $30,000, to be paid out of moneys which might be received for the patent, and if less than $62,000 should be received, a less sum in proportion. Upon that evidence his apparent right would be limited according to the later agreement. His motion is founded upon a proposition to show that this agreement had been cancelled before suit. The stipulation seems to contemplate that further evidence on this subject might be directed by the court, which would ordinarily be done only upon motion of a party. It seems proper enough that this motion should be granted and the evidence admitted, with evidence on the same subject in behalf of the orator if desired. Should he introduce this evidence and prevail upon it to the extent of showing that he is entitled to one-third interest, then this suit will be for his benefit in that proportion, while, as it now apparently stands, he has no interest unless the orator recovers. In the former aspect, if he would stand in the orator's suit entitled to one-third of its advantages he ought to bear one-third of its burdens. He should therefore be admitted to show that interest upon terms that if he succeeds he shall assume his share of the expenses of the suit.

The motion is therefore granted, upon terms that he is to pay one-third of the expenses accruing in the prosecution of this suit against the other defendant, until the evidence is taken and, under the stipulation, passed upon by the court, and in case he prevails upon the evidence so as to establish his right to one-third interest, then that he pay the same share of the expenses during the prosecution of the suit. There was included in this motion a further motion to make Caroline G. Caswell a party to the suit, on the ground that she has acquired some interest in the patent. Whatever interest she appears to
3168 have acquired is a mere right to share with Eddy what he may obtain, and that has been acquired long since the pendency of this suit. Therefore it does not appear to be necessary at all, even if proper, to make her a party.

Therefore, that part of the motion is denied.

(Signed) HOYT H. WHEELER.

(Endorsed:) U. S. circuit court. Filed Dec. 23, 1879. John I. Davenport, clerk.

At a stated term of the circuit court of the United States for the southern district of New York, held at the city of New York, on the 23d day of December, 1879.

Present Hon. Hoyt H. Wheeler, justice.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

On reading and filing the notice of motion made by Charles Eddy, dated the 13th day of December, 1879, and the affidavits of Charles

Eddy, Albert C. Corse, and Caroline G. Caswell, verified on the 9th day of December, 1879, and the affidavit of George H. Williams, and on all the pleadings, proceedings, and evidence herein, and after hearing Francis C. Barlow, esq., of counsel, in support of said motion, and George H. Williams, esq., of counsel, in opposition, and due deliberation being had thereon, now, on motion of Edward D. Bettens, esq., solicitor for Charles Eddy, it is

Ordered, That the defendant Charles Eddy be, and he hereby is given leave to take and file testimony in this suit, as to the cancellation of the contract signed by William W. Secombe, Charles Eddy,
3169 Jacob Shavor, and Albert C. Corse, dated October 7th, 1871, and printed in complainant's printed book of exhibit proofs at pages 323-4, provided that said Eddy or his solicitor herein, within five days from the entry of this order, file with the clerk of this court a written assent to the terms hereinafter mentioned, upon which this order is granted. If said written assent be not so filed in said five days, then said motion is denied. The terms upon which this order is granted are:

(1.) That the complainant, Christopher C. Campbell, have leave to introduce testimony to disprove said cancellation.

(2.) That the defendant Charles Eddy pay one-third of the legitimate expenses, to be taxed by the clerk, subject to the revision of this court, accruing in the prosecution of this suit against the defendant James, between the date of the filing of the written assent above mentioned and the time when said evidence is taken and passed upon by the court, under the stipulation by which said Eddy became a party defendant in this suit, as the same shall accrue.

(3.) That in case said Charles Eddy prevails upon the evidence in this suit so as to establish his right to one-third interest in said patent, then the said Charles Eddy is to contribute towards the expenses of the carrying on of this suit to the extent of one third thereof, as the same accrues, to be taxed by the clerk, subject to the revision of this court, or stand upon his rights the same as if this motion had not been granted.

And it is further ordered that said testimony be taken and filed in the manner usual in suits in this court, but that the time for so taking and filing said testimony be limited to thirty days from the date of the filing of the written assent above mentioned, unless the court or a judge thereof shall extend said time.

3170 And it is further ordered that Irving Browne, esq., of Troy, New York, be and he hereby is appointed a special examiner of this court to take the testimony at Troy, New York, under the 67th equity rule as amended, of such competent witnesses and of such documentary proofs as may be brought before him on the part of the defendant Charles Eddy, in proof of said cancellation, or of the complainant, Christopher C. Campbell, to disprove said cancellation.

And it is further ordered that Kenneth G. White, esq., of New York City, be, and he hereby is, appointed a special examiner of this court, to take the testimony in Connecticut, under the 67th equity rule as amended, of such competent witnesses and of such documentary proofs as may be brought before him on the part of the defendant Charles Eddy, in proof of said cancellation, or of the complainant, Christopher C. Campbell, to disprove said cancellation.

And it is further ordered that said Eddy and Christopher C. Campbell, or either of them, may examine such witnesses or take such testimony in proof or disproof of said cancellation, before a standing examiner of this court upon proper notice given.

The motion to make Caroline G. Caswell a party defendant herein is hereby denied, without costs.

(Signed) HOYT H. WHEELER.

(A copy.)

(Endorsed:) U. S. circuit court. Filed Dec. 23, 1879. John I. Davenport, clerk.

Circuit court of the United States, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

Please to take notice, that the terms upon which the order in
3171 this suit was granted, which order is dated December 23, 1879, and was entered and filed in the office of the clerk of this court on or about December 23, 1879, and gives leave to the defendant Eddy to take testimony as to the cancellation of a certain contract, and to the complainant, Campbell, to disprove said cancellation, are each and all hereby assented to by the defendant, Charles Eddy and Edward D. Bettens, as the solicitor herein for said Eddy. The said terms are specified in said order.

Dated New York, December 26, 1879.

EDWARD D. BETTENS,
As Solicitor for the Defendant, Charles Eddy, in this Suit.

To JOHN I. DAVENPORT, Esq.,
Clerk of U. S. Circuit Court.
MARCUS P. NORTON, Esq.,
Solicitor for Complainant Campbell.
STEWART L. WOODFORD, Esq.,
Solicitor for Defendant James.

(Endorsed:) U. S. circuit court. Filed Dec. 26, 1879. John I. Davenport, clerk.

Order to show cause, and papers used thereon, why Horace T. Caswell and Samuel R. Clexton should not be made parties defendants herein.

U. S. circuit court, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

On reading the affidavits of Horace T. Caswell, Samuel R. Clexton and Edward D. Bettens, and the papers referred to in said affida-
3172 vits, and on all the papers, pleadings and proceedings in this suit, and on motion of Edward D. Bettens, solicitor of record for the defendant, Charles Eddy, and of Horace T. Caswell and Samuel R. Clexton, appearing by said Bettens as counsel, it is

Ordered, that the complainant and the defendant Thomas L. James show cause before this court, to be held by Judge Hoyt H. Wheeler, at the United States court-house, post office building, in the city and State of New York, on the 21st day of January, 1880, at 11 o'clock in the forenoon of that day, or as soon thereafter as counsel can be heard, why

Samuel R. Clexton and Horace T. Caswell be not made parties defendants in this suit, under the same stipulations and subject to the same orders by which the said Eddy became and is a party in this suit, or why the said solicitor may not continue to act in this suit in the interest of said Caswell and Clexton, and at the sole expense of said Caswell and Clexton, or why Albert C. Corse be not made a party defendant, or for such other relief as to this court may seem just.

Jan'y 18, 1880.

SAMUEL BLATCHFORD.

(Endorsed:) Service of copies of within admitted Jan'y 23, '80. Geo. H. Williams, counsel for compl. U. S. circuit court. Filed Jan. 26, '80. John I. Davenport, clerk.

In the circuit court of the United States, southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

CITY AND COUNTY OF NEW YORK,
Southern District of New York, ss:

Edward D. Bettens, being duly sworn, says, that he is the solic-
3173 itor of record for the defendant, Charles Eddy, herein. That on or about November 20, 1879, deponent was retained by Horace T. Caswell (whose affidavit is hereto annexed) to attend to his interests in this suit. That thereafter deponent fully informed Charles Eddy of said retainer, and asked said Eddy to unite with deponent in attending to said interests. That thereupon, on December 4, 1879, the said Eddy retained deponent as his solicitor in this suit. That on said day deponent did appear in this suit for said Eddy, and ever since has been actively engaged in protecting the Eddy interests herein. That on or about January 12, 1880, said Eddy notified deponent to do nothing more in this suit in his name. Deponent believes that such notification will work great harm to the interests Eddy has hitherto represented, unless the relief prayed for by Horace T. Caswell and Samuel R. Clexton (whose affidavits are hereto annexed) be granted. That an examination of witnesses in behalf of said Eddy interests is now pending, and the time for taking said examination is limited to about twenty days.

That the complainant herein has a motion returnable January 21, 1880, which will require a week's preparation to meet.

That one suit is now pending affecting said Eddy interests (a suit begun by one Secombe), and another suit is threatened against said interests. That deponent believes the Eddy interests will be seriously imperilled, if not sacrificed, if said interests are not immediately and actively attended to. That said Eddy was made a party as trustee for himself, Jacob Shavor and Albert C. Corse. That Corse's interests are now vested in Horace T. Caswell, as appears by said Caswell's affidavit hereto annexed. That all of Eddy's interests are vested in Samuel R. Clexton, as appears by the affidavit of Samuel R. Clexton, hereto annexed. That said Caswell and Clexton are willing to pay all the necessary expenses of protecting their interests in this suit.

That said Eddy is a bankrupt, having made a general assign-
3174 ment for the benefit of his creditors, under the insolvency laws of the State of New York, and is now and has long been out of the State of New York.

EDWARD D. BETTENS.

Sworn to before me this 16th day of January, 1880.

CORNELIUS D. GOULD,
Notary Public, New York Co.

In the circuit court of the United States, southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

STATE OF NEW YORK,
Rensselaer County, ss:

Albert C. Corse, being duly sworn, says that he is the Albert C. Corse named in the order of this court in this suit, filed September 13th, 1878, and that deponent desires and consents to be made a party defendant in this suit.

ALBERT C. CORSE.

Sworn to before me this 9th day of December, 1879.

J. M. LANDON,
U. S. Commissioner, N. Dist. of N. Y.

3175 U. S. circuit court, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

CITY AND COUNTY OF NEW YORK.
Southern District of New York, ss:

Samuel R. Clexton, being duly sworn, says that he has read the affidavit of Horace T. Caswell, hereto annexed, and knows the contents thereof, and believes that all the allegations therein made are true. Deponent further says that on January 7th, 1880, he became by purchase the owner of all the right, title, and interest of Charles Eddy in and to the patent referred to in said affidavit, as appears by a copy of the assignment hereto annexed, marked Exhibit A. That by such purchase deponent became the owner of two-ninths of said patent; that this deponent became the owner of all the interest in said patent which Charles Eddy and Jacob Shavor acquired by the assignment dated October 23d, 1869, referred to in said affidavit; that deponent and Horace T. Caswell are the full and exclusive owners of the one-third of said patent which was assigned to said Eddy as trustee by Marcus P. Norton by said assignment, dated October 23d, 1869.

That said Charles Eddy no longer has any right, title, or interest in said patent, except that he is the named trustee of said one-third interest; that said Eddy refuses to protect said interest, and for that reason, and also for the reasons set forth in said affidavit of Hor-
3176 ace T. Caswell, deponent desires to be made a party defendant to this suit, with permission to protect his interest in said suit at his own expense.

S. R. CLEXTON.

Sworn to before me this 15th day of January, 1880.

GEORGE W. VULTEE,
Notary Public, City and Co. of N. Y.

Exhibit A is at page 133, and is marked Defendant Clexton's Exhibit, Cipperly & Stannard assignment.—J. A. S., ex'r.

In the circuit court of the United States, southern district of New York.
In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

CITY AND COUNTY OF NEW YORK,
Southern District of New York, ss:

Horace T. Caswell, being duly sworn, says: That he is the owner of one-ninth of the patent specified hereafter.

That this is a suit brought for relief against infringements of letters patents for an improvement in post-office, postmarking, and canceling hand-stamps, originally granted to Marcus P. Norton April 14, 1863, reissued to Jacob Shavor and Albert C. Corse August 23d, 1864, and to Helen M. Ingalls October 3d, 1870, in Division A, numbered
3177 4143; that the complainant is the assignee of said Helen M. Ingalls, and that this suit was begun by said complainant about July, 1877, against the defendant James only; that said defendant set up in his answer, as one of his defences, the non-joinder of Charles Eddy as a party to this suit; that said Charles Eddy, as trustee for himself and said Shavor and Corse, was the owner in fee of an undivided one-third part of said patent, by virtue of an assignment to him as such trustee, made by said Marcus P. Norton, dated October 23, 1869, recorded in the Patent Office October 25, 1869, and in evidence in this suit and printed at pages 17, 18, Vol. II, Defendants' Exhibits.

That thereafter, on the 13th day of September, 1878 (over one year after this suit was begun), on motion of complainant, Charles Eddy was made a party defendant in this suit, as trustee for himself, said Shavor and said Corse; that said motion, the papers used thereon and the order thereon are printed at pages 463–473, Complainant's Book of Exhibits; that thereafter, and on the 1st day of September, 1879 (nearly one year after said Eddy was made a party to this suit), an interlocutory decree, establishing the validity of the patent, and directing a reference to a master to assess damages, was filed.

That said Eddy had not, up to that time, appeared by solicitor or counsel in this suit; that he did not appear personally or by solicitor or counsel at the final hearing; that the rights of said Eddy as trustee or individually were never, up to the filing of that decree, brought to the notice of said court, except as aforesaid. That the opinion of the court on said final hearing makes no allusion to the rights or interests of said Eddy in said patent except as hereinafter stated. That in consequence of said neglect of said Eddy to appear by solicitor, or counsel, or individually in said suit and at said hearing, the court did not understand what Eddy's rights were. That in said decree the court decreed that the complainant Campbell was the exclusive owner in trust of said patent subject to the rights of Helen M. Ingalls; and of Charles Eddy, if
3178 any. That such a decree is manifestly erroneous, inasmuch as said Eddy, as trustee aforesaid, was at the time of filing of said interlocutory decree, the owner in fee of one undivided one-third of said patent by virtue of the assignment dated October 23, 1869, above referred to, and found at pages 17–18, Vol. II, of defendants' exhibits. That on March 22, 1879, the said Albert C. Corse (one of Eddy's cestuis qui trust herein) transferred all his right, title, and interest in said

patent to Caroline G. Caswell, as appears by an assignment, a copy of which was filed herein on or about December 26, 1879. That by assignments, copies of which are hereto annexed, and marked Exhibits B and C, deponent is now the owner of said interest. That as the attorney in fact of said Caroline G. Caswell, deponent has made frequent and earnest endeavors to induce said Eddy to attend to his interest as trustee of said one-third part of said patent, and to appear in said suit, and to defend and protect and maintain said interests; but that said Eddy steadily neglected to attend to said interests, or to appear in said suit. That thereupon, as said attorney in fact, deponent retained Edward D. Bettens, esq., a solicitor of this court, to protect as far as possible his interests in said suit represented by said Eddy. That retainer was on or about November 20, 1879. That said Bettens thereafter was retained by said Eddy as solicitor herein. That said solicitor on examining the evidence, papers, and proceedings herein, discovered that there was a conflict between said complainant and said Eddy as to the ownership of said patent. That said Eddy claimed that his interests were fixed and determined by the assignment dated October 23, 1869, aforementioned, and printed at pages 17, 18, of defendants' exhibits, (Vol. II), and that he was the owner in trust of one-third of said patent pursuant to said assignment.

That on the other hand said said complainant claimed that said Eddy's rights were limited by a contract, printed at pages 323–4 of complainant's exhibits (said contract being one entered into by said Eddy,
3179 Shavor, Corse, and one Secombe). That said contract was a sort of pooling arrangement between said parties, by which, in case of their collecting certain moneys from the United States, on a certain claim, said moneys were to be divided between said parties in manner specified in said contract. That the complainant claims that said contract is an assignment of Eddy's interest to said Secombe, and that Eddy's interest' in said patent are determined by that contract. That deponent considers such claim of the complainant as an absurd one. But that inasmuch as complainant made such a claim, deponent and said solicitor deemed it advisable to obtain permission from the court to prove that said contract was duly canceled. That after argument said permission was duly given by order of court, entered on or about December 23, 1879. That the time to take said testimony was limited to thirty days from December 26, 1879. That said examination was set down for January 6, 1880, and was adjourned, at request of complainant, to January 15, 1880. That said complainant has served notice of motion on said solicitor for January 21, 1880, for an order to take testimony to prove that said Eddy is entitled to no rights at all under said assignment of October 23, 1869, above mentioned. That deponent has expended large sums of money and given much of his time in endeavoring to protect the interest of said Eddy as trustee herein, and that said Eddy has been fully informed of said expenses and of the active interest taken by deponent herein. And said Eddy has duly authorized said solicitor to do all the acts above mentioned, but has taken no further interest therein, and has made no payments to said solicitor or for the expenses herein. That on or about the 31st day of March, 1879, the said Eddy made a general assignment for benefit of his creditors under the laws of the State of New York. That the assignees of said Eddy, under a general assignment, on or about the 7th day of January, 1880, sold and transferred all of said Eddy's right, title and interest in said patent to Samuel R. Clexton. That since said sale the said solicitor has been notified by said Eddy

3180 to no longer act as solicitor for said Eddy herein; that the interests of deponent are in imminent peril on account of said Eddy's refusal to permit further proceedings in his name herein, and said interests will be certainly sacrified and lost unless said solicitor be permitted to proceed with said examination, and to oppose said motion and to actively attend to said interests. And deponent asks that he be made a party defendant herein, or that said solicitor be permitted to proceed herein and take said examination and protect said interests at the expense of deponent.

That at the time when said Eddy made a motion to take testimony herein (to wit, on or about December 22, 1879), a motion was also made that said Caroline G. Caswell be made a party defendant herein; that said motion was made simply on the ground that said Caroline G. Caswell was a proper and necessary party to this suit, because she was a cestui que trust to Eddy as trustee of the interests involved in this suit, and the rule in equity cases is that both the trustee and cestui que trust are proper and necessary parties to a suit affecting the trust property; that said motion was denied, on the ground that her interest "appears to be a mere right to share with Eddy what he may obtain, and that said right has been acquired long since the pendency of this suit."

That deponent's rights are the same that Albert C. Corse (the assignor's of Caroline G. Caswell), possessed by said assignment, dated October 23, 1869, and that said Corse Caswell interests are really eight years older than this suit; that the reason why this motion is now made, is not merely because deponent is a cestui que trust of said patent (the ground of former motion to make Caroline G. Caswell a party), but because his trustee, said Eddy, has neglected and still neglects his trust, and now refuses to protect deponent's interest in said patent in this suit, and because said Eddy has no title in said patent except that of a naked trustee.

3181 That the complainant's motion for leave to take testimony to prove that the said assignment, dated October 23, 1869, is invalid, comes up for argument before Mr. Justice Hoyt H. Wheeler, on January 21, 1880; that deponent asks for an order to show cause, returnable before Mr. Justice Hoyt H. Wheeler, January 21, 1880, New York City, why deponent and said Samuel R. Clexton should not be made parties defendants to this suit, under the stipulation and orders by which said Eddy is made a party, and why deponent and said Clexton should not be permitted to oppose said motion of complainant and to protect their interests in this suit at their own expense; or why Albert C. Corse (whose consent to be made a party defendant is hereto annexed) be not made a party defendant, in order that through said Corse the interests of deponent and said Clexton may be protected.

H. T. CASWELL.

Sworn to before me this 16th day of January, 1880.

CORNELIUS D. GOULD,
Notary Public, New York Co.

EXHIBIT B.

I hereby sell, assign, and transfer to Herbert M. Caswell, of Troy, New York, all my right, title, and interest in law and in equity, in and to all those certain inventions and improvements in postmarking and canceling stamps, and of, and in and to letters patent of the United States of America issued therefor, April 14, 1863, to Marcus P. Norton,

and of, and in and to all the several and respective reissues and assignments thereof, and agreements thereto, and of, and in and to all and any rights, claims, and demands for the past and future use thereof, or for any infringements thereof.

CAROLINE G. CASWELL. [SEAL.]

Sealed and delivered this 16th day of January, 1880, in the presence of—

HORACE L. HICKS.

3182 EXHIBIT C.

I hereby sell, assign, and transfer to Horace T. Caswell, of Troy, New York, all my right, title, and interest, in law and in equity, in and to all those certain inventions and improvements in postmarking and canceling stamps, and of and in and to letters patent of the United States of America issued therefor, April 14, 1863, to Marcus P. Norton, and of and in and to all the several and respective reissues and assignments thereof, and agreements thereto, and of and in and to all and any rights, claims, and demands for the past and future use thereof, or for any infringements thereof.

HERBERT M. CASWELL.

Sealed and delivered this 16th day of January, 1880, in the presence of

HORACE L. HICKS.

At a stated term of the circuit court of the United States for the southern district of New York, held on the 24th of January, 1880, at the court-house thereof, New York City.

Present, Hon. Hoyt H. Wheeler, justice.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY.

On reading and filing the order to show cause, granted herein by Hon. Samuel Blatchford, dated January 17, 1880, and the affi-
3183 davit of Edward D. Bettens, verified January 16, 1880; the affidavit of Albert C. Corse, verified December 9, 1879; the affidavit of Samuel R Clexton, verified January 15, 1880, and the affidavit of Horace T. Caswell, verified January 16, 1880, and the papers referred to in said affidavits, and on the pleadings, papers, and proceedings herein, and after hearing Edward D. Bettens, esq., of counsel in favor of the motion, and George H. Williams, esq., of counsel for complainant, and Samuel B. Clarke, esq., of counsel for defendant James, being present, and having been heard thereon, now on motion of Edward D. Bettens, of counsel for Horace T. Caswell and Samuel R. Clexton, it is

Ordered, that the said Horace T. Caswell and Samuel R. Clexton be, and the same are hereby, made parties defendants to this suit, subject to same orders and stipulations by and under which Charles Eddy, as trustee for himself, Jacob Shavor, and Albert C. Corse, became and is a party defendant to this suit, with the same rights and privileges and

subject to the same obligations and liabilities as the said Eddy, as they appear in the proceedings in this suit.

HOYT H. WHEELER.

Agreed to as to form.

(Endorsed:) U. S. circuit court. Filed Jan. 26, 1880. John I. Davenport, clerk.

3184 *Stipulation and order under which Charles Eddy is a defendant in this suit.*

In the circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES, DEFENDANT.

Whereas it is alleged in defendant's answer herein, that Charles Eddy is interested in the subject-matter of this suit, in trust for himself, Albert C. Corse, and Jacob Shavor; and whereas said defendant in his said answer prays that said Charles Eddy may be made a party to this suit; and whereas said complainant is willing that said prayer should be granted so far as it may be necessary to bring said Eddy before this court for the proper adjudication thereby of all his claims or interests in the subject-matter of this suit: Now it is hereby stipulated and agreed, by and between said complainant, Christopher C. Campbell and said Charles Eddy, that said Eddy, by an order of this court, shall be made a party to this suit, as prayed for in said answer, and the filing of this stipulation in said court in the above-entitled case shall be held and treated by the court as his voluntary appearance for that purpose and for all the purposes of this suit, as fully in all respects as though he was an original party thereto. It is understood that said Eddy claims that his rights and interests in the subject-matter of this suit are fixed
3185 and determined by an assignment from Marcus P. Norton to him in trust of a one third interest in the patent, dated April 14, 1863, and its reissues referred to in the pleadings in this case, which said assignment is dated October 23, 1869, and a certified copy of which is now in evidence, and by a contract of even date with said assignment now in evidence, and that said complainant denies this, and claims that said Eddy's rights and interests are fixed and determined by an instrument in writing, dated October 7, 1871, and executed by Charles Eddy, Jacob Shavor, Albert C. Corse, and W. W. Secombe, a certified copy of which is now in evidence. And it is further stipulated and agreed that upon the pleadings and evidence as they now stand, and without any further evidence or pleadings in the case, unless the court shall otherwise direct, said court shall decide as to what the rights and interests of said Eddy in the subject-matter of this suit are, and shall make such decree in respect thereto as equity and good conscience may require. And it is further agreed that if there is recovery in said suit against said de-

fendant James, the court shall determine the rights respectively thereto of complainant and said Eddy, as equity and good conscience may require. And said complainant further agrees that the said assignment of October 23, 1869, from Marcus P. Norton to Charles Eddy, in trust as aforesaid, was a valid assignment, not affected by any prior or cotemporaneous assignment by said Norton to Helen M. Ingalls, or other written agreement to which said Eddy is a party, excepting the one hereinbefore referred to and dated October 7, 1871. And it is further understood that all costs awarded against said complainant, and counsel fees, are first to be paid out of any recovery in said case, and that no costs are to be adjudged against said Eddy.

Witness our hands and seals this day of June, 1878.

CHARLES EDDY. [L. S.]

U. S. A. Patent Office, July 19, 1878.

3187 UNITED STATES OF AMERICA,
Northern District of New York, ss:

On the 11th day of September, A. D. 1878, before the undersigned, a United States commissioner in and for said district, came the above-named Charles Eddy, who is personally known to me to be the identical person who executed the foregoing agreement as Charles Eddy, and acknowledged to me that he had executed the same for the purposes therein named. Witness my hand and official seal, at Troy, Rensselaer County, in said State, at the date above given.

[SEAL.] N. B. SYLVESTER.
United States Commissioner.

(Endorsed:) U. S. circuit court. Filed Sept. 13, 1878. John I. Davenport, clerk.

Motion to make Charles Eddy a defendant.

In the circuit court of the United States, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES, DEFENDANT.

Order by the court.

Now comes the said complainant, by George H. Williams, his
3188 counsel, and the defendant, by S. B. Clarke, assistant U. S. district attorney, his counsel, and the motion heretofore continued from the 23d of last July by consent of parties, came on to be heard upon a stipulation between said complainant and said Eddy, filed herein, and an affidavit by said counsel for complainant filed therewith, as well as upon the pleadings and evidence in this case, and after hearing said counsel for complainant in support of said motion, and said counsel for defendant in opposition thereto, and it appearing that said defendant in his answer had prayed that said Eddy be made a party to this suit, and the said Eddy in said stipulation claiming to have an interest in the subject matter of this suit, agrees in said stipulation that the filing thereof in this cause shall be held and treated by the court as his voluntary appearance for all the purposes of this suit, as fully in all respects as though he was an original party thereto; it is considered upon the foregoing and the pleadings and evidence in the case, that the said motion of complainant ought to be granted; and it further appearing that said Eddy cannot be made one of the complainants herein, it is ordered and adjudged, that the said Eddy be, and he is hereby, made a defendant in this suit, for himself, as well as in trust for Jacob Shaver and Albert C. Corse, for all the purposes thereof, as fully in all respects as though he were an original party thereto. And it is further ordered, as regards the complainant Campbell and defendant Eddy, that this cause, the said Eddy consenting thereto in said stipulation, be heard upon the pleadings and evidence as they now stand, unless the court shall hereafter otherwise direct.

(Signed) SAMUEL BLATCHFORD.

True and correct copy of an order of the court on file, and of the whole thereof.

[SEAL.] JOHN I. DAVENPORT, *Clerk.*

3189 In the circuit court of the United States of America, southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES AND CHARLES EDDY, DEFENDANTS.

To the complainant, Christopher C. Campbell, and Marcus P. Norton, esq., his solicitor; and to the defendant Thomas L. James, and Stewart L. Woodford, esq., solicitor for said Thomas L. James:

GENTLEMEN: You, and each of you, will please to take notice, and

due notice is now and hereby given to you and each of you, that on Tuesday, the 6th day of January, 1880, at 10½ o'clock in the forenoon of that day, pursuant to and by virtue of the order of this court, dated December 23d, 1879, made in this suit, and filed in the office of the clerk of this court, on or about December 23d, 1879, I shall commence the taking of evidence and proofs, on the part of, and in behalf of the above-named defendant, Charles Eddy, in this cause, as to the cancellation of the contract signed by William W. Secombe, Charles Eddy, Jacob Shavor and Albert C. Corse, dated October 7th, 1871, and printed in complainant's printed book of exhibit proofs, at pages 323–4. And I shall continue the examination from day to day until said proofs have been completed.

You will further take due notice that the said evidence and proofs in this cause so to be taken on the part and behalf of said defendant Eddy will be so taken by and before John A. Shields, esq., one of the standing examiners of this court, at his office in the new post-office and
3190 court-house building of said United States, in the city of New York, and in room No. 78 of said building. The same to commence on said 6th day of January, 1880, at 10½ o'clock in the forenoon of that day.

You will also take notice that the said evidence and proofs so to be taken will be taken under and in pursuance to and with the 67th equity rule of this court, and all amendments thereof. You will also please to take notice that all evidence and proofs so taken will be duly filed in the office of the clerk of this court; and the same being so filed will be used at and upon a hearing in this cause, under the stipulation by which said Eddy became a party defendant in this suit, and under the said order of December 23d, 1879.

Dated New York, December 30th, 1879.

Yours, &c.,

EDWARD D. BETTENS,
Solicitor for Charles Eddy.

An application having been made to the undersigned, one of the standing examiners of this court, by the solicitor of the defendant Charles Eddy, to take evidence and proofs in the aforesaid entitled cause, in pursuance of the above and foregoing notice of time and place for the taking of the testimony on the part and behalf of said defendant Eddy, as stated in the said notice, bearing date this 30th day of December, 1879:

It is now and hereby ordered that the examination of witnesses, and the taking of documentary proofs, and the filing of exhibits, or other evidence according to said notice, take place before me at the time and place designated in the said notice. You are requested to be present to attend the same for and on the part of the parties to this suit that you respectively represent, if you shall deem it best so to do.

Dated New York, December 30th, 1879.

JOHN A. SHIELDS,
Examiner, &c.

To MARCUS P. NORTON, Esq.,
Solicitor for Complainant.
STEWART L. WOODFORD, Esq.,
Solicitor for Defendant James.

3191 At a stated term of the circuit court of the United States for

the southern district of New York, held at the city of New York, on the 5th day of January, 1880.

Present, Hon. Samuel Blatchford, justice.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND CHARLES EDDY. } In equity.

The examination of witnesses in behalf of defendant Eddy, having been set down for January 6, 1880 (Tuesday), before John A. Shields, esq., standing examiner, pursuant to an order of this court in this suit dated December 23, 1879, and, at complainant's solicitor's request, the said examination having been adjourned to January 15, 1880, same hour and place, and the time in which the examination under said order of December 23, 1879, is to be taken, being limited to thirty days from December 26, 1879, now, on consent of complainant's solicitor, and on motion of Edward D. Bettens, solicitor for defendant, Eddy, it is

Ordered, that the time for taking the testimony, under and pursuant to said order of December 23, 1879, be, and the same is hereby extended to forty-five days from December 26, 1879, making fifteen additional days to the time in which said testimony is to be taken.

SAMUEL BLATCHFORD, *J.*

Entry of above is consented to.
EDWARD D. BETTENS,
Solicitor for Defendant Eddy.
MARCUS P. NORTON,
Solicitor for Complainant.
STEWART L. WOODFORD,
Solicitor for Defendant James.

(Endorsed:) U. S. circuit court. Filed Feb. 10, 1880. John I. Davenport, clerk.

3192 *Testimony taken and filed by Horace T. Caswell and Samuel R. Clexton, under the orders dated December 23, 1879, and January 24, 1880.*

United States Circuit Court. Southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS JAMES AND CHAS. EDDY. }

Testimony taken on the part of the defendant Charles Eddy, pursuant to order of court, dated December 23, 1879, under and pursuant to the 67th rule of the Supreme Court of the United States, as amended, before John A. Shields, esq., a standing examiner of said court.

NEW YORK, *January* 6, 1880.

The defendant, Charles Eddy, appeared by his solicitor, Edward D. Bettens, esq.

Examination adjourned at the request of solicitor for complainant, Marcus P. Norton, esq., to January 15, 1880.

NEW YORK, *January* 15, 1880—11 o'clock a. m.

Examination adjourned to January 23, 1880.

3193 NEW YORK, *January* 23, 1880—11 o'clock a. m.

Met pursuant to adjournment.

Present: Hon. George H. Williams, of counsel for complainant, and Esek Cowen, esq., and Edward D. Bettens, esq., of counsel for defendant Eddy, Samuel B. Clarke, esq., of counsel for defendant James.

CHARLES H. MCGRATH, a witness produced on the part of the defendant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. Charles H. McGrath; I am thirty-four years of age; I reside in Troy, N. Y.; and I am a shipper in stove business.

Q. 2. Do you know Charles Eddy, formerly of Troy, N. Y.?

A. Yes, sir.

Q. 3. Look at the agreement now shown you, and state whether or not the same was signed by Charles Eddy, in your presence?

A. Yes, sir; I suppose it was.

Q. 4. Is the signature C. H. McGrath, witness for Charles Eddy, your signature?

A. Yes, sir.

Q. 5. At whose request did you sign it as subscribing witness?

A. At Mr. Eddy's.

CHAS. H. MCGRATH.

Sworn to before me this January 23, 1880.

JOHN H. SHIELDS,
Examiner, &c.

3194 The complainant's counsel will make no objection to said agreement for want of further proofs to as its execution.

The agreement offered in evidence, being the original agreement, of which a certified copy was put in evidence by complainant in this case, on May 17, 1878, and marked Complainant's Exhibit Secombe, on page 323 of complainant's book of exhibits.

Complainant's counsel objects to anything and everything upon said agreement, or connected with it, except as it appears in the certified copy referred to.

The said agreement is marked Defendant Eddy's Exhibit, Secombe Original January 23, 1880.

J. A. S., *Exr.*

NEW YORK, *February 3d*, 1880.

Met pursuant to adjournment.

Present: Counsel as before.

HORACE HOLT, a witness produced on the part of the defendants, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence and occupation?

A. Horace Holt; I am 50 years of age; I reside in Brooklyn, Kings County, N. Y.; and I am a hand-stamp manufacturer.

Q. 2. Did you know William W. Secombe in his lifetime?

A. I did.

Q. 3. Were you connected in business with him; and, if so, for how many years?

A. I was, for about ten years.

Q. 4. During that time did you have an opportunity to become acquainted with his handwriting?

A. I had.

Q. 5. How often have you seen him write?

A. Almost daily during the time that I was connected with
3195 him; I was superintendent of the mechanical part of his business; I had correspondence with him on two occasions which I distinctly recollect.

Q. 6. (Counsel for defendants shows the witness the letter without date attached to the Exhibit Secombe Original, and addressed to Mr. Norton.) Please look at this letter now shown you, and the signature to the same, and state whether or not, in your judgment, the said letter and signature are in the handwriting of William W. Secombe?

A. It is, to the best of my knowledge and belief, both the letter and signature?

Cross-examined by Hon. GEORGE H. WILLIAMS:

Cross-Q. 7. You do not appear to be very positive about it; is there anything in the writing that causes you to hesitate?

A. No, sir.

Cross-Q. 8 Is that the usual signature of Mr. Secombe to that letter?

A. With a single exception.

Cross-Q. 9. What is the exception?

A. The initial letter in Secoombe is not his usual way of writing his name.

Cross Q. 10. What is the difference?

A. The initial letter of his signature usually was in the form of a double loop, coming below the line.

Cross-Q. 11. The initial letter of this signature is not made in that way, is it?

A. It is not.

Cross-Q. 12. Did Mr. Secombe usually write his Christian name, or the initials of his Christian name, as they are written in this letter?

A. He did with those he was intimate and familiar with.

Cross-Q. 13. He had then, as I understand you, one way of signing his name for friends and another way of signing it for stangers; is that so?

A. He has written letters to me with the single word Secombe, his surname.

Cross-Q. 14. What would you take that word to be standing be-
3196 fore Secombe at the bottom of the letter, if you didn't know anything about Secombe's handwriting?

A. "Yours."

Cross Q. 15. You don't understand it, then, to be the initials of his Christian name?

A. No, sir.

Cross Q. 16. Does that word indicate the mode in which Mr. Secombe usually made the letter Y?

A. I don't know.

Cross-Q. 17. Do you think the last signature at the bottom of the exhibit handed to you is in the same handwriting as the signature at the end of the letter?

A. I do.

Cross-Q. 18. Do you think they were both written by Mr. Secombe?

A. I do, sir.

Cross-Q. 19. Look at that paper which purports to be an answer in equity in the case of Robertson vs. The Secombe Manufacturing Company, purporting to be filed in this court March 4, 1872, and state in whose handwriting the signatures are to the answer to the paper.

(Objected to as immaterial; 2d, that the rule in this State does not

allow the proof of handwriting by comparison unless the paper with which the controverted signature is compared is material to the case and properly in evidence.)

A. The one at the bottom I would say is W. W. Secombe's signature.

Cross-Q. 20. State in whose handwriting, if you know, is the signature to that paper written—William W. Secombe.

A. My judgment is that it was written by Mr. Secombe himself.

Redirect by ESEK COWEN, Esq.:

Redirect Q. 21. Have you ever seen Mr. Secombe make the initial S. of his surname as it is made in that letter?

3197 A. I have no recollection of seeing it.

Redirect Q. 22. Taking the whole writing together, have you any doubt that letter is in Mr. Secombe's handwriting?

A. I have not.

Cross-examined by Hon. G. H. WILLIAMS:

Cross-Q. 23. When did you first see that letter?

A. I saw that letter this afternoon, sir; about three hours ago.

Cross-Q. 24. Where did you see it?

A. In my office, at my place of business.

Cross-Q. 25. Where was that?

A. 39 John street, this city.

Cross-Q. 26. Who showed it to you?

A. A gentleman who was introduced to me by Mr. Clexton.

Cross-Q. 27. Do you remember the name of the gentleman?

A. No, sir; I do not.

Cross-Q. 28. Do you know Mr. Green?

A. I have a slight acquaintance with him.

Cross-Q. 29. Has he been to your office to see about evidence in this case?

A. He asked me if I could identify W. W. Secombe's handwriting or signature.

HORACE HOLT.

Sworn to before me this February 3, 1880.

J. M. DEUEL,
Examiner, etc.

WILLIAM DRINKER, a witness produced on the part of the defendants, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. William Drinker; I am thirty-five years of age; I reside in the city of New York, and I am in the hand-stamp business.

3198 Q. 2. Were you connected in business with the late W. W. Secombe in his lifetime; if so, for how many years, and in what capacity?

A. I was, about six years; in the capacity of bookkeeper and cashier.

Q. 3. Are you well acquainted with his handwriting?

A. I am.

Q. 4. How frequently did you see him write while you were with him in business?

A. Almost daily.

(Counsel shows the witness the letter attached to Exhibit Secombe, original, without date, and addressed to Mr. Norton.)

Q. 5. Look at the letter now shown you, and state whether or not, in

your judgment, the said letter, including the signature, is in the handwriting of W. W. Secombe, deceased.

A. To the best of my judgment, it is.

Cross-examined by Hon. G. H. WILLIAMS:

Cross-Q. 6. What do you take the signature at the bottom of the letter to be?

A. "Yours, Secombe."

Cross-Q. 7. Is that the usual signature of Mr. Secombe?

A. This "S" is not the way he usually made it.

Cross-Q. 8. Is that the only difference you discover between that and his usual signature?

A. It is.

Cross-Q. 9. Did he usually write his name Secombe without the initials of his Christian name?

A. Being connected with him and having business transactions only together, I never saw his signature excepting with the initials before it.

WM. DRINKER.

Sworn to before me this February 3d, 1880.

J. M. DEUEL,
Examiner, etc.

3199 JANUARY 23, 1880—11 o'clock *p.* m.

Met pursuant to adjournment.

JEREMIAH D. GREEN, a witness produced on the part of the defendant, being duly sworn, deposes and says:

Q. 1. What is your name, age, residence, and occupation?

A. Jeremiah D. Green; I am sixty-eight years of age; I reside in Troy, N. Y., and have been employed for the last few years as an attorney in patents and claims most of the time.

Q. 2. Do you know Charles Eddy and Albert C. Corse and Marcus P. Norton, and did you know Jacob Shavor and William W. Secombe in their lifetime?

A. I know Charles Eddy, Albert C. Corse, and Marcus P. Norton, and did know Jacob Shavor and William W. Secombe in their lifetime.

Q. 2. In or about October, 1871, were you acting as attorney for Jacob Shavor and Albert C. Corse, in reference to their interest in Norton's patent for a post-office cancelling stamp?

A. I was.

Q. 4. Do you recognize the agreement marked "Secombe original," which I now show you?

A. I do.

Q. 5. Did you produce it to be used on this examination?

A. I did.

Q. 6. How long had it been in your possession before you gave it to Mr. Corse?

A. From about the last of March or first of April, 1872.

Q. 7. From whom did you receive it at the time spoken of in your last answer?

A. From Marcus P. Norton.

Q. 8. Was there anything annexed to the paper at the time you received it?

A. There was.

Q. 9. What was it?

3200 A. A letter from Mr. Secombe to Mr. Norton, and upon the back of the same sheet of paper was a note written by Mr. Norton and signed by him.

Q 10. State whether or not the letters you speak of are the same as are now attached to the agreement?

A. Yes.

Q. 11. Are you acquainted with the handwriting of William W. Secombe, deceased?

A. I think I am.

Q. 12. Have you seen him write?

A. Yes, sir.

Q. 13. State whether or not, in your judgment, the signature to the letter attached to this exhibit is in the handwriting of the late Mr. W. W. Secombe?

A. I think it is; I have compared it with several letters that I have received from him, and I have no doubt that it is his signature.

Q. 14. At the time you received this agreement from Mr. Norton, was there anything written on the face of the agreement; and, if so, what?

A. The same memorandum that is on the agreement now, with the exception of that which is in bluish ink, or purple ink, and signed by me; the erasures of names of parties to the instrument and the witnesses thereto; also the memorandum of the record of the Patent Office was the same as on the instrument now, at the time that I received it from Mr. Norton.

Q. 15. Then, if I understand you correctly, the instrument, at the time you received it, was in exactly the same condition as that in which it now appears, with the exception of the memorandum signed by you?

A. Yes, sir.

Q. 16. When did you add that memorandum?

A. Within twenty minutes from the time I received it.

Q. 17. By whose authority?

A. By the authority of Jacob Shavor and Albert C. Corse, as their attorney.

Q. 18. Had you consulted with them about the cancellation before it was made?

3201 A. I had in relation to the procuring of the document and its cancellation.

Q. 19. Were you a party to the negotiation which led to the execution of the original?

A. I was.

Q. 20. I wish you would state, as nearly as you can remember, the circumstances that led to the cancellation of this instrument; at whose request it was cancelled, if you know, and why the cancellation was asked for?

A. The cancellation was asked by Eddy, Shavor, and Corse, through me, as attorney, upon the ground that the conditions on which the instrument was made and signed were repudiated or refused to be carried out on the part of Mr. Secombe; I called upon Mr. Secombe along in the winter of 1872, and demanded a surrender of this agreement, as he was not willing to comply with the understanding and verbal agreement; I afterwards, in the month of March, 1872, in company with Albert C. Corse and Frederick G. Ransford, and then demanded the surrender and cancellation of that instrument, Mr. Secombe.

(Complainant's counsel objects to any statement made upon that occasion by Mr. Secombe.)

Mr. Secombe asked me if I made the demand as attorney for Shavor and Corse; I replied that I did; Mr. Secombe then asked Mr. Corse if I was attorney for him, Corse and Shavor; Corse replied that I was; he then stated that he would see about it right away, or very soon, something to that effect; I can't give the language.

Either that day or the next, Mr. Norton showed me the document and the letter which is now attached to it, which he said he had received from Mr. Secombe for cancellation, if he saw fit to do so.

He then, in my presence, and in the presence of Mr. Ransford, wrote the memorandums upon the letter from Secombe, and upon the agreement, and made the erasures as they now appear; he then gave the instrument to me with the letter attached, as it now is.

3202 Q. 21. Did I understand you to say that you were acting for Mr. Eddy, as well as Shavor and Corse, in demanding this instrument from Mr. Secombe?

A. I was.

Q. 22. What instructions, if any, did you have from Mr. Eddy in relation to that matter?

A. Mr. Eddy requested me to procure the surrender of that instrument; I had a memorandum at the time drawn up by Francis Rising, and signed by Rising, Eddy, Corse, and Shavor, setting forth in part the verbal agreement between the parties to this instrument, marked Secombe original; my instructions were to demand the surrender of this instrument.

Q. 23. What, if anything, did you say to Mr. Eddy about this cancellation after it was made?

A. I told Mr. Eddy that I had the instrument, and that it was cancelled.

Q. 24. What did he say, if anything?

A. He said he was very glad of it, and hoped that I would take good care of it; after that, some time, I took the instrument to the office of Eddy, Corse & Company, and showed it to each of them, Shavor, Corse, and Eddy.

Q. 25. Did you have a written power of attorney from either of the parties, and, if so, from whom?

A. I did, from both Shavor and Corse, but not from Eddy.

(Defendants' counsel offers in evidence the note without date, from Secombe to Norton, which is attached to the Exhibit Secombe Original, and the memorandum made by Norton on the back of said note.

Also, a memorandum dated April 3, 1872, and signed Marcus P. Norton, written across the face of said agreement.

Also, the memorandum dated March 30, 1872, and signed by J. D. Green.

Also, the cancelling marks at the end of the agreement.

Complainant's counsel objects to the evidence specified in the 3203 above offer, on the ground that it is incompetent to affect the validity of the original instrument, and is inadmissible to affect the rights of complainant in this suit.

Cross-examined by Hon. G. H. WILLIAMS:

Cross-Q. 26. Where did this transaction between you and Norton, as to the Exhibit Secombe Original, take place?

A. In the hotel Nos. 17-19 Park Row, in this city.

Cross-Q. 27. Was the paper delivered to you by Norton at that place?

A. It was.

Cross Q. 28. Why didn't you deliver this paper to Shavor and Corse and Eddy, the parties to whom it belonged, if it was cancelled?

A. I retained it as their attorney, and delivered it when I was asked for it, and, as I have stated before, had showed it to each of them.

Cross-Q. 29. When were you first asked, by either of the parties named, for this paper?

A. I can't tell the time when I was first asked.

Cross-Q. 30. Can you tell anywhere near the time?

A. I think it was not long after its cancellation.

Cross-Q. 31. Who asked you for the paper at that time?

A. I think it was Mr. Eddy; Shavor and Corse, I think, were present, but I won't be positive.

Cross-Q. 32. Did you refuse to give them the paper at that time?

A. I did not.

Cross-Q. 33. Why didn't they get it?

A. They did in a few days; I took it down to their office; they examined it, and I took charge of it.

Cross-Q. 34. When did they next demand the paper from you?

A. They never demanded the paper from me.

Cross-Q. 35. Have they, or either of them, since then asked you for the paper?

A. They asked me if I had the paper; I told them I had; Mr.
3204 Eddy replied, on one occasion, speaking of it, that he thought he had it; I told him no, that I had it.

Cross-Q. 36. When was that that you had that conversation with Eddy?

A. I can't tell the date.

Cross-Q. 37. Haven't you refused, since the commencement of this suit, to let one or all of these parties have this paper?

A. Not to my knowledge; I don't know why I should.

Cross-Q. 38. Have you had any conversation with either of them about the paper since the suit was commenced?

A. I think I have.

Cross-Q. 39. With whom and when?

A. I had with Mr. Eddy, and I had with Mr. Corse; I can't tell the time—I think within the last year.

Cross-Q. 40. When did you deliver this paper up, and to whom?

A. I delivered it to Mr. Corse; I can't tell how many weeks ago—whether six weeks or two months, or what time. I made no memorandum as to the date.

Cross-Q. 41. Am I to understand from your answers relative to your demand upon Secombe, that Mr. Shavor and Corse claimed that Secombe had not presented this claim against the government as he had agreed in the original agreement, and therefore that they desired to have it cancelled?

A. The demand was not made upon that ground, but on a refusal of Mr. Secombe to enter into an agreement as to the persons who should be trustees for the parties in interest, and the proportional amounts which each should receive from the avails of the different patents to be named in such agreement; such agreement was made in accordance with the understanding at the time this agreement, marked Secombe Original, was made, which last-named agreement Mr. Secombe refused to sign.

Cross-Q. 42. Then the controversy between the parties was about an agreement outside of the one marked Secombe Original in this case?

3205 A. It was but a part of the consideration and understanding at the time this Secombe Original was made.

Cross-Q 43. Do you know anything about an agreement between Mr. Eddy and Mr. Norton and Miss Ingalls, dated January 9, 1871, by which Eddy agreed to sell and transfer to said Norton and Ingalls his interest as trustee for himself and for Shavor and Corse in this and other patents for $30,000?

(Objected to as not the best evidence. The contents of a written instrument cannot be proved by parol.)

A. Only by hearsay.

Cross-Q. 44. You didn't act as attorney for Mr. Shavor and Corse in making any such agreement, did you?

A. I did not.

Cross-Q. 45. Did Mr. Eddy or Shavor or Corse ever tell you there was such agreement made?

A. I do not now remember.

Cross-Q. 46. What do you mean by saying in your answer before the last, "Only by hearsay"?

A. By hearing people in Washington talk about such an agreement.

Cross-Q. 47. Will you swear that neither Mr. Eddy, Mr. Corse, or Mr. Shavor never told you that there was such an agreement?

A. I could not; not now; I don't remember.

Cross-Q. 48. Did you ever show the original, marked Exhibit Secombe, to anybody except to Mr. Shavor, Corse, or Eddy?

A. Yes, sir.

Cross-Q. 49. Did you ever show it to Mr. Clarke, the counsel for Mr. James in this suit?

A. I think I did; also Mr. Secombe.

Cross-Q. 50. About what time did you show it to Mr. Clarke, if you remember?

A. I can't tell; it was after this suit was commenced; it was at my house, I think; it was at my house; it was also at my house I showed it to Mr. Secombe.

3206 Cross-Q 51. Was it before or after you were a witness in this suit that you showed Mr. Clarke the paper?

A. I cannot tell; it was after the time when I was a witness in this case that I showed it to Mr. Secombe—I mean a brother of W. W. Secombe.

Cross-Q. 52. Do you know whether or not Mr. Eddy, in June, 1878, knew of the alleged cancellation of this instrument?

(Objected to as immaterial.)

A. He must have known it before; he might have forgotten it at that time, for he had seen the instrument; I showed it to him.

Redirect by ESEK COWEN, Esq.:

Redirect Q. 53. You stated that you were a party to the negotiations which resulted in the original Secombe agreement, marked Exhibit Secombe, Original; I want to know if you had any consultation with Mr. Norton before this agreement was made in regard to making this agreement with Secombe?

A. Yes, sir; I had several.

Redirect Q. 54. What was the substance of those consultations?

A. That the several patents should be put into the hands of two trustees in trust for the others, and the manner of dividing the interest of each, or the amount that each should receive; and it was at Mr. Norton's suggestion that I should be one of the trustees; afterwards

Mr. Hatch, of this city, was named as trustee in my stead; I went with Mr. Secombe to Washington to confer with the firm of Mason & Holloway in relation to the amount that Secombe and Norton had promised to Holloway & Mason, or Mr. Mason, for services rendered or to be rendered.

Redirect Q. 55. Were the amounts agreed upon the same as are mentioned in this agreement, Secombe Original?

A. They were intended to be.

3207 Redirect Q. 56. Do you know whether this agreement, Secombe Original, was submitted to Mr. Norton at or before the time it was executed?

A. That I cannot now tell, but the substance and subject-matter was talked over with Mr. Norton, Secombe, and myself before its execution, and agreed to by Norton.

Recross by Hon. C. H. WILLIAMS:

Cross Q. 57. Mr. Secombe, as I understand you, refused to carry out that arrangement by appointing trustees, as agreed upon?

A. By appointing trustees; and there was also a disagreement as to the amount of moneys the different parties were to receive. At the time the agreement was presented to Mr. Secombe for his signature, there was no disagreement as to who should be the trustees, but the disagreement was in relation to the manner of dividing the interest and the amounts of money that each should receive; there may have been some other manner of objection at that time.

Cross-Q. 58. Was not the amount that each party was to receive fixed and stated in the original agreement, marked Secombe Original? And if so, how could controversy arise on that subject?

A. My present impression is that Mr. Secombe required a greater portion of interest than was supposed to be set forth in the original agreement; at any rate, he claimed a greater portion of interest for his trust; that was talked over and agreed upon between the different parties before and at the time of the making of this agreement marked Secombe Original.

3208 NEW YORK, *Jan. 27th*, 1880—12 o'clock m.

Met pursuant to adjournment.

Present, counsel as before.

Cross-examination of J. D. GREEN continued by complainant's counsel:

Cross Q. 59. Can you state at what time you first came to New York to see Mr. Secombe about the cancellation of the instrument dated October 7th, 1871?

A. I can't state now.

Cross-Q. 60. Can you state in what month, or season, or year it was?

A. I think it was in 1871; that is my present impression.

Cross Q. 61. Can you state about what time in 1871?

A. I could not with any degree of certainty without examining memoranda which I have at home; I think in the latter part of the year 1871.

Cross-Q. 62. Can you tell whether it was in the summer or winter?

A. I cannot, but think it was after February, 1871; my impression is, in November or December of that year.

Cross Q. 63. Who accompanied you at that time to see Mr. Secombe, if anybody?

A. I do not now recollect, but perhaps I could refresh my recollection on examination of papers which I have at home.

Cross-Q. 64. Do you know where Mr. Norton was at that time?

A. I can't say whether he was here or not; he may have been with me for aught I now remember.

Cross-Q. 65. How many times did you call on Mr. Secombe about cancelling the said instrument?

A. I should think some two or three times; three times, I should think, and perhaps more.

3209 Cross-Q. 66. Can you state whether or not Mr. Norton was with you at any time when you called on Mr. Secombe for the purpose of said cancellation?

A. I couldn't be positive now, at this time.

Cross-Q. 67. Did anybody accompany you at any of the times?

A. Yes, sir.

Cross-Q. 68. Who?

A. Frederick G. Ransford and Albert C. Corse.

Cross-Q. 69. When did they accompany you to see Mr. Secombe about that matter?

A. On the day or the day before the cancellation was made by Mr. Norton.

Cross Q. 70. Were they or anybody with you at the other times when you called on Mr. Secombe about the cancellation?

A. Yes, sir; not Corse; that was the only time that Corse was with me, that I remember; but Ransford was with me once or twice before; Mr. Shavor was with me once or twice at Secombe's.

Cross Q. 71. Did you have any conversation with Mr. Norton about having this instrument cancelled before the 30th March, 1872?

A. I think I did have.

Cross-Q. 72. Can you tell when and where and what it was?

(Objected to, as immaterial and irrelevant.)

A. The language I could not give or the exact times or place, without referring to papers I have at home, except at the time that Corse, Ransford, and myself went to make the demand; I think we asked Mr. Norton to go with us; I think his reply was that he thought it was not best, or something to that effect.

Cross-Q. 73. Do you wish to be understood as saying that you have papers at home that will show the exact language of Mr. Norton, in prior interviews that you had on that subject?

A. I could not tell that until I had made the examination.

3210 Cross-Q. 74. Without undertaking to state the exact language of Mr. Norton, in any of those interviews, can you remember the idea he conveyed as to the cancellation of this instrument?

(Objected to as immaterial and irrelevant, except as to the interview with Mr. Norton, when Mr. Norton cancelled the agreement, said cancellation being dated March 30, 1872.)

A. My idea is that he thought the instrument should be cancelled, inasmuch as there was a failure between Secombe and the other parties to the instrument to carry out the understanding and verbal agreement had between the parties at the time of its execution; that, I think, embodies the idea.

Cross-Q. 75. Can you tell whether any of those interviews took place in Troy, New York or Washington?

A. I don't know that I can state positive without examining my memoranda and letters, but I think at Troy, N. Y., and New York City.

Cross Q. 76. You stated, I think, that Mr. Norton was a party to the

negotiations which resulted in the instrument of the 7th October, 1871; did you?

A. I think that I had talked with him on the subject; he may have talked with others who were parties to the arrangement.

Cross Q. 77. When and where did you talk with him about it?

A. That I will not be positive until I examine my memoranda.

Cross-Q. 78. Suppose you are not positive, can you state within a year of the time, or a thousand miles of the place?

A. I can state within a year of the time; I have already stated it was in the year 1871; my impression is it was in the city of Washington, in September, 1871.

Cross-Q. 79. And the place?

A. That I must examine my memorandum before I can fix the place; but I can give my impression, if that will satisfy you.

3211 Cross-Q. 80. State, as near as you can, the place.

A. I think in Washington and in New York, and, perhaps, in Troy.

Cross-Q. 81. Can you come any nearer the time than to say it was in 1871?

A. I don't know that I can now; but I think in September of that year, perhaps before.

Cross-Q. 82. Did you know when you came to New York, this time, for what purpose you were coming?

(Objected to as immaterial.)

A. I think I did.

Cross-Q 83. State then, if you know, what the purpose was.

(The same objection.)

A. It was to identify the instrument cancelled in the latter part of March, 1872, and which I had been examined on in this cause.

Cross-Q. 84. Did you not know that you were called to prove the cancellation of that instrument?

(Objected to as immaterial.)

A. Yes.

Cross-Q. 85. State, then, if you have memoranda in your possession giving dates and facts upon that subject, why you didn't examine them before you came down, so as to be able to testify with some degree of accuracy in reference to dates and facts?

(Objected to—1st, as immaterial; and 2d, as there are too many conclusions in the question.)

A. I believe that the memoranda on the document were sufficient to identify the document and the time of its cancellation without further reference to other papers.

3212 Cross-Q. 86. You did not expect, then, that any questions would be asked you about interviews or negotiations prior to the making of the said memoranda upon said document, did you?

(Objected to as immaterial.)

A. I thought very likely there would be, but their nature I could not tell.

Cross-Q. 87. Will you swear that you did not examine any letters or memoranda in your possession for the purpose of refreshing your memory before you came here to be a witness at this time?

(The same objection.)

A. No, sir; I won't.

Cross Q. 88. Will you swear that you did examine such memoranda and letters before coming here as a witness?

A. Only partially, and that with a view of getting some of them together.

Cross-Q. 89. Do you mean to say that you didn't examine any letters or memoranda to refresh your recollection as a witness at this time?

A. No, sir; I didn't say so.

Cross Q. 90. Do you mean to say, then, that you did?

A. I say as I said before, that I examined them for the purpose of getting them together for future use if necessary, but I did not get my memoranda all together.

Cross Q. 91. What future use do you contemplate with those letters and memoranda after you have been a witness as to the matters to which they relate in this case?

(Objected to as immaterial.)

A. That would be a matter of my own and not pertaining to this case.

3213 Cross-Q. 92. You did not consider it of any consequence then, that you should be accurate here as a witness with reference to dates and facts connected with said cancellation, did you?

A. I did, most assuredly.

Cross-Q. 93. Why didn't you examine them, so as to be prepared to state within months or years of the time when conversations took place about said cancellation, or the places where said conversations occurred?

A. I didn't deem it necessary at that time; besides I had not got my memoranda all together, and want of time to get them together, and attending to other business that I had to attend to.

Cross-Q. 94. Did any one, attorney or party interested in this case, ever say anything to you about making such an examination?

(Objected to as immaterial.)

A. I think they did.

Cross-Q. 95. Who?

A. I think Mr. Caswell; whether Mr. Cowen did or not I do not now remember.

Cross-Q. 96. When did you deliver up this exhibit, filed with your testimony, and to whom did you deliver it?

A. I can't tell you the date whether it was a month or six weeks, or a less time; I delivered it to Mr. Corse, by the request of Mr. Caswell.

Cross Q. 97. You knew, then, didn't you, that it was to be used as evidence in this suit?

A. The purpose of delivering it up (as I understood it) was to send it to the Patent Office, to have the cancellation recorded; I had talked with Mr. Eddy some time before; he thought it had better be sent to the Patent Office for record; I did not know the relation of the parties in this suit—Corse or Caswell, or Eddy, in this suit—so as to be advised whether it would be necessary to use this exhibit in evidence at the time they called for it.

3214 Cross-Q. 98. Is there any evidence in this document that it has ever been in the Patent Office since the alleged cancellation was made?

(Objected to, on the ground that it has not been shown that the witness knows anything about recording of patents in the Patent Office, or of any paper ever having been in the Patent Office.)

A. I don't discover any evidence upon the document of its having been in the Patent Office for record since January, 1872.

Cross-Q. 99. State, if you please, under what arrangement you delivered up this paper to Mr. Corse, if any.

(Objected to as immaterial.)

A. Only as I have stated.

Cross-Q. 100. Has there been no direct or indirect understanding or agreement by which you were to receive anything from this suit if the parties interested in this paper succeeded in the case?

(Objected to as immaterial.)

A. Not since the suit was commenced, to my knowledge.

Cross-Q. 101. You would have known about it if there had been such an understanding, wouldn't you?

A. I should.

Cross-Q. 102. Was there nothing said about that, or any inducement or consideration held out to you to deliver up this paper?

A. Not to my knowledge.

Cross Q. 103. What is your interest in the event of this suit?

(Objected to as incompetent, so far as it affects the title of Clexton or Caswell.)

3215 A. That will have to be determined hereafter; by an article of agreement, which was made and entered into——

(Defendants' counsel interrupts the witness, and objects to any statement about the agreement, as the agreement speaks for itself.)

Witness withdraws that part of the answer after the word "hereafter."

Cross Q. 104. What interest do you claim in the event of this suit?

(Objected to as immaterial.)

A. That I am not prepared to say.

Cross-Q. 105. You don't know, then, what your claim is, or whether you have any or not, do you?

(The same objection.)

A. I am not prepared to say.

Cross Q. 106. State at what time in the month of March, 1872, and where you first saw Mr. Norton.

A. That is a pretty hard question to answer, judge; I may have seen him a dozen times in the month of March, 1872.

Cross-Q. 107. When did you first see him in that month in the city of New York?

A. Whether I saw him before the 28th or 29th of March, 1872, in the city of New York, I can't tell now.

Cross-Q. 108. Do you remember seeing him in Troy at any time in that month?

A. That I cannot tell now.

Cross Q. 109. Where did you see him in New York, the 28th or 29th March, 1872?

A. I saw him on the 29th or 30th of March, 1872, at the hotel, I think it is, 17 and 19 Park row; I may have seen him before in this city at that time.

Cross Q. 110. Did you call on him at that hotel?

3216 A. I think I was stopping there at the time; whether he was stopping there or somewhere else, I don't now remember.

Cross-Q. 111. How long did you stop there at that time?

A. I can't tell that; not but a short time; a few days.

Cross-Q. 112. Was anybody else from Troy stopping there at that time?

A. Yes, sir; Frederick G. Ransford; there may have been others.

Cross Q. 113. Where did you see Mr. Norton in that hotel?

A. In the sitting-room; in the office room; the room adjoining the office.

Cross-Q. 114. Did you see him more than once?

A. Yes, sir; I think I did.

Cross-Q. 115. Where did you see him on the 28th or 29th?

A. I don't remember of having seen him except at that hotel; yet I might have seen him elsewhere.

Cross Q. 116. Did he call on you at that hotel about this cancellation buisiness?

A. I can't tell you how that was; I can't say whether he was stopping there, or stopping at some other hotel; but I think the object of his business there was in part, if not in whole, in relation to this cancellation of this agreement, Exhibit Secombe Original, or the procurement of said document from Mr. Secombe.

Cross-Q. 117. Did you call upon him or did he call upon you about this cancellation matter at that time?

A. That I do not recollect; but I talked to him in relation to the matter either there or elsewhere before the document was sent to him.

Cross Q. 118. Did you always see him in that little office room to which you referred in your former answer?

A. That I can't say.

Cross-Q. 119. Who was keeping the hotel at that time?

3217 A. That I can't tell you; I think there was one of the men that is there now.

Cross Q. 120. You don't know whether you saw Mr. Norton in his room at that hotel or not?

A. I don't recollect.

Cross Q. 121. You don't know how many times you saw him there, do you?

A. No; I can't tell; at that time.

Cross Q. 122. Do you know on how many different days you saw him at that hotel at that time?

A. I can't tell whether it was one, or two, or more, as I have stated before.

Cross Q. 123. What took place between you and Norton in that little office room, where you say you saw him in that hotel?

A. It was not so very small, it's the room in which the office was situated; it is changed now; I think we asked Mr. Norton to go over with us to Secombe's office; he said, in substance, that he didn't think it was best; after that, either that day or the next, he said that he had the document from Secombe; he showed the document, and sat down and wrote the memoranda upon it, and then gave the document to me.

Cross-Q. 124. That was the first conversation that you had with him there on the subject, was it, when you asked him to go over to Secombe's with you?

A. I think not.

Cross-Q. 125. What else was said there at this time about this matter of cancellation?

A. I can't give the conversation; there was a good deal said in relation to the matter; I may be able to remember more after thinking it over.

Cross Q. 126. Have you stated now all you can remember at this time?

A. Substantially.

Cross-Q. 127. Why didn't Mr. Secombe, if he was willing to cancel this instrument, cancel it when you called upon him to do it?

A. I can't tell, unless he wished to consult Mr. Norton about it, as he sent the document to him.

3218 Cross-Q. 128. Did he tell you that he would or would not cancel it when you called on him?

A. He did not, but stated on the last time I called for it that he would attend to it, or see about it, or something of that character.

Cross-Q. 129. How far is this hotel from where his office was at that time?

A. Oh, a short distance, perhaps fifteen or twenty rods; his office was at No. 7 Park Place.

Cross-Q. 130. Why did Mr. Ransford accompany you, and what had he to do about it?

A. He was a party interested in the verbal agreement entered into at the time of the execution of this agreement, Exhibit Secombe Original, and was present when the arrangement was made.

Cross Q. 131. How was he interested?

A. As being a part owner of one of the patents that was to be put into the hands of the trustees for to obtain compensation from the government.

Cross Q. 132. How was he interested in the patent described in the instrument which you say was cancelled?

A. As I stated before, the two or more patents were to be put into the hands of two trustees, and the collection from the government was to be controlled and managed by them, and the avails of which should be divided between the parties interested; each trustee to have the control, each one half of any avails that might be received from any collection or sales of said patents.

Cross Q. 133. Can you tell of what advantage it was to Mr. Ransford to have this original exhibit cancelled?

A. Yes; substantially the same as to either of the parties to the agreement entered into on the occasion referred to in my last anwer, but perhaps not exact in amount.

Cross Q. 134. Was he in any way interested in the patent described in the original exhibit?

A. In the same manner that I have before stated.

3219 Cross-Q. 135. What interest did Mr. Ransford have in the patent that was issued to Norton, on the 14th April, 1863, and reissued to Helen M. Ingalls on the 4th October, 1870?

A. Only as I have before stated.

Cross Q. 136. You have not stated anything on that subject, as I unde'stand it; therefore, I would ask you to answer the question specifically, if you can.

A. My answer is the same as before; none to my knowledge, except as before stated at that time, at the time that he called upon Mr. Secombe with me.

Cross-Q. 137. Well, then, if this original exhibit was canceled relating exclusively to the patent issued to Norton, and reissued to Miss Ingalls, as above stated, Ransford had no interest, had he, in having it canceled or continued to exist?

A. His interest to have it cancelled was that the understanding and agreement was not carried out; I am not aware that Mr. Ransford ever had an assignment in a legal form of any portion of the patent issued to Marcus P. Norton, in 1863.

Cross-Q. 138. Mr. Ransford, then, was interested in having the parol agreement with Secombe carried out and not in having it rescinded; wasn't he?

A. He felt an interest in having the agreement cancelled when Mr.

Secombe refused to sign the instrument which was drawn up in accordance with the verbal understanding and agreement as before stated.

Cross-Q. 139. So it was a matter of sentiment or feeling on his part in going with you to Socombe; was it?

A. That he is better qualified to tell than I am.

Cross-Q. 140. Was there any table in this office at the hotel where you say you and Norton met?

A. I think there was a table or desk.

Cross-Q. 141. Did he sit down at that table or desk to do that writing?

A. I think he did.

Cross-Q. 142. Did you sit down with him?

A. I don't think I sat down at that time; I think I stood up by him or near him at that time.

Cross-Q. 143. Did you do your writing in that instrument at that desk or table?

A. I think not.

Cross Q. 144. Where did you do it?

3220 A. I can't tell you whether I did it in the office or whether I did it in my room.

Cross-Q. 145. You are positive, are you, that you made this endorsement on this instrument within 20 minutes after you received it; are you?

A. I think I did; I did it right away.

Cross Q. 146. What do you mean in that endorsement by saying on demand?

A. It would be more proper if I had said after demand; I received the document after I had demanded it; that is what I me'nt by the memoranda.

Cross-Q. 147. Did you mean by the demand from Norton or Secombe?

A. The demand on Secombe.

Cross Q. 148. You say in this memorandum written by you, this instrument was surrendered to J. D. Green, as attorney for J. Shavor and A. Corse, on demand and cancelled—what do you mean by saying cancelled there; or what did you do to cancel the instrument after you received it?

A. I did nothing to cancel it; I wrote the memoranda for a memorandum only.

Cross-Q. 149. Does not this memorandum clearly imply that this instrument was cancelled after you received it?

A. I think it does not; it was not intended to imply anything of the kind.

Cross-Q. 150. You say you received this instrument from Mr. Norton exactly as it now is, with the exception of your endorsement upon it, on the 30th March, 1872, at the hotel 17 and 19 Park Row, in the city of New York; can you tell why the endorsement on the original instrument, which was made in New York on the 30th March, 1872, was dated at Troy, N. Y., on the 3d day of the subsequent month?

A. I cannot say why Mr. Norton made the date at Troy, and on the 3d April; I was aware of the fact as soon as he handed it to me, and for that very reason I wrote the memorandum upon the edge of the instrument.

3221 Cross-Q. 151. Did you call his attention to the fact that the endorsement was dated at the wrong time and place?

A. I think I did.

Cross-Q. 152. What did he say?

A. I think he stated it made no difference as the instrument was thoroughly cancelled; I can't give the words, it was that in substance.

Cross-Q. 153. Did you observe upon the letter when it was delivered to you this endorsement: P. S.—I delivered the same to J. D. Green of Troy, N. Y., on the 3d day of April, 1872, for cancellation, &c.?

A. I think that must have been on it at the time.

Cross-Q. 154. Did you call Mr. Norton's attention to the fact that he had endorsed a false statement on this letter at the time that it was delivered to you?

A. I can't say whether I did or not.

Cross-Q. 155. This endorsement states that the same (referring to the contract) was delivered to you on the 3d day of April, 1872, for cancellation; does not that imply that the paper was not cancelled when it was delivered to you?

A. It would imply that had not Mr. Norton's attention been called to it at the time, and the memoranda that were written upon the letter and on the face of the instrument or contract; also the erasures were made by Mr. Norton, in my presence and that of Frederick G. Ransford, in the hotel before referred to, before its delivery to me.

Cross-Q. 156. What did Mr. Norton say when his attention was called to the fact that his endorsement stated it was to be delivered to you to be cancelled?

A. As near as I can get the substance of what was said when I called his attention to the date of the memorandum, that it made no difference —that it was pretty thoroughly cancelled.

Cross-Q. 157. Did you see Mr. Norton make these endorsements and these pen marks at the bottom of the original instrument at the same time while he was sitting at that desk at the office of the hotel before mentioned?

3222 A. Possibly he might have got up during the time, but it was done within a few minutes and before the document was given to me.

Cross-Q. 157½. Were they all done at the same place in the hotel?

A. In the room there at the table or desk.

Cross-Q. 158. Will you swear that these pen marks across the signatures to the original instrument, and the other defacing marks made at the bottom thereof, are written with the same ink that was used in making the endorsement on the original instrument purporting to be signed Marcus P. Norton, and dated April 3, 1872?

A. I will not, from the fact that there are usually a number of ink stands on a table or desk, but they were made before the paper was delivered to me.

Cross-Q. 160. Were they made at the same time?

A. What do you mean by the same time, or what am I to understand by the same time? The writing and the marks I have before described was made within the space of a few minutes or a short time.

Cross Q. 161. I mean to ask whether or not when Norton sat down at that table or desk as you say, to cancel this instrument, he then and there wholly cancelled it as it is, excepting your endorsement upon it?

A. He might have got up during the time, as I have stated before; that I would not say.

Cross-Q. 162. Do you think that after he made the endorsement upon the instrument he got up and went away, and then came back and took a pen and took ink from some other ink stand to make the pen marks and scrawls at the bottom of the instrument?

(Objected to as immaterial.)

A. As I have stated before he may have got up before finishing the cancellation and erasures, and may have taken a different ink or ink from a different ink stand from that which he used in writing the memorandums.

3223 Cross-Q. 163. Will you swear that across the name of Charles Eddy, Jacob Shayor, and Albert C. Corse there are not three straight lines made with the same ink as your endorsement is written with upon this paper?

A. I will not; there seems to be something of that character.

Cross-Q. 164. Can you give any reasons why those straight lines are drawn across those names and none across the name of Secombe?

A. I don't know of any.

Cross-Q. 165. Are you very confident that the signature to that letter attached to that original exhibit is the handwriting of W. W. Secombe?

A. I am quite confident that it is; I have compared it with signatures to letters written by him, and I think it would take an expert to make a signature to resemble his writing so closely; but I could not detect it on comparison with several of his letters.

Cross-Q. 166. Is there not a manifest difference between the signature to that letter and the signature to the original exhibit?

A. There is some difference in the general appearance, but it is manifestly written by the same person, in my judgment.

Cross-Q. 167. You stated that Mr. Norton suggested you as one of the trustees under that parol agreement that was made at the time the parties entered into this original exhibit; when was that?

A. I can't tell the date, but it was during the nego'tion.

Cross-Q. 168. Can you tell the month or year?

A. I can tell the year.

Cross-Q. 169. State as nearly as you can the time.

A. Well, it was in 1871, after February.

Cross-Q. 170. That is as near as you can come to it, is it?

A. Yes, without looking at some memorandums that I have.

Cross-Q. 171. You and Mr. Norton were on perfectly friendly terms at that time, were you?

A. During those negotiations I think we were.

3224 Cross Q. 172. Where do you stop in this city?

A. I stop in the International; I stopped there last night; a few nights before I stopped up town with Mr. Smith.

Cross-Q. 173. Is the International the same as used to be the hotel 17 and 19 Park Row?

A. Yes, sir.

Cross-Q. 174. Were you made aware of the fact that anybody had been there to examine their records to see whether Mr. Norton had been there the last of March or the first of April, 1872?

(Objected to as immaterial.)

A. I was made aware that Mr. Norton and some other had been there to inquire about the register of 1872. I was also informed that the register of 1872 had been broken up and destroyed, and that the only record was a transcript of part and portions of their register for that year and some other years.

Cross-Q. 175. Did the landlord or bookkeeper or other clerk tell you that he had no means of telling who was there in 1872?

(The same objection.)

A. Not entirely.

Cross-Q. 176. Did the books or papers which they have show that you were there in March, 1872?

A. Yes, sir.

Cross-Q. 177. Does that transcript show that Mr. Norton was there in 1872?

(Objected to, as the books are the best evidence.)

A. I am not aware whether it does or does not, but it's my impression that it does not, and that there are skips about dates where there is no transcript of persons who stayed there.

Adjourned to Friday, January 30, 1880, at 11 o'clock a. m.

3225 NEW YORK, *January* 30, 1880—11 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before.

Hon. George H. Williams, absent.

Cross examination of JEREMIAH D. GREEN, continued by MARCUS P. NORTON, Esq.:

Cross-Q. 178. I direct your attention to Defendants' Eddy's Exhibit Secombe Original, January 23, 1880, J. A. S., Ex'r, which I now hand you, and I call your attention particularly to the following words: "Troy, N. Y., Apr. 3, '72," on the same page upon which the signatures to this exhibit are found, and also to the following words: "Troy, N. Y., April 3, 1872," and inasmuch as you have already stated substantially that you stood near by and saw Norton write upon the letter attached to that exhibit, and also to writing on the back of it, each of which appear over his name, I now ask you to state whether the words that I have quoted in the question were written at the same time, or upon the same occasion, or at the same place, Nos. 17 and 19 Park Row, in this city, where you say you saw Norton do the writing which you allege he did do on that instrument and on the 30th day of March, 1872.

A. The words and figures referred to in the question, as well as the entire note or memorandum upon the back of the letter, and the words and figures referred to written across the body of the instrument termed in suit Secombe original, were written and made by Marcus P. Norton, on the 30th day of March, 1872, in the hotel No. 17 and 19 Park Row, in the office room of that hotel, or a room adjoining the office; but whether there may have been some little time intervening between the commencement and finishing of this writing, I cannot say; Mr. Norton attached the letter to the body of the instrument in that hotel at that time and day.

3226 Cross-Q. 179. In your last answer you use the following words, namely: "But whether there may have been some little time intervening between the commencement and finishing of this writing, I cannot say." Give your present best recollections on that subject.

A. I have already given my best recollections at this time in my last answer.

Cross Q. 180. And those recollections are as good and as correct, and the court may depend upon them for correctness and truthfulness, and no more so than any and all other matters which you have testified about with reference to that writing; I mean each and every thing you have testified about concerning it; is that it?

(Objected to as immaterial, incomprehensable and absurd.)

A. My statement in relation to it, sir, is true according to my best recollection at this time; I will not undertake to dictate to the court anything in this matter.

Cross-Q. 181. At the time you made answer to the last question, did

you comprehend and understand that question at that time, and while you were attempting to answer it?

A. My answer was in accordance with my understanding of the question.

Cross-Q. 182. You will please state your understanding of that question.

A. I have already stated it.

Cross-Q. 183. State it again.

A. I would like to know the object.

Cross-Q. 184. Do you decline to answer the question?

A. I ask for information; I do not decline anything; as a witness I have a right, if I do not understand the question, to have it explained, so that I may know how to frame an answer if the answer already given is not satisfactory.

3227 Cross-Q. 185. If, from the time the first cross-question was put to you on this cross-examination down to this present question, you have answered a single question during the cross-examination intervening that you did not fully and fairly understand at the time you made your answer to it or them in answer to this question; I ask you to state such question or questions by the number which stand to them on this record, and if you desire time for that purpose you may have all the time you require to ascertain about that matter.

A. I have not examined over the record of the cross-examination, neither do I know where the numbers, or what the numbers are to the several questions that have been put to me, and if I am to understand that I am requested to examine the record so as to be prepared to distinguish them by their numbers, I should require some time, or hours to do so, and to be furnished with a copy of the evidence or questions put to me on cross-examination in this case.

Cross-Q. 186. I now give you the opportunity to take the original record now before the examiner, of your cross-examination, together with all the time you desire, for the purpose of ascertaining whether you have answered any question on your cross-examination, or any question during your examination-in-chief that you did not at the time when you made your answer to each and every such question fully and fairly understand the same at the time the examiner read them to you, and at the time you were making your answers as they now appear upon this record, not only during your cross-examination but also during your direct examination. Do you desire the opportunity that I offer you for that purpose, and will you take the original record here in the presence of the examiner and take time sufficient to examine it to ascertain the fact whether any question was answered by you that you did not correctly understand at the time? I give you this opportunity and make you this offer in view of the answers you have made in answer to questions put to you to day.

3228 (Counsel for defendants Clexton and Caswell objects to this mode of examination, and especially to the proposal to take up further time in an examination of this testimony by the witness, and requests the witness not to avail himself of the offer of the counsel for the complainant.)

A. I will examine the record before I sign it and make explanation where I deem it necessary; I will not avail myself of the privilege offered by the counsel at this time.

Cross-Q. 187. You desire to be understood, then, that at this present time you cannot say whether you have answered any question, either

during your cross or direct examination, that you did not fully and fairly understand at the time when the examiner read them to you, and you answered them; is that it?

A. There may be something that I wish to explain; I can't say whether there is or not.

Cross Q. 188. You do not know, then, at this present time whether the answers you have made on cross-examination, as well as on your direct, are or are not correct in point of fact; is that it?

A. I think they are, in the main.

Cross-Q. 189. Your last answer contains all that you know with reference to the several matters about which you have testified on this examination; does it not?

A. With what I have said before in relation to examining the record and making such explanations as may occur to me at that time.

Cross-Q. 190. In your answer to Cross-Q. 178 you state: "Mr. Norton attached the letter to the body of the instrument in that hotel, at that time and day;" were you asked in Cross-Q. 178 anything concerning the subject matter I have quoted from your answer to it?

A. I think not.

Cross-Q. 191. Do you know whether there was or was not?

A. I did not discover it when the clerk read it now.

3229 Cross Q. 192. Did you discover any such thing when you answered that question as being called for by it?

A. Not directly.

Cross-Q. 193. Did you indirectly make any discovery of that kind at that time?

A. The same answer.

Cross-Q. 194. Being under cross-examination, and as by your last answer you have admitted under oath that you testified about matters and things which at the time you knew were not contained in the question submitted to you, I ask you why it was that you mentioned those things and directed the examiner to take them down as a part of your answer to that question, of which you knew at the time you were not inquired of concerning?

A. Because I considered it closely allied to the other part of the question, which was equally true in reference to the same document referred to in the question.

Cross-Q. 195. Paste and pasting a paper to another paper is the same as ink and the writing on a piece of paper, is it not?

A. No.

Cross-Q. 196. I request your attention again to this same exhibit, to the writing in purple ink, signed J. D. Green, and I ask you who wrote that, if you know?

A. I wrote it.

Cross-Q. 197. Is that the writing and that the signature which, in your direct-examination, you say you put there within twenty minutes after, as you say, Norton did the writing on that same paper of which you have spoken in both of your examinations?

A. That is the writing; I think it was put there within twenty minutes; it might have been put there within a shorter time, not much.

Cross-Q. 198. Have you any doubt whatever in your mind that you put that writing there, as you have stated, within twenty minutes of the time when you allege that you saw Norton do the writing that you have spoken of, in that hotel on the 30th March, 1872?

3230. A. I have no doubt at my present recollection; I know I wrote it and within a short time after Mr. Norton handed it to me, and

after his having written the memorandums before named, and signed by him.

Cross-Q. 199. Now give the time of day of that day when those several writings of which you have spoken took place at that hotel, as you have stated they did?

A. I cannot recollect.

Cross-Q. 200. Is this writing which is in your handwriting on that exhibit all the evidence or the data which you have by which you fix the 30th day of March as the time, and that hotel as the place where you say you saw Norton do this writing, and where, within twenty minutes thereafter you procured a bottle or inkstand containing purple ink and wrote that which appears above your name on that instrument?

A. I have other evidence.

Cross-Q. 201. You have?

A. Yes.

Cross-Q. 202. Now for what purpose did you do the writing which you say you did on that paper, and why did you write it on the margin at right angles with the signatures Eddy, Shavor and Corse and Secombe?

A. I wrote it as a memorandum which would show the date that it was delivered to me, and show its cancellation and date in the hands of other persons who might have it; I put it on the margin opposite the names of the parties to the instrument because it was a convenient place to put it.

Redirect by ESEK COWEN, Esq.:

Redirect Q. 203. Have you any distinct recollection as to who made the straight marks through the names of Eddy, Shavor and Corse, running through those signatures from end to end?

A. I have no distinct recollection; I may have done it myself before Mr. Norton made the diagonal or cross marks over these signatures.

3231 Redirect Q. 204. State whether or not those straight and cross marks were all on the paper at the time it was finally delivered to you by Mr. Norton.

A. They were, when it was finally delivered to me by Mr. Norton; I think that I examined the instrument before any cross marks or memorandums were written upon it.

Redirect Q. 205. (Envelope shown witness.) Do you recognize the envelope now shown you?

A. I do.

Redirect Q. 206. What was the enclosure of that envelope when you first saw it, and when, and where did you see it?

A. I saw it first at the hotel, 17 and 19 Park row, on the 30th day of March, 1872; it contained this Exhibit Secombe Original.

Redirect Q. 207. What, if anything, was written on the outside of the envelope at that time?

A. There was written the name of Marcus P. Norton, Esq.

Redirect Q. 208. That name appears to be struck out; who did that?

A. Mr. Norton made the cross marks across the name with a pen.

Redirect Q. 209. Who delivered it to you, and what, if anything, did it contain?

A. Mr. Norton delivered it to me on the day above referred to, and at the hotel referred to; it contained this Exhibit Secombe Original, in the same condition except wear, and the marginal note made by me.

Redirect Q. 210. Who wrote the direction that now appears on the outside of the envelope?

A. Mr. Norton.

(Envelope offered in evidence by defendants Clexton and Caswell, and it is marked Defendants' Exhibit Secombe Envelope, J. A. S., Ex'r.)

Redirect Q. 211. What, if anything, has been done with that envelope since you received it?

A. I have always kept the document Secombe original in it,
3232 except when I exhibited it to Eddy, Shavor and Corse, and until I delivered said document to Mr. Corse for his use.

Redirect Q. 212. Do you recognize the ink in which the memorandum of March, 1872, was written?

A. I do.

Q. 213. What ink do you think it was?

A. It is a species of purple ink, or a bluish purple ink; I think I made it myself, or made the mixture; I generally carried a small pocket inkstand filled with that or a similar ink.

Recross examination of the witness J. D. GREEN, by Marcus P. Norton, Esq.:

Recross-Q. 214. On your last redirect an envelope was shown you which you say contained the exhibit now under consideration, and which you say was delivered to you by Marcus P. Norton in the city of New York, at the hotel Nos. 17 and 19 Park row; was the paper in the envelope at the time that Norton delivered it to you, at that time and place?

A. It was.

Recross-Q. 215. Was that envelope sealed at the time he delivered it to you at that time and place?

A. My impression is it was not.

Recross-Q. 216. Was it ever sealed?

A. I am not positive.

Recross-Q. 217. But you have seen it to day, have you not?

A. I have.

Recross-Q. 218. According to your story concerning it to-day, it has been in your possession since the 30th of March, 1872; did you frequently see it during the period from that time till now?

A. It has been in my possession, with the exception of such times as it was in the hands of Eddy, Shavor, and Corse for examination, which was but a few minutes at a time, and until I delivered it to Mr. Corse a short time ago, I have seen it several times; I had it filed away with other papers where I knew it was safe: the number of times that I looked at it or examined it since it came into my possession I cannot state.

3233 Recross-Q. 219. Approximate the number of times you have seen that envelope and paper since the 30th day of March till to-day.

A. It would be only guess-work to attempt to approximate.

Recross-Q. 220. Since your evidence on this occasion shows that you are something of an expert at guessing, suppose you guess at this matter and state the number of times by the process of guessing that you have seen this envelope and paper during the time named, and particularly the envelope?

(Objected to, 1st, that the question is insulting; 2d, that the guess of the witness is not evidence.)

A. I do not claim to be an expert in guessing as the counsel intimates, and, as I said before, I can't tell the number of times that I have examined the envelope and the document which it contained.

Recross-Q. 221. Have you seen the envelope fifty times during the time inquired about?

A. I may have done, I can't say.

Recross-Q. 222. Do you know whether you saw it at all during that time?

A. Yes, I do.

Recross-Q. 223. When and where was that?

A. At my house a good many times, and at the office of Shavor & Corse.

Recross-Q. 224. For what purpose, if any, did you see and examine that envelope at your house for a great many times, as stated in your last answer, and during the time I am inquiring about?

A. I didn't say that I examined it a great many times.

Recross-Q. 225. Did you ever examine it during this time, at any time, and for any purpose?

A. I did.

Recross-Q. 226. About how many times and for what purpose?

A. Well, probably four or five times, for the purpose once or
3234 twice of showing it to Mr. Shavor at my house, I think, in connection with Mr. Ransford; I also examined it with Mr. Eddy and Mr. Corse, and I think Mr. Shavor, at the office of Eddy, Shavor and Corse; I also took it out and showed it to Mr. Secombe, the brother of W. W. Secombe, as I understand; we examined it together at my house; I also examined it with Mr. Clarke; I showed it to him at his request; and many other times have I seen it when I had been overhauling my papers.

Recross-Q. 227. At what time did you show it to Mr. Clarke at his request?

A. I can't say what time it was, but about or not far from the time they commenced taking testimony before Mr. Brown in Troy, in this case.

Recross-Q. 228. What Mr. Clarke do you refer to in your last answer?

A. Mr. Clarke, the defendant James' attorney.

Recross-Q. 229. Did you ever carry that envelope about your person for any purpose, in your pocket or otherwise?

A. Yes, sir.

Recross-Q. 230. Well, about how many times since March 30, 1872?

A. I carried it in my valise from New York to Troy; I carried it in my pocket from my house to the office of Eddy, Corse & Co.; I carried the document but not the envelope in my pocket from my house to the office of A. C. Corse; I do not know what the firm name is.

Recross-Q. 231. At what time did you carry that envelope in your valise, from New York to Troy?

A. I think I left New York on the night or evening of March 30, 1872, for Troy, but I can tell positively by examining my memoranda.

Recross-Q. 232. What memorandum do you refer to in your last answer?

A. Memorandum of expenses.

Recross-Q. 233. Where is that memorandum now?

A. I think I have got it here in New York; it is possible that I may not have it now.

Recross-Q. 234. Do you know where it is at this time?

A. I am not positive, as I said before.

3235 Recross-Q. 235. You are as positive about that as any matter you have testified about here, are you not?

A. I am not.

Recross-Q. 236. I ask you now to state whether, on the evening of the 30th March, 1872, you left New York for Troy?

A. It is my impression that I did; I can't say positively.

Recross-Q. 237. If you did not leave New York for Troy on the evening of 30th March, 1872, at what time did you?

A. My impression is, that is the time that I did leave.

Recross Q. 238. Are you willing to swear and do you swear that you left New York on the evening of the 30th March, 1872, for Troy, as you now remember it, or as your best present recollections as to that matter?

A. That is my best recollection at present.

Recross-Q. 238½. You are certain, however, that at that time or within 24 hours of it, you did leave New York for Troy, are you not?

A. I am very confident of it.

Recross-Q. 239. And you have no doubts on that subject, have you?

A. I haven't; as I said before, it is my best recollection.

Recross-Q. 240. That is not the question; the question is, have you any doubts in your mind that either on the 30th March, 1872, or else within 24 hours thereafter, we will say 48 hours thereafter, you left New York for the city of Troy in this State?

A. I have no doubt at preesnt.

Recross-Q. 241. Anybody with you on your journey from New York to Troy with whom you had personal acquaintance at the time referred to in my last previous questions?

A. I can't say positive, but I think Frederick G. Ransford was with me.

Recross-Q. 242. Do you know whether Ransford was with you or not on that occasion?

A. I wish to know what occasion.

3236 Cross-Q. 243. I mean on the occasion and during your journey from New York to Troy, either on the evening of the 30th March, 1872, or at some time subsequent thereto, and within 48 hours of that time when you say you went from New York to Troy; that is the time and occasion to which I now refer.

A. I think Ransford was with me, but I am not positive.

Cross Q. 244. Anybody else that you know on that occasion?

A. Not that I now recollect of; that may have been.

Cross Q. 245. After you arrived in Troy at the time referred to, how long did you remain there before going anywhere else out of the city?

A. Not but a few days.

Cross-Q. 246. Well, about how many days?

A. I couldn't tell exactly. But I was soon after in New York, and soon after that in Washington on about the 7th or 8th April, or thereabouts in Washington. That I can't say within a day or two or three. I may be mistaken as to that time coming to New York and going to Washington.

Recross-Q. 247. We will now return to the matter of the envelope which you have given testimony about to-day, and now I ask you again, whether you can say that that envelope was sealed with the Secombe exhibit, when or at that time you say Norton handed it to you on the 30th March, 1872?

A. I think it was not.

Recross Q. 248. If not sealed at that time, and should it now appear to be sealed, who sealed it, if you know?

A. If it is sealed now and was sealed when I received it, the end or

side was open when I received it. I did not break any seal myself to take out the instrument or for any other purpose.

Cross-Q. 249. Who ever charged you with having broken the seal to that envelope in the manner stated by you in the last part of your last answer, so as to take out the instrument that was in it?

A. I have not said that any one did or had.

3237 Recross-Q. 250. If you did not do just that very thing, why were you particular to state in your last answer that you did not do it, when no one had asked you a question concerning it?

A. I considered the questions put in relation to that matter as tending to imply indirectly to that point.

Cross-Q. 251. So you thought you would anticipate a question of that kind and make your answer before the question was put; is that it?

A. I answered the question in the manner I did because it was true, and for the reasons I stated in my last answer.

Cross-Q. 252. Now, I desire you to state whether that envelope was or is opened at the end or side, so that whatever paper it did contain might be removed?

A. It was when it left my hands.

Cross-Q. 253. At what time was that?

A. This afternoon.

Cross-Q. 254. Well, at which place was that opened; the end or along the side?

A. I can't say whether it was opened at the end of the envelope or at the side or edge. That I did not pay any particular attention to.

Cross-Q. 255. Whichever it may be, by whom was that opening made, and when, if you know?

A. I don't know. I don't recollect.

Cross-Q. 256. You don't know anything about it; is that it?

A. I will not be positive whether it was sealed or not, as I have said before, and I will not be positive whether or not Mr. Norton opened it at the edge or end.

Cross-Q. 257. You have stated on your redirect examination that that envelope has upon it the directions of "Charles Eddy, Troy, N. Y."; if you know, for what purpose were those words put there?

A. I suppose it was directed to Charles Eddy, in my care, Charles Eddy being one of the parties that had signed the instrument which the envelope contained, and one that had directed or requested me to procure its cancellation.

3238 Cross-Q. 258. Did you deliver that envelope and the instrument you say it contained to Charles Eddy, as directed to do on and by the envelope, namely, Charles Eddy, Troy, N. Y.?

A. I did.

Cross-Q. 259. When?

A. I can't tell the time, but I notified him of the fact of the cancellation of the instrument the first opportunity that I had.

Cross-Q. 260. I again ask you to state whether, on arriving at Troy at the time when you say you left New York for Troy on March 30, 1872, you obeyed the directions contained upon that letter, namely, the immediate delivery of the envelope and its contents to Charles Eddy, at Troy, N. Y.?

A. There was no such mandate on the envelope as immediate delivery.

Recross-Q. 261. What directions, if any, were upon that envelope which you were to follow in the delivery of it and its contents to anybody?

(Objected to, as the envelope shows for itself and is the best evidence.)

A. Nothing mandatory. It was directed to Charles Eddy, esq., Troy, New York, I think, by J. D. Green.

Recross-Q. 262. For what purpose were the words Charles Eddy, Troy, New York, put upon that envelope?

(Counsel for Clexton and Caswell objects; as the witness did not write the words he cannot know for what purpose they were written.)

A. I suppose for the purpose of showing Mr. Eddy when he received the document and envelope that he, Norton, had written that direction upon the envelope, as there could be no other possible motive that I could see, of his putting a direction upon the envelope, as I was then acting in behalf of, and for, Shavor, Corse & Eddy, and by their request.

3239 Recross-Q. 263. You were where, acting as agent for Shavor, Corse & Eddy?

A. In the city of New York, and at the time this inscription was put upon the envelope I was at the hotel No. 17 and 19 Park Row.

Recross-Q. 264. Now, at what time was that?

A. I think it was on the 30th day of March, 1872.

Recross-Q. 265. You say in your last two answers that you were here in New York, March 30, 1872, acting as the agent of Shavor, Corse & Eddy; what did they employ you to do as their agent at that time?

A. One of the things was to procure the cancellation of this agreement between Eddy, Shavor & Corse and W. W. Secombe, marked "Secombe original" in this cause.

Recross-Q. 266. You saw Mr. Secombe about that matter, did you?

A. I did.

Recross-Q. 267. Did he cancel it, as you had requested him to do?

A. Mr. Norton cancelled it.

Cross-Q. 268. Did Mr. Secombe cancel that instrument, as you had requested him to do, at that time? I demand of you an answer, yes or no.

A. I don't answer any question because of a demand, and I don't think it is gentlemanly in the counsel to demand an answer to any question; nevertheless, I will answer this: that I did not see Mr. Secombe cancel or obliterate the document referred to.

Recross-Q. 269. I again ask you whether W. W. Secombe, on that occasion, in any manner or form, cancelled the instrument referred to, and I again demand of you your answer to this question, either aye or nay to it?

A. I say nay, except through Mr. Norton.

Cross-Q. 270. Do you know the signature of W. W. Secombe?

A. I think I do.

Recross-Q. 271. As made by him on March, 1872?

A. I can't say from my present recollection that I have seen
3240 but one signature that was made purporting to be the signature of Wm. W. Secombe, and made the latter part of March, 1872.

Recross-Q. 272. I now show to you one of the records of this court, signed and sworn to by W. W. Secombe on the 4th day of March, 1872, and filed in this court on that day and year; take it, examine the signature, and see if that is the signature of Secombe.

(Objected to. In the first place, it has not been proved that the paper shown witness is a record of this court, or to have been filed in this court; secondly, that it is not the proper way of comparing handwriting.)

A. It resembles his handwriting, as I had seen it, very closely.

Recross-Q. 273. Upon this same court record, which is the answer of the defendants in the case of Thomas J. W. Robertson vs. The Secombe Manufacturing Company, and contains thirty-nine pages of printed matter, and marked upon its back, at the upper end, in blue pencil, the following number "5-344," and at the bottom the following words, "Filed 4th March, 1872," on page 38 appears, in two places, the name of Marcus P. Norton, in writing; look at those, and state whether they are the signatures of his, as made by him in March, 1872, if you know, and if you do not know, of course we don't expect you to say anything about it.

(Objected to. The same objections, and that it has not been shown that said paper is material to this case, and, therefore, it is improper to attempt to prove such signature in that way.)

A. Without examining the document, as requested in the question, the signatures in this paper of Marcus P. Norton resembles his signature very closely when written with a quill pen.

Adjourned to ten o'clock a. m., Saturday, 31st January, 1880, at same place.

3241 NEW YORK, *January* 31, 1880—10 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before.

Hon. G. H. Williams absent.

Cross-examination of JEREMIAH D. GREEN continued by MARCUS P. MORTON, Esq.:

Cross-Q. 274. I now hand to you from the files and original records of this court several separate papers, the first of which is a notice for the taking of testimony in the case of Robertson vs. The Secombe Manufacturing Company, fixing the time and place for those proceedings; it is signed Marcus P. Norton, and dated New York, the 12th June, 1872, and belongs to the file in the suit I have named; the other seven papers which I show you are original papers belonging to the files of this court in the case of The Union Paper Bag Machine Company, Ellis A. Hollingsworth and Leonard Whitney, jr., versus John L. Newell and George H. Mallory; the first of which is the original answer in that cause, signed and sworn to on the 7th July, 1873, endorsed and countersigned "Marcus P. Norton, solicitor and counsel, Troy, N. Y."; the next is dated May 26, 1873; it is signed "Marcus P. Norton," and addressed to the clerk of this court; the next is a paper signed "Marcus P. Norton," and is his appearance in that case coupled with notice of retainer and of appearance; the next is an affidavit made by Maurice Flaherty on the 15th September, 1873; the next is an affidavit made by Edward Stanley on the 16th September, 1873; and the next is an affidavit made by George H. Mallory on the 16th September, 1873, and containing thirteen pages of writing; and the next is dated the 24th March, 1874, signed "Marcus P. Norton," and is a notice addressed to George Harding, solicitor for complainants; take this package of several
3242 papers, eight in all, look at them under the dates that I have given, and state in whose handwriting they are, if you know; I mean the body of those papers, including the name of Marcus P. Norton, wherever it is.

(Defendants' counsel objects to the question on the ground that all said papers appear to be papers made in former suits in which said Norton was connected, and that none of them are at all material to this case.

A. The first and second page therein, together with the signature thereto, is in the handwriting of Marcus P. Norton, in my judgment; the answer in the case of the Union Paper Bag Company and others v. Newell & Mallory appears to be in the handwriting of Norton, as his signature as solicitor and counsel; the notice of motion for time to take proofs in said case, with the signature, appears to be in his handwriting; the notice of retainer to the clerk in said case is also in his handwriting and signed by him; also the notice of retainer to George Harding, solicitor, is also in his handwriting; also the deposition of Maurice Flaherty in said case is also in said Norton's handwriting, with the exception of the signature; also the deposition of Edward Stanley in the said case is in the handwriting of Mr. Norton, except signatures; the deposition of George H. Mallory in the same case is in the handwriting of Mr. Norton, except the signatures.

Cross Q. 275. I now show to you a letter dated August 23, 1871, the National Hotel, Washington, D. C., addressed to the Commissioner of Patents, and signed Marcus P. Norton; I also show to you an affidavit made by C. C. Callan, September 14, 1871, at Washington, D. C.; and I also show to you an affidavit made by Marcus P. Norton 22d August, 1871, before C. C. Callan, notary public, at Washington, D. C.; I also show to you a paper dated 23d February, 1864, signed Jacob Shavor and Albert C. Corse; also an affidavit dated 18th February, 1870, attached to that paper, and also another affidavit signed John T. Lamport, 18th April, 1870, before C. R. Ingalls, one of the
3243 justices of the supreme court of this State, each of which are exhibits in this cause and were used before this court at the final hearing of this cause; take them and look at them, and state in whose handwriting those several papers are, excluding the marks made by the examiner on them, and also each and every signature, either by Norton or anybody else, that appears upon them.

(Objected to as immaterial.)

A. The body of these documents are written in the hand of Marcus P. Norton.

Cross-Q. 276. Since you were cross-examined by Mr. Williams, complainant's counsel, the other day, have you been to your home at the city of Troy, or at the city of Troy, N. Y.?

A. I have.

Cross-Q. 277. During that cross-examination you spoke of the importance and the necessity of some kind of memorandum which you said you had at home, in order to enable you to give correct and positive answers to certain questions proposed to you by Mr. Williams; did you bring such memorandums with you on your return from Troy, when you last came from there; and, if you did, have you not the same with you?

A. I brought some memorandums with me, which I have in this city; others I had not an opportunity to get together for want of time.

Cross-Q. 278. Did you bring the ones which you had reference to in your answers to the questions put to you by Mr. Williams?

A. That I cannot determine until I have arranged such memorandums and examined the cross-examination so as to know which or what memorandum to refer to.

Cross-Q. 279. You understood my last question, did you not?

A. I think I understood it.

3244 Cross-Q. 280. Cross-Q. 278 is here again repeated to you, and I demand of you an answer either yea or nay; and I further de-

mand from you at this time and place the production of the memorandums inquired about, if you have any such.

(Objected to, and to the demand in it; that it does not specify any particular memorandum, and that it is impossible for the witness to understand what memorandums are referred to; if the counsel will specify any particular memorandum the witness will produce it.)

Complainant's counsel says that the questions put with reference to the memorandums show that the witness was inquired of only concerning that which, on a former cross-examination, he referred to in answer to questions put by Mr. Williams. To that memorandum or those memorandums this inquiry and this demand has reference, and to which both question and demand are limited.

Counsel for Caswell and Clexton takes a further objection. The witness did not swear from any memorandum, but merely intimated that he might be more definite on certain points if he had certain memorandums which were at home; that as he did not swear from the memorandums, or any of them, counsel for the complainant has no right to their production.

A. Witness makes the same answer, and declines to produce any memorandums at present.

Adjourned to February 3, 1880.

FEBRUARY 4, 1880—11 a. m.

Met pursuant to adjournment.

Mr. JEREMIAH D. GREEN recalled:

3245 Q. (The memorandum agreement between Norton and Green, without date, shown witness.) About what time, according to your recollection, was this agreement signed by you and Norton?

A. In the fore part or middle of September, 1871.

Q. Then the memorandum agreement was executed before the Secombe agreement of October 7, 1871?

A. Yes, sir.

Q. Do you remember where this memorandum agreement was executed?

A. I do; in the city of Washington, at the National Hotel.

Q. While you and Mr. Norton were having the negotiations which resulted in this agreement, was anything said between you about an arrangement with Secombe of the nature set forth in the agreement of October 7, 1871?

A. I think there was; and after this agreement was made Mr. Secombe and me went to Washington together and saw Mr. Norton in relation to the Eddy, Corse and Shavor interest; also called upon Judge Mason, of the firm of Mason & Holloway, in relation to the interest they claimed to have in the patent of 1863 for legal services, as employed by Norton and Secombe in the examination before the Third Assistant Postmaster-General, in the fore part of 1871 or 1870. I am not sure whether it was commenced in December, 1870, or the fore part of the year 1871; this matter had been talked over between Secombe and myself, Shavor, Corse and Eddy before we went down to Washington; the date that we went I cannot give now.

Q. Do you know why the provisions of this memorandum agreement were not carried out? And if so, state the reason.

A. Mr. Secombe refused to sign the agreement drawn up in accordance with this memorandum, and the understanding had between the parties to the Secombe original in this case, on the grounds of the in-

terest or amounts the different parties owning, or claiming to own, the patents of 1863, 1869, December 16, 1862, were too large. Mr. Secombe was not willing that the parties represented by the trustee,
3246 Hatch, who was named in my stead at the suggestion of Mr. Secombe and Mr. Chittenden, the legal adviser of Mr. Hatch, should have the control of the one-half of any amount of moneys or other property that should or might be received from such patents, or either of them, from the government, or from any other source; that is, in substance, the reason that final agreement was not consummated.

(The answer and the question and the paper referred to by the witness are each and all objected to as incompetent, irrelevant and immaterial for any of the purposes embraced under the order of court by which these proceedings are had.)

J. D. GREEN.

Sworn to before me this February 5th, 1880.

JOHN A. SHIELDS,
Examiner, &c.

Adjourned to Friday, February 6, 1880, at 11 a. m.

JANUARY 23, 1880—11 a. m.

Met pursuant to adjournment.

ALBERT C. CORSE, a witness produced on the part of the defendants, being duty sworn, deposes and says:

Q. 1. What is your name, age, residence and occupation?

A. Albert C. Corse; I am fifty-six years of age; I reside in Troy, N. Y.; and I am a stove manufacturer.

Q. 2. In 1871 you were a member of the firm of Eddy & Corse, composed of yourself and Charles Eddy, and Jacob Shavor had formerly been a partner of yours and Mr. Eddy?

A. Yes, sir.

Q. 3. Did you, Mr. Shavor, and Mr. Eddy at that time have, or claim to have, an interest in the Norton patents for post-office cancelling-stamps?

3247 A. We did.

Q. 4. Did you then understand that William W. Secombe was assignee in trust for that portion of those patents which was not owned by Eddy, Shavor and Corse?

A. I supposed he had the title; I did not know what his special interest was.

Q. 5. Did you sign Exhibit Secombe Original, now shown to you?

A. I did.

Q. 6. If you were present at any interview between yourself, Eddy and Shavor, or either of you, and J. D. Green, in which the matter of obtaining a cancellation of this instrument was discussed, I wish you would state when and where that conversation was, and the substance of it, as near as you can recollect.

(Objected to as incompetent.)

A. As well as I recollect it, we had several interviews at the office of Eddy & Corse. Mr. Shavor, Mr. Eddy, Mr. Green and Mr. Norton and myself were present. Mr. Norton was complaining of the action of Mr. Secombe in the matter, and it was decided to demand a cancellation of the instrument. We all agreed to that.

Q. 7. Did you accompany Mr. Green and Mr. Ransford in making a call on Mr. Secombe?

A. I did.

Q. 8. What took place at that time?

A. Mr. Green made the demand of Mr. Secombe for the return or cancellation of the document. He asked Mr. Green if he acted as attorney for Eddy, Shavor and Corse; he said he did; Mr. Secombe then turned to me and asked if he was my attorney; I told him he was; he then said to Mr. Green that he would attend to the matter, as well as I recollect now.

Q. 9. How soon after that did you learn, if at all, that this Secombe agreement had been cancelled?

A. I think it was within a day or two.

Q. 10. Do you remember Mr. Green showing the cancelled instrument to you?

3248 A. I do.

Q. 11. Did he show it to any one else in your presence?

A. The first time I saw it I think Mr. Ransford was present; I saw it here in New York first; afterwards I saw it at the office of Eddy, Corse & Co., in Troy.

Q. 12. Was it shown to any one else there?

A. I have no recollection about its being shown to persons not parties to the contract; Eddy and Shavor were present, and saw it.

Q. 13. At any of these interviews before the paper was cancelled at which Norton was present, did he assert or state in any manner that the agreement Secombe Original was made by you without his knowledge, or that he had not consented to it?

A. He did not.

Cross-examined by Hon. G. H. WILLIAMS

Cross-Q. 14. You and Eddy and Shavor, as I understand, agreed with Secombe in the original marked Secombe Original to take from him, when he had collected it from the U. S., $30,000 for your interest in the patent for the post-marking and cancelling instrument?

(Objected to, that the instrument is the best evidence.)

A. We did.

Cross-Q. 15. You say Mr. Norton complained of what Secombe was doing; what complaints did Norton make?

A. That he was not pushing the matter to get anything from the government as he had agreed to or should, and that he was not willing to furnish him, Mr. Norton, sufficient funds to press the matter.

Cross-Q. 16. Do you know anything about the agreement dated January 9, 1871, made between Charles Eddy, as trustee for himself,

3249 and Jacob Shavor and Albert C. Corse, by which he agreed to convey their interest in the patent in question, and in other patents, to Marcus P. Norton and Helen M. Ingalls for the sum of $30,000?

(Objected to, that the agreement is the best evidence; and 2d, that the question is incompetent as it relates to evidence which, if it has any effect at all, is in violation of the stipulation by which Eddy was made a party to this action, and which fixes the rights of Eddy as defined by the agreement of October 23, 1869, or by that of October 7, 1871; and 3d, that the evidence is incompetent under the order of the court, which only permits evidence relating to the cancellation of the agreement of October 7, 1871, and that the question has no bearing upon such issue.)

A. I have no recollection of such an instrument now.

Cross-Q. 17. Did you ever hear Mr. Eddy say anything about it?

(The same objection as last above.)

A. I have no recollection of it now.

Cross-Q. 18. Have you stated all that took place at the time you interviewed Secombe as to the cancellation of the instrument in question?

A. There was some conversation between him and Mr. Green; Mr. Secombe was somewhat excited; he might have said the damn thing was not worth anything; he and Mr. Green had some conversation by themselves, and Mr. Secombe came over to the window where I was standing and showed me a window curtain that you could leave in any portion of the window; it was something new to me; I had never seen such before.

3250 NEW YORK, *February* 4, 1880—11 o'clock a. m.

Met pursuant to adjournment.

Present, counsel as before, Hon. George H. Williams being present.

ALBERT C. CORSE recalled:

Q. Look at the letter dated March 25, 1872, and marked J. A. S., exr., now shown you, and state whether or not you recognize that letter.

A. I do.

Q. When and where did you first see it?

A. Bridgeport, Connecticut; it was either the 29th or 28th March, 1872.

Q. How did you receive it at Bridgeport?

A. Through the mail.

Q. I see there is a memorandum on the outside of the letter signed Gus; by whom was that written?

A. It was written by my oldest son, Augustus P. Corse.

Q. What did you do upon receipt of that letter?

A. I came to New York and saw Mr. Jeremiah D. Green, Mr. Ransford, and Mr. Norton; I met Mr. Green on the street opposite 17 and 19 Park row; Mr. Ransford was with Mr. Green; we then went down Broadway to the office of a commissioner by the name of Kellock, I think; I gave Mr. Green a power of attorney; we then returned to the hotel, 17 and 19 Park row, where we met Mr. Norton; at Mr. Norton's request I went with Mr. Green and Mr. Ransford to the office of Mr. Secombe to confer with him about the cancellation of this Secombe agreement.

Q. Are you sure that that was the 29th March, 1872?

A. That is the date the instrument bears, and I think it must be that day.

Q. What instrument do you refer to?

A. The power of attorney I gave Mr. Green on that day; I have looked at it recently.

3251 (Objected to unless the power of attorney is produced.)

Q. Aside from that instrument, what is your best recollection, after seeing the instrument and having your memory refreshed by it, as to the day on which you and Ransford and Green met Norton at the hotel in Park row?

A. I know it was the last of March, 1872.

Q. Did Mr. Norton, at that interview, give any reason for not going himself to call on Secombe; and, if so, what?

A. He said he thought it was better for me to go with Mr. Green and Ransford, as he was attorney for Mr. Secombe.

Q. When and where did you first see the agreement Secombe Original after it was cancelled?

A. Mr. Green showed it to me either the same or the next day before I left New York on that occasion.

(Letter dated March 25, 1872, offered in evidence, and marked De-

fendant's Exhibit Letter Charles Eddy, dated March 25, 1872, J. A. S., ex'r.)

Cross-examined by Hon. G. H. WILLIAMS:

Cross-Q. Will you swear, Mr. Corse, that at the time you first saw that agreement after the alleged cancellation that it contained upon it all the writing and pen marks which appear upon it at this time?

A. I have a distinct recollection of the letter attached to it, also of the cancellation, and, to my best recollection, the last time I saw it it was in this room; it was in the same condition as it was when Mr. Green showed it to me, with the exception of some paper which appears to have been pasted on the document to hold it together; that is my best recollection.

3252 Cross Q. Are you sure that the papers that are pasted on it to hold it together were on it when you first saw it in this room?

A. I don't think they were.

A. C. CORSE.

Sworn to before me this February 4th, 1880.

JOHN A. SHIELDS,
Examiner, &c.

It is hereby admitted that Federick G. Ransford, a witness formerly sworn in this case, if produced by the defendants, Caswell and Clexton, would testify that he was at the hotel No. 17 and 19 Park row, New York city, on or about the 29th day of March, 1872; that on that day there was an interview between J. D. Green, Albert C. Corse, and said Ransford and Marcus P. Norton; that Green, Corse, and Ransford went to see W. W. Secombe, to obtain the cancellation of the Secombe agreement, at the request of Norton, who excused himself on the ground that he was counsel for Secombe; that the next day the same parties, with the exception of Corse, met at the same hotel, and Mr. Norton then wrote upon a written instrument across the lines thereof, and delivered the same, after writing upon it, to said J. D. Green.

And it is hereby stipulated that this statement shall be received and taken with the same effect as if said Ransford were sworn and had testified to the above facts, subject to any objection, by complainant as to the competency of said evidence, the same as if said Ransford had been called as a witness.

Defendant's counsel offers in evidence three letters heretofore marked by the examiner for identification, and they are marked respectively Defendant's Exhibit Norton Letter, August 29, 1871, J. A. S., ex'r, and Defendant's Exhibit Norton Letter, September 19, 1871, J. A. S., ex'r, and Defendant's Exhibit Norton Letter, October 5, 1871, J. A. S., ex'r.

Defendant also offers another letter marked for identification, and it is marked Defendant's Exhibit Norton Letter, September 29, 1871, J. A. S., ex'r.

3253 Defendant's counsel also offers in evidence the memorandum agreement without date heretofore marked for identification, and it is marked Defendant's Exhibit Norton & Green agreement, J. A. S., ex'r.

Defendant's counsel offers in evidence assignments from Albert C. Corse, of the city of Troy, N. Y., to Caroline G. Caswell, dated the 27th March, 1879, and acknowledged on the same day, and recorded in the Patent-Office at Washington, January 14th, 1880, conveying all his interest in the patent of April 14, 1863, upon which this action is brought.

Complainant's counsel objects to the introduction and reception of

the same as evidence in this matter, on the ground that the same is immaterial, irrelevant, and incompetent,

1st. Because the original records in the cause used at final hearing show that Mr. Corse had no interest whatever to transfer in the manner shown in the paper.

2d. Because under the order of this court by which these proceedings are being had the offer as well as the paper itself is neither admissible or permissible.

3d. Because upon the paper offered there is no certificate whatever showing that the paper offered has ever been recorded in the Patent-Office. It is objected to on each and all of the grounds that have been assigned.

Counsel for complainant now takes a further objection to that part of the paper offered beginning with the words "the interests" and ending with the words "notary public," and to that part the same objections are interposed that have been taken to the first paper called an assignment.

3254 Received and marked Defendant Caswell's Exhibit Corse Assignment, J. A. S., ex'r.

Counsel for complainant objects to the record just made by the examiner, and especially to the word "received," and assigns as objections each and every of those above stated.

Counsel for defendants Clexton and Caswell offers in evidence a certified copy of a general assignment dated March 31st, 1879, from Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., of the city of Troy, N. Y., composing the firm of Eddy, Corse & Company, to J. Albert Cipperly and Charles N. Stannard, conveying to them all the property of the said firm, and the individuals composing the same in trust for the *the* benefit of creditors. Recorded in the Rensselaer County clerk's office, April 1, 1879.

Complainant's counsel objects to the same being received as evidence, and assigns as reasons for those objections each and every of the objections taken as against the defendant Caswell's Exhibit Corse Assignment last above offered.

Received and marked Defendant Clexton's Exhibit General Assignment, J. A. S., ex'r.

To the same complainant's counsel objects in the manner and form last above stated.

Defendant Clexton also offers in evidence an assignment bearing date the 7th January, 1880, from J. Albert Cipperly and C. N. Stannard, the assignees named in the preceeding general assignment, to Samuel R. Clexton, conveying the interest of Charles Eddy, in and to letters patent of the United States, issued April 14, 1863, and all the reissues thereof. It is recorded in the Patent Office January 16, 1880.

3255 Complainant's counsel objects to the introduction and reception of the same in evidence, on the grounds already assigned against the other two papers that have been offered here this morning. in the manner stated in the record, and with the further objection that the letters patent granted by the United States, are only assignable by virtue of the patent act of July 8, 1870, and the amendments thereto, and,

2d. And further, letters patent of the kind stated can neither be sold under execution or by assignees under a general assignment under the laws of the State of New York, and not even by proceedings in bankruptcy, excepting as before stated under the act of July 8, 1870, and the subsequent act of Congress on that subject.

Received and marked Defendant Clexton's Exhibit Cipperly and Stannard Assignment, J. A. S., ex'r.

To the entries made by the examiner complainant's counsel interposes the same objections as last above.

Defendant Caswell now offers in evidence an assignment from Caroline G. Caswell to Herbert M. Caswell, dated 16th January, 1880, and acknowledged the same day, conveying all her interest in said patent and its reissues.

Complainant's counsel objects to the introduction and reception of the same in evidence, assigning therefor each and every of the grounds and reasons stated as objections to each and every of the other papers that have been made and produced, and further objects that if the general assignment of Eddy, Corse & Co. that has been produced here to-day be of any consequence whatever in these proceedings, it conveys in and by the terms thereof all the interest of Corse, if he had any, to Samuel R. Clexton, which was done previous to the alleged recording in the Patent Office of the pretended assignment of Corse to the Caswells,
3256 the patent law requiring that all deeds of assignment, if genuine, in order to be valid as against subsequent purchasers without notice must be recorded in the Patent Office within three months of the date thereof, a matter of which the records produced show was not done, and for this reason objection is taken to the same, in addition to the other objections, as it also appears from the papers produced that the so called Corse assignments were recorded within two or three days of each other in the Patent Office, which was a long time subsequent to the date of the general assignment, dated 31st March, 1879, and recorded in the clerk's office, county of Rensselaer, April 1, 1879. The date of the so-called Corse assignment, being on its face the 27th of March, 1879, about four days previous to the date of the alleged Corse assignment, previous to the date of the general assignment, by the firm of which Mr. Corse was at the time a member, as stated by opposing counsel, and, it is fair to presume, must have known of the embarrassments of that firm, and that they intended to make, as they did make within two or three days thereafter, a general assignment, as appears by the paper that has been offered on that subject.

Received in evidence and marked Defendant Caswell's Exhibit Caroline G. Caswell's Assignment, J. A. S., Ex'r.

The same objections to the entry the examiner has just made, as last above; and further objection is taken to the paper upon examining it since the objections were entered that this same Caroline G. Caswell, upon asking this court permission to become a defendant presented for the consideration of the court a pretended assignment of a much earlier date than this, as the records of the court will show, if I am not mistaken, and, further, that the paper has not been recorded in the Patent Office, which is necessary if the paper be of any consequence.

3257 Defendant Caswell offers in evidence an assignment from Herbert M. Caswell to the defendant Horace T. Caswell, dated January 16, 1880, and acknowledged on the same day, conveying all his right, title, and interest in said patent, and the reissues thereof.

Complainant's counsel objects to the introduction and reception in evidence, and assigns as the reasons therefor each and every that has been taken to the several papers that have to-day been offered and objected to in this record.

Received and marked "Defendant Caswell's Exhibit Herbert M. Caswell's Assignment, J. A. S., Ex'r."

Complainant's counsel objects to the introduction and reception in evidence, and assigns as the reasons therefor each and every that has been taken to the several papers that have to-day been offered and objected to in this record.

Testimony for defendants Caswell and Clexton closed February 7th, 1880.

3257*a* DEFENDANTS CASWELL'S AND CLEXTON'S EXHIBITS.

3258 *Defendant's Exhibit Norton Letter.—Aug.* 29, 1871.—*J. A. S., Exr.*

WASHINGTON, D. C., NATIONAL HOTEL,
August 29th, 1871.

J. D. GREEN, Esq.,
Troy, N. Y.:

DEAR SIR: I propose that an effort be made for a settlement of any and all differences in the stamp matter. Not because I do not firmly and truly believe that I am right in each and every position that I have heretofore taken, or that I have any doubt as to the result whenever I may get ready to move for final settlement by the government, but because I am convinced to-day that there is somebody at work trying to defeat us all. Now, if you represent the other parties in such a manner that what you do will be accepted by them in final settlement, and will come directly here to see me, I will meet you "on the square," and we will make an effort on both sides for a fair and satisfactory settlement of the whole matter. Let us come together in a spirit of kindness and fairness, and trust in the great and good Spirit to lead us to final and satisfactory results, and I have no doubt but you and I alone can fix up the whole matter. Let us avoid as much as possible all reference to the past, for I believe that I have been outraged and swindled, deceived and robbed, and so believing, it does me no good to refer to those things.

I therefore pledge you the word of a most sacred honor that I will meet you in a spirit of kindness, with the hope that we may agree upon terms of settlement that will be satisfactory to all, and if we can agree, then I will send for Mr. Secombe, and we will close it up now, and if we close up an agreement, then we will go at work at once to get ready for next session of Congress for our work to be done. It ought to be done at once if done at all, and such will do away with my plan to wait until the fourteen years expire, and then go in for an extension, as I
3259 had almost concluded to do. If we can agree, then there need be no delay for the seven years' term. There certainly can be no harm in an effort for a peaceful adjustment of the whole affair, which I think can be done in case you come here and meet me in same spirit as I will you, and for the time forget all of the past on both sides, and go about the work of a faithful settlement, so that we can truly say all our trouble is over, and we are united into one with no more unkind feelings, and in that spirit go before committee of Congress at the very beginning of the session.

If we agree, the papers will have to be signed by Mr. Secombe, and there is no doubt but that he will concede to my views and concessions. He and I will be agreed most certainly. I have not informed him of this letter and do not wish to until you shall have been here and come to conclusions for the interest of us all. If you come as proposed, and will telegraph me on the receipt of this letter, I will delay my papers in course of preparation, until we meet and have one sitting in our efforts for settlement. I make this proposition in good faith, and not for you

or me to say one of the other, there I have succeeded in my points, and, we are to do no such a thing. You better come entirely alone, or at least come and see me alone, and do not a thing on either side to provoke the other to unkind words. I am the one that has been so deeply wronged and outraged, and if I can come to friendly grounds, you ought to do nothing to drive me away from it. I must have all that is of an unkind nature laid aside with the view of terminating an unhappy controversy, because it is for the interest of us all to do so.

Now, sir, I will do my share for such conclusions. If you can meet me in the same spirit and on same grounds then I want you to come without a day's delay, and telegraph me on the receipt of this if you are to come so that I can get it to-morrow, and upon this letter I now ask the best and richest blessings of kind Heaven, and await your answer.

I am,

MARCUS P. NORTON.

3260 *Defendants' Exhibit Norton Letter.—Sept.* 19, 1871.—*J. A. S., ex'r.*

WASHINGTON, D. C., NATIONAL HOTEL,
September 19*th*, 1871.

J. D. GREEN, Esq.,
Troy, N. Y.:

DEAR SIR: I have written Eddy to-day about stamp. Please see him and he will tell you my plan and let you read the letter.

Let's put all the patents into one lot and then make a new and fair deal among all our interests, for we will make more money out of it. I will put in my New York interest into the same lot and you outside persons shall bear the expenses. My interest in the Secombe Company are quite large and valuable as you will see. And right there we can control a monopoly in the manufacture, and also manage to collect for past use and infringements R. R. Now, I will put this in too, but you must arrange for the necessary expenses to go on with the business, all I want in the whole is one-quarter free from all expenses and you outside people may have the rest, but you must aid me in those expenses for I am suffering for money now. We can be friends and labor together as one, and all get rich. Please say to Shavor and Ransford that I desire to let the past be past, and will join them heart and hand in doing right, and in doing justly by each other. God will bear me witness in all this, for it is well known that for a long, long time I have been trying to live the Christian's life. I have had great trials—I thought you all were trying to rob me, and that it was necessary to do all I have done, in good faith to save myself and property. But I have now no feelings. I love those whom I thought were doing me a great wrong, and now desire to meet you all on Christian grounds and will suggest a trusteeship of three persons, to wit: Chas. Eddy, J. D. Green and W. W. Secombe, to have all the patent titles to settle for the use, &c., &c., and to
3261 pay all expenses, and to help me out of my money needs at this time—I am willing to do anything that is right, just, and honorable in this business. Our contentions have done two things. First, made me very poor, and, second, increased the values from $100,000 to $1,000,000. Now, let us join in good faith, and all do right one with the other. This is now my prayer. Now, Green, think of it as you may. The spirit of the good Master is now struggling with me, and I with it, and I am a new and happier man. Now all meet me right there, and do right by me.

When will you be here? Please hasten your coming, for I am getting down sick here, and must go home at once.

In haste,

M. P. NORTON.

Defendants' Exhibit Norton and Green Agreement—J. A. S., ex'r.

MEMORANDUM AGREEMENT.

For the purpose of conducting to a final issue certain negotiations, arrangements and agreements of and concerning past disagreements, and differences between the persons and parties hereinafter set forth and named, we, the undersigned, having due and lawful authority so to do, hereby enter into this memorandum agreement, which shall be taken up and cancelled upon the making and signing of the permanent agreement by and between the same persons and parties, to wit, Marcus P. Norton, of the city of Troy, State of New York, for himself and for Helen M. Ingalls of same place, and Wm. W. Secombe, of the city of New York, parties of the first part by Marcus P. Norton, their attorney and counsel, and the inventor, patentee, and owners by certain assignments duly made and of record, of certain letters patent granted to said Marcus P. Norton, for "postmarking and for cancelling postage-
3262 stamps," dated as follows, to wit: December 16th, 1862, and No. 37,175, and April 14th, 1863, and No. 38175, and all reissues thereof, also, owners of one-fourth part of letters patent granted on the 9th day of August, 1859, and No. 25036, for "Improvement in Post-Marking Stamp," and Frederick G. Ransford and Jacob Shavor, of said city of Troy, and Peter Low, of the city of Cleveland, State of Ohio, and Wm. B. Hatch, of the city, county and State of New York, parties of the second part, by J. D. Green, of said city of Troy, their attorney and counsel, and owners by assignment so called, of one-fourth part each in the letters patent for "Improvement in Post-Marking Stamps," granted August 9, 1859, and No. 25036, and granted upon the application of Marcus P. Norton. Witnesseth, That the said persons composing the said first and second part hereby propose and consent to enter into agreement to put the said letters patent into the hands of trustees, to wit, William W. Secombe, of city of New York, for the party of the first, and Jeremiah D. Green, of said city of Troy, for the party of the second part. The said patents and all claims against the Post-Office Department for past and future use of the same, or of either of them, shall be managed by said trustees for the collection of compensation and settlement with the Government of the U. S. A. for the past and future use by the Post-Office Department of the said patent dated April 14, 1863, and the several reissues thereof, or of either of the other said patents, and whatever money shall be had, or other property shall be taken or obtained in such settlement shall be equally divided among the parties of the first and second part (after deducting the actual and necessary expenses in securing such settlement). And each party shall also furnish a person for the prosecution of said claim and for such settlement, who shall be Marcus P. Norton and Jeremiah D. Green aforesaid, and each party to bear their own expenses except Commissioners fees, and fees for witnesses in any suit in Court of Claims for such settlement, and other necessary expenses aside and apart from the
3263 services of the said persons so furnished and named as aforesaid, such last named expenses to be first deducted from the whole sum or amount received. The said party of the first part shall cancel any or

all claims of Charles Eddy and A. C. Corse, if there shall be any such now held in a lawful manner from or by any act on the part of Marcus P. Norton aforesaid, so that said Jacob Shavor shall not be liable therefor in any manner or form. The said party of the said second part will well and faithfully assign unto Helen M. Ingalls aforesaid, or to any one named by her, and said Marcus P. Norton, all and each and every right, title, and interest that they have or obtained by assignment from said Norton, or in any other manner whatever, to all the invention covered by the claims that were stricken from the application of June 15, 1859, upon which issued the patent of August 9, 1859, there being then in all, to wit, first, second, fourth, retaining in that application only that upon which was based the third claim for which said patent was granted, and they shall also release unto said Helen M. Ingalls, or any person or persons named by her, and said Marcus P. Norton, all and each and every claim they, or any of said party of second part may have to a certain patent granted to said Marcus P. Norton on the 14th day of January, 1862, and filed in Patent Office, August 8th, 1861, for improvements in hand stamps, or in post-office post-marking stamps, and now pending for reissue in the name of "Secombe Manufacturing Company," and the said Peter Low shall also release any and every claim he may have in a certain case or application known as the "Norton & Haskins" rejected and withdrawn case (and he shall also release said Norton from any and all indebtedness to him in case there shall be any such, and the said Shavor shall do likewise unto said Norton). Each and every party hereto shall enter into the final agreement in good faith, render all the aid in his or their power to maintain said patents and caveats on which the same were granted, and to obtain settlement and payment from the general Government as aforesaid.

3264 On pages 3 and 4 the red-pencil lines were made in lines 11, 12, and 13, page 3, and in lines 12, 13, 14, 15, and 16, page 4, as erasures before signing.

MARCUS P. NORTON.
J. D. GREEN.

The words so erased are included in ( ) in this printed testimony.

EDW. D. BETTENS,
Solicitor for Defendants Caswell & Clexton.

Defendant's Exhibit Norton letter.—Sept. 29, 1879.—*J. A. S., Ex'r.*

WASHINGTON, D. C., NATIONAL HOTEL,
September 29, 1871.

J. D. GREEN, Esq.:

DEAR SIR: I wrote you this morning quite fully, and I have thought that perhaps it is unnecessary for me to remain here away from my family when they are actually suffering for attention from me, while I am anxious to have stamp matter settled up fairly, and have been and am willing to make concessions whereby to get it done, I have also expected that I would be liberally and frankly met by your side of the case. You do not say one word about the aid I asked for, whether it is to be done or not. If not to be done, it is only right that you should frankly tell me so; then I will raise the money here, and go right square home, and will remain there and hold on to what we have, and of course would have to consent to a settlement until the 1859 patent runs out, unless I

now petition Congress to pay my family for that term, which of course would interfere with your first term. This plan would settle the whole thing, and compel Congress to say which patent is the one to set-
3265 tle under; but, on the other hand, if I am helped in my great distress for money just to live on, that is all I ask until we can get it through. I am ready to put the whole matter, extended term and all, right in, and also to work right along for full success, and I have many friends here and elsewhere who will aid me in getting it through, and so make but one settlement of it. Now I want you to say frankly by return of mail whether or not any provisions have been made for aid to me in funds for my family until we can finish a settlement.

If the patent is good for anything, it is good for something, and it is worth the aid I ask; if not, then you ought not to be in my way any longer. I hope you will see that I am not asking too much when I ask what I do. My deed of trust from Secombe for $\frac{2}{5}$ of the 1863 patent I have thought it best to put upon record, and when you are ready to do me exact justice, we are willing to sign papers which will reach the extended term, and also modify this $\frac{3}{5}$ arrangement, and never before. This I have from Miss Ingalls to-day; so you have only to come up to my proposition when you were here. I can raise money to go home, but I want to go on and help it through on the "combination," and, if met right, shall do so.

M. P. NORTON.

P. S.—If I have no answer to this letter by Tuesday morning, then I leave for home.

M. P. NORTON.

Defendants' Exhibit Norton letter.—October 5, 1871.—J. A. S, Ex'r.

WASHINGTON, D. C., NATIONAL HOTEL,
October 5, 1871.

J. D. GREEN, Esq.:

DEAR SIR: Your letter is at hand. It is not right for you to
3266 hinder me here from my family, from whom I have been gone over two months. They need me at home now, and are actually in want of money to keep them from cold and sickness. They think it strange that I do not come home, or send them money. They need it now—now. What use have I for a contribution, as you call it, unless I am to be benefited by it? None whatever. It is a full month since you went from here to do it all up inside of ten or twelve days. Mr. Green, I desire to do right, to be an honest man, and to live the Christian's life. I won't go into argument of the wrongs done me about this stamp, but I will say that I cannot and shall not remain here only a few days longer, because I can't let my family suffer longer, or be thrown out doors here because of non-payment of my bill. No; but I will send to my wife's relatives, and get money to go home, and then remain there, and sign no papers or allow any signed by my family. You must not call this threatening. If you are to do right by me, why don't your people do so, and do it now?

In haste,

M. P. NORTON.

Defendants' Exhibit Charles Eddy letter.—Dated March 25, 1872.—J. A. S., Ex'r.

METROPOLITAN HOTEL, TWEED & GARFIELD, PROPRIETORS,
New York, March 25, 1872.

CHAS. EDDY, Esq.:

DEAR SIR: Mr. Secombe and I have concluded it to be best for you to come here, to be present in our efforts to settle up matters between the patents of 1859 and 1863. You will need to be here on Wednesday morning, as we meet at this hotel for that purpose on that morning. In this settlement Mr. Secombe will desire to change his relation with
3267 you and those you represent, especially as the case must go into the Court of Claims, and I concur with him, as you have found some fault with me. To avoid hereafter any possible opportunity for any one to find fault, and to get this whole matter forever settled, it is much the better way to have all those present on that occasion who in any manner claim an interest. It is much the better way to go the entire ground over again, and begin new, and in that way have a friendly and satisfactory settlement, and then go on and get the money. Let us have some good trustees, and put the case into the Court of Claims at once, and we can get it through and get our money at this term of that court, which will be inside of three or four months. There is no use of employing any attorneys in the case either, for I can and will take all the proofs we may need, and prepare the case for presentation to the court, and then all it will cost will be the bare expenses of doing the same.

Don't fail to be at my room at this hotel early Wednesday morning next for the business above named. I must now go home, as my family are sick and in great need of me, and I want to get it settled so I can go Wednesday night. You can come down on the night train, and be here at six o'clock morning, or you can come the night before, to-morrow night. But don't fail to come, as it is arranged for all the parties to be here at that time. I write this after consultation with Secombe, and at his request, in which I concur.

In haste,

MARCUS P. NORTON.

Mr. Eddy says, if there's anything in this to attend to it; he hardly thinks it worth his while to go down.

GUS.

3268 *Defendants' Eddy's Exhibit Secombe Original.—Jan'y 23, 1880.—J. A. S.*

Whereas Charles Eddy, Jacob Shavor, and Albert C. Corse (formerly comprising the firm of Charles Eddy & Co., of the city of Troy, N. Y.), and William W. Secombe, of the city of New York, are together interested in the prosecution of a certain claim against the government of the United States, to recover certain moneys for the use of an improved patented cancelling stamp, known as the "Norton post-office cancelling stamp," invented and patented by Marcus P. Norton. And, whereas, the said William W. Secombe is also trustee for other parties interested in the prosecution of said claims to the amount of one-half of said claim: Now, it is understood and agreed by and between the said Charles Eddy, Jacob Shavor, and Albert C. Corse, parties of the first part, and William W. Secombe, trustee as aforesaid, party of the second part,

that the said parties of the first part will accept and receive in full payment and satisfaction of their claim and demand the sum of thirty thousand dollars.

It is further agreed that the said sum of thirty thousand dollars shall be paid by the party of the second part out of the moneys so received by said party of the second part, as trustee as aforesaid, provided his said trust fund amounts to the sum of sixty-two thousand dollars, and in case said trust fund does not amount to said sum of sixty-two thousand dollars, then the parties of the first part agree to take and receive in full satisfaction and payment of their said claim, the pro rata sum or amount of such sum as shall be received by the party of the second part, as trustee as aforesaid, in connection with Holloway & Mason, of the city of Washington, D. C., whose interest in said claim against the government is twenty thousand dollars, and William W. Secombe, whose personal claim therein is twelve thousand dollars, it being under-
3269 stood that each of the parties shall accept the said pro rata amount in full satisfaction of their several claims.

In witness whereof the parties have hereunto set their hands this seventh day of October, 1871.

CHARLES EDDY.
JACOB SHAVOR.
ALBERT C. CORSE.
W. W. SECOMBE.

In presence of Francis Rising, as to Shavor, Corse, & Secombe.
C. H. McGRATH,
Witness for Charles Eddy.

Received for record January 28th, 1872, and recorded in liber T 14, page 434 of Transfers of Patent.

In testimony whereof I have caused the seal of the Patent Office to be hereunto affixed.

[SEAL.] SAMUEL A. DUNCAN,
Acting Comm'r of Patents.

The letter pasted to Exhibit Secombe Original, page 113, is as follows (in evidence, see testimony of J. D. Green, page 45):

[W. W. Secombe, pres't. P. A. Curtis, sec'y. Office of Secombe Manufacturing Company, No. 7 Park place, New York.]

Mr. NORTON:

I have decided to send you the contract, and you can do what you are a mind to with it.

I shall leave my office soon, but shall wait till the boy comes back if you have any message.

Yours,

SECOMBE.

Endorsed on the foregoing letters are the following words (in evidence, see testimony of J. D. Green, page 45):

3270 TROY, N. Y., *April* 3, 1872.

I received this letter with the contract hereto annexed on the 30th day of March, 1872, for the uses and purposes as stated therein and herein.

MARCUS P. NORTON.

P. S.—I delivered the same to J. D. Green, of Troy, N. Y., on this 3d day of April, 1872, for cancellation, &c.

MARCUS P. NORTON.

Endorsed on the Exhibit Secombe Original are the following words (in evidence, see testimony of J. D. Green, page 45):

TROY, N. Y., *April* 3, '72.

This instrument was given to me by Mr. Secombe on the 30th day of March, 1872, for the uses and purposes as stated in the letter hereto annexed, also for cancellation if I deem it best so to do, which I do believe ought to be cancelled, and I do direct the same to be done by virtue of said letter hereto annexed.

MARCUS P. NORTON.

The following memorandum is also on said Exhibit Secombe Original (in evidence, see testimony of J. D. Green, page 45):

This instrument was surrendered to J. D. Green, attorney for J. Shavor and Corse, on demand, and cancelled March 30th, 1872.

J. D. GREEN.

Defendant's Exhibit Secombe envelope.—J. A. S., Ex'r.

(If not called for in ten days return to Secombe M'f'g Co., 7 Park place, New York.)

MARCUS P. NORTON, ESQ.,

CHARLES EDDY, Esq.,

TROY, N. Y.

By J. D. GREEN, ESQ.

3271 *Defendant's Exhibit Norton Letter.—August* 28, 1872.—*J. A. S., Ex'r.*

[Freese's Commercial Hotel, on the European plan. W. B. Pugh & Co., proprietors, 17 and 19 Park Row, opposite new post-office.]

NEW YORK, *August* 28, 1872.

A. C. CORSE, Esq., *Troy, N. Y.:*

DEAR SIR: As I came from your office on yesterday I called on Tibbetts & Butler to see about the time when they made for me the model of "reservoir" and "copper lining," or other lining that would not rust out, and that could easily be replaced, if necessary, for any cause, &c., &c., &c., and I find from their books that it was in January, 1868, which gives us more time than I told you. The model also with damper in flue strip principle was made at same time, while the entire stove model, with all my improvements, was made by them January, 1869. Tibbetts will have the account drawn off for me by Friday next, when I will be home and ready to put all those matters square through, as I proposed to you.

Ransford and Green are here with me, and we are fully determined on having the stamp business, when we at Troy can and will manage

and control. By to-morrow we will have all matters, when we can fully manage the same upon the plan and principle suggested by your Mr. Eddy, as we all fully concur in the same, and out this dishonest man, Secombe—a great fraud—must go, and we have the first successful move made to that end. We hope to leave here to-morrow night for Troy.

I thought it best to name the stove matter to you for consideration, with and by all your house, as well as the stamp business here.

I have other authorities to hold up each and every of my positions in the Stanley stove case, and it is stronger to-day than before. I have not yet seen Ruggles, and may not. All will depend upon cir-
3272 cumstances, for I am certain that we will defeat him on many points and grounds. I am fully satisfied, by recent authority found here to-day, that we can get this case re-opened for a rehearing. A similar case has just been done here, only not half as strong as the Stanley case.

I will see you all on my return home, and will be amply prepared to maintain my every position in all these matters.

In haste, &c.,

MARCUS P. NORTON.

Defendant's Norton Letter.—April 15, 1876.—*J. A. S., Ex'r.*

[National Hotel, F. Tenney & Co.]

WASHINGTON, D. C., *April 15th*, 1876.

CHARLES EDDY, Esq.:

MY DEAR SIR: Your letter of the 14th instant has come to me this evening, and I am glad that you are coming to the exact point. When I came on here and looked over matters I became satisfied that the bill introduced in the Senate by our friend Senator Ingalls, whom you will remember is an own cousin of Mrs. Norton's, was not broad enough to make all points sure. I then drew up another one and had Mr. Townsend introduce it in the House. Well, after that was in point I again became well satisfied that it ought to be further amended, which I done in the committee room. I met Mr. Green there and his bill, yet I went on with my argument as though we had never before met.

The committee were favorable to my bill as I had amended it. Mr. Green suggested some two or three amendments about title matter, and I at once accepted the same and would have had them all in, in the first place, had I not honestly thought the bill already covered those points.

That was one reason why I wanted you here, so that you might
3273 be satisfied with the bill either as it was or else as amended at your suggestion. The Green bill, as you call it, was taken from mine, but were it a law it would be useless to us for many legal reasons. Now, Mr. Eddy, I do not believe that there will be any more trouble about our stamp matter, for Green has come to his senses, and is acting like a man about it, and you at Troy have come to the exact line of right except you ought to do something on actual expenses—personal at that; not one cent is required for any other use, and would not be used by me if it were. We are perfectly right without any bribe money.

I enclose herewith printed report of "Secretary of War" on bill 2865. The bill as agreed on is printed with it, as you will see when I have marked it in red pencil. Please study this amended bill and see the points to provide for, and see how well it has been done. I can't see

how you can find any fault with it; if you do, let me know just what and where it is by return of mail, as the bill will be reported on "Wednesday" or "Friday" of next week.

I finished the committee report last night. I worked on it three days and one night, and Green also worked one day in looking up the cases we wanted to put in.

We went before the sub-committee last night, and the report was adopted by them without a single amendment.

This forenoon we took it to the "Secretary of War" for the Patent Committee, to see if it was right there, and the Secretary of War approved of every word of it, but made some additions to the last end of it on an important point, too. Now we have a most elaborate and perfect report. We prepared it for the committee, because it needed to be full and perfect, and would require much patient time; we have it, and right, too. It will go to the Public Printer on Monday or Tuesday and be printed in one day and night. We will send you copy of it. Mr. Green is pleased with it, he never asked to have me change but
3274 one or two words of it. We worked hard to get it just right on every point, so that when it is read in the House no one can assail it, and the "Committee on Patents" and the "Secretary of War" say that it is just the thing. Indeed, the Secretary of War told Mr. Green and myself to-day that I was "a very strong and able paper," which we took as a compliment.

Monday we meet the Patent Committee of House to arrange for passage of our bill.

It is expected that that committee will be called on for its bills reported on, some day next week. We mean to have everything ready to put our bill in its passage, if it goes through the House, as no doubt it will, it being so strongly backed by this new Secretary of War, also by the Attorney-General, and by the other departments in its present form. If we can't carry it without, we will have a special message from General Grant to Congress urging it as a public-measure and of necessity at that. It is all ready to go through the Senate, for their committee are for it. We meet Senate Committee on Patents on Thursday next for the purpose of having the bill all ready then to be passed by Senate as soon as House has passed it. By this there will be no delay.

I am so tired to-night over our work all the week that I can hardly write well enough for you to read this letter. I have three warm personal friends in the House, one of them an old classmate of mine in Union College, who have agreed to speak on the bill for us, too, so I have four such men now in the House. These are not on the Patent Committee. Then we have eleven on Patent Committee, so we think we can tide it through.

We are strong.

In the Senate we have a large number of personal friends. I spent an evening with Senator Conkling one week ago to-night and he is very friendly and will help if we need any in the Senate.

If this bill become a law, we can realize a handsome fortune each out of it, because it is right we should. You see there will be no de-
3275 lay about it, for we mean to have the cases preferred ones in each court, and we can take them up at the exclusion of all other cases or business. These are the amendments suggested by the War Department.

Now, I have given you the main features of the bill, of the report, and of what we are doing here, so you may approve or disapprove of the same.

It has been a great job to get a bill just right, so that everybody's rights shall be preserved, but we have it.

A hundred dollars for personal expenses will, I think, be enough if you could spare it, and not feel as though you were being robbed.

What say you? Secombe is up; he has gone into bankruptcy. I have twice written Lamport, John S., to send me certain papers which he has of mine, and he does not answer me; will you see him, and see if he has received my letters, and why he does not respond?

We are perfectly agreed about this matter of bill, reports, &c., &c., and I think Green will stand up to it like a man; if so, we will have money very soon, too, and in quantity to please us all.

I wish I had hit on this plan two years ago.

You can show this letter to whom you please, but answer at once, as I can't say on what day the committee will report, whether Wednesday or Friday, and I want to know your opinion of our bill.

I send you two.

Truly, &c.,

MARCUS P. NORTON.

Defendant's Caswell's Exhibit Corse Assignment.—J. A. S., Ex'r.

Know all men by these presents, that Albert C. Corse, of the city of Troy, county of Rensselaer, and State of New York, party of the first part, in consideration of the sum of one dollar, and other good valu-
3276 able, and sufficient consideration, to him in hand paid by Caroline G. Caswell, party of the second part, at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sold, assigned, transferred, and set over unto the said party of the second part all his right, title, and interest in and to certain patents of the United States for and improvements in certain postage-stamp cancelling apparatus, now in the name of Charles Eddy, trustee, in trust and for the benefit of said party of the first part and others, the same to be held by the said Caroline G. Caswell for her own use and behoof, and for the use and behoof of her legal representatives, as fully and entirely as the same would have been held and enjoyed by me if this assignment and sale had not been made.

In witness whereof I have hereunto set my hand and seal this twenty-seventh day of March, in the year eighteen hundred and seventy-nine.

ARBERT C. CORSE. [SEAL.]

Signed and sealed in presence of,

STATE OF NEW YORK,
County of Rensselaer, ss:

On this twenty-seventh day of March, in the year eighteen hundred and seventy-nine, before me, the subscriber, personally came Albert C. Corse, to me known to be the person described in and who executed the within instrument, and who acknowledged that he executed the same.

EDWARD F. LEAHY,
Commissioner of Deeds, Troy, N. Y.

STATE OF NEW YORK,
City of Troy, Rensselaer County Clerk's Office, ss:

I, James Keenan, clerk of the said county, and also clerk of the supreme and county courts, being courts of record held therein, do hereby

certify that Edward F. Leahy, whose name is subscribed to the
3277 certificate of proof or acknowledgement of the annexed instrument, was, at the time of taking such proof or acknowledgment, a commissioner of deeds in and for said city, dwelling in said city, and duly authorized to take the same; that I am well acquainted with the handwriting of the said commissioner, and verily believe that his signature to the said certificate of proof or acknowledgement is genuine, and that said instrument is executed and acknowledged according to the laws of the State of New York.

In testimony whereof I have hereunto set my hand and affixed the seal of said county this 12th day of December, A. D. 1879.

[L. S.] JAMES KEENAN, *Clerk.*

The interests assigned and intended to be assigned by Albert C. Corse to Caroline G. Caswell, by above instrument in writing, dated March 27, 1879, and acknowledged on the same day, before Edward F. Leahy, commissioner of deeds for city of Troy, are as follows: Letters patent of the United States, issued and granted to Marcus P. Norton, as the original and first invention for "improved postmarking and canceling hand stamps," dated respectively as follows, to wit: January 14th, 1862, No. 34184; December 16th, 1862, No. 37175; April 14th, 1863, No. 38175; reissued August 23d, 1864; reissued No. 1748, and August 3d, 1869, reissued No. 3586; also, patent for revenue cancelling stamps, dated August 16th, 1865, No. 49432; also patent for improvement in postmarking and cancelling hand stamps, issued July 13th, 1859, and dated June 10th, 1869, No. 92688; also all reissues of the above, and especially the reissue of patent dated April 14th, 1863, which reissue is to Helen M. Ingalls, dated October 4th, 1870, on "Division A," numbered 4143. The interests conveyed by Albert C. Corse to Caroline G. Caswell are particularly described in an assignment made by Marcus P. Norton to Charles Eddy, as trustee, dated Oc-
3278 tober 23d, 1869, and recorded in Patent Office, October 25th, 1869.

And I hereby sell and assign and transfer all my interests in said patents and their reissues to the said Caroline G. Caswell.

ALBERT C. CORSE.

STATE OF NEW YORK,
County of Rensselaer, ss:

On this thirteenth day of January, in the year eighteen hundred and eighty, before me, the subscriber, personally came Albert C. Corse, to me known to be the person described in and who executed the above instrument, and acknowledged that he executed the same.

[L. S.] A. R. MOORE,
Notary Public.

STATE OF NEW YORK,
City of Troy, Rensselaer County, Clerk's Office, ss:

I, James Keenan, clerk of the said county, and also clerk of the supreme and county courts, being courts of record held therein, do hereby certify that A. R. Moore, whose name is subscribed to the certificate of proof or ackn'wledgment of the annexed instrument, was, at the time of taking such proof or acknowledgment, a notary public of the county of Rensselaer, dwelling in said county, and duly authorized to take the same; that I am well acquainted with the handwriting of the said notary, and verily believe that his signature to the said certificate

of proof or acknowledgment is genuine, and that said instrument is executed and acknowledged according to the laws of the State of New York.

In testimony whereof I have hereunto set my hand and affixed the seal of said county this 13th day of January, A. D. 1880.

[L. S.] JAMES KEENAN, *Clerk.*

Recorded Jan'y 14th, 1880. Liber V. 24, page 441.

3279 *Defendant's Caswell's Exhibit Caroline G. Caswell's Assignments, J. A. S., Ex'r.*

I hereby sell, assign, and transfer to Herbert M. Caswell, of Troy, New York, all my right, title, and interest, in law and in equity, in and to all those certain inventions and improvements in postmarking and cancelling stamps, and of and in and to letters patent of the United States of America issued therefor April 14, 1863, to Marcus P. Norton, and of and in to all the several and respective reissues and assignments thereof and agreements thereto, and of and in and to all and any rights, claims, and demands for the past and future use thereof, or for any infringements thereof.

CAROLINE G. CASWELL.

Signed, sealed, and delivered this 16th day of January, 1880, in the presence of—

H. S. HICKS.

STATE OF NEW YORK,
Rensselaer County, ss:

On this 16th day of January, in the year one thousand eight hundred and eighty, before me, the subscriber, personally appeared Caroline G. Caswell, to me known to be the same person described in and who executed the above instrument, and acknowledged that she executed the same.

H. S. HICKS,
Com'r of Deeds, Troy, N. Y.

STATE OF NEW YORK,
Rensselaer County, ss:

On this 20th day of January, 1880, before me personally appeared H. S. Hicks, to me known to be the person who took foregoing acknowledgment, and acknowledged that he took the same.

J. M. LANDON,
U. S. Commissioner, N. Dist. N. Y.

3280 STATE OF NEW YORK,
City of Troy, Rensselaer County, Clerk's Office, ss:

I, James Keenan, clerk of the said county and also clerk of the supreme and county courts, being courts of record held therein, do hereby certify that H. S. Hicks, whose name is subscribed to the certificate of proof or acknowledgment of the annexed instrument, was at the time of taking such proof or acknowledgment a commissioner of deeds in and for said city, dwelling in said city, and duly authorized to take the same; that I am well acquainted with the handwriting of the said commissioner and verily believe that his signature to the said certificate of proof or acknowledgment is genuine, and that said instrument is executed and acknowledged according to the laws of the State of New York.

In testimony whereof I have hereunto set my hand and affixed the seal of said county this 27th day of January, A. D. 1880.

[L. S.] JAMES KEENAN.

Defendants' Caswell's Exhibit Herbert M. Caswell Assignment, J. A. S., Ex'r.

I hereby sell, assign, and transfer to Horace T. Caswell, of Troy, N. Y., all my right, title, and interest in law and in equity in and to all those certain inventions and improvements in postmarking and cancelling stamps, and of and in and to letters patent of the United States of America issued therefor, April 14, 1863, to Marcus P. Norton, and of and in to all the several and respective reissues and assignments thereof and agreements thereto, and of and in and to all and any rights, claims, and demands for the past and future use thereof or for any infringements thereof.

City of Troy, Rensselaer County, Clerk's Office, ss :

I, James Keenan, clerk of the said county and also clerk of the supreme and county courts, being courts of record held therein, do hereby certify that H. S. Hicks, whose name is subscribed to the certificate of proof or acknowledgement of the annexed instrument, was at the time of taking such proof or acknowledgment a commissioner of deeds in and for said city, dwelling in said city, and duly authorized to take the same; that I am well acquainted with the handwriting of the said commissioner, and verily believe that his signature to the said certificate of proof or acknowledgment is genuine and that said instrument is executed and acknowledged according to the laws of the State of New York.

In testimony whereof I have hereunto set my hand and affixed the seal of said county this 27th day of January, A. D. 1880.

[L. S.] JAMES KEENAN.

3282 *Defendant's Clexton's General Assignment Exhibit.—J. A. S., Ex'r.*

This indenture made and entered into this 31st day of March, 1879, by and between Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., of the city of Troy, in the county of Rensselaer, and State of New York, copartners doing business at said city of Troy, un'er the firm-name of Eddy, Corse and Company, and individually, parties of the first part, and J. Albert Cipperly and Charles N. Stannard, of the same place, parties of the second part, witnesseth: That whereas the said parties of the first part are indebted to divers persons in sundry sums of money and being unable to pay the same in full, are desirous of making a proper provision for the payment thereof, so far as is possible, and of making a just and proper distribution of their property among their said creditors: Now, therefore, the said parties of the first part, in consideration of the premises and of one dollar to each of them in hand paid by the said party of the second part, the receipt whereof is hereby duly acknowledged, have granted, bargained, sold, assigned, transferred, and set over, and by these presents do grant, convey, bargain, sell, assign, transfer, and set over unto the said party of the second part all and singular their copartnership and individual estate and property, real and personal goods, chattels, effects, credits, accounts, debts, dues, demands, choses in action and property of every name and kind whatsoever, whether held by and in the name of said parties of the first part, and each and either of them, or by and in the name of any other person for them or either of them, except such property, if any held or owned by said parties of the first part, separately and individually, as is exempt by law from levy and sale under execution; to have and to hold the same unto the said party of the second part, their heirs, executors, administrators, and assigns. In trust, however, to take possession
3283 of the same with all reasonable dispatch, and to sell and convert the same into money; also to sue for, collect, and receive all such debts, accounts, demands, choses and things in action hereby assigned as may be collectible, and with and out of the proceeds of such sales and collections first to pay and discharge all the just and reasonable expenses, costs, and charges of executing and perfecting this assignment and of carrying into effect the trust hereby created, together with a lawful commission to the party of the second part for their services in executing said trust; second, with and out of the net proceeds of the separate and individual property of each of the said parties of the first part to pay in full his separate and individual debts and liabilities; if the net proceeds of the separate and individual property of each or either of the said parties of the first part is insufficient to pay his separate and individual debts and liabilities in full, then the proceeds of the individual property of the said party of the first part so insufficient to pay his debts and liabilities in full shall be applied pro rata to the payment of the said party's separate and individual debts and liabilities; if, however, any surplus remains of the net proceeds of the said separate and individual property of either of the said parties of the first part after payment of his separate and individual debts and liabilities in full, the said surplus shall be applied towards the payment of the copartnership debts and liabilities of the said parties of the first part in the manner and as hereafter provided and set forth; third, the net proceeds of the said copartnership property together with the surplus, if any, of the proceeds of the individual property of the said parties of the first part, or either or each of them, shall be used and applied to first pay in full all and sin gular the debts and liabilities of said first parties set

forth and enumerated in a schedule hereto annexed marked Schedule A, and hereby made a part of this assignment, in full, with interest, if the residue of such proceeds shall be sufficient for that purpose, and if the same be not sufficient, then the said parties of the
3284 second part shall pay and apply the said net proceeds or residue thereof to and in payment of the said debts and liabilities ratably and in proportion to the respective amounts thereof after payment in full of all the debts and liabilities designated, enumerated, and set forth in said schedule A, as above directed; and provided the said party of the second part shall pay all and singular the debts and liabilities, and after fully paying and discharging all the aforesaid debts and liabilities as above provided, the said party of the second part shall pay all and singular all other debts and liabilities of the parties of the first part, and if such residue be not sufficient to pay and discharge all such debts and liabilities in full, then the said party of the second part shall pay and distribute the said proceeds among all the aforesaid other creditors of the said parties of the first part ratably and in proportion to the respective amounts thereof; and if, after the payment of all the said debts and liabilities in full, there shall be a remainder or residue of said property or proceeds, to repay and return the same to the said parties of the first part, their executors, administrators, and assigns; and in furtherance of the premises, the said parties of the first part doth hereby make, constitute, and appoint the said parties of the second part, their and each of their true and lawful attorneys, irrevocable, with full power and authority to do all acts and things which may be necessary in the premises to the full execution of the trust hereby created, and to ask, demand, recover, sue for and receive of and from all and every person or persons all property, debts, demands due, owing, and belonging to the said party of the second part, and to give acquittances and discharges for the same; to sue, prosecute, defend, and implead for the same, and to execute, acknowledge, and deliver all necessary deeds, instruments, and conveyances; and the parties of the first part do hereby authorize the parties of the second part to sign the copartnership name of the parties of the first part to any check, draft, promissory note, or other
3285 instrument in writing, for the payment of moneys which is payable to the order of the parties of the first part in their copartnership name, and to sign the copartnership name to any instrument of any name, kind, or nature, which may be necessary to more fully carry into effect the object, design, and purpose of this trust; and the said parties of the first part respectively, in their individual capacities, do hereby make, constitute, and appoint the parties of the second part the attorney of each and every of them, and do hereby authorize him or them to sign the name of each and any of them to any check, draft, or promissory note, or other instrument in writing, which is payable to the order of each or any of the parties of the first part, or to sign the name of each or any of the parties of the first part to any instrument in writing whenever it may be necessary to do so to the carrying into effect the object, design, and purpose of this trust; and the said party of the second part do hereby accept the trust created and imposed upon them by this instrument, and covenants and agrees to and with the said parties of the first part that they will faithfully and without delay execute the trust created according to the best of their skill, knowledge, and ability.

In witness whereof the parties to these presents have hereunto set their hands and seals the day and year first above written.

CHARLES EDDY. [L. S.]
ALBERT C. CORSE. [L. S.]
AUGUSTUS P. CORSE. [L. S.]
GEORGE C. BALDWIN, JR. [L. S.]
CHARLES N. STANNARD. [L. S.]
J. ALBERT CIPPERLY. [L. S.]

Sealed and delivered in the presence of—
A. E. WOOSTER.

3286 STATE OF NEW YORK,
Rensselaer County, ss:

On this 31st day of March, 1879, before me came Charles Eddy, Albert C. Corse, Augustus P. Corse, George C. Baldwin, jr., and Charles N. Stannard and J. Albert Cipperly, to me each personally known, and known to me to be the persons mentioned and described in and who executed the foregoing instrument, and each for himself severally and duly acknowledged that he executed the same.

A. E. WOOSTER,
Notary Public, Rens. Co., N. Y.

Schedule A referred to and forming a part of the annexed assignment, containing a statement of the names of the creditors first preferred in such assignment, the general nature of such indebtedness, and the amount thereof: William Eddy, of the city of Troy, N. Y., amount due and unpaid to him on one promissory note for borrowed money made by said Eddy, Corse & Company, January 1st, 1878, four thousand and one hundred dollars, with interest thereon from January 1st, 1879. John M. Earl, of the city of Troy, N. Y., amount due and unpaid on the several promissory notes for borrowed money, twenty-seven hundred dollars, with interest thereon from June 1st, 1878. David M. Green, of the city of Troy, amount due him for borrowed money, thirteen hundred dollars, with interest thereon from July 1st, 1878. S. R. Clexton & Son, of the city of Troy, amount due them for borrowed money, seven hundred dollars, with interest thereon from . Charles N. Stannard, of the city of Troy, N. Y., amount due him for work, labor, services, and casting, nine hundred and fifty-three dollars and fifty-six cents, with interest from January, 1878. Mrs. Horace T. Caswell, of the city of Troy, N. Y., amount due for borrowed money, one thousand two hundred and twenty-two $\frac{6}{100}$ dollars. Isaac S. Caproon, of the city of Troy, amount due him for work, labor, and services as an em-
3287 ployee, thirteen dollars. Hiram Eddy, of the city of Troy, N. Y., amount due him for borrowed money, work, labor, and services, three hundred and twenty-one dollars, with interest from . J. Albert Cipperly, of the city of Troy, N. Y., amount due him on a promissory note made to him by said Eddy, Corse & Company, for work, labor, and services; money paid and advanced by him as an attorney and counsel in and about their matters and business, and for costs, charges, and expenses of suits, &c., for which he is liable, and for counsel, twenty-four hundred and forty-seven $\frac{8}{100}$ dollars. Liberty Gilbert, of the city of Troy, amount due him for borowed money, eight hundred dollars, with interest, from Liberty Gilbert; and promissory note for money lent and advanced January 1st, 1877 eight hundred dollars, and interest from January 1st, 1878. Andrew B. Fales, of Troy,

N. Y., on account merchandise purchased and received of him, during the year 1878, five hundred and fifty dollars, and interest from January 1st, 1879. Caleb Merritt, on account, for money lent and advanced, three hundred dollars. Gilbert Geer, jr., of the city of Troy, N. Y., on account for money lent and advanced, the sum of four hundred dollars. James Kelly, of Troy, on account for work, labor, and services as an employee, forty-five dollars. William Smith, of Troy, for services as employee, thirteen dollars.

Defendants' Clexton's Exhibit Cipperly and Stannard Assignment.—J. A. S., Ex'r.

Whereas Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., individually, and as constituting the firm of Eddy, Corse, & Co., doing business at the city of Troy, N. Y., heretofore made and executed a general assignment for the benefit of their creditors, bearing date on or about the 31st day of March, 1879, to and which assignment was accepted by the undersigned, J. Albert Cipperly and Charles N. Stannard, who thereupon duly qualified and entered upon the discharge of their duties as assignees thereunder; and the said assignees having given due notice of this sale to the creditors of the said Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., and the persons interested in the premises:

3289

Now, this indenture witnesseth that for and in consideration of the sum of ($2,500) two thousand and five hundred dollars to us, the said

J. Albert Cipperly and Charles N. Stannard, as such assignees as aforesaid, in hand paid, the receipt whereof is hereby acknowledged, we, the said J. Albert Cipperly and Charles N. Stannard, as assignees aforesaid, have sold, assigned, and transferred, and by these presents do hereby sell, assign, transfer, and set over unto Samuel R. Clexton, of the city of Troy, county and State aforesaid, and his heirs, assigns, and lawful representatives. all the right, title, and interest of the said Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., and of each of them respectively, and of said firm of Eddy, Corse & Co., which they, or either of them, had at the time of said general assignment, and which by virtue thereof passed to and became vested in such assignees as aforesaid, in law or in equity. of, in. and to all those certain inventions and improvements in postmarking and cancelling stamps, and of, in, and to letters patent of the United States of America, issued therefor April 14, 1863, to Marcus P. Norton, and of, in and to all the several and respective reissues and assignments thereof, and agreements relating thereto, and of, in, and to any and all rights, claims, and demands which we have as such assignees for damages, profits, royalties or otherwise, for the past and future use thereof, or for any infringements thereof which in any manner passed to or became vested in us, said assignees, by virtue of said general assignment as aforesaid, to have and to hold the same unto him, the said Samuel R. Clexton, his heirs, assignees, and lawful representatives, to the
3290 full end of the term for which said letters patent are granted, as fully and entirely as the same would have been held by us as such assignees a saforesaid had this assignment and sale not been made.

In testimony whereof we have hereunto set our hands and affixed our seals this 7th day of January, 1880.

EDWARD D. BETTENS,
Solicitor for Horace T. Caswell and Samuel R. Clexton.

To MARCUS P. NORTON, Esq.,
Complainant's Solicitor.
STEWART L. WOODWARD, Esq.,
Solicitor for Defendant James.

(Endorsed:) U. S. circuit court. Filed Mar. 8, 1880. John I. Davenport, clerk.

At a stated term of the circuit court of the United States, held in and for the southern district of New York, at the court rooms, in the post-office building in the city of New York, on the 11th day of March, 1880.

Present, Hon. Hoyt H. Wheeler, circuit judge.

CHRISTOPHER C. CAMPBELL
agst.
THOMAS L. JAMES, CHARLES EDDY, HORACE T. Caswell and Samuel R. Clexton.

The parties being before the court by their respective counsel, and the counsel for Samuel R. Clexton having offered an assignment from Jonathan Richardson, administrator, and Charlotte S. Shavor, administratrix of Jacob Shavor, deceased, to said Clexton of all their right, title and interest in and to letters patent mentioned in the complaint in this case:

It is ordered that the said assignment be, and the same is hereby, admitted in evidence in this suit, and filed with the o her testimony.

(S'd) HOYT H. WHEELER.

(Endorsed:) Filed in court, March 11, 1880. U. S. circuit court. Filed March 11, 1880. John I. Davenport, clerk.

3294 Whereas, at various times and under several and different dates, the letters patent of the United States were issued upon the application and petition of Marcus P. Norton, of the city of Troy, County of Rensselaer, and State of New York, for and upon improvements in post-office postmarking and cancelling hand stamps, and printing, dating, and cancelling hand stamps, among which were letters patent of the following dates and numbers, to wit, August 9th, 1859, No. 25,036, and its extension January 14th, 1862, No. 34,184; December 16th, 1862, No. 37,172; April 14th, 1863, No. 38,175, reissued August 23rd, 1864, No. 1748; of reissued patents, August 15th, 1865, No. 49.432; and for improvements in post-office way bill envelopes, June 10th, 1862, No. 35,539, and any and all legal reissues or extensions of the abovenamed letters patent; also a patent granted to J. T. A. Robertson for improvements in hand stamps, September 22d, 1857, No. 18,249. And whereas the aforesaid improvements and letters patent were duly assigned and conveyed (either in whole or in part) to Jacob Shavor (now deceased) and Albert C. Corse, or to the firm of Charles Eddy & Co., which firm was composed of Charles Eddy, Jacob Shavor and Albert C. Corse, each of whom were then residents of the city of Troy, County and State aforesaid. Which several deeds of assignment were duly re-

corded in the United States Patent Office, to which record reference is now hereby had, for a more full and perfect description thereof.

And whereas Jonathan Richardson, of the city, county and State aforesaid, is the administrator, and Charlotte S. Shavor, of the town of Ghent, county of Columbia, and State of New York, is the administratrix of the estate of the said Jacob Shavor, deceased;

And whereas Samuel R. Clexton, of the city of Troy, county and State aforesaid, is desirous of purchasing, and has purchased, from us, all the right, title and interest which we have in and to the above-named letters patent, as administrators of the said estate of Jacob Shavor, deceased:

Now, therefore, in consideration of the sum of five dollars, to us in hand paid by said Samuel R. Clexton, the receipt whereof is hereby acknowledged, and in the further and other valuable considerations, the receipt of which is hereby duly acknowledged, we have sold, 3295 assigned and transferred unto said Samuel R. Clexton and his legal representatives, all the right, title and interest in and to each and all of the above-recited letters patent, their reissues and extensions, as fully and entirely as the same are vested in us, as administrators of the estate of Jacob Shavor, as aforesaid, to have and to hold the same as fully and entirely as the same would have been held and enjoyed by the aforesaid estate, if this assignment had not been made.

And we also sell and assign to said Samuel R. Clexton, or his legal representatives, all the right, title and interest, which we have, as administrators of the estate of Jacob Shavor, deceased, in and to all and any compensation for the past use of said improvements and letters patents, or their reissues or extensions, as hereinbefore stated, whether such use was by the Government of the United States, or any other party or parties. And said Clexton is hereby fully authorized to collect and receipt for the same, and to do all acts that may be necessary to be done in relation to said patents, or pertaining to collections for past use or for intringements on said patents, as fully and entirely as we, the said administrators, could do, had this assignment and transfer not have been made.

In witness wheref we, the said administrator and administratrix, have hereunto set our hands and seals this 3d day of March, A. D. 1880.

(S'g'd) JONATHAN RICHARDSON.
CHARLOTTE S. SHAVOR.

In presence of—
(S'g'd) ESEK COWEN.
JOHN J. HASSETT.

STATE OF NEW YORK,
Rensselaer County, ss:

On this 3d day of March, 1880, personally appeared before me, Jonathan Richardson, administrator, and Charlotte S. Shavor, administratrix, &c., of Jacob Shavor, deceased, to me known to be the same 3296 persons named in and who executed the above assignment, and severally acknowledged that they had executed the same.

[NOTARIAL SEAL.] CHARLES D. KILBURN,
Notary Public, Renss. Co., N. Y.

(Endorsed:) U. S. Patent Office. Received for record, Mar. 5, 1880. Recorded liber F 25, page 191. U. S. circuit court. Filed Mar. 11, 1880. John I. Davenport, clerk. Filed March 11, 1880 (in court), pursuant to order of same date on file.

At a stated term of the circuit court of the United States, held in and for the southern district of New York, at the court-room, in the post-office building, in the city of New York, on the 12th day of March, 1880.

Present, Hon. Hoyt H. Wheeler, judge.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES ET AL. } In equity.

The parties being before the court by their respective counsel, and the counsel for Horace T. Caswell having offered an assignment from Albert C. Corse to Samuel R. Claxton of all his right and title herein, and also an assignment from said Clexton to Horace T. Caswell of said interests, and the assignments of Caroline G. Caswell to Herbert M. Caswell, and Herbert M. Caswell to Horace T. Caswell, having been recorded since the taking of the testimony under the order of December 23d, 1879,

It is ordered that the said assignments be, and the same are hereby, admitted in evidence in this suit, and filed with the other testimony.

(Endorsed:) Filed in court August 17, 1880. U. S. circuit court, Filed August 17, 1880. John I. Davenport, clerk.

3297 The said assignments are as follows:

I hereby sell, assign, and transfer to Herbert M. Caswell, of Troy, New York, all my right, title, and interest in and to certain letters patent of the United States, issued and granted to Marcus P. Norton as the original and first inventor for "Improved Marking and Cancelling Hand stamps," dated respectively as follows, to wit, January 14th, 1862, No. 34184; December 16th, 1862, No. 37,175; April 14th, 1863, No. 38175; reissued August 23d, 1864, reissued No. 1748, and August 3d, 1869, reissued No. 3586. Also patent for revenue cancelling stamp, dated August 15th, 1865, No. 49432; also patent for improvement on postmarking and cancelling hand stamps, issued July 13th, 1869, and dated June 10th, 1869, No. 92688; and also of and in and to all the several respective reissues and assignments and agreements thereof and thereto; and of, in, and to all and any rights and claims and demands for the past and future use thereof, or for any infringements thereof.

In witness whereof I have hereunto set my hand and seal, this 10th day of February, 1880.

CAROLINE G. CASWELL. [SEAL.]

UNITED STATES OF AMERICA,

Notary Public, New York Co.

U. S. Patent Office. Received for record March 15, 1880. Recorded liber page .

Whereas Albert C. Corse, of Troy, New York, heretofore, on or about March 31st, 1879, sold, assigned, and transferred to J. Albert Cipperly

and Charles N. Stannard, all his right, title, and interest in, and to all those certain inventions and improvements in postmarking and cancelling hand-stamps, and of, in, and to letters patent of the United States of America, issued therefor April 14, 1863, to Marcus P. Norton, and of, in, and to all the several and respective reissues and assignments thereof, and agreements relating thereto; and of, in, and to any and all rights, claims, and demands, profits, royalties or otherwise, for the past and future use thereof, or for any infringements thereof; and

Whereas the said J. Albert Cipperly and Charles N. Stannard, on or about January 7, 1880, by an instrument in writing, recorded in the Patent Office January 16, 1880, liber J 24, page 268, and to which reference is made for more particularity, sold and assigned to Samuel R. Clexton, of Troy, New York, all of the said right, title, interest, claims, demands, profits, and royalties acquired by said Cipperly and Stannard from said Corse; and

Whereas the said Albert C. Corse, by an instrument in writing, dated March 1, 1880, and confirmatory of the above assignments, has sold, assigned, and transferred to the said Samuel R. Clexton all of his
3300 right, title, and interest in and to said patent, issued April 14, 1863, to said Norton, and of, in, and to all the several and respective reissues and assignments thereof, and agreements relating thereto; and of, in, and to any and all rights, claims, and demands of his for damages, profits, royalties, or otherwise, for the past and future use thereof, or for any infringements thereof:

Now, therefore, I, the said Samuel R. Clexton, in consideration of the premises, and in consideration of the sum one dollar, to me in hand paid, and for other valuable consideration, do hereby sell, assign, and transfer unto Horace T. Caswell, of Troy, New York, all of the right, title, and interest acquired by me from said Corse, in manner above stated, in and to said patent, issued April 14, 1863, to said Marcus P. Norton, and in and to the several and respective reissues and assignments thereof, and agreements relating thereto; and of, in and to all rights, claims, and demands for damages, profits, royalties, or otherwise, acquired by me from said Corse, in manner above stated, for damages, profits, royalties, or otherwise for the past and future use thereof, or for any infringements thereof. To have and to hold the same unto him, the said Horace T. Caswell, his heirs, assigns, and lawful representatives, to the full end of the term for which said letters are granted. The interests, and the only interests assigned, and intended to be assigned by these presents, are the interests in said patent, its reissues, assignments, agreements, and in the rights, claims, and demands for damages, profits, royalties, or otherwise for the past and future use thereof, or of any infringements thereof which said Corse had therein in March, 1879, prior to said assignment to said Cipperly and Stannard, or which I now have through said Corse; and I particularly exclude from the force and the effect of this assignment all the interests in said patent, its reissues, assignments, agreements, and all the rights, claims, and demands for damages, profits, royalties, or otherwise for the past and future use thereof, or of any infringements thereof, which Charles Eddy and Jacob Shavor, or the personal representatives of said Shavor, had therein in March, 1879, prior to said assignment to said Cipperly and Stannard, or which I now have and own through said Eddy and Shavor, or the personal representatives of said Shavor.

S. R. CLEXTON. [SEAL.]

Witness my hand and seal March 9, 1880.

3301 STATE OF NEW YORK,
City and County of New York, ss:

On this 9th day of March, in the year 1880, before me personally came S. R. Clexton, to me known, and known to me to be the individual described in, and who executed the foregoing instrument, and to me he acknowledged that he executed the same.

[SEAL.] CORNELIUS D. GOULD,
Notary Public New York County (29).

U. S. Patent Office. Received for record March 13, 1880. Recorded , liber , page .

3302 At a stated term of the circuit court of the United States for the southern district of New York, held on the 11th day of March, 1880, at the city of New York.

Present, Hon. Hoyt H. Wheeler, justice.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES, CHARLES EDDY, HORACE T. CASWELL, and SAMUEL R. CLEXTON. } In equity.

On reading and filing the affidavit of Horatio F. Averill, and notice of motion made by Charles Eddy for leave to have Horatio F. Averill, esq., substituted herein in the place and stead of Edward D. Bettens, esq., as the solicitor of Charles Eddy, as trustee for himself, Jacob Shavor, and Albert C. Corse, and as solicitor of Charles Eddy, so far as Eddy has any individual interests herein, and after hearing George F. Betts, esq, of counsel in support of said motion, and Francis C. Barlow, esq., of counsel in opposition, now, on motion of Horatio F. Averill, esq., it is ordered that said Horatio F. Averill is substituted in this suit as the solicitor of said Eddy, so far as said Eddy may have individual interests herein, and the appearance of Edw. D. Bettens
3303 is limited to that extent; and on motion of Edward D. Bettens, esq., it is ordered that said Eddy's motion for leave to substitute said Horatio F. Averill, esq., in the place and stead of said Edward D. Bettens, esq., as solicitor herein for said Charles Eddy, as trustee for other persons than himself, as aforesaid, be, and the same is hereby, denied until the further order of this court, and without prejudice to further motion.

HOYT H. WHEELER.

EDW. D. BETTENS,
Solicitor for Caswell and Clexton.

(Endorsed:) Filed in court March 11, 1880. U. S. circuit court. Filed March 12, 1880. John I. Davenport, clerk.

3304 At a stated term of the circuit court of the United States of America for the southern district of New York, in the second circuit, held at the United States court-rooms, in the city of New York, on Thursday, the 11th day of March, in the year of our Lord one thousand eight hundred and eighty.

Present, the honorable Hoyt H. Wheeler, circuit judge.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES, ET AL. }

The above cause coming on for argument on exceptions to the master's report filed therein by the respective parties:

Mr. George H. Williams is heard in support of exceptions filed in behalf of complainant.

Mr. Stewart L. Woodford, U. S. attorney, is heard in support of exceptions filed in behalf of the defendant.

Mr. Esek Cowen is heard in support of exceptions filed in behalf of the defendant.

Cur. adv. vult.

3305 United States circuit court, southern district of New York.—In equity, February term, 1880.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES, CHARLES EDDY, HORACE T. Caswell, Samuel R. Clexton.

This cause has now been heard upon the report of the master and exceptions thereto as to the liability of the defendant James; and upon the stipulations under which the other defendants became parties, and by which their rights, as between themselves and the plaintiff, were submitted to the court, and the evidence in support of their respective claims as to those rights.

From the report it appears that the defendant James became postmaster at the city of New York on the 1st day of April, 1873, while the patent in suit was owned by Helen M. Ingalls, and commenced using the patented invention, and has ever since continued the use in performance of his duties; that on the 2d day of January, 1877, she conveyed the patent to the plaintiff, and assigned to him her claims for past infringement; and that the gains and profits to the defendant James in the saving of salaries of clerks to perform the duties required of him by the Post-Office Department have been sixty-three thousand dollars, due to his infringement.

3306 The principal and controlling questions arising upon the report and exceptions are whether the plaintiff is entitled to recover in this suit, as well for the infringement before the assignment to him as for that after, and whether the defendant James is liable to account for the gains and profits received by him as postmaster, either as such or as damages.

It is not pretended by or on behalf of the defendant but that an assignee of such claims may maintain a suit upon them in his own name in equity, 2 Story's Eq., § 1007; but it is insisted that the bill in this cause does not cover such claim, and that the evidence does not show an assignment of such claim from Miss Ingalls to the plaintiff. It is true, as was stated when this cause was decided on the former hearing, that the pleader does not appear to have framed this bill with that aspect in mind, but what was said then was not said upon examination and deliberation as a full disposition of the question, but only in passing as illustrating the other question then being considered; so the question is open now whether the bill is sufficient to cover that claim. As to that, the bill sets forth the infringement by the defendant while the patent was owned by Miss Ingalls, and sets forth in haec verba the assignment from her to the plaintiff of the patent, also of "all the right, interest and claim for and to the past use of said invention and improvements under the said letters patent;" and, besides praying for an injunction and for an increase of damages, "in addition to the profits and gains to be accounted for by the defendant," has a prayer for "such other and

further relief as shall be agreeable to equity." This, meagerly, it is true, but, after all, substantially sets forth the claim and assignment, and a prayer for relief, as applicable to that as to the other part of the case. Perhaps there should be a special prayer for an account as to either aspect; but if one is required it is quite strongly hinted at, if not very aptly inserted. The proof of the assignment consists of the instrument set forth; and that seems to be amply sufficient to cover this claim. The plaintiff is entitled to recover for the whole time, if any one is, as the case now stands, and it appears that he can recover it in this suit, if anywhere, without doing violence to any of the settled rules of pleading.

The other is much the more important question.

3307 Whatever question there might be, if the subject was new, it now seems to be settled that savings in cost by infringement of a patent may be recovered as profits, Carwood Patent, 94 U. S., 695; Elizabeth *vs.* Pavement Co., 97 U. S., 126. The defendant saved the sum named by using the patented invention. It is said that the master erred because the defendant might have used another form of stamp which would not have been an infringement, and that the saving by using the patented invention, instead of that, would have been much less than the saving reported. It does not appear, however, but that such use of the other form would have been an infringement; and if that appeared, it appears that the other form was not known to the defendant, and that the saving reported was, in fact, saved by substituting the patented improvement for what was known and would probably otherwise have been used. The saving therefore appears to be wholly due to the infringement.

It is said, too, that this patent is for a device that can only be used in the postal service, which is wholly monopolized by the Government of the United States, which could send letters without postmarking them at all, or lessen the frequency of the mails, so that the postmarking could be done separate from the cancellation of the stamps by the old method without increase of clerical force, at its pleasure, thus leaving this patented invention subject as to use or value entirely to the will of the Post-Office Department, so that the use of it in the postal service would not deprive the owner of any opportunity to have it used otherwise, and could not damnify him, and that therefore no damages can be recovered in this case; and that no profits can be recovered because there is no party before the court, or that can be brought before the court, who has received any. If it was true that, because those who can make use of a patented invention could also do without it, would show that no injury resulted to the owner of the patent from such use, and cut off all claim for damages, there are probably few inventions that would sustain claims for damages at all. People could do as well before the discovery and leave the inventor to the enjoyment of his invention by himself. But the master has not reported any damages beyond the profits, and it does not seem that the defendant can be held liable for damages if he cannot be for profits, unless it may be for taking the profits and placing them beyond the reach of the plaintiff.

3308 The Post Office Department required the mails to be sent with certain frequency, and that the postage be paid by stamps on letters, and that the letters should be postmarked and the stamps cancelled separately, and required that the defendant should do this at the New York office, either himself or by the employment of clerks. The defendant says in his testimony that the clerks are paid by the government. This is, doubtless, true in practical effect, so far as he is con-

cerned; still it is to be presumed that the business is done according to the law, and he probably did not intend to testify that it was in any respect done contrary to the law. The law is that the Postmaster General may allow to the postmaster at New York City, and to certain others, out of the surplus revenues of their respective offices, that is to say, the excess of box-rents and commissions over and above the salary assigned to the office a reasonable sum for the necessary cost, among other things, of clerks—to be adjusted on a satisfactory exhibit of the facts, Rev. Stats., sec. 3860. The defendant is therefore to be taken to have made this saving out of moneys actually received into his hands from the profits of his office. He saved it by using the invention in the performance of duties which he was required to do and had just so much more money left in his hands by reason of the infringement when the duties were done. He did this as postmaster, but he was not obliged to do it. He could have refused the office, or resigned it, or have let this invention alone. He was not subject to any restraint, physical or moral, that he could not make subservient to his own choice. His choice was to use this invention and make this gain. When made it belonged to the orator. He paid it over to the government, and it passed beyond his reach and the orator's, unless it is recovered in this suit and reimbursed to him under the law. He has not these profits now, and would not have them if he had cast the money into the sea; he has had them as he would have had them then. The situation of the defendant is very different from that of the City of Elizabeth in Elizabeth *v.* Pavement Co., 97 U. S., 126. The city had not saved or made anything by the infringement and was not liable for profits in any view, whether any-one else was or not, and never had been. Here the defendant has paid over to the government what belonged to the owner of the 3309 patent, but that is no just answer to the claims of the owner, now belonging to the orator. Justice can only be done by requiring the defendant to restore the gains to those to whom they belong, and leave him to be protected as the law provides; and in doing this no injustice will be done to any one. That his official character did not excuse the infringement has already been held upon what seems to be abundant authority in this case. If he is liable as an infringer as if he were an ordinary individual, he must be liable to the extent of the consequences as an ordinary individual would be without regard to his reckoning over with the government. His official character is not any shield against the owners of the patent, although it may be a source of indemnity against the consequences. The other questions relate to who, as between themselves, have the right to recover what is recovered, or the right to control the disposition of what is recovered, in which apparently the defendant James has no interest. These questions are of two kinds; one of the kinds is of questions relating to the right when the suit was commenced, the other relating to rights since acquired. It is said by counsel for some of the claimants that this court has not jurisdiction of all these questions because some of them rest upon contracts between the parties, not citizens of different States, and do not involve any questions under the patent laws of the United States. The suit was brought by the plaintiff alone against the defendant James alone. Objection was made by the defendant that Charles Eddy was an owner of an interest in the patent, and that the suit could not properly proceed without him, whereupon Eddy appeared and became a party to the suit under a stipulation stating that he claimed his rights were fixed and determined by an assignment of one-third of the patent to him, and a contemporaneous agreement, dated October 23d, 1869, and the plaintiff that they were

determined by an agreement in writing among the owners of the patent dated October 7th, 1871, and that the cause should proceed upon the evidence taken, unless the court should otherwise direct, to a decree ascertaining the rights and interests of Eddy. This agreement as to what the court should decide did not enlarge what would have been before the court, with Eddy as a party defendant, without such an agreement, for it would all the while be necessary to determine his
3310 rights, in order to settle what would be left to the plaintiff as the foundation of any decree that might be made in his favor. The court has directed further evidence to be taken as to whether the instrument of October 7th, 1871, is still in force or has been cancelled, and such evidence has been taken. Eddy was a trustee for Jacob Shavor and Albert C. Corse. Since the commencement of the suit the personal representatives have conveyed his title; Corse has conveyed his; and Eddy and Corse have made an assignment for the benefit of creditors, which the assignees and those claiming under them insist carried the patent, and Eddy insists that it did not.

It is quite obvious, from this statement, that all these questions are questions of title to the patent which arise under the patent laws. The whole question as to the instrument of October 7th, 1871, according to the claims of counsel on each side of that question, is as to whether it affected the title by operating to convey a part or not, which is necessarily a question of title; and it seems to be agreed on all hands that if it did not affect the title, the question as to cancellation of it afterwards would be quite different from what it would be if it did; for if it conveyed title, cancellation of it would not reinvest the title, and if it was only an executory agreement as to the division of money it might well be cancelled by the parties to it. And if the court is to take notice at all of rights acquired since the suit was brought, those rights arise upon the acquisition of title, if they arise at all, so that all questions concerning them arise upon the title to the patent, and the right to recover for an infringement of it under the patent laws of the United States. It has never been doubted but the circuit courts have jurisdiction of all such questions, whatever the doubts and decisions may have been when neither the title itself, nor any question as to whether there was an infringement, was before the courts. Hartell vs. Tilghman, 99 U. S., 547.

Conveyances pendente lite do not all affect the litigation as between the parties to the original controversy, unless there are special statutes or circumstances to control; but courts of justice, even courts of law, and especially courts of equity, often protect the rights of the real owners to the fruits of a recovery, as against those who are nominal but not real owners, whenever their rights may have been acquired.
3311 All parties claiming to have derived any title or right from the owners of the patent, according to the decision in the principal case since the commencement of the litigation, have become parties to the record and submitted the evidence of their claims, and the questions arising thereupon are to be considered. This is not in any wise contrary to the stipulation made under which Eddy became a party to the suit; for these claims all arise under the right of Eddy as reserved to him in the stipulation, and when that right is ascertained and distinguished from the plaintiffs, the plaintiff has no right nor apparent interest as to where it shall go, whether to Eddy himself, for himself, and those for whom he was trustee, or to those to whom he and his cestuis que trust may have conveyed that right.

As the case stands, on October 20th, 1869, Norton owned and held

the title to the patent. He made an agreement in writing with Eddy that he would convey one-third of it to Eddy in trust for himself, Shavor, and Corse, and that $20,000.00 of the first money received on account of the patent should be received by Eddy for himself, and them to settle all claims between them and Norton; and that one-third of all further receipts should be received in like manner by him, and the other two-thirds by Norton. On the same day, or on the 20th, the copies differ as this date and the originals are not here, he conveyed the patent to Miss Ingalls. The conveyance to her was not recorded until after the other, and probably was not intented to be, for she mentioned it in an agreement with W. W. Secombe, dated October 4th, 1870, as having been left unrecorded for a time and afterwards recorded, in order that the patent might be reissued to her, and it is not to be presumed that such a fraud was intended as would result from a conveyance of a third to Eddy after the whole had been conveyed to her. Whatever its date in fact was, whether the 20th or the 23d, it was not recorded until August 1st, 1870, more than three months after its date, and it became subject to the conveyance to Eddy. Rev. Stats., sec 4898. The parties concerned appear to have understood that her conveyance was so subject. On the 15th day of August, 1870, Norton made an agreement in writing with Secombe that he should have the sum of $2,500 advanced, and to be advanced on account of the patent,
3312 with ten per cent. interest, out of any sum of money paid by the Postmaster-General for the use of the patent, and that if Norton should succeed in obtaining the one-third interest conveyed to Eddy in trust for himself, Shavor, and Corse, Secombe should have only six per cent. interest, but should have one-fourth of the patent. On the 4th day of October, 1870, Miss Ingalls made an agreement in writing with Secombe referring to this agreement between Norton and him, and ratifying and confirming it as if made by her. The patent was reissued to her on that day, and on the 4th day of March, 1871, she conveyed to him all her right, title, and interest in and to the patent in trust for herself and the wife and children of Norton, with full power to sell and assign and to grant licenses and manufacture under the patents, to pay the expenses of the trust, reserve his compensation as trustee, and pay over the balance according to a declaration of trust, which he then executed to her, by which he was to have two-fifths of the proceeds and she the other three fifths in trust for herself and the wife and children of Norton. In this state of the title the agreement of October 7th, 1871, was made and signed by Eddy, Shavor, Corse and Secombe. There had been a suit against the government in the Court of Claims, for compensation for the use of the patent, which had failed because no contract had been proved, and the matter had been before Congress for an appropriation to make compensation, which had not been disposed of by final action. The meaning and effect of the agreement are to be judged of in the light of this situation. It recited that the parties to the agreement were interested in the prosecution of a certain claim against the government for the use of this invention, and stated that it was understood and agreed between them that Eddy, Shavor, and Corse would "accept and receive in full payment and satisfaction of their claim and demand the sum of thirty thousand dollars," to be paid out of the monies to be received, provided it should amount to $62,000; and a pro rata sum if it should not amount to the sum stated with parties whose interest was $20,000, and Secombe, whose claim was $12,000. It is argued on the one hand that this was a conveyance which would cut the rights of Eddy, Shavor, and Corse in the patent down to $30,000;

and on the other, that it is a mere executory agreement. All interests in patents are assignable by instrument in writing. No
3313 particular form is required; but still there must be some operative words expressing at least an intention to assign in order to constitute an assignment. There are no such words in this instrument. There is no consideration stated for their agreement to accept that sum in satisfaction when received; there is not even an agreement to pay it. The substance is that if it is paid they will so receive it. Neither is there any consideration proved. They received no compensation or forbearance, nor Secombe any detriment that is shown. It would not be even an accord and satisfaction of the claim, if Secombe had received the money, and could not even be pleaded as such, for it is a mere accord without satisfaction, which is never a bar. It is wholly executory in character as to whatever it applies to, depending on future events and not presently operating on anything. But if it was an assignment of anything it makes no allusion to a patent further than to mention a claim for the use of a certain patented cancelling stamp invented and patented by Norton. It is plain that the claim referred to is under the patent, but a conveyance of the claim would not carry the patent. The patent would still be left, so far as this instrument in any view is concerned. This agreement was held by Secombe until the latter part of March, 1872, when, at the request of the other parties, he delivered it up to be canceled, and it was canceled. It was a mere agreement in the first place, and it required nothing more solemn than a mere agreement to end it. Such an agreement fully acted upon is fully and satisfactorily proved. The conveyances afterwards, until they reached the plaintiff, of the patent without the interests of Eddy, Shavor, and Corse, and their interests remained intact as they were under the assignment of one-third to Eddy in trust, October 23d, 1869. It is suggested that this agreement was recorded, and that the record of it may have misled the plaintiff, but this is not at all probable, and the result is not chargeable to Eddy or his cestuis if it did. That it was recorded would not make it an instrument of title, but would only complete its effect if it was one. If the plaintiff learned of the record he is to be taken to have learned of it as it was, and to have known that it
did not affect the title. According to these views the plaintiff is
3314 entitled to a decree for the payment by the defendant James to him of two-thirds of the sum reported by the master, namely, $42,000.

This conclusion would dispose of the whole case as it was originally brought; but when the defendant objected that all the parties in interest were not before the court, so that complete justice could be done, and the whole controversy disposed of, he set out the conveyance to Eddy as trustee for himself, Shavor, and Corse, as showing an outstanding interest, and prayed that Eddy, as trustee, might be made a party to the cause prior to the final hearing. It was the duty of the defendant in making that objection to set forth what parties were wanting that the plaintiff might supply them. This is required in pleadings at law to give the plaintiff a better writ before abating the one he has. The same is required in proceedings in equity, although not with the same strictness. Story's Eq. Pl., § 543. In complying with this requirement the defendant set forth who was lacking, and whose presence as a party was desired by him, namely, Eddy, as trustee, and that party was added accordingly, as he had prayed; since then all parties whose presence was desired by others have been before the court. It is not important in equity proceedings, for every purpose, that all the parties

to the controversy should be upon opposite sides in the formal pleadings. It is sufficient that they are citizens of different States on opposite sides of the dispute although not on opposite sides in the pleadings for the removal of the cause to the Federal court. Meyer vs. Delaware Railroad Cons. Co., S. C. U. S., Oct. term, 1879, Chicago Leg. News, Jan. 3, 1880. That the rights of the parties could be determined in the cause notwithstanding their position would seem to be a necessary ground to that conclusion. In this cause the pleadings cover all the grounds of claim upon and defence by the defendant, as well as to that part claimed by Eddy, as in respect to that by the plaintiff, and the evidence has been taken in respect to all the *the* issues made, and considered as bearing upon them. Under these circumstances, at least, it seems proper that the rights of Eddy and of those claiming under him as trustee, to the fruits of the infringement of the defendant, should be considered and determined. All the parties, except the defendant James, have insisted upon this course, and he has only insisted
3315 that the proceedings should be such as to protect him from further suits for the same cause. These proceedings, with these parties to them, appear to be ample for that purpose.

Eddy was trustee by name in the conveyances for himself, Shavor, and Corse. The presumption would be, in the absence of all proof, that he was trustee for himself and them in equal proportions. Whatever proof there is shows them to have been equal partners in cognate matters, and intensifies rather than rebuts the presumption. He could not be trustee for himself in any proper sense of the term, and must have been an absolute owner of his share of the third he held, or one-ninth of the whole. Shavor and Corse were equitable owners of their share, or one-ninth each of the whole. Shavor died, and his personal representatives, by leave of court, became parties to the suit under the rights represented by Eddy. On the 27th day of March, 1879, Corse assigned his right to Caroline G. Caswell, and she became a party in like manner. Corse and Eddy were partners with others, and they and their co-partners each as partners and as individuals, on the 31st day of March, 1879, assigned to J. Albert Cipperly and Charles H. Stannard "all and singular their co-partnership and individual estate and property, real and personal, goods, chattels, effects, credits, accounts, debts, dues, demands, choses in action, and property of every name and kind whatsoever, whether held by and in the name of said parties of the first part, and each and either of them, or by and in the name of any other person for them, or either of them, except such property, if any held or owned by said parties of the first part individually, as is exempt by law from levy and sale under execution," in trust, to be converted into money for the payment of the debts of the firm and its individual members. These assignees, assuming that the assignment covered the patent rights, have assigned them to Samuel R. Clexton, who has become a party to this suit. The personal representatives of Shavor have assigned his right to Clexton. The rights of Caroline G. Caswell to the share of Corse, all rights of Corse, if there were any remaining to him after his assignment to her and the assignment to trustees, and all rights acquired by Clexton through the trustees, have been transferred to Horace T. Caswell, who has become a party to this suit also. So all
3316 the rights of Corse, without reference to the fairness of his conveyance to Caroline G. Caswell so near to the time of the conveyance to trustees for the benefit of creditors, and without reference to whether that conveyance would pass any of these rights, have become vested in Horace T. Caswell, and all the rights of Shavor have become

vested in Clexton, and the only question remaining is whether the rights of Eddy passed to the assignees, and thence to Clexton, or remained to himself. All these assignments covered the claims for past infringement as well as the title to the shares of the patent.

The infringement of the defendant has been ripening into a cause or causes of action, all the while from the time when he began to infringe to the time of the assignment in favor of Eddy. Eddy's right to recover upon these causes of action, so far as they had accrued up to that time, was a chose in action. Choses in action are expressly named in the assignment to trustees, and by force of those words it would carry this claim. But his title to the patent remained, and the further question is as to what became of that. The words of the assignment are probably broad enough to cover it. Similar words were held to be sufficient for such a purpose in Railroad Co. vs. Trimble, 10 Wall., 367. Still there is excepted out of the individual property of the assignors all property exempt by law from levy and sale under execution. If this means such property as is specially exempt by express provisions of the statutes, the right to the patent is not included among the classes of such property. But the exception is not of the property exempt by statute, but of the property exempt by law. Property can be levied upon and sold under execution at all only by force of law. Such property as cannot by law be taken is by law exempt. This patent right could not by law be so levied upon and sold, and was therefore by law exempt. This conveyance, too, is understood to be such a conveyance for the benefit of creditors as the law of New York sanctions and upholds for appropriating the property of debtors to the payment of their debts in place of legal proceedings to judgment, execution, and levy for that purpose. It is to be construed like other written instruments in the light of the circumstances and its professed object for the purpose of ascertaining the intention of the parties. In this view it may well be understood that the intention was to place in the hands of the as-
3317 signees what the creditors could otherwise reach, and to except out by this clause what they could not reach. This consideration aids the conclusion that this patent right was excepted and not conveyed. Probably these distinctions were not actually thought of, and very likely the actual effect of the instrument upon other property was not, but the instrument was probably made in that way because the assignors were willing to stand by its effect upon their property of various kinds, situated under various circumstances, whatever the effect might turn out to be. And an assignment of what by law could be taken was all the creditors had a right to claim. So Caswell is entitled to one-ninth of the whole sum reported by the master, seven thousand, dollars and Clexton is entitled also to one-ninth and so much of the profits of one-ninth as accrued before March 31st, 1879, in addition, and Eddy is entitled to the profits of the same ninth which accrued subsequently to that time.

The profits allowed consist in money saved from salaries at a uniform rate, so that the amount due to the ninth share of Eddy for the time before March 31st, 1879, and for the time subsequent is readily computed. For the time before it is $6,125, and for the time subsequent, $875.

Therefore, of the profits reported by the master the orator is entitled to	$42,000 00
Samuel R. Clexton to	13,125 00
Horace T. Caswell to	7,000 00
Charles Eddy to	875 00

The defendant James has moved for a stay of proceedings in this cause, on account of a suit brought in this court against him, for the same infringement, by the personal representative of William W. Secombe under whom the plaintiff claims title, in which it is alleged that the title to this patent did not pass from Secombe because the deed from him did not in terms cover it; and that, if it did, the contract pursuant to which the deed was made was that this patent should not be conveyed, and that the deed should be reformed to that extent. This motion has been heard at the same time with the exceptions to the master's report. As the cases now stand, this plaintiff cannot be affected by any parol contract between the parties to that deed, as to
3318 what it should cover. He is a purchaser for valuable consideration without notice of any such outstanding equitable claim to the patent, if it exists. The laws srelating to patents require the title to the patent to be shown by the records of the Patent Office, and he had a right to rely upon the title there shown. That the deed did carry this patent has already been determined in this case, upon a full argument and consideration.

There is no apparent ground upon which this motion can justly be sustained, and it must be denied.

On account of the number of those found to be entitled to share in the avails of the recovery, and of the conflicting claims between them, it may be preferable to the defendant James, equally advantageous to those entitled, and perhaps more proper as the case is made up, that he should have opportunity to make payment into the registry of the court, for the benefit of those entitled, instead of being compelled to pay their shares to them severally.

The exceptions to the master's report are overruled; the report is accepted and confirmed and a decree ordered to be entered that the defendant James pay to the clerk of this court the sum of sixty-three thousand dollars mentioned in the master's report, within twenty days from the entry of the decree, for the benefit of the other parties to this suit—forty-two thousand dollars for the plaintiff, thirteen thousand one hundred and twenty-five dollars for Samuel R. Clexton; seven thousand dollars for Horace T. Caswell; and eight hundred and seventy-five dollars for Charles Eddy, and for execution thereof in default of such payment, and for costs to the plaintiff, to be taxed.

HOYT H. WHEELER.

3319 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES, CHARLES EDDY ET AL., defendants.

To EDWARD D. BETTENS, Esq.,
Solicitor for Samuel R. Clexton and Horace T. Caswell, defendants:

SIR: Please to take notice that on Thursday, the 17th day of August, 1880, at 11 o'clock forenoon of that day, or as soon thereafter as counsel can be heard by the court, and before honorable Hoyt H. Wheeler, one of the judges of this court, I shall make a motion in which I shall ask the court for an allowance for counsel and solicitor fees under the stipulations with the defendant Eddy in June, A. D. 1878, and an order

made by this court on or about the 24th day of January, A. D. 1880, by which the said Clexton and Caswell became and were made defendants in this cause.

3320 There having been an adjustment and settlement of such matters and things as came directly under and within the order of this court dated the 23d day of December, A. D. 1879, and the same having been satisfied and accepted by complainant any and all notices having reference to said order are now and hereby re'cinded and discontinued.

Of these, and each of these several matters you will please take due notice.

MARCUS P. NORTON,
Solicitor for Complainant.

Dated this 12th day of August, A. D. 1880.

To EDWARD D. BETTENS,
Solicitor for Caswell and Clexton.

(Endorsed:) U. S. circuit court. Filed August 17, 1880. John I. Davenport, clerk.

3321 Circuit court of the United States, southern district of New York. In equity. February term, 1880.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES, CHARLES EDDY, AND others.

This cause has been further heard upon the motion of the defendant, James for a rehearing in chief upon the question of prior knowledge and use at the Philadelphia post-office, and upon the exceptions to the master's report; upon the motion of the defendants, Clexton and Caswell, for a rehearing upon the question as to the passing of the title of Eddy to the patent by his assignment for the benefit of his creditors; upon the *the* motion of the plaintiff for a rehearing upon the question as to the passing of Eddy's right to recover gains and profits already accrued by the same assignment; and upon the motion of the plaintiff for an increase of damages to be recovered.

3322 The motion for a rehearing in chief is based upon some inaccuracies in the statement of the age of a witness in the former opinion and upon the supposition that, because some of the testimony, and of the reasons leading to the finding are stated, the other evidence was overlooked, and no other reasons were considered. This supposition is not well founded. There was no attempt to review all the evidence, or to state all the reasons bearing upon that question of fact, in the opinion.

Nothing material not before considered has been suggested as ready to be offered in respect to the exceptions to the master's report, nor in respect to the passing of Eddy's title to the patent by his assignment.

It is urged that the right to recover gains and profits would not pass without the right to the patent itself. This is probably true, at law, but perhaps not so in equity. The right to recover them by the assignee in the name of the assignor has not been denied in any case cited in argument or that has been seen. In this case as it stands the form of

3323 the recovery in one name or another is not at all in question. The right to the gains and profits as between the defendants other than James, themselves, when recovered, only is in controversy. The

right of the plaintiff to the share of Eddy has been acquired since the decree, as a part of a sum already recovered, and not as a right of recovery acquired before recovery had. There appears to be no obstacle in the way of acquiring such a right. No damages have been found in this case, and there are none as such to be increased. The statute authorizes an increase of damages, not an increase of gains and profits to be recovered. (Rev. Stats., sects. 4919, 4921.) If damages existed to be increased the circumstances of this case would not warrant any increase. There has been no wanton invasion of the rights of the owners of the patent by the defendant. The use of the invention in such manner as to be accountable for the profits has been rather desired than otherwise. This is shown by the evidence as well as by the fact that no injunction has been asked for.

3324 The motions are denied.

HOYT H. WHEELER.

For plaintiff, Marcus P. Norton, George H. Williams.
For defendants, Samuel B. Clarke, ass't U. S. att'y.

(Endorsed:) U. S. circuit court. Filed Sept. 14, 1880. John I. Davenport, clerk.

3325 JAMAICA, *Sept.* 21, 1880.

DEAR SIR: Enclosed I return your draft of decree made to conform to my views and signed. You may have it re-engrossed and return it to me for signature, or file it as it is, as may be preferred. In either case please call the attention of the complainant's solicitor to it before filing it.

As the cancellation of the instrument of October 7th, 1871, is but a step in the proceedings, I think the statement of the conclusion as to that alone is out of place, and therefore I have erased it.

Yours, truly,

H. H. WHEELER.

3326 Circuit court of the United States for the southern district of New York.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES AND OTHERS.

BLATCHFORD, J.:

This is a suit in equity for the infringement of a patent. A final decree has been entered in it, adjudging that the plaintiff recover from the defendant James personally a sum of money for such infringement, and awarding execution against him personally therefor. The infringement was committed by the use by the defendant James, in the post-office at the city of New York, while he was postmaster there, and in the business of such post-office, of an apparatus for stamping letters with a postmark and cancelling postage-stamps, in infringement of said pat-

ent. On behalf of the defendant James a motion is now made to this court to grant a certificate under § 989 of the Revised Statutes of
3327 the United States. That section is as follows: "When a recovery is had in any suit or proceeding against a collector or other officer of the revenue, for any act done by him, or for the recovery of any money exacted by or paid to him, and by him paid into the Treasury, in the performance of his official duty, and the court certifies that there was probable cause for the act done by the collector or other officer, or that he acted under the direction of the Secretary of the Treasury, or other proper officer of the government, no execution shall issue against such collector or other officer, but the amount so recovered shall, upon final judgment, be provided for and paid out of the proper appropriation from the Treasury."

The first question which arises is, whether the defendant James, as such postmaster, was such an officer of the revenue as is meant by the expression "other officer of the revenue" in the section. The section is taken from § 12 of the act of March 3d, 1863 (12 U. S. Stat.
3328 at Large, 741). Such § 12 runs in these words: "In all suits or proceedings against collectors or other officers of the revenue for any act done by them, or for the recovery of any money by or paid to such officer and by him paid into the Treasury of the United States, in the performance of his official duty, in which any district attorney shall be ordered to appear on behalf of such officer by the Secretary or Solicitor of the Treasury, or by any other proper officer of the government, such attorney shall be allowed such compensation for his services therein as shall be certified by the court in which such suit or proceedings shall be had to be reasonable and proper, and approved by the Secretary of the Treasury; and where a recovery shall be had in any such suit or proceedings, and the court shall certify that there was probable cause for the act done by the collector or other officer, or that he acted under the directions of the Secretary of the Treasury or other
3329 proper officer of the government, no execution shall issue against such collector or other officer, but the amount so recovered shall, upon final judgment, be provided for and paid out of the proper appropriation from the Treasury."

So much of said § 12 as is not to be found in § 989 of the Revised Statutes is found in §§ 827 and 834.

The above § 989 is found in Title 13 of the Revised Statutes, entitled "The Judiciary," and in Chapter 18 thereof, entitled "Procedure." It is provided by § 5595 of the Revised Statutes that the 73 Titles thereof embrace the Statutes of the United States, general and permanent in their value, in force on the 1st day of December, 1873, as revised and consolidated by commissioners appointed under the act of June 27th, 1866 (14 U. S. Stat. at Large, 74). Section 5,600 of the Revised Statutes provides that the arrangement and classification of the several
3330 sections of the revision have been made for the purpose of a more convenient and orderly arrangement of the same, and therefore no inference or presumption of a legislative construction is to be drawn by reason of the Title under which any peculiar section is placed.

The act of March 3d, 1863, is entitled "An act to prevent and punish frauds upon the revenue, to provide for the more speedy and certain collection of claims in favor of the United States, and for other purposes." In section 2 are found the words "frauds upon the revenue"; in sections 3, 4, and 6 the words "any officer of the revenue"; in section 5 the words "the revenue laws"; in section 7 the words "any fraud on on the revenue"; in section 11 the words "the revenue laws," and in

sections 12 and 13 the words "collectors or other officers of the revenue." It is clear that the word "revenue" in all these forms of expression means only the revenue from customs. The act does not
3331 relate to revenue from any other source. So far as it relates to revenue from any source it relates only to revenue from customs.

The words "officers of the revenue," in section 12, mean officers of the revenue from customs. The words "officer of the revenue," in § 989 of the Revised Statutes, which is a mere revision or reprint of § 12 of the act of 1863, can have no different meaning from what it would have had if there had been no revision or reprint. Under said § 12, the words "other officers of the revenue" would never have been construed to mean a postmaster. Therefore they cannot be so construed in § 989 of the Revised Statutes. The revision cannot change the meaning of the same words by displacing the enactment from the connection in which Congress originally placed it.

This is the view held by the Post-Office Department itself; for on the report of the Postmaster-General to the President, of November 8th, 1879, reference is made to this suit and to the decision in it, by the interlocutory decree, adverse to the defendant James, and it is
3332 stated that "there is no provision of Federal law to secure 'certificates of probable cause' to the United States officials other than Treasury officials, in cases of adverse judgments for acts done in their official capacity."

This is unquestionably a correct view. For what acts done in their official capacity "Treasury officials" may have such certificates granted to them under the statute, and whether such acts can ever include the act of infringing a patent are questions not involved in this case.

The motion is denied on the ground above stated.

Stewart L. Woodford (district attorney) and Samuel B. Clarke (assistant district attorney) for the motion.

Marcus P. Norton opposed.

3333 (Indorsed:) Circuit court of the United States for the southern district of New York. Christopher C. Campbell vs. Thomas L. James and others. Decision. May 26th, 1880. U. S. circuit court. Filed May 26, 1880. John I. Davenport, clerk.

3334 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

At a stated term of the circuit court of the United States held in and for the southern district of New York at the court-house in the city of New York, on the 18th day of August, 1880.

Present, the honorable Hoyt M. Wheeler, judge.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
vs.
THOMAS L. JAMES AND CHARLES EDDY AND others.

On reading and filing the annexed stipulation, together with a copy of the agreement of March 20, 1880, in said stipulation mentioned, and also the annexed assignment of Charles Eddy to Albert E. Woos-
3335 ter, and reference being had to the decision of the court now on file respecting the matter of the judgment in said stipulation mentioned,

And on motion of Horatio F. Averill, esq., solicitor for the defendant Charles Eddy, it is ordered that out of the judgment obtained by the complainant, Christopher C. Campbell, in the above entitled action when realized, there be paid to Albert E. Wooster, as assignee of Charles Eddy the sum of five thousand dollars, for services rendered and to be rendered to said Eddy in said suit, as his agent, attorney, solicitor, and counsel therein, and his employment of and liability to other persons and counsel therein; and that there be further paid out of said judgment when realized to said Charles Eddy, or to his duly constituted agent or assignee, the further sum of five thousand dollars.

And it is further ordered that if the amount of the judgment in the above entitled cause be paid into court, by the defendant, the sum of five thousand dollars be paid to Albert E. Wooster, as assignee
3336 of Charles Eddy, as above mentioned, and to said Charles Eddy, or to his duly constituted agent or assignee, the further sum of five thousand dollars (making in the total ten thousand dollars) out of the amount adjudged to be due to the complainant Christopher C. Campbell.

And, on like motion, it is further ordered that, by virtue of the instrument in writing, dated March 20, 1880, in the annexed stipulation referred to, there be paid to the complainant, Christopher C. Campbell all sums that may be adjudged to be due the defendant, Charles Eddy, in this suit.

And this order is made without prejudice to the rights of any parties in interest, except those who have signed the agreement of March 20, 1880, and the assignment from Eddy to Wooster.

HOYT H. WHEELER.

3337 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT & assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY & others.

It is hereby stipulated that out of the judgment obtained against Thomas L. James in the above-entitled action, there be paid to Charles Eddy, his executors, administrators, or assigns, the sum of ten thousand dollars, if that amount be realized in said suit, and that an order to that effect may be entered at any time without further notice, pursuant to an instrument in writing dated March 20, 1880, executed by and between Charles Eddy and Christopher C. Campbell. The said order is not to be entered until after the decision of the court respecting the matter of said judgment, now pending before it.

3338 Dated March 26th, 1880.

CHARLES EDDY.

(Endorsed:) U. S. circuit court. Christopher C. Campbell vs. Thomas L. James & others. Stipulation.

3339 Whereas, on the 14th day of April, 1863, the letters patent of the United States of America No. 38175 were granted and issued to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, upon new and useful improvements in post-office postmarking and postage cancelling hand stamps, which letters patent were first reissued on the 23rd day of August, A. D. 1864, and were numbered 1748, and were again reissued to Marcus P. Norton on the 3rd day of August, A. D. 1869, and were numbered 3586, and thereafter, and for the third and last time, were reissued, and to Helen M. Ingalls, assignee of the said Marcus P. Norton, bearing date the 4th day of October, A. D. 1870, in two divisions, viz, "Division A," No. 4143, and "Division B," No. 4144, which said letters patent, on the 1st day of September, A. D. 1879, were by Judge Hoyt M. Wheeler, sitting as and with the powers of a circuit judge in the circuit court of the United States in and for the southern district of New York, in the suit of Christopher C. Campbell, complainant and assignee in trust, against Thomas L. James and Charles Eddy, defendants, pronounced to
3340 be good and valid letters patent in and by an interlocutory decree or decretal order made by said judge on the day and date above stated in that suit, in conformity to and with an opinion and decision in writing that had previously been made by said Judge Hoyt M. Wheeler, and filed in said court, in the clerk's office thereof, some time in the month of August, A. D. 1879:

Now, therefore, this agreement made between Charles Eddy, now or late of the city of Troy, in the State of New York, party of the first part, and Christopher C. Campbell, of East Chatham, Columbia County, State of New York, individually and as assignee in trust, party of the second part, witnesseth:

That the said party of the first part, for and in consideration of the sum of one dollar to him in hand paid by said party of the second part, and of the covenants and provisos as to the payment to him of the further sum of twenty thousand dollars hereinafter contained, doth hereby convey, assign, and transfer unto the said party of the second
3341 part, all the right, title and interest of the said party of the

first part of every name and nature of, in, and to the said letters patent hereinbefore described, and to any or either of them, and of, in, and to the said letters patent hereinbefore described, and to any or either of them, and of, in, and to all and any and every claim and demand of said party of the first part for or by reason of any infringement of said letters patent, or of any use of articles described in or covered by said letters patent, and as well against the United States or any department of the government thereof, or any postmaster or other person or persons infringing said patents or either of them, or to any sum that may be provided for by act or resolutions of the Congress of the United States as against any individual persons or corporations or persons holding official positions under the said government.

To have and to hold the same to said party of the second part in trust for Mrs. Minnie D. Norton, wife of Marcus P. Norton, and their daughters, viz, Ada Lavinia Norton, Helen Grace Norton and Estelle May Norton, their heirs, assigns, or lawful representatives, with the same force
3342 and effect as if no conveyance or assignment of any interest in said letters patent, or of any claim or demand for infringement thereof had ever been made by any person heretofore at any time to said party of the first part.

And the said party of the second part doth hereby covenant and promise to and with said party of the first part that he will pay or cause to be paid to said party of the first part, his executors, administrators, or assigns the sum of twenty thousand ($20,000) dollars in manner following, viz, ten thousand dollars to be paid out of the judgment obtained against Thomas L. James in the suit above mentioned, if that amount be realized in said suit; but if not, then in the first suit or suits brought for infringement of the above recited patents or either of them in which said sum is first or soonest realized.

The remaining sum of ten thousand dollars is to be paid out of the sum first realized in any suit or suits (besides the aforesaid suit now pending against said James), which shall be brought for infringe-
3343 ment of said letters patent or either of them; and in the said suit now pending against said James, or in any of the suits hereinbefore referred to, the said party of the second part doth hereby covenant and agree that the court may by order direct the payment of the sums hereby promised to be paid to the said party of the first part, or to his executors, administrators, or assigns. And in case the Congress of the United States shall make an appropriation or provision for the purchase of said letters patent, or either of them, or for the settlement of claims or demands for the infringement thereof, or if such purchase or settlement be made in any manner, then there shall be paid to said party of the first part, or to his executors, administrators, or assigns, the said sum of twenty thousand dollars or so much as shall be necessary with whatever may have been paid in suits as above recited to make up the said sum of twenty thousand dollars, provided that said payments shall not in the whole exceed the sum of twenty thousand dollars.

It is understood between the parties hereto that this conveyance
3344 shall and does hereby embrace, assign, and convey to the party of the second part, in trust as aforesaid, on the conditions above set forth, each and every letters patent and invention of every name and nature whatsoever patented to or invented by Marcus P. Norton in which the said party of the first part has any right, title, or interest whatever, whenever or howsoever the same may have been acquired.

In witness whereof the parties to these presents have hereunto set their hands and seals this twentieth day of March, A. D. 1880.

3347 Know all men by these presents that I, Charles Eddy, one of the defendants in the suit now pending in the circuit court of the United States for the southern district of New York, wherein Christopher C. Campbell, assignee in trust, &c., is complainant against Thomas L. James and others, defendants, for and in consideration of one dollar to me in hand paid by Albert E. Wooster, of the city of Troy, county of Rensselaer and State of New York, and of services rendered and to be rendered to me in said suit, and in respect to the agreement hereinafter mentioned, and matters therein mentioned by the said Albert E. Wooster, as my agent, attorney, solicitor and counsel therein, and of his employment of and liability to other persons and counsel therein, have sold, assigned and conveyed, and by these presents do sell, assign and convey unto the said Albert E Wooster, and to his executors, administrators and assigns, such portion of the judgment recovered in said suit in my favor, or such portion of the judgment made or to be made under an agreement executed between said Christopher
3348 C. Campbell and myself, bearing date the 20th day of March, 1880, as shall first realize on my behalf the sum of five thousand dollars.

And I hereby direct that out of the moneys first realized in my behalf under said judgment, or under said agreement, there be first paid to the said Albert E. Wooster the said sum of five thousand dollars.

And I hereby give to the said Albert E. Wooster a lien for the said sum of five thousand dollars upon the said judgment, and upon the said agreement, and upon the moneys realized in my behalf, from or by virtue of them, or either of them.

And in case more than fifteen thousand dollars shall be realized in my behalf in said suit, or under and by virtue of said agreement, then, and in that case, in consideration of the premises aforesaid, I, the said Charles Eddy, have also sold, assigned, and conveyed, and by these presents do sell, assign, and convey unto the said Albert E.
3349 Wooster, and to his executors, administrators and assigns, all such portions of said moneys as shall be realized in my behalf on said judgment or said agreement over and above the said sum of fifteen thousand dollars.

It being hereby intended, and I hereby direct that out of the moneys realized in my behalf under said judgment and under said agreement, in addition to the five thousand dollars herein first above mentioned, and after deducting the further sum of ten thousand dollars realized in my behalf as aforesaid, there be paid to the said Albert E. Wooster the further sum of five thousand dollars, or so much thereof as shall be realized as aforesaid, over and above the said sum of fifteen thousand dollars.

And I hereby give to the said Albert E. Wooster a lien upon the said judgment and agreement, and upon the moneys realized in my behalf therefor, after the said sum of fifteen thousand dollars shall be realized and obtained as aforesaid.

In witness whereof I have hereunto set my hand and seal this
3350 16th day of April, in the year one thousand eight hundred and eighty.

CHRISTOPHER C. CAMPBELL, COMPLAINANT assignee in trust,
versus
THOMAS L. JAMES AND CHARLES EDDY ET AL., defendants.

To STEWART L. WOODFORD,
United States Attorney, and Solicitor and of counsel herein for the defendant Thomas L. James:

SIR: Be pleased to take due notice that on Wednesday, the 23d day of June, A. D. 1880, at 10 o'clock forenoon of that day, or as soon thereafter as counsel can be heard by the court, and at the United States court-house at Rutland, county of Rutland, in the State and district of Vermont, and before Hon. Hoyt H. Wheeler, one of the judges of this court, and in the court-room in said court-house where he usually holds court as such judge, I shall move the court to increase the sum or amount of damages found and allowed by the master in this cause
3352 and duly confirmed by this court upon exceptions taken to the report of the master duly filed in court by him, from the sum and amount of $63,000 ℔—, to twice that sum and amount, namely, to the sum and amount of $126,000 ℔, one hundred and twenty-six thousand dollars, exclusive of "costs, charges, and disbursements" allowed in and by the decretal order of this court made on the first day of September, A. D. 1879, and thereafter duly filed in court.

Such motion will be founded upon the statutes of the United States of America passed by the Congress of said United States, and approved on the 8th day of July, A. D. 1870, and the same may be found at sections 4919 and 4921 of the Revised Statutes of the United States, approved on the 22d day of June, A. D. 1874, also August 15th, A. D. 1876, to which your attention is requested.

Such motion will also be founded upon each and every paper on file in this court in this cause, as well also upon the practice had in this cause, and also upon each and all proceeding in this cause, so that the whole case and matter may be brought to the attention and consideration of this court, in order that said court may be the better pre-
3353 pared to determine whether this motion ought or ought not to be granted.

You will also take notice that I shall then and there ask of the court an order allowing and directing that an execution be issued by the clerk of this court, and under its seal and in the usual manner, to collect and to enforce the payment of such judgment as this court may, upon this motion, determine against the said defendant, Thomas L. James. Of each of these matters you will please to take due notice.

Dated this 14th day of June, A. D. 1880.

MARCUS P. NORTON,
Solicitor for Complainant, Troy, N. Y.
GEORGE H. WILLIAMS,
Of Counsel for Complainant, Washington, D. C.

Personal service hereof is, this 14th day of June, A. D. 1880, hereby admitted by copy of the same.

STEWART L. WOODFORD,
U. S. Att'y, for Def't.

C.

3354 (Indorsed:) In the circuit court of the United States in and for the southern district of New York, second circuit. In equity. Christopher C. Campbell versus Thomas L. James et al. Notice of motion to increase the damages in this cause from $63,000 to $126,000, as by law provided. Marcus P. Norton, solicitor for complainant, Troy, N. Y. George H. Williams, of counsel, &c. U. S. circuit court. Filed Aug. 18, 1880. John I. Davenport, clerk. Original.)

3355 To Marcus P. Norton, esq., solicitor for complainant; Stewart L. Woodford, esq., solicitor for Thomas L. James; Horatio F. Averill, esq., solicitor for Charles Eddy:

You and each of you will please to take notice that the following proposed decree, a copy of which is herewith served on each of you, will be mailed on the 17th day of September, 1880, at the New York City post-office, to the honorable Hoyt H. Wheeler, at Jamaica, Vermont, for his approval and acceptance, as the final decree in this suit.

Dated New York, September 16th, 1880.

Yours, &c.,

EDWARD D. BETTENS,
Solicitor for Samuel R. Clexton and Horace T. Caswell, and Charles Eddy, their Trustee.

3356 Service of a copy of above proposed decree and notice is hereby admitted.

Dated New York, September 17th, 1880.

MARCUS P. NORTON,
Complainant's Solicitor.

Solicitor for Thomas L. James.
H. F. AVERILL,
Solicitor for Charles Eddy.

SOUTHERN DISTRICT OF NEW YORK,
City and County of New York, ss:

Edward D. Bettens, being duly sworn, says that on the 17th day of September, 1880, at New York City, New York, in the office of Stewart L. Woodford, in the post-office building, he personally served a copy of the above notice and within proposed decree on the solicitor of Thomas L. James by delivering to and leaving with Albert B. Herrick, assistant U. S. attorney, and then in charge of said solicitor's office, a
3357 true copy of said notice and proposed decree; that at the time of said service both Stewart L. Woodford and Samuel B. Clarke were absent from said office.

EDWARD D. BETTENS.

Sworn to before me this 17th day of September, 1880.

THOS. B. CLIFFORD,
Notary Public, City & Co. of New York.

3358 *Final decree, February term*, 1880.

In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES, CHARLES EDDY, HORACE T. Caswell, and Samuel R. Clexton, defendants.

This cause came on to be heard at this term of this court, as to the rights herein of Christopher C. Campbell, Charles Eddy, Horace T. Caswell, and Samuel R. Clexton, as between themselves; also upon exceptions taken and filed in court by the defendant, Thomas L. James, and the complainant, to the final report made in this by Kenneth G. White, one of the masters of this court, dated the 2nd day of January,
3359 1880, and by him filed in court, on the 12th of the same month and year, and thereupon argument thereof was duly had to the court, by counsel for the respective parties to the suit; whereupon, and upon due consideration thereof by the court, it is now ordered, adjudged, and decreed as follows, that is to say:

First. That Christopher C. Campbell, the complainant herein, is the owner in trust of an undivided two-thirds part of the letters patent "Division A," numbered 4143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, being for letters patent, numbered 38175, granted and issued on the fourteenth day of April, 1863, to Marcus P. Norton, subject to the rights of Helen M. Ingalls. That Charles Eddy, individually and as trustee for Horace T. Caswell and Samuel R.
3360 Clexton, is the owner of an undivided one-third part of said letters patent, "Division A," numbered 4143.

Second. That the exceptions, and each thereof, of the complainant to the master's report be, and the same are hereby, overruled.

Third. That the exceptions, and each thereof, of the defendant, Thomas L. James, to the master's report be, and the same are hereby, overruled.

Fourth. That the report of the master in this cause be, and the same is hereby, in all respects ratified and confirmed and accepted.

Fifth. That the gains, profits, savings, and advantages which have been made, or "which have arisen or accrued on account of the
3361 infringements" upon and in violation of the rights under and secured by the letters patent, "Division A" numbered 4143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, being for letters patent numbered 38175, granted and issued on the fourteenth day of April, 1863, to Marcus P. Norton, of the city of Troy, county of Rennselaer and State of New York, in this cause, are the sum of sixty-three thousand dollars ($63,000.00).

Sixth. That the complainant do recover from the said defendant, Thomas L. James, the sum of forty-two thousand dollars ($42,000,00), besides his charges and disbursements, herein taxed at the sum of one thousand four hundred and seventy $\frac{40}{100}$ dollars ($1,470.40), making in all the sum of forty-three thousand four hundred and seventy-one $\frac{40}{100}$ dollars ($43,471.40).

3382 That Charles Eddy, individually and as trustee for Samuel R. Clexton and Horace T. Caswell, do recover of the said Thomas L.

James the sum of twenty-one thousand dollars ($21,000.00). That of the said sum of $21,000, the said Clexton is entitled to thirteen thousand one hundred and twenty-five dollars ($13,125) thereof; and the said Caswell to seven thousand dollars ($7,000) thereof; and the said Eddy to eight hundred and seventy-five dollars ($875) thereof assigned to the complainant since the interlocutory decree, as appears by assignment on file.

Seventh. That the said defendant, Thomas L. James, within twenty days from the entry of this decree, pay to the clerk of this court the sum of sixty four thousand four hundred and seventy-one $\frac{40}{100}$ dollars ($64,-
3363 471 $\frac{40}{100}$) and interest thereon from the entry of this decree to the date of said payment to said clerk for the benefit of the complainant, and Samuel R. Clexton, and Horace T. Caswell, and Charles Eddy, and the complainant, his assignee. That upon said payment to said clerk of said sum of $64,471.40, and interest as aforesaid, the said clerk shall forthwith pay, to the said Christopher C. Campbell, the sum of ($43,471.-40, forty-three thousand four hundred and seventy-one $\frac{40}{100}$ dollars, and interest thereon from the date of entry of this decree, to the date of said payment to said clerk; and to the defendant, Samuel R. Clexton, the sum of ($13,125.00) thirteen thousand one hundred and twenty-five dollars and interest thereon, from date of the entry of this decree to
3364 the date of said payment to said clerk; and to the defendant Horace T. Creswell, the sum of (7,000) seven thousand dollars, and interest thereon, from the date of said entry of this decree to the date of said payment to said clerk; and to the complainant, assignee of Charles Eddy ($875.00) eight hundred and seventy-five dollars, and interest thereon, from the date of the entry of this decree to the date of said payment to said clerk.

Eighth. In default of the payment by the defendant Thomas L. James to the clerk of this court, within twenty days from the entry of this decree, of the said sum of $64,471.40, and interest as aforessaid, then that Christopher C. Campbell, as assignee in trust, and Charles Eddy, individually and as trustee for Samuel R. Clexton and Horace T.
3365 Creswell, have execution against the said Thomas L. James for the sum of ($64,471.40,) sixty-four thousand four hundred and seventy-one $\frac{40}{100}$ dollars, and interest thereon from the date of the entry of this decree. That the moneys collected under said execution, less the marshal fees, be forthwith paid by the marshal collecting the same to the clerk of this court, for the benefit of the complainant and and Samuel R. Clexton and Horace T. Caswell, and the complainant, assignee of Charles Eddy; and that said clerk thereupon forthwith pay such portions of said money to said complainant, said Samuel R. Clexton, and said Horace T. Caswell, and said complainant, assignee of Charles Eddy, respectively, as the said Campbell, Clexton, Caswell, and
3366 Eddy are each respectively entitled to under sixth paragraph of this decree.

Dated this 21st day of September, 1880.

HOYT H. WHEELER.

(Endorsed:) U. S. circuit court. Chistopher C. Campbell vs. Thomas L. James, et al. Proposed final decree, and notice of settlement. Edward D. Bettens, solicitor for Caswell, Clexton, and Eddy, their trustee, 206 Broadway, New York. U. S. circuit court. Filed, Sep. 23, 1880. John L. Davenport, clerk.

3367 The circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES, CHARLES EDDY, HORACE T. Caswell, and Samuel R. Clexton, defendants.

Paragraph first. It is now and hereby stipulated and agreed that the defendant Thomas L. James may appeal this case to the Supreme Court of the United States without giving any bond or security whatever on said appeal as to the other parties to the suit, provided such ap-
3368 peal is taken by said James in time for and placed on the calendar of the October term, 1880, of said Supreme Court.

Paragraph second. It is also further stipulated and agreed that in case such an appeal is taken in time for and placed on the calendar of said October term, 1880, of said Supreme Court, no execution or other process for enforcing the final decree or judgment herein shall issue on behalf of any party to the suit against said defendant James prior to the first day of January, eighteen hundred and eighty-one, and that no attempt to obtain execution or other process against said defendant James shall be made by any of the parties to this suit prior to the first day of January, eighteen hundred and eighty-one, provided,

3369 First, that the Attorney-General shall, on the first day o the October term, 1880, of the said Supreme Court, or as soon thereafter as he can be heard, move the Supreme Court to advance the said appeal upon the calendar of said Supreme Court, and shall use his utmost endeavors to obtain such advancement, so that said appeal may be argued and heard during the month of November, 1880, in said Supreme Court; and provided, also,

Second. That if the said appeal shall not be argued and heard in said Supreme Court before December 1st, 1880, then this paragraph (that is to say, paragraph second) of this stipulation shall be null and void on and after January 1st, 1881; and all parties to this suit on and after January 1st, 1881, shall have the same rights to obtain, vacate,
3370 or suspend an execution, or other process for enforcing the final decree or judgment herein that they would have if this stipulation (contained in said paragraphs first and second) had not been made.

Dated New York, this 31st day of August, 1880.

MARCUS P. NORTON,
Solicitor for Complainant.
H. F. AVERILL,
Solicitor for Def't Chas. Eddy.
EDWARD D. BETTENS,
Solicitor for Defendants Horace T. Caswell & Samuel R. Clexton.

On the conditions above stated the Attorney-General will move to advance this cause upon the calendar of the Supreme Court as indicated.

Signed this 31st day of August, 1880, by authority of the letter of the Attorney-General to Samuel B. Clarke, ass't U. S. att'y, dated Aug. 26, 1880, and on file in the district attorney's office.

3372 POST-OFFICE DEPARTMENT,
Washington, D. C., Sept. 26, 1879.

SIR: In the matter of the case of Christopher C. Campbell vs. Thomas L. James and Charles Eddy, in the circuit court of the United States for the southern district of New York, wherein a decree has been rendered in favor of the complainant and against the defendants, you are hereby directed to take such steps, by appeal or otherwise, as may be required by law, to have said decree reviewed by the Supreme Court of the United States, to the end that the same may be modified or reversed.

Respectfully,
(Signed) D. M. KEY,
Postmaster-General.

Hon. THOS. L. JAMES,
Postmaster, New York City, N. Y.

Correct copy.

T. L. JAMES,
Postmaster.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS L. JAMES, CHARLES EDDY, HORACE T. CASWELL, & SAMUEL R. CLEXTON, defendants.

CITY AND COUNTY, SOUTHERN DISTRICT OF NEW YORK, *ss:*

Thomas L. James, one of the above-named defendants, being duly sworn, says I have been directed by the Post-Office Department of the United States to appeal the above cause to the Supreme Court of the United States, as will appear from the true copy of such directions hereto annexed. Said directions were received shortly after the rendition of the interlocutory decree herein, have never been revoked, and the execution thereof has been deferred only till the final decree should be entered, which was done on the 23d day of September, 1880.

THOS. L. JAMES, *P. M.*

Subscribed & sworn to before me this 25th Sept., 1880.

Notary Public (8).

3374 (Endorsed:) Affidavit of Mr. James as to instructions to appeal. Rev. Stats., §§ 1000, 1001, 1007, 1012. U. S. circuit court. Filed Sept. 28, 1880. John I. Davenport, clerk.

3375 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN trust, complainant,
vs.
THOMAS L. JAMES, CHARLES EDDY, SAMUEL R. Clexton, and Horace T. Caswell, defendants.

To the honorable the Supreme Court of the United States:

The appeal of Thomas L. James, one of the above named defendants and appellants, respectfully showeth:

I. That on the 4th day of June, 1877, the above-named complainant filed his bill in the circuit court of the United States for the south-
3376 ern district of New York against this appellant; that process thereupon issued against this appellant, and having been duly served therewith, this appellant entered his appearance in said circuit court on the 3rd day of July, 1877.

II. That upon the 26th day of July, 1877, in pursuance of a stipulation entered into by the respective solicitors of the above-named complainant and this appellant, said complainant filed his amended bill in said circuit court against this appellant in place and stead of said original bill, in which amended bill said complainant alleged in substance as follows: that on the 14th day of April, 1863, the letters patent of the United States, numbered 38175, for a certain new and useful improvement in post office postmarking and canceling hand stamps, were duly issued to Marcus P. Norton, as the true, original and
3377 first inventor of said improvement; that on or about the 20th day of April, 1863, by an assignment in writing bearing that date, said Marcus P. Norton sold, assigned and transferred unto Jacob Shavor and Albert C Corse in trust, all his right, title and interest in and to said letters patent and invention, which assignment was thereafter recorded in the patent office; that on the 23rd day of August, 1864, upon a surrender of said original letters patent, new letters patent, numbered 1748 of reissued letters patent, being for the same invention upon reformed and amended specifications and claims, were duly issued to said Shavor and Corse; that on or about the 23d day of February, 1864, said Shavor and Corse, by a deed of assignment bearing that
3378 date, sold, reassigned and reconveyed the aforesaid letters patent, and any and all reissues thereof, to said Marcus P. Norton, which assignment was recorded in the Patent Office on the 24th day of July, 1869; that on the 3d day of August, 1869, upon a surrender of said reissued letters patent, new letters patent for the same invention, upon reformed, corrected and amended specifications, numbered 3586 of reissued letters patent, were duly issued to said Norton; that on the 20th day of October, 1869, said Norton, by an assignment in writing of that date, sold, assigned, and transferred said letters patent to Helen M. Ingalls, which assignment was recorded in the Patent Office on the 1st day of August, 1870; that on the 4th day of October, 1870, upon a surrender of said last reissued letters patent, new letters patent (the specifications, draw-
3379 ings and claims or summary of invention therein being the same as those contained in said last reissued letters patent) numbered 4143, Division A of reissued letters patent, were duly issued to said Helen M. Ingalls; that on the 4th day of March, 1871, by an assignment in writing of that date, said Helen M. Ingalls conditionally assigned and trans-

ferred to William W. Secombe (in trust according to the terms and conditions of a deed of trust, bearing the same date, signed, executed, and delivered by said Secombe to said Ingalls as a part of said conditional assignment) all her right, title, and interest in and to said last reissued letters patent, Division A, which assignment was recorded in the Patent Office on the 11th day of March, 1871; that said Se-
3380 combe wholly and entirely failed to keep and maintain the terms and conditions stated in said deed of trust, and that said assignment to him long since became utterly void and of no effect either in law or in equity; that on the 10th day of July, 1873, by deed of assignment bearing that date and recorded in the Patent Office, said Secombe, with whom joined the Secombe Manufacturing Company, assigned, transferred, and reconveyed to said Helen M. Ingalls all the right, title, interest, claims, or demand of them, or either of them, to or under said patent of April 14th, 1863, or its aforesaid reissues; that on or about the 2d day of January, 1877, by an assignment in writing of that date, said Helen M. Ingalls sold, assigned, and conveyed in trust unto the said complainant, Christopher C. Campbell, all her right, title,
3380*a* and interest in and to the said letters patent and invention so as aforesaid patented, reissued, and last reissued as number 4143, Division A, which assignment has been duly recorded in the Patent Office; that said patented invention and improvement is of very great utility and value, and has been in extensive public use; that this appellant, being postmaster of the United States at the city of New York, has at divers times since the first day of January, 1872, wrongfully made, used, and sold said patented invention to the great injury of said complainant; and in & by said amended bill said complainant prayed in substance for a writ of subpœna ad respondedum against this appellant, for writs of injunction, preliminary and perpetual, against this appellant, and that this appellant might be compelled to
3381 account for and pay to the complainant the profits acquired, and the damages in addition sustained by the complainant by reason of the said infringements.

III. That on the 3d day of December, 1877, this appellant filed his answer in said circuit court, and on the 24th day of January, 1878, his amended answer to complainant's said amended bill, in which said answer and amended answer it was alleged in substance as follows: That complainant was not the owner of and had no title to said last reissued letters patent, "Division A. No. 4143"; that said Shavor and Corse did not reassign to said Norton, as stated in said bill; that said Secombe did not reassign to said Ingalls, as stated in said bill; that said assignment from said Ingalls to said Secombe did not become null and
3382 void as stated in said bill; that on the 23d day of October, 1869, said Norton assigned one third of his right, title and interest in and to said letters patent to Charles Eddy as trustee for himself, Jacob Shavor & Albert C. Corse, which assignment was recorded in the Patent Office on the 25th day of October, 1869, and that said Charles Eddy, as trustee, should be a party to the suit; that none of the said reissues were duly and lawfully made, or were for the same invention as that described in said original patent; that said Marcus P. Norton was not the true, original and first inventor of the improvement described and claimed in said original letters patent, or of any material or substantial part thereof; that said improvement had been patented (in let-
3383 ters patent described) prior to said Norton's supposed invention or discovery thereof; that said improvement had been known and used by others (named and described) prior to said Norton's supposed

invention or discovery thereof; that said improvement had been publicly used and sold by persons and at places named and described for more than two years before said Norton made his application for said original patent; that such public use and sale was with said Norton's consent and allowance; that said Norton had abandoned said improvement to the public before his application for said original patent; that this appellant had not infringed upon said last reissued letters patent, Division A, No. 4143; that this appellant had never used any
3384 instrument or device for postmarking letters & canceling postage stamps thereon, either directly or by subordinates, except as an officer and agent of the United States in his office of postmaster at the city of New York, and that all such official use by him was with the consent, approbation and approval and under the direction of the Postmaster General, and that, therefore, this appellant was not liable to suit for his action in the premises.

IV. That on the 4th day of December, 1877, said complainant filed in said circuit court his replication to this appellant's said answer, and on the 25th day of January, 1878, his replication to this appellant's said amended answer.

V. That thereafter upon the pleadings aforesaid and upon cer-
3385 tain mutual stipulations and upon certain orders of said circuit court proofs were taken by and on behalf of said complainant and this appellant, and were filed in said circuit court.

VI. That thereafter, on the 13th day of September, 1878, on motion of said complainant's counsel, founded upon this appellant's said amended answer, and upon a certain stipulation entered into by said Charles Eddy & said complainants, said Eddy was, by an order of said circuit court, made a party defendant in the suit as well for himself as in trust for said Jacob Shavor and said Albert C. Corse.

VII. That thereafter this cause came on to be heard upon pleadings and proofs before said circuit court, and after argument thereof
3386 and consideration by said circuit court it was interlocutorily adjudged and decreed in substance as follows: that the said letters patent, Division A, numbered 4143, reissued to said Helen M. Ingalls on the 4th day of October, 1870, are good and valid; that said Marcus P. Norton was and is the original and first inventor of the said improvement described and claimed in said original letters patent and in the several reissues thereof; that Christopher C. Campbell, the said complainant, is the exclusive owner in trust of said reissued letters patent numbered 4143, subject to the rights of Helen M. Ingalls and of Charles Eddy thereto, if any; that this appellant has infringed upon said reissued letters patent by causing to be manufactured and by using and by causing others to use the said improvement as specified
3387 and charged in said complainant's bill; that an account be taken of the profits, gains, and advantages which have been in any wise received or made, or which have arisen or accrued by reason of the infringements aforesaid, and also of the damages in addition thereto, if any, which said complainant has sustained by reason of the infringments aforesaid; that said complainant recover of this appellant his costs, charges and disbursements to be taxed; that it be referred to Kenneth G. White, esq., to ascertain and take and state and report to the court an account of profits and damages.

VIII. That thereafter upon their own petition (under a claim of interest in said letters patent and in demands for infringements thereof, through and under said Charles Eddy, Jacob Shavor and Albert
3388 C. Corse), by an order of said circuit court granted on the terms

therein stated, Samuel R. Claxton and Horace T. Caswell were made parties defendants, and by leave of said circuit court proofs, as well between them of the one part and Charles Eddy of the other part as between them and Charles Eddy of the one part and said complainant of the other part, were then taken and filed in said circuit court.

IX. That on or about the 12th day of January, 1880, upon the proofs submitted by said complainant and this appellant, said master, Kenneth G. White, esq., found and reported in writing to said circuit court in substance as follows: that the gains and profits which have arisen or accrued to this appellant under the interlocutory decree in
3389 the saving of salaries amounts to the sum of $63.000.00, and with his said report said master filed the said proofs and all thereof.

X. That thereafter the said complainant and this appellant duly filed their respective exceptions to the said report of the master in said circuit court.

XI. That thereafter, to wit, in February term, 1880, the cause came on to be further heard by the said circuit court as well upon the proofs submitted to the master, his said report, and the said respective exceptions thereto of said complainant and this appellant as upon the pleadings, stipulations, and proofs relating to the interests of said complainant and of said Charles Eddy, and of those claiming through
3390 and under said Eddy in said letters patent and in the demands for infringement thereof, and after argument of counsel and consideration by the court, on the 23d day of September, 1880, a final decree was made, pronounced and entered in the cause, wherein and whereby it was adjudged and decreed in substance as follows: That said exceptions of this appellant, as well as those of complainant, be *be* disallowed and overruled; that said master's report be confirmed and ratified; that the sum of $63,000 00 be recovered of this appellant; that of such sum said complainant is entitled to $42,000.00, said Clexton to $13,125.00, said Caswell to $7,000.00, and said Eddy to $875.00; that this appellant pay said sum of $63,000.00 for the benefit of the parties entitled into the registry of said circuit court within twenty days after the entry of the decree, or in default thereof that execution there-
3391 for issue; that said complainant recover of this appellant the sum of $1,471$\frac{40}{100}$ costs as taxed.

Wherefore this appellant appeals hereby from the whole of said final decree of said circuit court and from every part thereof, except such part as overrules said exceptions of complainant, and respectfully prays that said final decree, the bill, amended bill, answer, amended answer, pleadings, stipulations, depositions, exhibits, evidence, master's report, evidence before the master, exceptions to the report, and proceedings in the said cause may be sent to the Supreme Court of the United States without delay, and that the said Supreme Court will pro-
3392 ceed to hear the said cause anew, and that the said decree of said circuit court and every part thereof, except such part as overrules said exceptions of complainant, may be reversed and a decree made dismissing said bill and amended bill with costs, or such other decree as to the said Supreme Court shall seem just.

Dated New York, September 25th, 1880.

THOMAS L. JAMES,
Appellant.

STEWART L. WOODFORD,
U. S. Attorney, Solicitor and of Counsel
for said Defendant and Appellant Thomas L. James.

The foregoing appeal is hereby allowed this 27th day of September, 1880.

SAM'L BLATCHFORD,
Circuit Judge.

3393 (Indorsed:) U. S. Supreme Court. C. C. Campbell versus Thomas L. James, Charles Eddy, et al. Petition. Appeal of Thomas L. James. Stewart L. Woodford, United States attorney. Due service of a copy of the within is hereby admitted , 18 . U. S. circuit court. Filed Sept. 28, 1880. John I. Davenport, clerk.

3394 SOUTHERN DISTRICT OF NEW YORK, *ss:*

Samuel B. Clarke, being duly sworn, says: I am one of the assistants of Stewart L. Woodford, attorney of the United States for the southern district of New York, who is the solicitor of record of the defendant appellant, Thomas L. James. I served the annexed citation, the petition of appeal of said appellant, James, and said James' affidavit, verified September 25th, 1880 (by exhibiting said original citation and delivering a copy of said citation, said petition, and said affidavit), upon Marcus P. Norton, esq., solicitor of record of the complainant respondent, Christopher C. Campbell, on the 29th day of September, 1880; upon Horatio F. Averill, esq., solicitor of record of the defendant-respondent, Charles Eddy, on the 28th day of September, 1880; and upon Edward D. Bettens, esq., solicitor of record of the de-
3395 fendant's respondents, Horace T. Caswell, Samuel R. Clexton, and Charles Eddy, as trustee of said Clexton and Caswell, on the 28th day of September, 1880.

Said solicitors of the respondents respectively waived service of the stipulation, dated Aug. 31, 1880, for the reason that they were already in possession of a copy thereof, and in my presence signed the admission of service which is endorsed upon the annexed original citation.

SAMUEL B. CLARKE.

Subscribed and sworn to before me this 1st day of October, 1880.

JOHN A. SHIELDS,
U. S. Commissioner, S. D. of N. Y.

3396 UNITED STATES OF AMERICA, *ss:*

By the honorable Samuel Blatchford, judge of the circuit court of the United States for the southern district of New York.

To Christopher C. Campbell, Charles Eddy, Horace T. Caswell, and Samuel R. Clexton:

Whereas Thomas L. James has lately appealed to the Supreme Court of the United States from a decree lately rendered in the circuit court of the United States for the southern district of New York, made in favor of you the said Campbell, the said Caswell, the said Clexton, and the said Eddy, and whereas such appeal has been taken by direction of the Post Office Department of the United States, and whereas you and all of you have waived the giving of any bond or security whatever by said James on such appeal, you and each and all of you are
3397 therefore hereby cited to appear before the said Supreme Court, at the city of Washington, D. C., on the second Monday of October, 1880, to do and receive what may appertain to justice in the premises.

Given under my hand, at the city of New York, in the southern district of New York, in the second circuit, the 27th day of September, 1880.

SAM'L BLATCHFORD.

Due and timely service of the within citation by copy thereof, and of a copy of defendant James' petition of appeal, and of said James' affidavit, verified Sept. 25, 1880, and of the stipulation dated Aug. 31, 1880, is now and hereby admitted.

New York, Sept. 28, 1880.

MARCUS P. NORTON,
Solicitor for Complainant Christopher C. Campbell, and Assignee in Trust.

HORATIO F. AVERILL,
Sol'r for Chas. Eddy.

3398 EDWARD D. BETTENS,
Solicitor for Samuel R. Clexton, Horace T. Caswell, and Charles Eddy, as Trustee for Samuel R. Clexton and Horace T. Caswell.

(Endorsed:) Citation. U. S. Circuit court. Filed October 1st, 1880. Joseph D. M. Dewy, clerk.

3399 U. S. circuit court, southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL
vs.
THOMAS L. JAMES ET AL.

SOUTHERN DISTRICT OF NEW YORK,
City and County of New York:

Edward D. Bettens, being duly sworn, says that he is the solicitor of record in the above entitled suit for Samuel R. Clexton, Horace T. Caswell, and Charles Eddy, as trustee for Samuel R. Clexton and Horace T. Caswell; that on the 30th day of September, 1880, in the city of New York, State of New York, deponent served the annexed petition of appeal of Samuel R. Clexton, and the annexed citation granted on said petition on the following named solicitors of the parties to this suit, and at the places set opposite their names, to wit:

Marcus P. Norton, as solicitor for Christopher C. Campbell, assignee in trust, in the Metropolitan Hotel.

Horatio F. Averill, as solicitor of Charles Eddy, in his office, number 120 Broadway.

Stewart L. Woodford, as solicitor of Thomas L. James, in his office in United States Post Office building.

3400 That said service was made by delivering to and leaving with said Norton copies of said petition and citation and exhibiting to him the originals thereof, by delivering to and leaving with Samuel B. Clarke (in the absence from his said office of Stewart L. Woodford) copies of said petition and citation and exhibiting to him the originals thereof, by delivering to and leaving with George F. Betts (in the absence of said Horatio F. Averill from his said office) copies of said petition and citation and exhibiting to him the original thereof; that at the times of said services Marcus P. Norton was the solicitor of said complainant; Stewart L. Woodford was the solicitor of said James and Samuel B. Clarke was of counsel for said James; Horatio F. Averill was the solicitor of said Eddy and George F. Betts was of counsel for said Eddy; that at the time of said services the said Woodford by said Clarke, the said Averill by said Betts, and the said Norton, each, in writing (annexed to said citation), admitted due and timely service of said citation by copy, and of a copy of said Clexton's petition; that de-

ponent, as the solicitor for said Charles Eddy, as trustee for Samuel R. Clexton and Horace T. Caswell, hereby admits due and timely service of said citation and petition of appeal.

EDWARD D. BETTENS.

Sworn to before me this 1st day of October, 1880.

THOS. B. CLIFFORD,
Notary Public, City & Co. of New York.

3401 By the honorable Samuel Blatchford, one of the judges of the circuit court of the United States for the southern district of New York.

To Christopher C. Campbell, assignee in trust, Thomas L. James, Horace T. Caswell, Charles Eddy, Charles Eddy as trustee for Horace T. Caswell & Samuel R. Clexton, greeting:

Whereas Samuel R. Clexton has lately appealed to the Supreme Court of the United States from a part of a decree lately rendered in the circuit court of the United States for the southern district of New York, as appears by a petition of appeal filed in the clerk's office of the circuit court of the United States for the southern district of New York, and wherein he is the appellant and you are the respondents; and whereas he has filed the security required by law, you, and each of you, are hereby cited and admonished to be and appear at a Supreme Court of the United States to be holden at the city of Washington, in the District of Columbia, on the second Monday of October, eighteen hundred and eighty, to do and receive what may appertain to justice to be done in the premises.

Given under my hand at the city of New York, in the southern district of New York, in the second circuit, the 29th day of September, in the year eighteen hundred and eighty.

SAMUEL BLATCHFORD.

Due and timely service of the within citation by copy thereof and of a copy of defendant Clexton's petition of appeal is now and hereby admitted.

New York, September 30th, 1880.

STEWART L. WOODFORD,
U. S. Attorney, Solicitor for def't Thomas L. James, S. B. C.
MARCUS P. NORTON,
Solicitor for Complainant.
H. T. AVERILL,
Solicitor for Charles Eddy.
EDWARD D. BETTENS,
Solicitor for Charles Eddy as trustee for Samuel R. Clexton and Horace T. Caswell.

3402 Circuit court of the United States for the southern district of New York. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT,
vs.
THOMAS. L. JAMES, CHARLES EDDY, SAMUEL R. Clexton, and Horace T. Caswell, defendants.

To the honorable the Supreme court of the United States:

The appeal of Samuel R. Clexton, one of the above-named defendants and appellant, respectfully showeth:

I. That on the 4th day of June, 1877, the above-named complainant

filed his bill in the circuit court of the United States for the southern district of New York against James Thomas L. James; that process thereupon issued against said James, and said James having been duly served therewith, said James entered his appearance in said circuit court on the 3rd day of July, 1877.

II. That upon the 26th day of July, 1877, in pursuance of a
3403 stipulation entered into by the respective solicitors of the above-named complainant, and said James, said complainant filed this amended bill in said circuit court against said James in place and stead of said original bill, in which amended bill said complainant alleged, in substance, that on the 14th day of April, 1863, the letters patent of the United States numbered 38175 for a certain new and useful improvement in post-office marking and canceling hand stamps were duly issued to Marcus P. Norton as the true, original, and first inventor of said improvement; that on or about the 20th day of April, 1863, by an assignment in writing bearing that date, said Marcus P. Norton sold, assigned, and transferred unto Jacob Shavor and Albert C. Corse, in trust, all his right, title, and interest in and to said letters-patent and invention, which assignment was thereafter recorded in the Patent Office; that on the 23rd day of August, 1864, upon a surrender of said original letters-patent, new letters patent, numbered 1748 of reissued letters-patent, being for the same invention upon reformed and amended specifi-
3404 cations and claims, were duly issued to said Shavor & Corse; that on or about the 23rd day of February, 1864, said Shavor and Corse, by a deed of assignment bearing that date, sold, reassigned, and reconveyed the aforesaid letters-patent and any and all reissues thereof to said Marcus P. Norton, which assignment was recorded in the Patent Office on the 24th day of July, 1869; that on the 3rd day of August, 1869, upon a surrender of said reissued letters-patent new letters patent for the same invention upon reformed, corrected, and amended specifications numbered 3586 of reissued letters patent were duly issued to said Norton; that on the 20th day of October, 1869, said Norton, by an assignment in writing of that date, sold, assigned, and transferred said letters patent to Helen M. Ingalls, which assignment was recorded in the Patent Office on the 1st day of August, 1870; that on the 4th day of October, 1870, upon a surrender of said last reissued letters patent new letters patent (their specifications, drawings and claims or summary of invention therein, being the same as those contained in said last reissued letters patent), numbered 4143, "Division A" of reissued letters patent, were duly issued to said Helen M. In-
3405 galls; that on the 4th day of March, 1871, by an assignment in writing of that date, said Helen M. Ingalls conditionally assigned and transferred to William W. Secombe (in trust, according to the terms and conditions of a deed of trust bearing the same date, signed, executed, and delivered by said Secombe to said Ingalls as a part of said conditional assignment), all her right, title, and interest in and to said last reissued letters patent, Division A, which assignment was recorded in the Patent Office on the 11th day of March, 1871; that said Secombe wholly and entirely failed to keep and maintain the terms and conditions stated in said deed of trust, and that said assignment to him long since became utterly void and of no effect, either in law or in equity; that on the 10th day of July, 1873, by deed of assignment bearing that date and recorded in the Patent Office, said Secombe, with whom joined the Secombe Manufacturing Company, assigned, transferred, and reconveyed to said Helen M. Ingalls all the right, title, interest, claims, or demand of them, or either of them, to or under said patent of April 14, 1863, or

its aforesaid reissues; that on or about the 2nd day of January,
3406 1877, by an assignment in writing of that date, said Helen M. Ingalls sold, assigned, and conveyed in trust unto the said complainant, Christopher C. Campbell, all her right, title and interest in and to the said letters patent and invention, so as aforesaid patented, reissued, and last reissued as number 4143, division A, which assignment has been duly recorded in the Patent Office; that said patented invention and improvement is of very great utility and value, and has been in extensive public use; that said James, being postmaster of the United States at the city of New York, has, at divers times, since the first day of January, 1872, wrongfully made, used and sold said patented invention to the great injury of said complainant, and prayed therein for a writ of subpœna ad respondendum against the said James, for writs of injunction, preliminary and perpetual, against the said James, and that the said James might be compelled to account for and pay to the complainant the profits acquired and the damages in addition sustained by the complainant by reason of the said infringement.

III. That on the 3rd day of December, 1877, the said James
3407 filed his answer in said circuit court, and on the 24th day of January, 1878, his amended answer to complainant's bill, in which said answer and amended answer it was alleged in substance as follows: that complainant was not the owner of, and had no title to said last reissued letters patent, Division A, No. 4143; that said Shavor and Corse did not reassign to said Norton as stated in said bill; that said Secombe did not reassign to said Ingalls as stated in said bill; that said assignment from said Ingalls to said Secombe did not become null and viod as stated in said bill; that on the 23rd day of October, 1869, said Norton assigned one-third of his right, title, and interest in and to said letters patent to Charles Eddy, as trustee for himself, Jacob Shavor, and Albert C. Corse, which assignment was recorded in the Patent Office on the 25th day of October, 1869, and that said Charles Eddy, as trustee, should be a party to this suit; that none of the said reissues were duly and lawfully made, or were for the same invention as that described in said original patent; that said Marcus P. Norton was not the true original
3408 and first inventor of the improvement described and claimed in said original letters patent, or of any material or substantial part thereof; that said improvement had been patented (in letters patent described), prior to said Norton's supposed invention or discovery thereof; that said improvement had been known and used by others (named and described) prior to said Norton's supposed invention or discovery thereof; that said improvement had been publicly used and sold by persons and at places named and described for more than two years before said Norton made his application for said original patent; that such public use and sale was with said Norton's consent and allowance; that said Norton had abandoned said improvement to the public before his application for said patent; that said James had not infringed upon said last reissued letters patent "Division A," No. 4143; that said James had never used any instrument or device for postmarking letters and canceling postage stamps thereon, either directly or by subordinates, except as an officer and agent of the United States, in his office of postmaster at the city of New York, and that all such official use by him was with
3409 the consent, approbation and *and* approval, and under the direction of the Postmaster-General, and that therefore the said James was not liable to suit for his action in the premises.

IV. That on the 4th day of December, 1877, said complainant filed in said circuit court his replication to said James' answer, and on the 25th

day of January, 1878, his replication to said James' said amended answer.

V. That thereafter upon the pleadings aforesaid and upon certain mutual stipulations and upon certain orders of said circuit court, proofs were taken by and on behalf of said complainant and said James, and were filed in said circuit court.

VI. That thereafter a stipulation dated June, 1878, and filed in said suit on September 13, 1878, was entered into by and between Charles Eddy and the complainant (which stipulation was duly approved of by Helen M. Ingalls and Marcus P. Norton, and which approvals were filed in said suit on said September 13, 1878), by which it was agreed between said complainant and said Eddy that said Eddy should be made a party to this suit as prayed for in said James' answer, and that the
3410 filing of said stipulation in said court should be held and treated as said Eddy's voluntary appearance, for that purpose and for all the purposes of said suit as fully in all respects as though he was an original party thereto. Said stipulation further recites that said Eddy claims that his rights in the subject matter of said suit are fixed and determined by an assignment dated October 23, 1869, from Marcus P. Norton to said Eddy in trust of a one-third interest in said patent and its reissue and by a certain contract of even date with said assignment; that said complainant denies this and claims that said Eddy's rights are fixed and determined by a certain instrument dated October 7, 1871, and executed by Charles Eddy, Jacob Shavor, Albert C Corse, and W. W. Secombe. Said stipulation further recites that said Eddy's rights and interests in the subject matter of said suit shall be determined by the said court upon the pleadings and evidence as they then stood, and without any further evidence or pleadings in said case unless the court shall otherwise direct, and that the court is to make such decree in respect thereto as equity and good conscience may require, and in case of a recovery against said James the court shall de-
3411 termine the rights respectively thereto of said complainant and said Eddy. Said stipulation further recites that the said assignment of October 23, 1869, from Marcus P. Norton to Charles Eddy is a valid assignment not affected by any prior or contemporaneous assignment by said Norton to Helen M. Ingalls, or other written agreement to which said Eddy is a party excepting said instrument dated October 7, 1871.

VII. That thereupon, and on the 13th day of September, 1878, on motion of said complainant and on said stipulation, and on the affidavit of counsel for complainant and on the pleading and evidence then in said suit by an order of said circuit court filed on said September 13, 1878, the said Charles Eddy was made a party defendant as well for himself as in trust for Jacob Shavor and Albert C. Corse for all the purposes of said suit as fully in all respects as though he were an original party thereto. And said order further ordered that as regards said Campbell and said Eddy that said suit be heard upon the pleadings and evidence as they then stood unless the court should thereafter otherwise direct.

VIII. That thereafter this cause came on to be heard upon the
3412 pleadings and proofs before said circuit court, and after argument thereof and consideration by said circuit court it was interlocutorily adjudged and decreed in substance, as follows, that the said letters patent, "Divison A," numbered 4143, reissued to said Helen M. Ingalls, on the 4th day of October, 1870, are good and valid; that said Marcus P. Norton was and is the original and first inventor of the said

improvement described and claimed in said original letters patent, and in the several reissues thereof; that Christopher C. Campbell, the said complainant, is the exclusive owner, in trust, of said reissued letters patent, numbered 4143, subject to the rights of Helen M. Ingalls and of Charles Eddy thereto, if any; that said James has infringed upon said reissued letters patent by causing to be manufactured and by using and by causing others to use the said improvement as specified and charged in said complainant's bill; that an account be taken of the profits, gains and advantages which have been in anywise received or made, or which have arisen or accrued by reason of the infringements aforesaid, and also of the damages in addition thereto, if any, which said com-
3413 plainant has sustained by reason of the infringement aforesaid; that said complainant recover of said James his costs, charges, and disbursements to be taxed; that it be referred to Kenneth G. White, esq., to ascertain and take and state and report to this court an account of profits and damages.

IX. That thereafter an application was made by said Eddy's counsel for leave to take evidence as to the cancellation of said instrument dated October 7, 1871, and that Caroline G. Caswell be made a party defendant in said suit. That said motion came on to be heard upon the pleadings, evidence, and proceedings in said suit, and on the affidavits of Charles Eddy, Albert C. Corse, and Caroline G. Caswell, each verified December 9, 1879, and of George H. Williams, verified December 13, 1879, and after argument thereof and consideration by said court, it was ordered, in substance, that said Eddy have leave to take and file testimony in said suit to prove the cancellation of said instrument dated October 7, 1871, provided the said Eddy or his counsel within five days after the entry of said order, file with the clerk of said court a written assent to the terms upon which said order was granted.
3414 That said terms are stated in said order, and that said order is dated December 23, 1879, and that said Eddy thereafter duly filed, on December 26, 1870, said written assent to said terms; that Caroline G. Caswell's motion to be made a party to said suit was denied.

X. That thereafter an application was made to said court by Horace T. Caswell and this appellant, to be made parties defendants in said suit; that said motion was made on the affidavit of Edward D. Bettens, verified January 16, 1880; Samuel R. Clexton, verified January 15, 1880; and Horace T. Caswell, verified January 16, 1880; and on the papers, pleadings, and proceedings in said suit; that said affidavits stated in substance, that by said assignment dated October 23, 1869, from said Norton to said Eddy in trust, the said Eddy, as trustee for himself, Jacob Shavor, and Albert C. Corse, became the owner in fee of an undivided one-third of said patent and its reissues; that thereafter, the said Albert C. Corse assigned and conveyed to Caroline G. Caswell his (said Corse's) interest in said patent; that thereafter said Caroline G. Caswell, assigned and conveyed to Herbert M. Caswell, all her
3415 right, title, and interest in said patent; and that thereafter the said Herbert M. Caswell assigned and conveyed to said Horace T. Caswell, all of his (said Herbert M. Caswell's) interest in said patent. That the said Eddy, on or about March 31, 1879, made and executed a general assignment to assignees for the benefit of his (said Eddy's) creditors, under the laws of the State of New York. That thereafter, and on or about January 7, 1880, the said assignees of said Eddy, under said general assignment sold and conveyed to this appellant all of said Eddy's interest in said patent. That said Eddy no longer had any interest in said patent. That said Horace T. Caswell was the owner of

one-ninth of said patent; and that this appellant was the owner of two-ninths of said patent, and that this appellant was the owner of all the interest in said patent that said Jacob Shavor and Charles Eddy had acquired by or through said assignment from said Norton to said Eddy in trust, dated October 23, 1869.

XI. That after argument thereof, and consideration by said court, it was ordered, in substance, that said Horace T. Caswell and this appellant be made parties defendants to said suit, subject to the
3416 same orders and stipulations by and under which said Charles Eddy, as trustee for himself, Jacob Shavor, and Albert C. Corse became, and then was, a party defendant to said suit, with the same rights and privileges, and subject to the same obligations and liabilities, as the said Eddy, as they then appeared in the proceedings in said suit. That said order is dated January 24, 1880, and under said order the said Caswell and this appellant became and are parties defendants to said suit.

XII. That thereafter, upon said stipulation of June, 1878, and the said order of said court thereon filed on September 13, 1878, and the further orders of said court dated December 23, 1879, and January 24, 1880, and the affidavits upon which said orders were obtained, and on the papers referred to in said affidavits, and upon certain orders of said circuit court, proofs were taken and filed in said circuit court as to the respective rights of said complainant, Horace T. Caswell, Charles Eddy, and this appellant in and to said patent and claims for its infringement.

3417 XIII. That thereafter, to wit, in February term of said court, 1880, this cause came on to be further heard by the said circuit court—

(1) Upon the proofs submitted to the master, his said report, and the said respective exceptions thereto of said complainant and the said defendant James; and

(2) Upon the pleadings, stipulations, orders, and proofs relating to the respective rights in said patent and claims for its infringements of said complainant, Horace T. Caswell, Charles Eddy, and this appellant; and after argument by counsel and consideration by the court, on the 23rd day of September, 1880, a final decree was made and pronounced in this cause wherein and whereby it was adjudged and decreed in substance as follows, that is to say:

3418 (1) That said complainant is the owner in trust of an undivided two thirds part of said letters patent, Division A, numbered 4143, reissued to Helen M. Ingalls on 4th day of October, 1870, subject to the rights of Helen M. Ingalls; that Charles Eddy, individually and as trustee for Horace T. Caswell and Samuel R. Clexton, is the owner of an undivided one-third part of said letters patent, Division A, numbered 4143.

(2) That all the exceptions to the master's report be overruled, and said report be confirmed and accepted.

(3) That the gains, profits, savings, and advantages which have been made, or which have arisen or accrued on account of the infringements upon, and in violation of, the rights under and secured by the said letters patent, Division A, numbered 4143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, in this cause, are the sum of $63,000.00.

(4) That the complainant recover of Thomas L. James the sum of $42,000.00 besides his charges and disbursements taxed at $1,470.40; in all, $43,471.40; that Charles Eddy, individually and as trustee for

Samuel R. Clexton and Horace T. Caswell, recover of Thomas L.
3419 James $21,000.00; that of said 21,000 said Clexton is entitled to
13,125 00, said Caswell to $7,000, and said Eddy to $875; and that said $875 has been assigned to the complainant since the interlocutory decree, as appears by assignment on file.

(5) That said James, within 20 days from the entry of the said decree, pay to the clerk of this court $64,471 40 and interest thereon from entry of said decree to date of said payment to said clerk for the benefit of the complainant, said Clexton, said Caswell, said Eddy, and the complainant, his assignee; that upon said payment to said clerk the said clerk forthwith pay to said Campbell $43,471.46, and interest thereon from the date of entry of said decree to date of said payment to said clerk; and to said Clexton, $13,125.00 and interest thereon from the date of the entry of said decree to date of said payment to said clerk;
and to said Caswell $7,000.00 and interest thereon from the date
3420 of the entry of said decree to the date of said payment to said
clerk; and to the complainant, assignee of Charles Eddy, $875 and interest thereon from date of entry of said decree to date of said payment to said clerk.

(6) In default of said payment by said James to said clerk, that Christopher C. Campbell, as assignee in trust, and Charles Eddy individually and as trustee for Samuel R. Clexton and Horace T. Caswell, have execution against said James for $64,471.40 and interest thereon from the date of the entry of said decree. That the moneys collected under said execution less the marshal fees, be forthwith paid by the marshal collecting the same to the clerk of this court for the benefit of the complainant said Clexton, said Caswell, and said complainant, assignee of Charles Eddy, and that said clerk thereupon forthwith pay such portions of said moneys to said complainant, said Clexton, said Caswell, and said complainant, the assignee of Charles Eddy, respectively, as the said Campbell, Clexton, Caswell, & Eddy are each respectively entitled
to, under the sixth paragraph of said decree.

3421 Wherefore this appellant appeals from so much of said decree
as orders, adjudges, and decrees as follows; that is to say:

(1.) "That Charles Eddy, individually and as trustee for Horace T. Caswell and Samuel R. Clexton, is the owner of an undivided one-third part of said letters patent, Division A, numbered 4143." In the place and stead of said part of said decree so appealed from, the said decree should order, adjudge, and decree as follows, to wit: "That Charles Eddy individually has no right, title, or interest in said letters patent, Division A, numbered 4143. That samuel R. Clexton is the owner of an undivided one-ninth part of said letters patent, Division A, numbered 4143. That Charles Eddy as trustee for Samuel R. Clexton and Horace T. Caswell is the owner of an undivided two-ninths part of said letters patent, Division A, numbered 4143."

(2.) "That Charles Eddy, individually and as trustee for Samuel R. Clexton and Horace T. Caswell, do recover of the said Thomas L. James the sum of twenty-one thousand dollars." In the place and stead of said part of said decree so appealed from, the said decree should order,
adjudge, and decree as follows, to wit: "That Charles Eddy in-
3422 dividually recover nothing of said Thomas L. James. That Samuel
R. Clexton individually do recover of the said Thomas L. James the sum of seven thousand dollars. That Charles Eddy, as trustee for Samuel R. Clexton and Horace T. Caswell, do recover of the said Thomas L. James the sum of fourteen thousand dollars."

(3.) "That Christopher C. Campbell, as assignee in trust, and Charles

Eddy, individually and as trustee for Samuel R. Clexton and Horace T. Caswell, have execution against the said Thomas L. James for the sum of $64,471.40 (sixty-four thousand four hundred and seventy-one $\frac{40}{100}$ dollars) and interest thereon from the date of the entry of this decree." In the place and stead of said part of said decree so appealed from, the said decree should order, adjudge, and decree as follows, to wit: "That Christopher C. Campbell, as assignee in trust, and Samuel R. Clexton individually and Charles Eddy as trustee for Samuel R. Clexton and Horace T. Caswell, have execution against the said Thomas L. James for the sum of $64,471.40 (sixty-four thousand four hundred and seventy-one $\frac{40}{100}$ dollars) and interest thereon from the date of the entry of this decree."

(4.) "That Charles Eddy is entitled to $875 assigned to the
3423 complainant since the interlocutory decree as appears by assignment on file"; and that there be paid to the clerk of the circuit court of the United States for the southern district of New York for the benefit of "Charles Eddy and the complainant, his assignee, or for the benefit of the complainant assignee of Charles Eddy," the sum of $875, or any part thereof, or any sum of money whatever; and that said clerk pay to "the complainant, assignee of Charles Eddy, the sum of eight hundred and seventy-five dollars and interest thereon from the date of the entry of this decree to the date of said payment to said clerk," or any part thereof, or any sum whatever.

And this appellant respectfully prays that the decree of the said circuit court, and the bill, answer, pleadings, depositions, evidence, stipulations, orders, and proceedings in the said cause may be sent to the Supreme Court of the United States without delay, and that the said Supreme Court will proceed to hear the said cause anew, and that so much of the said decree of the circuit court as is hereinbefore complained of may be reversed, or that such other decree may be made by the said Supreme Court as to the said Supreme Court shall seem just.

Dated New York, September 28, 1880.

SAMUEL R. CLEXTON,
Appellant.

EDWARD D. BETTENS,
Solicitor & of Counsel for Samuel R. Clexton,
206 *Broadway, New York City, New York.*

The foregoing appeal is hereby allowed this 29th day of September, 1880.

SAMUEL BLATCHFORD.

3424 (Indorsed:) U. S. circuit court. Christopher C. Campbell vs. Thomas L. James et al. Copy. S. R. Clexton's petition of appeal. Edward D. Bettens, solicitor for S. R. Clexton, 206 Broadway, New York City.

3425 Circuit court of the United States of America for the southern district of New York, in the second circuit.

CHRISTOPHER C. CAMPBELL *vs.* THOMAS L. JAMES, CHARLES EDDY, SAMUEL R. Clexton, and Horace F. Caswell & ano.	Bond for damages and costs.

Know all men by these presents, that we, John Consalus and Patrick

H. Feely, each of Troy, Renns. Co., New York, are held and firmly bound unto the above named Charles Eddy, in the sum of five hundred dollars, to be paid to the said Charles Eddy, for the payment of which, well and truly to be made, we bind ourselves, and each of us, our and each of our heirs, executors, and administrators, jointly and severally, firmly by these presents, sealed with our seals, and dated the twenty-seventh day of September, in the year our Lord one thousand eight hundred and eighty. Whereas the above named Samuel R. Clexton has prosecuted an appeal to the Supreme Court of the United States to reverse a certain part of the decree rendered in the above entitled suit by the judge of the circuit court of the United States for the southern district of New York:

Now, therefore, the condition of this obligation is such, that if the above named Samuel R. Clexton shall prosecute said appeal to effect and answer all, if he shall fail to make said appeal good, then this obligation shall be void, otherwise the same shall be and remain in full force and virtue.

JOHN CONSALUS. [L. S.]
PATRICK H. FEELY. [L. S.]

Sealed and delivered, and taken and acknowledged, this 27th day of September, 1880, before me.

WM. V. S. WOODWARD,
United States Circuit Court Comm'r in and for the Northern District of New York.

3426 UNITED STATES OF AMERICA,
Northern District of New York, ss:

John Consalus and Patrick H. Feely, each for himself, being duly sworn, deposes and says that he resides in Troy, State of New York, and is a householder therein, and that he is worth the sum of one thousand dollars over and above all his just debts and liabilities.

JOHN CONSALUS.
PATRICK H. FEELY.

Sworn to this twenty-seventh day of September, A. D. 1880, before me.

WM. V. S. WOODWARD,
U. S. Circ. Court Comm'r in & for the North'n Dist. of N. Y.

UNITED STATES OF AMERICA,
Northern District of New York, ss:

I hereby certify that before me personally came John Consalus and Patrick H. Feely, known to me to be the individuals described in and who executed the within bond, and acknowledged that they executed the same.

WM. V. S. WOODWARD,
U. S. Com'r.

(Indorsed:) U. S. circuit court. Christopher C. Campbell vs. Thomas L. James et al. Bond for damages and costs on Edward D. Bettens, 206 Broadway, New York City, solicitor for S. R. Clexton.

The within bond is approved Sept. 29, 1880.

SAM'L BLATCHFORD,
U. S. Circuit Court.

Filed Oct. 2, 1880.

JOHN I. DAVENPORT,
Clerk.

3427 In the circuit court of the United States in and for the southern district of New York, second circuit. In equity.

CHRISTOPHER C. CAMPBELL, COMPLAINANT and assignee in trust,
versus
THOMAS L. JAMES, CHARLES EDDY, SAMUEL R. CLEXTON, and HORACE T. CASWELL, defendants.

To the honorable the judges of the Supreme Court of the United States of America and to the Supreme Court of said United States.

The appeal of Christopher C. Campbell, complainant and appellee, and appellant in this cause, respectfully showeth unto said Supreme Court:

I. That on the 4th day of June, A. D. 1877, he, the said complainant, filed his bill of complaint in this cause in the circuit court of the United States, in and for the southern district of New York, against the above named defendant, Thomas L. James; that process in due form, duly issued against said defendant, Thomas L. James, and the same
3428 having been duly served therewith, the said defendant, Thomas L. James, entered his appearance in due time in said cause, in the said circuit court, on the 3d day of July, A. D. 1877.

II. That on the 26th day of July, A. D. 1877, in pursuance of a stipulation in writing, entered into by and between the respective solicitors of the above named complainant and the said defendant, Thomas L. James, said complainant, Christopher C. Campbell, filed his amended bill of complaint in this cause, in said circuit court, against the said defendant, Thomas L. James, in the place and stead of said original bill of complaint.

III. That on the 3d day of December, A. D. 1877, the said defendant, Thomas L. James, filed his answer in this cause in said circuit court, and on the 24th day of January, A. D. 1878, the said defendant, Thomas L. James, filed in this cause, and in the said circuit court, his amended answer to the said complainant's said amended bill of complaint.

IV. That upon the filing in this cause in said circuit court by
3429 the said defendant, Thomas L. James, of his aforesaid mentioned and described original answer, and of his said mentioned and described amended answer, and in due time the said complainant and assignee in trust, Christopher C. Campbell, duly made and filed in this cause in the said circuit court his replication thereto, and to each thereof. The said replication to the said original answer being so filed, on the 4th day of December, A. D. 1877, and the said replication to the said amended answer being so filed on the 25th day of January, A. D. 1878.

V. That thereafter, and upon the aforesaid mentioned and described pleadings, in due form, and in due time, proofs, exhibits, and evidence were duly taken by and on the behalf of said complainant, Christopher C. Campbell, and also upon the behalf of said defendant Thomas L. James, and the same and each thereof were duly filed in this cause in said circuit court.

VI. That thereafter, and on the 13th day of September, A. D. 1878, on the motion of said complainant, Christopher C. Campbell's
3430 counsel, founded upon a certain stipulation in writing, dated the day of June, A. D. 1878, and signed by Christopher C. Campbell, the said complainant, and Charles Eddy, and upon an affidavit made by George H. Williams, of counsel for said complainant, dated

the 5th day of September, A. D. 1878, and in opposition of counsel for said defendant, Thomas L. James, the said Charles Eddy was, by an order of the said circuit court, dated the 13th day of September, A. D. 1878, made a party "defendant in this suit, for himself, as well as in trust for Jacob Shavor and Albert C. Corse, for all the purposes thereof, as fully in all respects as though he were an original party thereto."

VII. That thereafter, in due time and in due form, this cause came on to be heard, and the same was duly heard, upon pleadings and proofs before said circuit court; and after argument thereof upon the part of said complainant and of the said defendants, Thomas L. James and Charles Eddy, and upon due consideration thereof by said circuit court, it was ordered, adjudged, and decreed by the court in substance, 3431 substantially as follows: That the letters patent, Division A, numbered 4143, and reissued to Helen M. Ingalls October 4th, A. D. 1870, being for letters patent numbered 38175, granted and issued on the 14th day of April, A. D. 1863, to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, and conveyed to Jacob Shavor and Albert C. Corse, reissued to them and numbered 1748, and dated August 23d, A. D. 1864, and by them reconveyed and reissued to the said Marcus P. Norton, numbered 3586, and dated August 3d, A. D. 1869, are good and valid."

"That the said Marcus P. Norton was and is the original and first inventor and discoverer of the new and useful improvement in post-office postmarking and canceling hand stamp, described and claimed in said letters patent and in the several reissues thereof, and the specifications thereto attached, as hereinbefore stated and set forth."

"That Christopher C. Campbell, the complainant herein, is the exclusive owner in trust of the said reissued letters patent numbered 4143, as hereinbefore described, and of the new and useful improvements 3432 in post-office postmarking and canceling hand stamp, described and claimed in the said reissued letters patent numbered 4143, subject to the rights of said Helen M. Ingalls and Charles Eddy thereto, if any."

"That the said defendant, Thomas L. James, has infringed upon the said reissued letters patent numbered 4143, hereinbefore described, that is to say, by causing to be manufactured, and by using, and by causing others to use, the said 'new and useful improvements in post-office postmarking and canceling hand stamps,' as specified and charged in the said bill of complaint."

"That an account be taken of the profits, gains, and advantages which have in anywise been received or made, or which have arisen or accrued, on account of the infringements aforesaid, and also of the damages in addition thereto, if any, which the said complainant has sustained by reason of the infringements aforesaid."

"That the said complainant do recover of said defendant, Thomas L. James, his costs, charges, and disbursements, to be taxed."

"That it be referred, and the same is hereby referred, to Kenneth G. White, of the city of New York, one of the standing masters of 3433 this court, to ascertain and take, and report to the court an account of the gains, profits, and advantages which the said defendant, Thomas L. James, has in anywise received or made, or which have arisen or accrued on account of the infringements aforesaid, and also of the damages in addition thereto which the said complainant has sustained by reason of said infringements."

IX. That thereupon and on the 4th day of December, A. D. 1879, Edward D. Bettens, residing in the city of New York, made and filed in

this cause, in said circuit court, his appearance, with notice of retainer, as solicitor for the said defendant Charles Eddy; that as such solicitor for said defendant Eddy, the said Bettens, on the 13th day of December, A. D. 1879, applied to one of the judges of said circuit court, by motion and notice thereof, for the permission and leave of said court "to take evidence as to the cancellation of the contract, dated October 7th, 1871, and recorded in the Patent Office January 29th, 1872," and also, "at the same time," asked the court aforesaid to make one Caroline G. Caswell, "a party defendant herein;" that the said
3434 motion came on for argument of counsel; and thereupon, after the reading and filing of an affidavit made by the said Charles Eddy, on the 9th day of December, A. D, 1879; and an affidavit of Albert C. Corse, made by him on the 9th day of December, A. D. 1879; and, also, upon an affidavit made by Caroline G. Caswell, on the said 9th day of December, A. D. 1879; and argument of counsel for and in opposition to said motion, it was determined and ordered by said circuit court, on the 23d day of December, A. D. 1879, "That the defendant Charles Eddy be, and he hereby is, given leave to take and file testimony in this suit as to the cancellation of the contract signed by William W. Secombe, Charles Eddy, Jacob Shavor, and Albert C. Corse, dated October 7th, 1871;" and it was at that time and by the same order of said court further ordered, "That Irving Brown, esq'r, of Troy, N. Y., be, and he hereby is, appointed a special examiner of this court to take the testimony at Troy, New York, under the 67th equity rule, as amended, of such competent witnesses, and of such documentary proofs as may be brought before him on the part of the defendant
3435 Charles Eddy, in proof of said cancellation, or of the complainant, Christopher C. Campbell, to disprove said cancellation;" and it was at that time and by the said order of said court further ordered "that said Eddy and Campbell, or either of them, may examine such witnesses or take such testimony in proof or disproof of said cancellation, before a standing examiner of this court, upon proper notice given."

X. That thereupon and thereafter, the said Edward D. Bettens, "as solicitor for the defendant Charles Eddy, in this suit," and on the 26th day of December, A. D. 1879, made and filed in this cause, in the said circuit court, the following notice and instrument in writing, and gave notice thereof to complainant's solicitor, to wit: "Please to take notice that the terms upon which the order in this suit was granted, which order is dated December 23d, 1879, and was entered and filed in the office of the clerk of this court, on or about said December 23d, 1879, and gives leave to the defendant Eddy to take testimony as to the cancellation of a certain contract, and to the complainant Campbell to
3436 disprove said cancellation, are each and all hereby assented to by the defendants, Charles Eddy and Edward Bettens, as the solicitor herein for said Eddy. The said terms are specified in said orders."

That on the 30th day of December, A. D. 1879, the said Edward D. Bettens, as the "solicitor for Charles Eddy," one of the defendants in this cause, made and served upon the said complainant's solicitor a notice in writing, containing, among other things, the following, that is to say: "That on Tuesday, the 6th day of January, 1880, at 10.30 o'clock in the forenoon of that day, pursuant to and by virtue of the order of this court, dated December 23d, 1879, made in this suit, and filed in the office of the clerk of this court, on or about December 23d, 1879, I shall commence the taking of evidence and proofs on the part of and in be-

half of the above named defendant, Charles Eddy, in this cause, as to the cancellation of the contract signed by William W. Secombe, Charles Eddy, Jacob Shavor, and Albert C. Corse, dated October 7, 1871."

That under said notice, commencing on the 15th day of Janu-
3437 ary, A, D. 1880, and from time to time thereafter, the said defendant Charles Eddy, by his said solicitor, Edward D. Bettens, certain testimony was taken and exhibits were placed on file therein by the said Edward D. Bettens as such solicitor, and the same and each thereof were filed in this cause in said circuit court, under the objections and remonstrances of counsel for said complainant Campbell.

XI. That thereupon, and on the 26th day of January, A. D. 1880, the aforesaid named and described Edward D. Bettens made and filed in this suit in the said circuit court a paper in writing, as follows, that is to say, "Sir: You will please to enter my appearance for the defendants Horace T. Caswell and Samuel R. Clexton, in the above entitled suit, and all papers herein are hereby demanded to be served in me at my office, No. 206 Broadway, New York city, New York," he having prior thereto, and upon a motion by him made to the court upon an affidavit made by himself, on the 16th day of January, 1880; also upon an affidavit made by Horace T. Caswell, on the 16th day of Jan-
3438 uary, 1880, and also upon an affidavit made by Samuel R. Clexton, on the 15th day of January, 1880, and thereupon on the 24th day of January, A. D. 1880, obtained an order of the said court, making the said Horace T. Caswell and said Samuel R. Clexton party defendants here, which order so dated the 24th day of January, A. D. 1880, was and is in the following words, that is to say: "Ordered, that the said Horace T. Caswell and Samuel R. Clexton be, and the same are hereby, made parties defendants to this suit, subject to the same orders and stipulations by and under which Charles Eddy, as trustee for himself, Jacob Shavor and Albert C. Corse, bacame and is a party defendant to this suit, with the same rights and privileges, and subject to the same obligations and liabilities as the said Eddy, as the appear in the proceedings in this suit."

XII. That by the leave and permission of the said circuit court, proofs and evidence were to be taken, and the only proofs and evidence that were allowed or permitted to be taken and filed in this suit by the
3439 said defendant Charles Eddy, under the aforesaid mentioned order of said court, dated the 23d day of December, A. D. 1879, or by the said defendants Horace T. Caswell and Samuel R. Clexton, under the hereinbefore mentioned order of said court, dated the 24th day of January, A. D. 1880, were such and only such as might be rendered by competent witnesses, and such documentary proofs as related to and only "to the cancellation of the contract signed by William W. Secombe, Charles Eddy, Jacob Shavor, and Albert C. Corse, dated October 7, 1871, and printed in complainants' printed book of exhibit proofs, at pages 323 and 324, provided that said Eddy, or his solicitor herein, within five days from the entry of this order, file with the clerk of this court a written assent to the terms hereinafter mentioned, upon which this order is granted." That any and all proofs and evidence produced and offered on the part and in behalf of the said defendants Eddy, Caswell and Clexton, that did not relate to and solely and exclusively to the said mentioned and described subject matter of the cancellation of the said contract, dated the 7th day of October, A. D. 1871, and recorded in the Patent Office, at Washington, were duly objected to by the counsel for the said complainant, on the grounds mainly
3440 that the same were not admissable or permissable under the said

orders of said court, dated the 23d day of December, A. D. 1879, and the 24th day of January, A. D. 1880.

XIII. That on or about the 12th day of January, A. D. 1880, upon the proofs taken and submitted by and on the part of the said complainant, Christopher C. Campbell, and the said defendant Thomas L. James, the said master, Kenneth G. White, found and reported in writing to said circuit court in substance, as follows: That the gains, profits, and advantages, and savings which the said defendant Thomas L. James, had in anywise received or made, or which had arisen or accrued on account of the infringements charged in the said bill of complaint, and which came under or within the final decree upon pleadings and proofs, and dated the first day of September, A. D. 1879, in the saving of salaries, amounted to the sum of ($63,000.00) sixty-three thousand dollars, and with the filing of his said report, said master also filed in said circuit court the said proofs and all thereof that were taken before him.

XIV. That thereupon and thereafter the said complainant,
3441 Christopher C. Campbell, and the defendant, Thomas L. James, in due form, duly filed their respective exceptions to the said report of the master aforesaid so filed by him in said circuit court, as follows, to wit, those of said defendant being so filed on the 7th day of February, A. D. 1880, and those of said complainant on the 12th day of said month and year.

XV. That thereafter, to wit, in the February term of said circuit court, in the year A. D. 1880, the said cause came on in due form to be further heard by the said circuit court as well upon the proofs submitted to the said master by said complainant and by said defendant Thomas L. James, his said report, and the said respective exceptions thereto of said complainant and said defendant Thomas L. James, filed in this cause as aforesaid in said circuit court; and also upon the said proofs and evidence taken and filed as aforesaid by said defendants Charles Eddy, Horace T. Caswell, and Samuel R. Clexton, under the said orders of said court, as follows, to wit, the 23d day of December, A. D. 1879, and the 24th day of January, A. D. 1880; and thereupon, after argument of counsel for the several parties respectively and consider-
3442 ation by the court, and on the 23d day of September A. D. 1880, a final decree upon the said report so made and filed in court as aforesaid by said master was made, pronounced, and entered in due form in this cause, wherein and whereby it was adjudged and decreed substantially as follows, that is to say: that the said exceptions of the said defendant Thomas L. James, as well as those of the said complainant, be disallowed and overruled; that the said master's report be accepted, ratified, and confirmed in all things; that the sum of $63,000$\frac{00}{100}$ (sixty-three thousand dollars) be recovered of the said defendant Thomas L. James; that of such sum the said complainant is entitled to $42,000$\frac{00}{100}$; that of said sum the said Clexton is entitled to $13,125$\frac{00}{100}$, said Caswell to $7,000$\frac{00}{100}$ and the said Eddy to 875\frac{00}{100}$; that the said defendant Thomas L. James pay the said sum of $63,000$\frac{00}{100}$ into the registry of said circuit court within twenty days after the entry of the said final decree, and in default thereof, that execution therefor be issued in due form; that said complainant recover of the said defendant Thomas L. *L.* James the sum of $1,471$\frac{40}{100}$ costs, as taxed by the clerk of said court, in all, the sum of
3443 $64,471$\frac{40}{100}$; and it was also and further adjudged and decreed in and by the said final decree in substance and substantially as follows, that is to say: that the said complainant, Christopher C. Camp-

bell, on the 20th day of March, A. D. 1880, by virtue of a certain instrument in writing of that date, became, and now is, the assignee in trust by the said defendant Charles Eddy, assignor, in and by which the said Charles Eddy sold, assigned, and conveyed to the said complainant, in trust as aforesaid, all and every right, title, and interest whatsoever obtained by him, if any, from Marcus P. Norton on the 23d and 25th days of October, A. D. 1869, and that the same and all thereof should be held and owned in trust aforesaid, "with the same force and effect as if no conveyance or assignment of any interest in said letters patent, or for any claim or demand for infringement thereof had ever been made by any person heretofore, at any time, to the said Charles Eddy."

"It is understood between the parties hereto that this conveyance shall, and does hereby, embrace, assign, and convey to the party of the second part, in trust as aforesaid, on the conditions above set forth, each and every letters patent and invention of every name and nature
3444 whatsoever patented to or invented by Marcus P. Norton, in which the said party of the first part has any right, title, or interest whatever, whenever or howsoever the same may have been acquired" by him.

XVI. And the said Christopher C. Campbell, complainant and appellee, and appellant in this cause, respectfully showeth unto the honorable the Supreme Court of said United States, that on or about the 14th day of July, A. D. 1870, the Congress of said United States, by virtue of and under the authority of the Constitution of the said United States, enacted a law which, on the 14th day of July, A. D. 1870, was duly approved by the President of said United States, in and by which act or law the Postmaster General of said United States was duly "authorized and directed to investigate the right and title of claimants to the invention, device, or instruments for the postmarking and postage-stamp canceling in the postal service, patented on the 14th day of April, A. D. 1863; reissued the 23d day of August, A. D. 1864; and again reissued the 3d day of August, A. D. 1869, and now
3445 and for many years past in general use in the postal service of the United States, and to ascertain and determine upon a fair, just, and equitable compensation for the use of the said invention and device from the date of its use by the Post-Office Department; and also to ascertain and determine upon a fair and equitable compensation for its future use and value to the Post-Office Department and government while the said letters patent shall continue, and to whom it should be paid under the said letters patent and reissues thereof, and to report the amount thus ascertained to Congress at its next session.'

That pursuant to the said act of the said Congress and in the winter of the year A. D. 1870 and 1871, and upon the due notice made and promulgated by the Postmaster-General of said United States, under the authority of said act of Congress, a trial or hearing was duly had in the Post Office Department building in the city of Washington, D. C., before said Postmaster-General, upon proofs and evidence touching the title, right and ownership of the said letters patent, and also of the value of said invention; and also as to who was the original and first inventor of the same; and also as to the importance and value
3446 of said machine or device as a labor-saving and effectual instrument for postmarking letters and for the cancellation of postage stamps in the postal service of said United States; and thereupon and after a long and expensive examination of witnesses and documentary

proofs and full enquiry into the said several matters named in said act of Congress, and upon the argument of counsel, the said Postmaster-General found, determined and adjudged in writing under the date of the 25th day of February, A. D. 1871, substantially, that Marcus P. Norton, the patentee, was the original and first inventor of the said machine or device; that the invention was of great utility and value in the postal service in the saving of labor and in the more effectual cancellation of postage stamps and in the rapid dispatch of the mails; that the several reissues thereof were duly and properly granted and issued by the Commissioner of Patents, and that the entire title, right, interest, and ownership of the said letters patent and of each and every reissue thereof were duly and lawfully vested in Helen M. Ingalls, who on the 4th day of October, A. D. 1870, obtained of the Commissioner of
3447 Patents a reissue of said letters patent in two divisions, namely, Division A, numbered 4143, and Division B, numbered 4144, and the said findings by said Postmaster-General so dated and reduced to writing has never been rescinded or reversed, but appears in the proofs and evidence in this suit in said circuit court.

XVII. And the said complainant, Christopher C. Campbell, appellee, and appellant in this cause and in said circuit court, respectfully showeth unto the honorable the Supreme Court of the said United States that if at any time on or after the 23d day of October, A. D. 1869, the hereinbefore mentioned and described Jacob Shavor and Albert C. Corse owned, or held, or claimed any right or title or interest of any kind, description or name whatever, they each sold, assigned, and conveyed the same and each and every thereof to the said defendant Charles Eddy, by deed of assignment and transfer, dated the 18th day of December, A. D. 1876, and duly of record in the Patent Office of said United States on the 11th day of January, A. D. 1876, in liber O 22, page 12 thereof, in which it is stated among other things as follows, to
3448 wit: "And whereas it is desirable that but one person shall have the management and control of the said patents for the sole purpose of effecting settlements under the same with any and all infringers of the same or of any one or more thereof, or with whomsoever may use the inventions and improvements contained in the said letters patent or any of them; which settlement for the past or future use may be in any way the said Eddy may deem proper and expedient":

"Now, therefore, for and in consideration of the sum of one dollar, and in the further and other valuable considerations which we now and hereby duly acknowledge the receipt of the same, we, Jacob Shavor and Albert C. Corse, of said city of Troy, county and State aforesaid, have sold, assigned, and transferred, and do now and hereby sell, assign, and transfer unto the said Charles Eddy, in trust, in the manner so as aforesaid stated, all the right, title, and interest of every name and description which we now have in, to, or for the said letters patent, and the inventions and improvements therein named, described, and claimed as new and patentable or in either of them.

"To have and to hold the same, and each and every thereof, in
3449 trust as aforesaid, with full power to enforce settlement and payment for the past or the future use of the said inventions and patents or either of them.

"He, the said Charles Eddy, having full and absolute control of each and all of the said several patents hereinbefore named by date as well as by numbers, commencing with the date of each thereof, intending herein and hereby to sell, assign, and transfer unto him, the said Charles Eddy, in trust, all our right, title, and interest and ownership

in any or all the said several letters patent from the date of each of the same and until the expiration of the term for which they were respectively granted and issued unto the said Marcus P. Morton."

That thereafter, and on the 20th day of March, A. D. 1880, the said Charles Eddy, in writing, sold, assigned, and conveyed unto the said complainant, Christophe' C. Campbell, in trust, all the right, title, interest, and ownership of every name, kind, or description purchased and obtained by him under and by virtue of the said date to, and purchase by him of and from the said Jacob Shavor and Albert C. Corse, as stated and contained in and by said deed of assignment and transfer so dated on the 18th day of December, A. D. 1876, and so re-
3450 corded in said United States Patent Office, and as stated and set forth in paragraph No. XVI hereof.

XVIII. And the said Christopher C. Campbell, complainant and appellee, and appellant in this cause, respectfully showeth unto the honorable the Supreme Court of said United States, that the proofs and the evidence taken and produced to the said master, Kenneth G. White, upon the said accounting had by and before him in this cause, under said decree dated the first day of September, A. D. 1879, on the part and in behalf of said complainant, fully show that the gains, savings, profits, and advantages which had been received, or made, or which had arisen or accrued on account of the infringements charged in the bill of complaint in this cause and sustained by the proofs therein, were of the value and amounted to the full and just sum of ($189,000 $\frac{00}{100}$) one hundred and eighty-nine thousand dollars, which sum and amount should have been allowed and determined and fixed upon by said master in place and instead of the said sum and amount of ($63,000) sixty-three thousand dollars, the sum and amount awarded by him in
3451 his said report, filed in said circuit court by him on the 12th day of January, A. D. 1880, and accepted and confirmed by this court as hereinbefore stated.

Wherefore and whereupon this complainant, Christopher C. Campbell, appellee and appellant, appeals hereby from the said final decree, dated the 21st day of September, A. D. 1880, and filed and entered in said circuit court on the 23d day of said September, A. D. 1880, or so much thereof as is found and contained in sections or paragraphs Nos. 1, 3, 4, 5, 6, 7, and 8, and therein and thereby ordered, adjudged, and decreed by said circuit court as its final decree in this cause in said court, and the grounds and reasons of and for this appeal are contained herein and stated in and by the several paragraphs hereof and in each and every thereof.

In the place and stead of the said several parts and portions of said final decree so appealed from, the said decree should order, adjudge, and decree as follows, that is to say:

First. The exceptions made and filed by the complainant, Chris-
3452 topher C. Campbell, to the master's said report ought not to have been disallowed and overruled by said court; but the same, and each and every thereof, should have been accepted, ratified, and confirmed by said circuit court, and judgment herein entered in said court accordingly.

Second. The said master's said report ought not to have been accepted, ratified, and confirmed by said court in the manner it was done in said final decree; because said master did not, upon the evidence and proofs before him, find the total amount of said gains, profits, savings, and advantages to have been not less than ($136,000.00) one hundred and thirty-six thousand dollars; and had said master found them to

have been one hundred and thirty-six thousand dollars, then such report in all things ought to have been accepted, ratified, and confirmed by said circuit court, and not otherwise.

Third. That the said complainant, Christopher C. Campbell, do, as assignee in trust, recover of and from the said defendant, Thomas L. James, the full and just sum of ($136,000.00) one hundred and
3453 thirty-six thousand dollars and costs, and disbursements in addition thereto.

Fourth. That the gains, profits, savings, and advantages which have been made or which have arisen or accrued on account of the infringements upon and in violation of the rights and privileges under and secured by the letters patent, Division A, numbered 4143, and reissued to Helen M. Ingalls, on the 4th day of October, A. D. 1870, being for letters patent numbered 38175, granted and issued on the 14th day of April, A. D. 1863, to Marcus P. Norton, of the city of Troy, in the State of New York, in this cause, are the full and just sum of one hundred and thirty-six thousand dollars ($136,000.00), and that the said complainant, Christopher C. Campbell, appellee and appellant, have execution therefor against said defendant, Thomas L. James, together with costs and interest on the whole amount from the day of the entry in court of judgment upon such final decree.

Fifth. That the rights and interests of Helen M. Ingalls named in the decretal order of said circuit court, on the first day of September, A. D. 1879, and at paragraph "third" thereof, were vested in said
3454 complainant, Christopher C. Campbell, according to the terms, conditions, and provisions stated in the certain deed of assignment and transfer made by her to him the said complainant, appellee and appellant, on the second day of January, A. D. 1877, and of record in the Patent Office of said United States, under and by virtue of which he obtained the right in and to the said letters patent on which this suit is founded, and which letters patent are named and described in said decretal order.

Sixth. That the exclusive right, title, interest in and ownership of the said mentioned and described letters patent were fully and lawfully vested in the said complainant, Christopher C. Campbell, appellee and appellant, in trust, subject only to the terms, provisions, and conditions stated and specified in the said deed of assignment and transfer to him by said Helen M. Ingalls, on the second day of January, A. D. 1877, and a certain deed of assignment and transfer to him by the said defendant, Charles Eddy, dated the 20th day of March, A. D. 1880,
3455 and recorded in said United States Patent Office, on the 27th day of March, A. D. 1880, and mentioned and referred to in the said final decree by said circuit court.

Seventh. That the said defendants Horace T. Caswell and Samuel R. Clexton are not rightful or lawful or proper parties to or in this suit in said circuit court, because they are not assignees, nor is either of them an assignee of the hereinbefore named and described letters patent upon which this suit is founded by the bill of complaint herein or of any part or portion thereof, or of any part or portion of the recovery upon or under said letters patent by reason of infringements thereof or otherwise.

Eighth. That any and all papers purporting to be deeds of assignments and transfers to said defendants Horace T. Caswell and Samuel R. Clexton in this cause in said circuit court, as well also the paper-writing purporting to be the general assignment in insolvency of the firm of Eddy, Corse & Co., composed of said defendant Charles Eddy,

and of Albert C. Corse, Augustus P. Corse, and George C. Baldwin, jr., should not have been received in evidence and considered by said
3456 court, as the same were not in the evidence in said cause or alluded to in the pleadings thereof; nor were the same at any time whatever brought into said cause upon or by the written permission, leave, or order of said circuit court; nor were nor could the same or any thereof be admitted in the evidence and proofs in said cause, under the said orders of said court, dated respectively the 23d day of December, A. D. 1879, and the 24th day of January, A. D. 1880, as those and each were by the terms and conditions thereof limited by said circuit court to the taking of proofs and evidence concerning the cancellation and the cancellation only of a certain paper in writing particularly designated therein by said court, and said final decree of said circuit court should have been made accordingly, and the said Caswell and Clexton wholly and entirely excluded from this cause as parties to or in the same.

And this complainant, Christopher C. Campbell, appellee and appellant, respectfully prays that the said final decree of the said circuit court and the original bill of complaint, the amended bill of complaint, the
3457 answer, the amended answer, the replications, and all the pleadings, the stipulations, depositions, exhibits, evidence, and all proofs, the master's report, the evidence before the master, the exceptions to said report, and also all the proceedings in the said cause, and the orders of said court, dated the 23d day of December, 1879, and the 24th day of January, 1880; the final decree upon the pleadings and proofs, dated the first day of September, A. D. 1880; also, the opinion in writing by Judge Hoyt H. Wheeler, filed by him in December, 1879, upon granting said order, dated December 23d, 1879, and also all papers relating to said suit now on file in said circuit court in this cause, may be sent to the Supreme Court of said United States without delay; and that said court will proceed to hear said cause anew, and that so much of the said final decree of the said circuit court, as is hereinbefore objected to and complained of in the manner and form aforesaid, stated by paragraphs and numbers, may be reversed by the said Supreme Court, and the rights of said complainant established under and in accordance with his said amended bill of complaint, and his proofs and evidence in connection
3458 therewith, as to the said Supreme Court of the said United States shall seem meet, just, and proper upon the whole case.

Dated New York, this 2d day of October, A. D. 1880.

CHRISTOPHER C. CAMPBELL,
Complainant and Assignee in Trust.

Christopher C. Campbell, complainant and assignee in trust, versus Thomas L. James, Charles Eddy, Horace T. Caswell and Samuel R. Clexton, defendants. Petition of complainant on appeal to the Supreme Court of the United States. Marcus P. Norton, solicitor for complainant. George H. Williams, of counsel for complainant. Copy.

3460 UNITED STATES OF AMERICA, *ss:*

By the honorable Samuel Blatchford, judge of the circuit court of the United States, in and for the southern district of New York, second circuit.

To Thomas L. James, defendant and United States postmaster at the city of New York, and to Charles Eddy, and to Horace T. Caswell, and Samuel R. Clexton, defendants:

Whereas, Christopher C. Campbell, complainant and assignee in trust, has lately appealed to the Supreme Court of the United States of America, from a decree lately rendered in the circuit court of the United States, in and for the southern district of New York, as will more fully appear by reference to a petition of appeal on file in the clerk's office of the said circuit court, in and for the southern district of New York, wherein he is the appellee and also appellant, and you and each
3461 of you, are defendants and appellants.

You, and each of you, therefore are hereby cited and admonished to be, and to appear before the said Supreme Court, at the city of Washington, D. C., on the second Monday of October, A. D. 1880, to do and to receive what may appertain to justice in the premises.

Given under my hand at the city of New York, in the southern district of New York, in the second circuit, on the 2d day of October, A. D. 1880.

SAM'L BLATCHFORD,
Circuit Judge.

Due, personal, and timely service of this citation, and of the complainant's petition of appeal of the suit of Christopher C. Campbell, complainant and assignee in trust, versus Thomas L. James, Charles Eddy, and Horace T. Caswell, and Samuel R. Clexton, defendants, is
3462 now and hereby admitted by copy of the same, and of each thereof, on this 4th day of October, A. D. 1880.

OCTOBER TERM, 1880.

SAMUEL R. CLEXTON, *Appellant*, *versus* CHRISTOPHER C. CAMPBELL, ASSIGNEE, &c., ET AL., *Respondents*.	No. 1098.

APPEAL FROM UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF NEW YORK.

BRIEF FOR SAMUEL R. CLEXTON, APPELLANT.

Supreme Court of the United States.

SAMUEL R. CLEXTON, *Appellant,* *versus* CHRISTOPHER C. CAMPBELL, ASSIGNEE, &c., THOMAS L. JAMES HORACE T. CASWELL, CHARLES EDDY, AND CHARLES EDDY AS TRUSTEE FOR H. T. CASWELL AND S. R. CLEXTON, *Respondents.*	*No.* 1098.

BRIEF FOR SAMUEL R. CLEXTON, APPELLANT.

STATEMENT.

This suit was begun June, 1877, in the Circuit Court, Southern District of New York, in Equity, by Christopher C. Campbell against Thomas L. James, Postmaster in New York City, to recover damages and profits for the use of certain Letters Patent, issued by the United States, for improvements in Post Office Post Marking and Cancelling Hand Stamps, dated April 14, 1863, and issued to Marcus P. Norton as the inventor of those improvements.

In January, 1878, the defendant, James, filed his amended answer, and alleged therein that Marcus P. Norton had exe-

cuted an assignment of a third interest in the patent to Charles Eddy as Trustee for said Eddy, Jacob Shavor and Albert C. Corse, by deed dated October 23, 1869, and recorded October 25, 1869. James pleaded the non-joinder in this suit of said Eddy, as such Trustee, and prayed that said Eddy, as such Trustee, be made a party.

Page 61 of Record.

For said assignment of October 23, 1869, see—

Page 1147 of Record.

September 13, 1878, Charles Eddy was made a defendant herein for himself, as well as in trust for Jacob Shavor and Albert C. Corse.

Pages 657–8 of Record.

Eddy as such Trustee was made such defendant at the request, and on the motion of the complainant, Campbell, and by a certain stipulation dated June, 1878, executed by the complainant Campbell, and approved of by Marcus P. Norton and Helen M. Ingalls.

Pages 654-5–6 of Record.

Such stipulation provided that "said court shall decide as "to what the rights and interests of said Eddy in the subject "matter of this suit are," and contained the admission that the complainant "agrees that said assignment of October 23, "1869, from Marcus P. Norton to Charles Eddy in trust, as "aforesaid, was a valid assignment, not affected by any prior "or cotemporaneous assignment by said Norton to Helen M. "Ingalls, or other written agreement to which said Eddy is a "party, except the one hereinbefore referred to, and dated "October 7, 1871." And it further stipulated that in case of a recovery against James "the court shall determine the rights "respectively thereto of complainant and said Eddy."

Pages 654–5 of Record.

Thereafter Corse's interests were transferred to Horace T.

Caswell, one of the above-named respondents, and Shavor's interests were transferred to Samuel R. Clexton.

Pages 1628, 1629, 1630, 1640–1–2 for Caswell's title.

Pages 1638–9 for Clexton's title.

January 24, 1880, Samuel R. Clexton and Horace T. Caswell were made defendants, and the determination of their rights provided for by order of court.

Page 1576 of Record.

The following are therefore the parties in this suit:

(1.) Christopher C. Campbell, assignee in trust for Helen M. Ingalls.

(2.) Thomas L. James.

(3.) Charles Eddy.

(4.) Charles Eddy, as Trustee for Samuel R. Clexton and Horace T. Caswell.

(5.) Samuel R. Clexton.

(6.) Horace T. Caswell.

March 31, 1879, Charles Eddy made a general assignment for the benefit of his creditors, under the Laws of New York, to J. Albert Cipperly and Charles N. Stannard, of all his "individual estate and property, real and personal, goods, "chattels, effects, credits, accounts, debts, dues, demands, "choses in action, and property of every name and kind whatsoever, except such property, if any, held or owned by him "as is exempt by law from levy and sale under execution."

See pages 1632–5 of Record.

Cipperly and Stannard, acting under that general assignment, sold Eddy's individual interest to Samuel R. Clexton, on January 7, 1880.

See pages 1635–6 of Record.

Between December 4, 1879, and February 10, 1880, testimony was taken as to the cancellation of the contract of

October 7, 1871, mentioned in the above cited stipulation of June , 1878.

See pages 1563 to 1637 of Record.

The above-mentioned general assignment from Eddy to Cipperly and Stannard, and the assignment of Cipperly and Stannard to Clexton, were put in evidence February 4, 1880.

See pages 1616 and 1614 of Record.

The above testimony and assignments were filed in court prior to February 10, 1880.

See notice of such filing, page 1637 of Record.

A hearing was first had as to the liability of James, and the interlocutory decree thereon was filed September 1, 1879, sustaining the patent, decreeing Campbell the owner thereof, subject to the rights of Ingalls and Eddy, and ordering a reference to a master to take and state an account.

See page 1458 of Record.

On March 11, 1880, a hearing was had (1) on the exception to the Master's Report, (2) as to the rights of Campbell, Eddy, Caswell, Clexton, and Eddy as Trustee, as between themselves.

See Notice of Hearing, page 1637 of Record.

The court's opinion as to the rights of Campbell, Eddy, Caswell, Clexton, and Eddy as Trustee, is as follows:

(1.) That Campbell owns an undivided two-thirds of the patent, and two-thirds of the recovery, to wit, $42,000.

(2.) That Eddy individually, and as Trustee for Caswell and Clexton, owns the other one-third of the patent and the balance of said recovery, to wit, $21,000.

(3.) That Caswell owns the Corse beneficial interest, to wit, one-ninth of the patent and $7,000 of the recovery.

(4.) That Clexton owns the Shavor beneficial interest, to wit, one-ninth of the patent and $7,000 of the recovery.

(5.) That Eddy had assigned to Cipperly and Stannard, by

his general assignment of March 31, 1879, all Eddy's choses in action for the use and infringement of his individual one-ninth of the patent that had accrued up to March 31, 1879; that these choses in action were vested in Samuel R. Clexton, and that the recovery in this suit for said choses in action, to wit, $6,125, belonged to Clexton.

(6.) That Eddy was the individual owner of one-ninth of the patent; that this one-ninth did not pass to Cipperly and Stannard by that general assignment of March 31, 1879, because it was excepted from the operation thereof by the words "except "such property, if any, as is exempt by law from levy and sale "under execution," and that Eddy was entitled to the recovery ($875) in this suit on all claims for the infringement of that one-ninth accruing subsequent to March 31, 1879.

See Opinion, pages 1644–1652.

On August 18, 1880, an order reciting certain alleged assignments, dated March 20, 1880, purporting to have been made by Charles Eddy to Christopher C. Campbell, and directing the payment to certain persons mentioned in the order of a portion of the complainant's recovery, was entered "without prejudice to the rights of any parties, in interest, except "those who have signed the agreement of March 20, 1880, and "the assignment from Eddy to Wooster." Such persons are Charles Eddy; Christopher C. Campbell; Marcus P., Helen M., Minnie D., Helen G. and Estelle M. Norton.

See page 1657 of Record.

The final decree was entered in accordance with the above opinion, except that the decree recognizes Campbell as the assignee, through the above order of August 18, 1880, of Eddy's $875. The decree gives to Campbell, as assignee, in trust for Helen M. Ingalls, a decree of recovery against James for $43,471.40 ($42,000 and the costs, $1,470.40); and gives to Eddy individually, and as Trustee for Caswell and Clexton, a recovery against James for $21,000, and decrees that of such $21,000 Clexton is entitled to $13,125, Caswell to $7,000, and Campbell, as assignee of Eddy, to $875. It also directs, conditionally, that Campbell,

as assignee, and Eddy, individually, and as Trustee for Caswell and Clexton, have execution against James for $64,471.40.

See pages 1664–5 of Record.

ASSIGNMENT OF ERRORS.

Samuel R. Clexton appeals from that decree, and assigns as errors:

A.—As to the Title.

I.—That said decree is erroneous, in that it should (and does not) decree that Samuel R. Clexton, individually, is the owner of an undivided one-third part of the Letters Patent "Division A," numbered 4,143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, being for Letters Patent, numbered 38,175, granted and issued on the fourteenth day of April, 1863, to Marcus P. Norton.

II.—That said decree is erroneous, in that it should (and does not) decree that Samuel R. Clexton, individually, is the owner of an undivided two-ninths part of the Letters Patent "Division A," numbered 4,143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, being for Letters Patent, numbered 38,175, granted and issued on the fourteenth day of April, 1863, to Marcus P. Norton.

III.—That said decree is erroneous, in that it should (and does not) decree that Samuel R. Clexton, individually, is the owner of an undivided one-ninth part of the Letters Patent "Division A," numbered 4,143, and reissued to Helen M. Ingalls on the 4th day of October, 1870, being for Letters Patent, numbered 38,175, granted and issued on the fourteenth day of April, 1863, to Marcus P. Norton.

IV.—That said decree is erroneous, in that in the place and stead of so much of said decree as decrees "That Charles "Eddy, individually and as Trustee for Horace T. Caswell "and Samuel R. Clexton, is the owner of an undivided one-

" third part of said Letters Patent 'Division A,' numbered " 4,143," the said decree should have decreed as follows: " That Charles Eddy individually has no right, title or interest " in said Letters Patent 'Division A,' numbered 4,143. That " Samuel R. Clexton is the owner of an undivided one-ninth " part of said Letters Patent 'Division A,' numbered 4,143, " and reissued to Helen M. Ingalls on the 4th day of October, " 1870, being for Letters Patent, numbered 38,175, granted " and issued on the fourteenth day of April, 1863, to Marcus " P. Norton. That Charles Eddy, as Trustee for Samuel R. " Clexton and Horace T. Caswell, is the owner of an undivided " two-ninths part of said Letters Patent 'Division A,' num- " bered 4,143, and reissued to Helen M. Ingalls on the 4th " day of October, 1870, being for Letters Patent, numbered " 38,175, granted and issued on the fourteenth day of April, " 1863, to Marcus P. Norton."

B.—As to the Recovery.

I.—That said decree is erroneous in that it should (and does not) decree that Samuel Clexton do recover of Thomas L. James the sum of $21,000.

II.—That said decree is erroneous in that it should (and does not) decree that Samuel R. Clexton do recover of Thomas L. James the sum of $14,000.

III.—That said decree is erroneous in that it should (and does not) decree that Samuel R. Clexton do recover of Thomas L. James the sum of $7,000.

IV.—That said decree is erroneous in that it should (and does not) decree that Samuel R. Clexton do recover of Thomas L. James the sum of $13,125.

V.—That said decree is erroneous in that in the place and stead of so much of said decree, as decrees, "That Charles " Eddy, individually, and as Trustee for Samuel R. Clexton and " Horace T. Caswell, do recover of the said Thomas L. James

"the sum of twenty-one thousand dollars ($21,000)," the said decree should have decreed, "That Charles Eddy, individually, "recover nothing of said Thomas L. James; that Samuel R. "R. Clexton, individually, do recover of the said Thomas L. "James the sum of seven thousand dollars; that Charles "Eddy, as Trustee for Samuel R. Clexton and Horace T. Cas- "well, do recover of the said Thomas L. James the sum of "fourteen thousand dollars."

VI.—That said decree is erroneous in that it should decree, (and does not) that Charles Eddy, as assignor for Samuel R. Clexton, do recover of Thomas L. James the sum of $6,125.

C.—As to Execution Against James.

I.—That said decree is erroneous in that it should (and does not) decree that Christopher C. Campbell, as Assignee in Trust, and Samuel R. Clexton, individually, have execution against Thomas L. James for $64,471.40, and interest thereon from the date of the entry of said decree.

II.—That said decree is erroneous in that it should (and does not) decree that Christopher C. Campbell, as Assignee in Trust, Samuel R. Clexton, and Charles Eddy, as Trustee for Horace T. Caswell, have execution against Thomas L. James for $64,471.40, and interest thereon from the date of the entry of said decree.

III.—That said decree is erroneous in that it should (and does not, decree that Christopher C. Campbell, as Assignee in Trust, Samuel R. Clexton, individually, and Charles Eddy, as Trustee for Horace T. Caswell and Samuel R. Clexton, have execution against Thomas L. James for $64,471.40, and interest theron from the date of the entry of said decree.

IV.—That said decree is erroneous in it that should (and does not) decree that Christopher C. Campbell, Assignee in Trust, Charles Eddy as assignor for Samuel R. Clexton and Charles Eddy, individually, and as Trustee for Samuel R. Clexton and Horace T. Caswell, have execution against

Thomas L. James for $64,471.40, and interest thereon from the date of the entry of said decree.

D.—As to What Portions of the Recovery Samuel R. Clexton is Entitled to.

I.—That said decree is erroneous in that it should (and does not) decree that Samuel R. Clexton is entitled to $21,000 of the recovery.

II.—That said decree is erroneous in that it should (and does not) decree that Samuel R. Clexton is entitled to $14,000 of the recovery.

III.—That said decree is erroneous in that it decrees, "That Charles Eddy is entitled to $875 assigned to the "complainant since the interlocutory decree, as appears by "the assignment on file;" and in that it decrees that there be paid to the Clerk of the Circuit Court of the United States for the Southern District of New York, for the benefit of Charles Eddy and the complainant, his assignee, or for the benefit of the complainant, assignee of Charles Eddy, the sum of $875; and in that it decrees that said clerk pay to "the complainant, assignee of Charles Eddy, the "sum of eight hundred and seventy-five dollars, and interest "thereon from the date of the entry of this decree to the date "of said payment to said clerk."

VI.—That said decree is erroneous in that it should have decreed (and does not) that Charles Eddy is entitled to no part of the recovery in this suit; that the complainant as assignee of Charles Eddy is entitled to no part of the recovery in this suit; and that no part of said recovery be paid to the Clerk of the Circuit Court of the United States for the benefit of Charles Eddy, or of complainant the assignee of Charles Eddy; and that said Clerk pay nothing to Charles Eddy or to the complainant as assignee of Charles Eddy.

That said decree is erroneous in that it decrees that Eddy's interest in the Letters Patent involved in this suit, and all claims for damages for infringements of such interest subse-

quent to March 31, 1879; and of profits arising since March 31, 1879, for use of said Letters Patent; and of a recovery and execution therefor in this suit against James, did not pass by Eddy's general assignment, executed March 31, 1879, to J. Albert Cipperly and Albert Stannard, and from said Cipperly and Stannard to Clexton by the deed of said Cipperly and Stannard to said Eddy, dated January 7, 1880, both of which deeds are in evidence in this suit, printed at pages 1632–36 of the Record.

POINTS.

I.

Christopher C. Campbell is in no way interested in this appeal, except as stated hereafter. It concerns Charles Eddy, Thomas L. James and Samuel R. Clexton alone.

In the court below Campbell claimed to own the *whole* patent. Eddy, Caswell and Clexton contested this and claimed to own a third of the patent under Norton's assignment of October 23, 1869, to Eddy in trust

See page 1147 of Record.

As between Campbell on the one hand, and Eddy, Caswell and Clexton on the other, this matter was litigated and settled in favor of Eddy, Caswell and Clexton.

The court decided that Eddy, Caswell and Clexton owned one-third of the patent, free from any connection with Campbell.

See opinion, pages 1644–1652 of Record.
Final decree, pages 1664–5 of Record.

What became of the one-third, concerns James, Eddy, Caswell and Clexton alone.

The rights of Eddy, Caswell and Clexton, as between themselves, were likewise determined by the court below.

See opinion, pages 1644–1652 of Record.
Final decree, pages 1664–5 of Record.

In such determination of the right of Eddy, Caswell and Clexton, as between themselves, "the plaintiff (Campbell) "has no right nor apparent interest as to where it shall go, "whether to Eddy himself, for himself, and those for whom he "was Trustee, or to those to whom he and his *cestuis que trust* "may have conveyed that right."

Opinion of Court, page 1647 of Record.

Eddy's evidence of ownership was on file before Clexton was made a party. After Clexton was made a party, the general assignment from Eddy to Cipperly and Stannard, and the latter's assignment to Clexton were filed. This was on February 4, 1880.

See pages 1616 and 1614 of Record.

James, Eddy and Clexton alone were interested in these assignments, and Eddy and James never objected to their introduction.

See page 1616 of Record.

No objection can now be taken to them.

General Rules Supreme Court, No. 13.
Desty's Federal Procedure, page 254.

Campbell did object to their introduction on February 4, 1880; such objection was futile, as it was no concern of his.

See page 1616 of Record.

Thereafter, *i. e.*, on March 20, 1880, Campbell claims to have bought out Eddy's interests, and an order was entered August 18, 1880, filing such alleged assignment.

Such order of August 18, 1880, however, was "made without prejudice to the rights of" Clexton.

See page 1657 of Record.

Independently of such order, Campbell could succeed only to Eddy's rights.

Eddy's assignment to Campbell was *pendente lite* so far as Clexton and Eddy are concerned, and therefore Campbell took the assignment from Eddy, subject to all the equities existing between Eddy and Clexton.

See Kinsman *vs.* Parkhurst, 18 How., 289.

As Eddy had made no objection to these assignments, Campbell has no right now to raise any objections to their admission in evidence.

The assignments are admitted even by Campbell to be genuine and valid.

See Campbell's objection at page 1616 of Record.

It is therefore clear that on this appeal no objection can be raised by any of the respondents but what Eddy or James could or can raise.

And the only objection to this appeal that Eddy can make is that he did not assign his patent rights to Cipperly and Stannard because he expressly excepted them from the operation of that assignment.

II.

The Circuit Court held that the general assignment of March 31, 1879, *executed by Charles Eddy (and others) to the general assignees, Cipperly and Stannard, did not convey Eddy's interest in the Letters Patent involved in this suit to Cipperly and Stannard, on the ground that such Letters Patent were expressly excluded by Eddy's excepting from the operation of such assignment such property,* IF ANY, *as was "exempt by law from levy and sale under execution."*

See Opinion of Court, pages 1644–1652 of Record.

See General Assignment, pages 1632–5 of Record.

The appellant Clexton believes such decision to be erroneous, and submits to this court that Eddy's interest in such Letters Patent did pass to Cipperly and Stannard, and from Cipperly and Stannard to him by assignments.

See pages 1635–6 of Record.

Eddy's general assignment of March 31, 1879, conveyed to Cipperly and Stannard all his "individual estate and property,

" real and personal, goods, chattels, effects, credits, accounts, " debts, dues, demands, choses in action, and property of every " name and kind whatsoever."

See General Assignment, page 1632 of Record.

Such words are broad enough to convey patent rights.

Thus, an instrument assigning " all property whatsoever and " wheresoever, was held to carry patent rights."

Railroad Co. *vs.* Trimble, 10 Wall., 367.

Therefore, Eddy's patent rights passed to Cipperly and Stannard, and then to Clexton, unless they were excluded by the words, " except such property, *if any*, as is exempt by law from " levy and sale under execution."

Such clause did not except patent rights, nor any other property than the usual *statutory exemptions*, for which statutory exemptions see § 1390, New York Code of Civil Procedure.

III.

Eddy's general assignment was executed in New York under the New York laws. The New York State Courts admit that Letters Patent cannot be levied on and sold under execution, but those courts have expressly decided that the phrase, " property exempt by law from levy and sale under execution," does not embrace Letters Patent.

For instance, section 297 of the New York Code of Procedure enacts that " the judge may order any property of the " judgment debtor, *not exempt from execution*, * * * to be " applied towards the satisfaction of the judgment."

The New York Supreme Court has expressly held that, under this statute, a judge can compel a debtor, the owner of Letters Patent of the United States to transfer such patent to be applied towards the satisfaction of the judgment, notwithstanding that property *exempt from execution* cannot be reached under that statute.

Barnes *vs.* Morgan, 3 Hun (N. Y.), 703.

"The debtor must devote all his property absolutely to the "payment of his debts; reserve no control to himself; provide "for no benefit to himself. When it appears from the pro- "visions of the assignment, or by other proof, that any of these "rules have been violated in making the assignment, the law "adjudges it fraudulent and void."

Oliver Lees & Co. Bank *vs.* Talcott, 19 N. Y., 146, 148.

"The law only tolerates them when honestly made for the "purpose of giving the preference and devoting the *whole* prop- "erty of the debtor to the payment of the debts."

Rathbun, *vs.* Platner, 18 Barb., 272, 275.

"As we understand the settled law of this State, derived "from an examination of all the decisions, assignments pre- "ferring certain creditors are only tolerated when they are ab- "solute and unconditional; when they devote the *whole* of the "assignor's property to the immediate and unqualified pay- "ment of his debts *pari passu*, or in a specified order; when "they contain no reservations or conditions."

Burdick *vs.* Post, 12 Barb., 168, 175.

"The courts have very reluctantly upheld general assign- "ments by an insolvent debtor which give a preference among "creditors; and they can only be supported when they make "a full and unconditional surrender of the property to the "payment of debts. The debtor can neither make terms, nor "reserve anything to himself, until after all his creditors have "been satisfied."

Barney *vs.* Griffen, 2 N. Y., 365, 371.

The New York General Assignment Act of 1877, ch. 466, page 543, enacts that the debtor, at time of making assignment, or within twenty days thereafter, shall make an inventory or schedule containing "a full and true inventory of all such "debtor's estate at the date of such assignment, both real and "personal, in law and in equity."

Omission to do this does not invalidate the assignment; the act provides that the assignee must do it.

The above act, following the above decisions, clearly contemplates an assignment of *all* the debtor's property.

Making out such schedules, but omitting to insert therein some property, is sufficient to enable a creditor to have the assignment set aside as fraudulent. This was expressly decided in Schultz *vs.* Hoagland, 9 N. Y. Weekly Digest, 319, decided February 2, 1880.

The above act, regulating general assignments in New York, was enacted in 1877.

New York Session Laws, 1877, chap. 466, p. 543.

Eddy's general assignment was executed March 31, 1879, and is clearly subject to that act and the above decisions, and is fraudulent and void if it did not convey *all* of Eddy's property except his statutory exemptions. For such statutory exemptions can be excluded and the assignment be valid.

Dow *vs.* Platner, 16 N. Y., 562.

Everything will be presumed to sustain the validity of Eddy's general assignment.

Parsons on Contracts, 5th Ed., Vol. II, p. 500.

Therefore, it must be presumed that the clause "except such property, if any, as is exempt by law from levy and sale under execution," means the statutory exemption, and does not exclude Eddy's interest in patents from the operation of his assignment.

It may be well to add that assignments preferring creditors are not void *per se* in New York.

See Bostwick *vs.* Burnett, 74 N. Y., 317.

VI.

The meanings of English words are known to the court. Yet dictionaries and other authorities may be consulted by the court to refresh its recollection of such meanings. It is proper

to consult law books, opinions of courts, statutes, &c., for the true meanings of words and legal phrases.

Such reference to dictionaries, statutes, &c., is to determine the meaning of such words and phrases, and it is not in any sense an attempt to vary or contradict a written instrument.

What then is the meaning of the word exempt? Webster defines the verb "exempt" as meaning "to take out or from;" "to release," "to exonerate."

Property that is *exempt* from execution is therefore property that is "taken out or from," or "released from," or "exonerated from" a general rule.

Property cannot be "taken out or from" a general rule, unless at one time it has been *in or under or subject* to that rule.

But in New York, choses in action and equitable assets never have been subject to levy and sale under execution.

Ransom *vs.* Miner, 1 Code Rep., N. S., 98.

Such property is not "*exempt*" from execution. It is not property that is, or has been, "taken out from," or "released from," or "exonerated" from execution. It never has been subject to execution.

On the other hand, chairs in New York are liable to execution; but *six chairs* are "exempt," *i. e.*, "taken out from," "released from," or "exonerated from," the burden resting on chairs generally.

§ 1390, New York Code of Civil Procedure.

It is erroneous to confound property *exempt* from execution with property *not subject* to execution. Property exempt from execution always means exempt by *statute*. Property exempt from execution refers only to property which, but for the special exemption, would be subject to execution. But property which from its *very nature* cannot be taken by execution is correctly designated as "property not subject" to execution.

Giving to the word "exempt" its exact and proper meaning, it is clear that Eddy's general assignment did pass his patent rights to Cipperly and Stannard, and that Clexton's appeal is well taken.

For Letters Patent, in New York, by their *very nature*, cannot be taken by execution. They never were subject to such

execution, and consequently never were "taken out from," or "released from," or "exonerated from" liability to a levy and sale under execution in New York.

For "no property can be levied on and sold under execution "unless it is present and within the view of those attending "the sale."

3 N. Y. R. S., page 629, § 41 (6th Ed.).

VII.

The *statutes* use the phrase "exempt by law from levy and "sale under execution," as meaning statutory exemption only.

"The judge may order any property of the judgment debtor "*not exempt from execution* to be applied towards the satisfac-"tion of the judgment."

§ 297, New York Code of Procedure.

Under this statute, as we have seen above, the New York Supreme Court compelled a debtor to assign Letters Patent, notwithstanding the clause "not exempt from execution."

Barnes *vs.* Morgan, 3 Hun (N. Y.), 703.
Thorne *vs.* Thomas, 1 Law Bulletin (N. Y.), 53.

Under the New York proceedings, supplementary to execution (a statutory substitute for a creditor's bill to reach debtor's equitable assets), the debtor may be brought before the judge to be examined as to his property. If there is danger that the debtor will leave the State, the judge may compel him to give an undertaking with sureties "that he will not during the "pendency of the proceedings dispose of any portion of his "property *not exempt from execution.*"

§ 292, New York Code of Procedure.

And, pending the appointment of a Receiver of such debtor's property, the judge may "forbid a transfer, or other disposi-"tion of the property of the judgment debtor *not exempt from* "*execution.*"

§ 298, New York Code of Procedure.

In New York, choses in action property situated out of New York and equitable assets generally are incapable of being levied on and sold under execution. "No property can be levied on and sold under execution unless it is present and within the view of those attending such sale."

3 N. Y. R. S., page 629, § 41 (6th Ed.).
Ransom *vs.* Miner, 1 Code Rep. (N. S.), 98.

Yet such property can be taken under the above § 297, or its transfer forbidden under §§ 292, 298.

Bunn *vs.* Fonda, 2 Code Rep., 70.
Fenner *vs.* Sanborn, 37 Barb., 610.
Newell *vs.* Cutler, 19 Hun (N. Y.), 74.
Potter *vs.* Low, 16 How. Pr. (N. Y.), 549.

It is evident from the above authorities that in New York, Letters Patent, choses in action, equitable assets, and other property not subject to levy and sale under execution, are not referred to or meant by the phrase, "property exempt from execution."

Property exempt from execution is property that is released from a liability to execution by express provisions of some statute.

VIII.

Property "exempt *by law* from levy and sale under execution" is the expression used in Eddy's general assignment.

By law means *by statute*, for:

First.—The forms of general assignments given by text writers as models after which assignments are to be drawn, use the phrase, "exempt by law," in the sense of "exempt by statute," and in no other sense.

"Excepting such as is *by law* exempt from execution," is used by Burrill.

See Burrill on Assignments, 2d Ed., 633.

"Except such property as is exempt *by law* from levy and "sale under execution," is found in Bishop.

See Bishop on Insolvent Debtors, pp. 439–440.

Every statute in which the phrase "exempt *by law* from levy and sale under execution" is found, employs the phrase as meaning exempt *by statute* from levy, &c.

Thus § 5045 of Revised Statutes of the United States (Title "Bankruptcy") enacts that from the operation of a bankrupt's conveyance there shall be excepted "such other property not "included in the foregoing exceptions as is exempted from "levy and sale upon execution, or other process or order of "any court, *by the laws* of the State, of the State in which the "bankrupt has his domicile."

Choses in action and equitable assets generally cannot be levied on and sold under execution in the State of New York, as we have seen above.

See Ransom *vs.* Miner.

By the *laws* of the State of New York, such choses in action are not subject to levy and sale upon execution.

But no one will for a moment contend that, even in New York, choses in action and equitable assets do not pass by a bankrupt's conveyance. Yet such property would not pass by such conveyance if *by laws* in the above statute (§ 5045) meant other than *by statutes.*

So, a debtor, to obtain his discharge when imprisoned for debt, must execute "an assignment of all his property not *expressly* exempt *by law* from levy and sale by virtue of an execution."

See § 2208 N. Y. Code of Civil Procedure.

No property, in New York, is *expressly* exempt from execution, by *law*, as distinguished from *by statute.*

The statutes regulating assignments of the estates of non-resident, absconding, insolvent or imprisoned debtors, use

the phrase "excepting such *a ticles* as are *by law* exempt from execution."

3 N. Y. R. S. (6th ed.), page 24, § 8.

And in another place, "except the *articles* which are *by law* exempt from execution."

3 N. Y. R. S. (6th ed.), page 26, § 6.

An article is tangible personal property, and hence *leviable* property.

But no tangible personal property is *exempt* from execution, *by law*, as distinguished from *by statute*.

It is idle to pursue this investigation any further. This phrase is found in numberless other places, and always means statutory exemption. Thus in §§ 2175 and 2177 of the New York Code of Civil Procedure it is "exempt *by law* from levy and sale by virtue of execution."

And in 3 N. Y. R. S. (6th ed.), page 23, § 22, it is "except such as is *by law* exempt from execution."

IX.

The burden of proof is on the person claiming the exemption to prove that the property in question is *exempt*.

"Where property is claimed to be exempt from execution "the burden of proof rests upon the person claiming the "benefit of such exemption."

Brown *v.* Davis, 9 Hun (N. Y.), 43.

"It undoubtedly devolved upon the plaintiff to show, af- "firmatively, the facts which entitled him to the exemption of "the property in question."

Griffin *v.* Sutherland, 14 Barb. 456, 459.

The burden of proof, therefore, is on Eddy and those claiming under him, to prove that Letters Patent are "exempt property" and not simply "property not subject to execution" —the same as choses in action and equitable assets generally.

X.

The court below, in its opinion, says, "an assignment of "what by law could be taken was all the creditors had a right "to claim."

See Opinion, page 1651 of Record.

But a creditor can by law take Letters Patent. He may not be able to take it by execution, nor by attachment, nor by appointment of a Receiver, nor by an assignment, made by order of the court, but not *signed* by the owner of the Letters Patent.

Still a creditor has one remedy. The court, at request of the creditor, may order the debtor, the owner of the patent, to execute an assignment of the patent to a third party, to be applied to the satisfaction of the debt.

Barnes *vs.* Morgan, 3 Hun, (N. Y.), 703.
Stephens *vs.* Cady, 14 How. (U. S.), at p. 531.
Stevens *vs.* Gladding, 17 How. (U. S.), at p. 452, near top, and head note at p. 448.
Ashcroft *vs.* Walworth, 1 Holmes, at p. 154.
Gordon *vs.* Anthony, 16 Patent Office Gazette, at p. 1139, and head note at p. 435.

It is no answer to say that the debtor MAY disobey the order of the court and prefer to undergo the penalties for his contempt rather than to execute such an assignment.

This court will not *assume* that its order will be disobeyed.

XI.

Eddy owned Letters Patent. Letters Patent cannot be taken by execution. Eddy is presumed to have known the law. If he had meant to except Letters Patent from his assignment, he would have omitted the words "if any" from the clause "except such property, *if any*, as is exempt by law "from levy and sale under execution."

The words "if any" throw doubt on the question as to whether Eddy had any exempt property at all, and is strong evidence that he did not regard the Letters Patent he then owned as exempt property.

XII.

The title to an immense amount of personal property is endangered in New York by the decision of the Circuit Court.

It has been the usual practice to insert in general assignments a clause exce pting property exempt by law from levy and sale under execution.

See Burrill on Assignments, 2d Ed., p. 633.
Bishop on Insolvent Debtors, pp. 439–440.

In many such assignments three-fourths of the debtor's property consists of choses in action and equitable assets *i. e.* non-leviable property. Such property, in New York, does not pass to the general assignees, if the decision of the Circuit Court be right. The *New York Daily Register* (a law paper) speaks of this decision as one wherein "the words, exempt by "law, were with *entire originality* held to include not only "those things exempt by statute, but non-leviable or equitable "assets."

See N. Y. *Daily Register*, 18 Vol. page 1108, the issue of Monday December 13, 1880.

XIII.

Shavor & Corse are alleged to have made an assignment of their interests to Eddy by a deed dated December 18, 1876.

See page 576 of Record.

Christopher C. Campbell claims that, by such assignment, Eddy became the legal owner of such one-third of the patent, free from all trusts.

See Campbell's Petition of Appeal, page 1689.

This assignment of December 18, 1876, its nature, purport and bearing in this suit are fully discussed in the brief of Caswell and Clexton, respondents in Campbell's Appeal, No. 1101.

Assuming, for the argument's sake, that Eddy, by this assignment of December 18, 1876, did become the owner of one-third of this patent, free from all trusts, then Clexton is clearly such owner, for Eddy transferred all his individual interests to Cipperly and Stannard, and they sold such interest to Clexton.

See pages 1632, 1635 of Record.

If, however, the title to such one-third did not pass to Cipperly and Stannard, because of the exemption clause, yet all choses in action, *i. e.*, claims for past infringement, passed from Eddy to Cipperly and Stannard, and then to Clexton. "Choses in action" are specially named in Eddy's general assignment.

See General Assignment, page 1632 of Record.

See opinion of court, page 1651, where the court says: "Choses in action are expressly named in the assignment to Trustees, and by force of those words it would carry this claim."

Therefore, if Campbell is right in his statement in his petition of appeal, Clexton owns one-third of the patent; and, at the very least, he owns all infringements up to March 31, 1879, and is entitled to a recovery of $18,375 against James.

Campbell claims that Eddy sold this one-third to him by an alleged deed, dated March 20, 1880.

See page 1658.

The bearing of this alleged assignment in the case is also fully discussed by counsel for Caswell and Clexton in the Campbell appeal.

But Eddy's sale to Cipperly and Stannard is just as effective in carrying his interest to Cipperly and Stannard, as would be the alleged assignment of Eddy to Campbell. One is as good a settlement with *infringers* as the other is.

XIV.

It may be said that Eddy's general assignment does not comply with the statutes regulating the transfer of patent rights.

The cases which will be cited for this proposition are cases in which it is held that an assignment *in invitum*, under insolvent proceedings, &c., does not pass such rights.

See Stephens *vs.* Cady, 14 How. (U. S.), 528.
Ashcroft *vs.* Walworth, 1 Holmes, 152.
Stevens *vs.* Gladding, 17 How. (U. S.), 447.
Gordon *vs.* Anthony, 16 Patent Office *Gazette*, 1135.

All these cases go on the ground that the assignments were not *signed* by the owner of the patent, but by some officer of the court, in involuntary proceedings.

They all say that, if the owner himself signed, even under the compulsion of involuntary proceedings, the title would pass.

See Stephens *vs.* Cady, 14 How. (U. S.), at p. 531.
Stevens *vs.* Gladding, 17 How. (U. S.), at p. 452, near top, and head note at p. 448.
Ashcroft *vs.* Walworth, 1 Holmes, 154.
Gordon *vs.* Anthony, 16 Patent Office *Gazette*, at p. 1139, and head note at p. 435.
See also Barnes *vs.* Morgan, 3 Hun (N. Y.), 703.
Thorne *vs.* Thomas, 1 *Law Bulletin* (N. Y.), 53.

Eddy executed his general assignment; it was his voluntary act.

See pages 1632–4 of Record.

XV.

The failure to record Eddy's general assignment in the Patent Office within three months (~~for it was, as a matter of fact, recorded on March 11, 1880~~), is of importance only as against *bona fide* purchasers for value, without notice. An unrecorded assignment is good as against everybody except a *bona fide* purchaser for value, without notice, and suit may be brought thereon without recording it.

Perry *vs.* Corning, 7 Blatch., at page 201 near middle.

Even such purchaser for value, without notice, must show that he purchased without notice.

See Perry *v.* Corning, above.

Eddy, the assignee, of course cannot raise the objection, and did not.

See page 1616 of Record.

Neither can Campbell, for

First.—The general assignment was introduced in evidence in this suit on February 4, 1880,

See pages 1614 and 1616 of Record.

And Eddy's alleged assignment to Campbell was made, if at all, on March 20, 1880. Prior to March 20, 1880, Campbell had no interest in the general assignment.

Moreover, Eddy's assignment to Campbell was *pendente lite*, and Campbell is bound by all the equities existing between Eddy and Clexton.

See Kinsman *v.* Parkhurst, 18 How., 289.

Second.—Campbell cannot raise this objection because Eddy cannot. For the order of court, filed August 18, 1880, which admits into this record Eddy's alleged assignment to Campbell was "made without prejudice to the rights of any parties in "interest, except those who have signed the agreement of "March 20, 1880, and the assignment from Eddy to Wooster."

See page 1657 of Record.

Clexton is not one of these parties.

Third.—Campbell had *actual* notice of this general assignment in February, 1880. It was introduced in evidence February 4, 1880, and filed in the presence of Campbell's counsel.

See page 1616 of Record.

Therefore the alleged assignment of March 20, is subject to this general assignment.

See § 4898, U. S. R. S.

XVI.

Making Clexton a party to this suit implies that he may have interests therein. Such interest appears in Clexton's moving papers.

See affidavit of Samuel R. Clexton and Horace T. Caswell, at pages 1572-6 of Record.

On such moving papers Clexton was made a party, "with "the same rights and privileges * * * as the said "Eddy, as they appear in the proceedings in this suit."

See order of court, January 24, 1880, at page 1576 of Record.

Eddy's right to have his interests determined in this suit, was provided for by the stipulation of June , 1878.

See pages 654-6 of Record.

Clexton, as the purchaser of Eddy's interest, is clearly entitled to have such determination, *especially as Eddy never objected to it.*

But, independent of the above considerations, it was certainly proper for the court to determine, in this suit, to whom it will decree the one-third interest to belong. The rule of courts of equity is that "the real parties in interest" shall be recognized, and such interests must be determined in this suit or never.

It appears in the record that Eddy, at a critical state of the case, peremptorily forbade any further steps to be taken in this suit. He never appeared by solicitor in this suit from its inception in 1877, up to December, 1879 (months after the interlocutory decree), and only then did he permit a solicitor to appear when his *cestui que trust* defrayed the expenses; he neglected his trust, was a bankrupt, and a fugitive from the State.

See pages 1571-6 of Record.

And, on March 20, 1880, the alleged assignment from Eddy to Campbell, was executed, which, if it amounts to anything, is a sale by Eddy to Clexton's most bitter opponent.

It was certainly proper to make Clexton a party and to permit him to protect his purchase.

There can be no doubt but that the court had jurisdiction of this matter, for it is a question of *title* to the patent.

Whenever the court makes a decree against an infringer, it must necessarily pass on such question.

Nor is it material that the parties (Eddy and Clexton) are not on opposite sides of the pleadings.

When the court "has jurisdiction of the parties it grants "the appropriate relief without regard to whether they come "as plaintiff or defendant." WAITE, *Ch. J.*

Littlefield *vs.* Perry, 21 Wallace, 205.

Meyer *vs.* Delaware Co., S. C. U. S., October Term, 1879, Leg. News, Jan. 3, 1880.

Moreover, Campbell, Eddy, Clexton and Caswell, all insisted on the rights of Eddy, Clexton and Caswell being determined herein.

See Opinion of Court below, pages 1644-1652.

Nor is it any objection that Eddy, Clexton and Caswell have no *pleadings*.

" In these causes the pleadings cover all the grounds of claim " upon and defense by the defendant, as well as to that part " claimed by Eddy as in respect to that claimed by the plain- " tiff, and the evidence has been taken in respect to all the " issues made, and considered as bearing upon them.

" Under these circumstances at least, it seems proper that " the rights of Eddy and of those claiming under him as Trus- " tee to the fruits of the infringement of the defendent, should " be considered and determined. *All the parties except the de- " fendent James, have insisted upon this course*, and he has only " insisted that the proceedings should be such as to protect " him from further suits for the same cause.

" These proceedings, with these parties to them, appear to " be ample for that purpose."

See Opinion of Court, page 1650.

XVII.

In so far as the decree of the Circuit Court determines that Charles Eddy did not transfer all his individual interests in the Letters Patent involved in this suit, and all claims for damages for the infringement of said interests, and all claims for profits for the use of said Letters Patent to his general assignees, J. Albert Cipperly and Charles N. Stannard, by the general assignment of March 31, 1879; and in so far as said decree determines that said Cipperly and Stannard did not transfer said interests and claims to Samuel R. Clexton by deed dated January 7, 1880; and in so far as said decree determines that Christopher C. Campbell, individually or in trust, acquired any interest in said patent or in said claim from Charles Eddy by the alleged assignment of March 20, 1880, or in any other way, the said decree should be reversed.

New York, January, 1881.

Edward D. Bettens,
Of Counsel.

OFFICE SUPREME COURT U.S.
FILED
DEC 31 1880
JAMES H. McKENNEY, Clerk.

Supreme Court of the United States.

OCTOBER TERM, 1880.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN TRUST, *Appellant*, *versus* THOMAS L. JAMES, ET AL., *Respondents*.	No. 1101.	Reply.

APPEAL FROM UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF NEW YORK.

BRIEF FOR SAMUEL R. CLEXTON, HORACE T. CASWELL, AND CHARLES EDDY THEIR TRUSTEE.

Supreme Court of the United States.

CHRISTOPHER C. CAMPBELL, ASSIGNEE IN TRUST, *Appellant,* *versus* THOMAS L. JAMES, CHARLES EDDY, HORACE T. CASWELL, SAMUEL R. CLEXTON, AND CHARLES EDDY AS TRUSTEE FOR H. T. CASWELL AND S. R. CLEXTON, *Respondents.*	*No.* 1101.

Brief on behalf of Samuel R. Clexton, Horace T. Caswell, and Charles Eddy, their Trustee.

STATEMENT.

Samuel R. Clexton, one of the above named respondents, is the appellant in the appeal numbered 1098 on the calendar of this court.

The court's attention, on this, Campbell's appeal, is respectfully called to the statement of facts and the brief, filed by counsel for Clexton, on Clexton's appeal, number 1098. That statement shows the following to be the parties in this suit, and likewise on this, Campbell's, appeal:

(1.) Christopher C. Campbell, assignee in trust for Helen M. Ingalls.

(2.) Thomas L. James.
(3.) Charles Eddy.
(4.) Samuel R. Clexton.
(5.) Horace T. Caswell.
(6.) Charles Eddy, as Trustee, for Samuel R. Clexton, and Horace T. Caswell.

That statement likewise shows the following facts, to wit:

This suit was originally begun by Campbell against James.

James pleaded the non-joinder of Charles Eddy, as Trustee for Charles Eddy, Jacob Shavor, and Albert C. Corse.

Thereupon, on Campbell's motion, and on a stipulation dated June, 1878, and by an order filed September 13, 1878, Charles Eddy, as Trustee, for himself, Jacob Shavor, and Albert C. Corse, was made a defendant. The stipulation of June, 1878, between Campbell and Eddy, admitted that the rights of Charles Eddy, as Trustee, for himself, Jacob Shavor, and Albert C. Corse, in the subject matter of this suit, were "*fixed and determined*," either by a certain assignment of one-third of the Letters Patent involved in this suit, + a contract dated October 23, 1869, and executed by Marcus P. Norton to Charles Eddy, as Trustee, for Eddy, Shavor and Corse, or by a certain contract dated October 7, 1871, executed by Charles Eddy, Jacob Shavor, Albert C. Corse, and W. W. Secombe.

The complainant Campbell, in that stipulation expressly admitted that the assignment dated October 23, 1869, above mentioned, is a valid assignment not affected by any prior or cotemporaneous assignment by said Norton to Helen M. Ingalls, or other written agreement to which said Eddy is a party, except said contract of October 7, 1871.

See stipulation of June, 1878, and order of September 13, 1878, at pages 654–657, of record.

See also statement of appellant Clexton in appeal, number 1098.

Eddy, Shavor and Corse (and Caswell and Clexton, their assigns,) claimed that the contract of October 7, 1871, had been cancelled.

The issue between Campbell on the one hand, and Eddy, Shavor and Corse, (or Caswell and Clexton, their assigns,) on the other hand, was thus narrowed down to the effect of such contract of October 7, 1871, and to the question of its cancellation. A large amount of testimony was accordingly taken, an argument thereon had to the court, as to the rights of Campbell on the one hand, and Eddy, Shavor and Corse (Caswell and Clexton, their assigns,) on the other hand, and the court decided that Campell owned but two-thirds of the patent, aud two-thirds of the recovery, and that the other third of the patent and of the recovery belonged to Eddy, Caswell and Clexton.

For such testimony see pages 1577–1637 of Record.

For court's opinion see page 1644 of Record.

For final decree see 1664 of Record.

See also statement of appellant Clexton, appeal No. 1098.

The defendant, James, was not interested in, and took no part in the above contest between Campbell, Eddy, Caswell and Clexton, except in so far as it was of vital interest to James to know who owned the patent.

The determination of such ownership necessarily was a condition precedent to a decree that James respond in damages to the owners.

Eddy was made defendant as Trustee for himself, Jacob Shavor, and Albert C. Corse, and by his own admission his rights as such Trustee are "*fixed and determined*" by the assignment of October 23, 1869, executed by Marcus P. Norton to Eddy as such Trustee.

See Eddy stipulation June, 1878, page 655.

Eddy was faithless to his trust; became a bankrupt and a fugitive (pages 1571–4, of Record).

The suit was begun in 1877; Eddy, as Trustee, was made defendant September 13, 1878 (page 657, of Record); the interlocutory decree was filed September 1, 1879, decreeing Campbell the *exclusive* owner of the patent, subject to the right of Helen M. Ingalls and of Charles Eddy, *if any* (page 1458, of

Record), and up to December, 1879, Eddy had not appeared by solicitor or counsel to protect either his iddividual or his trust interests.

See affidavits, pages 1571–4 of Record.

On March 31, 1879, Eddy failed in business and made a general assignment to assignees for his creditors.

See general assignment, page 1632, of Record.

After that date Eddy's interest in this suit was that of a naked Trustee for Shavor and Corse (or their assigns, Caswell Clexton), and it was his duty as such Trustee to attend to Caswell's and Clexton's interests; it was likewise his duty to his creditors and his general assignees to throw no obstacle in the way of having what individual interests he had possessed prior to March 31, 1879, fully protected.

The *cestui que trust* Caswell in November, 1879, retained counsel, and at Caswell's request, such counsel was allowed to appear as solicitor for Eddy in the suit in December, 1879. That was the first appearance of Eddy by solicitor in the suit to protect the very valuable interests Eddy was in duty bound to guard (page 1574 of Record)

Eddy's general assignees sold Eddy's individual interests in the patent and in its infringements to Samuel R. Clexton on January 7, 1880 (see page 1635, of Record), and five days thereafter Eddy peremptorily forbade his solicitor to do anything more in the suit (see page 1571, of Record). At that date (Jan. 12, 1880), the one-third interest represented by Eddy as Trustee was in imminent peril from the attacks of Campbell; testimony as to the cancellation of the contract of October 7, 1871, was then in process of being taken; the Master's report had been made (Jan. 2, 1880, see page 1556 of Record), and the final hearing as to the rights of Campbell, and Eddy as Trustees for Shavor and Corse, and on the Master's report, was expected to be heard in a few weeks.

On affidavits stating the above facts the court, by order dated January 24, 1880, made Clexton and Caswell defendants for the purpose of protecting the interests which their Trustee and assignor so faithlessly neglected, and were made such parties, with the same rights and privileges as the said Eddy.

See those affidavits and order at pages 1571–6, of Record.

Eddy, from being simply faithless in his trust, thereafter became bitterly hostile to Caswell and Clexton his *cestuis que trust*, as is evidenced by an alleged sale by Eddy of all his interest in the patent and infringements to Campbell, the bitter and implacable opponent of the "one-third" interest. Such alleged sale is by an alleged deed dated March 20, 1880, which was filed in this suit on August 18, 1880, pursuant to an order which *expressly* provided that such order and alleged deed should not prejudice the rights of Caswell, Clexton, and Eddy, their Trustee.

See order, page 1656, of Record.

On March 11, 1880, the court permitted Eddy, as Trustee, to appear by the same solicitor who represented Caswell and Eddy, his *cestuis que trust*, and permitted Eddy, as far as he had individual interests, to appear by a different solicitor.

See page 1643 of Record.

Eddy having proved himself utterly faithless to the "one-third" interest which he was in duty bound to protect, the court admitted Caswell and Clexton as defendants, and in its opinion and in the final decree recognized Caswell and Clexton as the substantial owners of the whole one-third interest and of the $21,000 allotted to the owners of the one-third; it gave $13,125 to Clexton, and $7,000 to Caswell, and $875 to Campbell, as assignee of Eddy under the alleged assignment of March 20, 1880, Eddy to Campbell, above mentioned.

See opinion, page 1614, of Record.
Final Decree, 1664, of Record.

On this appeal it will be convenient to consider in the following order:

First.—The rights of Eddy, Caswell and Clexton, as between themselves.

Second.—The rights of Christopher C. Campbell, the alleged assignee of Charles Eddy, under alleged assignment dated March 20, 1880.

Third.—The rights of Campbell on the one hand, as opposed to the rights of Eddy, Caswell and Clexton on the other hand. Under this head comes the stipulation of June, 1878, and the general question whether Eddy, as Trustee, for himself, Shavor and Corse had any interest in the subject matter of this suit.

FIRST.

The Rights of Eddy, Caswell and Clexton as Between Themselves.

I.

The rights and interests of Eddy, as Trustee, for himself, Jacob Shavor and Albert C. Corse are "*fixed and determined*" by *Eddy himself* by the assignment of October 23, 1869, executed by Norton to Eddy as such Trustee of a one-third interest in this patent and its infringements.

See stipulation, June, 1878, page 655 of Record.
Assignment, October 23, 1869, pages 1147 of Record.

That stipulation was acknowledged by Eddy on September 11, 1878, and filed September 13, 1878.

See page 656–7 of Record.

So far as Eddy is concerned he is bound by that stipulation, and his rights individually and as Trustee, on September 13, 1878, are to be sought for in the assignment of October 23, 1869, and *nowhere else.*

That stipulation relieves the court from all consideration of an alleged assignment, filed June 29, 1878, and marked "Complainant's Exhibit Shavor, Corse and Eddy—J. A. S., Exr., 2, *June* 29, 1878," purporting to be an assignment dated December 18, 1876, from Shavor and Corse to Eddy, in trust, with power to settle with infringers.

See page 577 of Record.

This alleged assignment of Dec. 18, 1876, assigns *nothing*. It assigns to Eddy, IN TRUST, "all the right, title and interest of "every name and description which we (Shavor and Corse) now "have in, to or for the said Letters Patent, and the inventions "and improvements, * * * intending herein and hereby to "sell, assign and transfer unto him, Charles Eddy, IN TRUST, all "our right, title and interest and ownership in any or all of the "said several Letters Patent."

Such words pass only title to patents.

See Moore *vs.* Marsh, 7 Wallace, 515.

Eddy, under assignment of October 23, 1869, already held the patent *in trust;* therefore the assignment of the title to him in trust on December 18, 1876, assigned nothing to Eddy but what he already had. Eddy admitted this by his stipulation of June, 1878, when he stipulated that his rights and interests as Trustee were *fixed and determined* by the assignment of October 23, 1869, and not by the one of December 18, 1876.

As to the alleged power to settle with infringers contained in the alleged assignment of December 18, 1876, it was revocable at the will of Shavor and Corse.

Eddy, by his stipulation of June, 1876, *admits that such power no longer (if it ever) existed.*

II.

We start then with an assignment of one-third of the patent by Norton to Eddy, in trust for himself, Jacob Shavor and Albert C. Corse, dated October 23, 1869.

See page 1147 of Record.

First.—As to Shavor's interest.

Shaver died.

See page 728 of Record.

Shavor's executors assigned the Shavor interest to Samuel R. Clexton.

See order of court and assignment, pages 1638-9 of Record.

Second.—As to Corse's interest.

Corse's interest became vested in Horace T. Casswell.

See order of court and assignments, pages 1640–1642; also 1628–9 of Record.

Third.—As to Eddy's interest.

Eddy failed March 31, 1879, and made a general assignment to J. Albert Cipperly and Charles N. Stannard of all "his individual estate and property, real and personal, goods, chattels, effects, credits, accounts, debts, dues demands, choses in action and property of every name and kind whatever, * * * except such property, if any, as is exempt by law from levy and sale under execution."

See page 1632 of Record.

On January 7, 1880, Cipperly and Stannard transferred Eddy's interest in the patent and its infringements to Samuel R. Clexton for $2,500.

See pages 1635–6 of Record.

Both these assignments were received in evidence on February 4, 1880, without any objections from Eddy or James.

See pages 1614, 1616, 1617 of Record.

The Circuit Court decided that Eddy's individual interest in the patent did not pass to Cipperly and Stannard, and from them to Clexton, because such patent rights were excepted from the operation of his general assignment by the words, "Except such property, if any, as is exempt by law from levy and sale under execution;" but that claims for the infringement of Eddy's patent that had accrued prior to March 31, 1879, did pass to Cipperly and Stannard and then to Clexton, because claims for such infringements are "choses in action," and choses in action are specially named in the general ~~arrangement~~ assignment.

See Opinion, page 1644 of Record.

These assignments, therefore, by the decision of the Circuit Court, gave to Caswell the beneficial interest in one-ninth of the patent, and entitled him to $7,000 of the recovery; and to Clexton a beneficial interest in one-ninth of the patent, and

entitled him to $13,125 of the recovery; and to Eddy an individual interest in one-ninth of the patent, and entitled him to $875 of the recovery.

So far as Campbell's appeal is concerned, Clexton and Caswell, and Eddy, as their Trustee, and James are deemed to be satisfied with the above decision of the Circuit Court. If it were not that Campbell claimed to be assignee of Eddy, by an alleged deed of March 20, 1880, Eddy would be deemed to be satisfied with that decree. And as such decision is no concern of Campbell (except as such alleged assignee of Eddy by alleged deed of March 20, 1880), Campbell would not be permitted to raise any objections to it, and such decision would be a final adjudication of the rights of Eddy, Caswell and Clexton. But because Campbell claims to be Eddy's assignee, and to have the right to raise here, on this appeal, any point that Eddy could raise had he appealed from this decision, it may be necessary for Caswell and Clexton to consider that this appeal is taken by Eddy from the above decision.

The rights of Eddy and Clexton as between themselves will first be discussed.

III.

No objections to the decision of the Circuit Court as to the rights of Eddy and Clexton, as between themselves, can be raised here but what Eddy could raise had he appealed.

Eddy did not object in the Circuit Court to the admission in evidence of the general assignment, and the assignment of Cipperly and Stannard to Clexton.

See page 1616 of Record.

Therefore no objection can be taken here.

Rule Supreme Court, No. 13.

Eddy did not, and could not, object to the admission in evidence of his assignment to Cipperly and Stannard, on the

ground that it did not show that it had been recorded. ~~As matter of fact it was recorded on March 11, 1880.~~

Therefore, that objection cannot be raised here by Campbell as Eddy's assignee.

IV.

It may be said that Eddy's general assignment does not comply with the statutes regulating the transfer of patent rights.

As to this see Point XIV., made by Samuel R. Clexton in his appeal, No. 1098.

Eddy's general asssignment is in writing, *signed* by Eddy.

V.

The failure to record the general assignment within three months is of no importance as against Eddy, and Campbell as his assignee.

See Point XV. Clexton's appeal, No. 1098.

Nor is it necessary to record an assignment of infringements.

Gear *vs.* Fitch, 16 Official Gazette, 1231.

VI.

The general assignment contains apt words for conveyance of all claims for infringements. It conveys all " his individual "estate and property, real and personal, goods, chattels,

"effects, credits, accounts, debts, dues, demands, choses in "action, and property of every name and kind whatsoever."
See page 1632 of Record.

Such words carry patent rights.
Railroad Co. *vs.* Trimble, 10 Wall, 367.

They are sufficient to carry torts under the laws of New York.
McKee *vs.* Judd, 12 N. Y., 622.
Sherman *vs.* Elder, 24 N. Y., 381.
Richtmeyer *vs.* Remsen, 38 N. Y., 206.

VII.

All the infringements of Eddy's individual interest in the patent that had accrued up to March 31, 1879, passed to his general assignees by that general assignment, and from those assignees to Clexton by assignment of January 7, 1880 (see page 1635 of Record). Infringements are *torts*.

It is settled that such torts are in no way inherent to or connected with the patent. An assignment of the patent alone, does not carry the torts.

An assignment of "all right, title and interest in the patent" conveys the patent, but not the torts.
Moore *vs.* Marsh, 7 Wallace, 515.

So an assignment of "all right, title, interest, claim or de-"mand whatsoever, in, to, or under" a patent, conveys the patent, but not the torts.
Dibble *vs.* Augur, 7 Blatch., 86.

It is equally well settled that an action can be brought to recover damages for such torts, even though the complainant has parted with the patent.
Moore *vs.* Marsh, 7 Wall., 515.

Furthermore, both under the laws of the United States and

of New York, torts affecting personal property (but not those affecting the person) are assignable and transferable.

"In general, it may be affirmed that mere personal torts, "which die with the party and do not survive to his personal "representative, are not capable of passing by assignment; "and that vested rights *ad rem* and *in re*, possibilities coupled "with an interest and claims growing out of and adhering to "property, may pass by assignment."—STORY, *J.*

Comegys *vs.* Vass, 1 Peters R., 194, 213.

"The law may be considered as settled, that a claim to "damage arising from the wrongful conversion of personal "property is a chose in action that is assignable."

McKee *vs.* Judd, 12 N. Y., 622.
Sherman *vs.* Elder, 24 N. Y., 381.
Richtmeyer *vs.* Remsen, 38 N. Y., 206.

The law is equally well established that infringement torts are also assignable.

"A cause of action in tort is not assignable; this rule, how-"ever, has reference to *strictly personal torts*, which do not sur-"vive the party injured; but right of action for damages and "claims growing out of, and adhering to property, will pass "by assignment," and the court accordingly held that complainant could recover for infringements.

Hamilton *vs.* Rollins, 4 Law and Equity Reporter, 561; decided by U. S. Circuit Court, Minnesota, September, 1877.

The assignments "were, therefore, assignments of a right of "action only—mere conveyances of the right to maintain "those several suits or other similar actions—mere choses in "action, in that narrow sense, after the patent itself had ex-"pired."

Complainants' bill was sustained.

Gear *vs.* Fitch, 16 Patent Office Gazette, 1231; decided October 7, 1878, by Judge LOWELL.

"I think that the purport and effect of the two papers of "the 8th of May, 1868, were, to vest in Dibble, as Trustee for "the three companies, all Robertson's interest in the patent;

"and to vest in Dibble, as Trustee for Robertson, all interest "in all claims for part infringement of the patent."—BLATCHFORD, *J.*

Dibble *vs.* Augur, 7 Blatch., 86-90.

VIII.

The appellant confounds the *assignability* of infringements with the *statutory* requirements as to the persons in whose *names damages* for such infringements are to be sued for *at law.*

For such statutory requirement see § 4919, U. S. R. S.

Moore *vs.* Marsh, 7 Wallace, 515.

It may well be that the court, because of some arbitrary rule, or for some other reason, will not permit a person to sue in his own name, but will yet grant such person full redress if suit be brought by him in the name of another.

Thus, a licensee cannot sue infringers in *his own name.* But he is not without redress. He can sue in the name of his licenser, even against the will of such licenser.

Goodyear *vs.* McBurney, 3 Blatch., 32.

So *at law*, formerly, choses in action could not be sued on in the name of the assignee. Such assignee, *at law*, was compelled to sue in name of his assignor. In equity he sued in his own name.

The mere fact that the statute does not permit the assignee of an infringement tort to sue *at law*, for damages, in his own name, simply puts such assignee, *at law*, on the same footing with a licensee.

The licensee must sue in the name of the licenser; and the assignee must sue in the name of the assignor.

The patent involved in this suit expired on April 14, 1880. The only value of the patent to its owners is in infringements of the patent, and the damages and profits to be received on account of such infringements. The owners have the right for six years, from April, 1880, to recover such damages and profits

Such owners can never more assign to anyone any interest in the patent, because the patent *no longer exists.*

If it be true that such owners cannot assign the infringement to anyone, but one who also receives or holds an interest in the patent, all this vast property is irrevocably tied up in the hands of the present owners, and neither they nor the law can transfer it to anybody. Only by the owners' death can they be divested of this property, and it is very doubtful whether their personal representative would succeed to their rights.

Such a conclusion demonstrates the absurdity of this theory —for it is but a theory.

Infringements, though torts, are property, and very valuable property, and like all other torts they are assignable, and the assignee is in law, as well as in equity, the owner of such torts.

Dibble *vs.* Augur, 7 Blatch, 86.

The statute merely regulates the mode of collecting the same *at law*, which is to be in the name of his assignee.

IX.

The owner of infringements has an action on the case at law to recover damages for these infringements.

§ 4919, U. S. R. S.

He has another remedy, in equity, to recover the *profits* accruing to the owner from the use by the infringer of the patented improvements.

The statute regulates the mode in which an action *on the case* is to be brought, and specifies the persons who can bring such an action, *at law.*

§ 4919, U. S. R. S.

But the statute says nothing about the parties to an *equity suit*, and does not prescribe the persons who are to bring suits for an accounting of profits.

An assignee of profits due the assignor on account of the past use of the patented improvement is not prevented by any statute regulations from suing in equity, even in his own name, for an accounting of profits.

The owners of the Norton patent have not proved any *damages* in this suit, and they never can from the nature of their patent. All they can ever get is profits. It is all they have got in this suit.

See opinion of court, page 1653 of Record.

All the assignments under which Clexton claims convey these profits.

See pages 1632–5 of Record for Clexton.

Therefore, as an assignee of these profits, Clexton is entitled to all the profits due from James to Eddy prior to March 31, 1879.

X.

Courts of equity, besides *profits*, can also give *damages*. No statute points out what person is to bring such suit for damages in equity, or prevents an assignee of infringements suing in his own name for such damages in equity.

The case of Dibble *vs.* Augur, 7 Blatch., 86, is an authority that the assignee of the claims should sue in his own name. In that case, the patentee conveyed the infringements to Dibble, as Trustee for the patentee; he likewise conveyed the patent to Dibble, as Trustee for certain corporations. Dibble as Trustee of infringements for patentee, and Dibble as Trustee of the patent for corporations are two distinct legal personages.

Judge BLATCHFORD held that Dibble, as Trustee for the patentee, had the legal title to the claims, and was the proper party to bring suit for such claims.

"I think that the purport and effect of the two papers of

" the 8th of May, 1868, were, to vest in Dibble, as Trustee for
" the three corporations, all Robertson's (the patentee) interest
" *in the patent;* and to vest in Dibble, as Trustee for Robert-
" son, all interest in all claims for *past infringements* of the
" patent against others than the three companies. * * *
" When the bill in this case was filed, it ought properly (so
" far as above past infringements are concerned) to have been
" filed in the name of Dibble, as Trustee for Robertson, join-
" ing Robertson as the *owner* of the equitable interest."
—BLATCHFORD, J.

Dibble *vs.* Augur, 7 Blatch., 86, 90–91.

XI.

The appellant Campbell admits that past infringements are assignable to one who takes title in the patent. This is a necessary admission on his part, otherwise he could not recover in this suit, as he does, infringements that accrued whilst Miss Ingalls owned the two-thirds of the patent before her assignment to Campbell in January, 1877.

It is difficult to see how Campbell gains any more rights in the infringements assigned to him by Miss Ingalls, than Clexton does in those assigned by Eddy to Cipperly and Stannard and by Cipperly and Stannard assigned to Clexton.

Campbell can have no better standing in court, so far as the Ingalls infringements are concerned, than Clexton has in the Eddy infringement.

The spirit of the statute (§ 4919) would seem to require that the person *interested as assignee in the patent at the time of the infringement, was the only person in whose name an action at law could be brought for damages.*

Such, indeed, is the [construction given this section by this court.

" True meaning of the word interested, as employed in the
" last clause of the fourteenth section of the Patent Act, when
" understood and applied, is, that the right of action is given

" to the person or persons owning the exclusive right *at the* " *time the infringement is committed.*"

Moore *vs.* Marsh, 7 Wall., 515, at p. 520.

Miss Ingalls, under this decision, is the person interested in the infringements prior to Campbell's purchase from her in January, 1877.

If there is any logic in Campbell's argument against Clexton's claim to own the infringements which accrued to Eddy prior to March 31, 1879, it necessarily follows that Campbell did not get from Ingalls any past infringements whatever, and that his recovery against James is too large by the amount of the profits that accrued prior to January, 1877.

XII.

Appellant Campbell relies on Bell *v.* McCullough, 1 Fisher's Pat. Cases, 380, and Gordon *v.* Anthony, 16 Official Gazette, 1135.

Bell *v.* McCullough.

Action *at law* for damages. Patent had expired.

Defense: " Since the expiration of the patent, the patentee " had assigned the same to one Christian Shunk, for whose " benefit the present suit was brought."

Judge LEAVITT charged the jury that this was no defense. Charge was not only correct, but it would have been a total miscarriage of justice to turn the plaintiff out of court on this defense.

The only possible way by which Shunk (the assignee of Bell) could ever collect these infringements *at law*, was in the name of Bell. In this way alone could § 4919 (or § 14, Act of July 4, 1836) of R. S. be satisfied, and Shunk get his rights.

So far from deciding that Shunk got nothing from Bell by the assignment, Judge LEAVITT added that it (the assignment) " may be good as a power of attorney authorizing the " assignee to collect for infringements."

On the facts (meagre as they are) Judge LEAVITT was right. Bell assigned to Shunk the patent *after* the expiration of patent.

Clearly Shunk got nothing by such an assignment, and the charge is correct from that point of view.

Gordon *v.* Anthony.

Facts of case:

Bill in equity for damages for infringement.

Patent issued October 19, 1858, and expired 1872.

Bill filed 1873 seeking damages for infringement since January 1, 1864.

In 1867 a Receiver was appointed "of all and singular the "debts, property, equitable interests, rights and things in "action of Ebenezer Gordon," the complainant. But Gordon *never executed and signed* any assignment of his patent rights to the Receiver.

On August 21, 1874, the Receiver executed an assignment to Anthony of "all the said Ebenezer Gordon's right, title "and interest in and to all and any claims under the said in-"vention, patent, letters patent, and patent rights."

Anthony thereupon made a motion for leave to file a supplemental answer, setting up the sale of August 21, 1874.

Judge BLATCHFORD denied the motion, and the decision seems correct.

The Receiver got no title to the Letters Patent in 1868, because Gordon never *signed* an assignment.

In support of the doctrine that the owner must *sign* the assignment, Judge BLATCHFORD cited

Stephen *v.* Cady, 14 How., 528.
Stevens *v.* Gladding, 17 How., 447.
Ashcroft *v.* Walworth, 1 Holmes, 152.

Assuming that the infringements from 1864 to 1866 vested in the Receiver, the latter did not transfer such infringements to Anthony by his assignment of August 21, 1874.

Such assignment conveyed "all the said Ebenezer Gordon's "right, title and interest in and under the said inventions, "patent, letters patent, and patent right."

These words would have conveyed the patent if the Receiver had had it (but he did not own the patent). They did not

carry claims for its infringement. In support of this Judge BLATCHFORD cited

Moore *v.* Marsh, 7 Wall, 515.
Dibble *v.* Augur, 7 Blatch., 86.

Much more comprehensive words were used in Dibble *v.* Augur without carrying the infringements. Judge BLATCHFORD did not decide that infringements could not be assigned to one not interested in the patent.

The citation of the case of Dibble *v.* Augur, also decided by Judge BLATCHFORD, proves the contrary.

For, in Dibble *v.* Augur, Judge BLATCHFORD held that Dibble, as Trustee for corporations, owned the patent, whilst Dibble, as Trustee for the patentee (quite a different Dibble, legally), held, as assignee from the patentee, the infringements.

XIII.

Clexton, as assignee of the Eddy individual interests, is clearly entitled to recover for claims for infringements prior to March 31, 1879, the sum of $6,125.

We next consider Clexton as the assignee of the Shavor interest and Caswell as the assignee of the Corse interest.

The assignments which vested these interests in Clexton and Caswell were recorded in Patent Office, and were filed by orders of court.

See pages 1638–9 of Record for Clexton's title to the Shavor interest.
See pages 1640–2; 1641 of Record for Caswell's title to the Corse interests.

The Shavor-Corse interests rest on the assignment & contract of October 23, 1869, executed by Norton to Eddy in trust for Eddy, Shavor and Corse.

By that assignment Eddy, as such Trustee, obtained an undivided one-third of this patent.

See Assignment, page 1147 of Record.

Eddy, on September 13, 1878, caused his stipulation of June, 1878, to be filed in court, wherein he stipulated that his rights and interests, individually and as such Trustee, are *fixed and determined* by the above assignment of October 23, 1869.

See Stipulation, page 654 of Record.

Eddy (and Campbell, as his assignee, who likewise executed the same stipulation) is bound by that stipulation. His rights and interests, individually and as Trustee, are to be found are "fixed and determined"—in that particular assignment of October 23, 1869, and nowhere else. It seems to be an imposition on the court for Eddy or Campbell, as his assignee, to say now that another paper filed June 29, 1878 (prior to the filing of the stipulation of June, 1878), totally changes Eddy's relations to Shavor and Corse, and, therefore, to Clexton and Caswell), and makes Eddy out a different sort of a Trustee from what he was under the assignment of October 23, 1869, or makes him out no Trustee at all, but the absolute owner of the one-third interest, free of all trusts.

Yet, Campbell, on this appeal, has the boldness to claim that an alleged assignment of Shavor and Corse to Eddy, in trust, dated December 18, 1876, filed June 29, 1878, has completely altered Eddy's relation to Shavor and Corse (and, therefore, to Clexton and Caswell).

See that alleged Assignment, page 577 of Record.

Eddy's stipulation of June, 1878, is an unanswerable reply to this claim; for that stipulation puts Eddy's rights and interests individually and as Trustee, as *fixed and determined* by the assignment of October 23, 1869, and not by that of December 18, 1876.

The alleged assignment of December 18, 1876, as an assignment, is a nullity. Eddy, as Trustee, already held the complete title to the one-third of the patent. The alleged assignment of December 18, 1876, purports to convey to Eddy, as Trustee, Shavor's and Corse's interests in the patent, and nothing more.

It assigns to Eddy, *in trust*, "all the right, title, and interest " of every name and description, which we (Shavor and Corse)

"now have, in, to, or for the said Letters Patent and the "inventions and improvements * * intending herein and "hereby to sell, assign, and transfer unto him, the said "Charles Eddy, *in trust*, all our right, title and interest and "ownership in any and all of the said several Letters "Patent."

See page 576 of Record.

That is an attempt to assign, in trust, to Eddy their rights in the patent; as Eddy already held, as Trustee, such rights, it is clear that nothing passed to Eddy by this alleged assignment.

It is true that Shavor and Corse purport to give to Eddy the power of settling with infringers, and *with infringers only*.

But such a power is revocable at the will of the givers. And it is to be presumed that this power was revoked by Shavor and Corse, or else Eddy would not have filed the above stipulation of June, 1878, "*fixing and determining* his rights, *individually* and as Trustee, by the assignment of October 23, 1869.

To be on the safe side, Caswell and Clexton long before March 20, 1880, divested Eddy of such alleged power to settle with infringers. This is not in the record, but it is here stated to show how dangerous might be the consequences of putting aside Eddy's stipulation of June, 1878, wherein he *expressly and unqualifiedly limits all his rights in the suit individually and as Trustee to the assignment of October* 23, 1869, and thus repudiates any other powers or rights which Campbell now claims belong to Eddy through the alleged assignment of December 18, 1876.

First.—As to Caswell.

The assignment of October 23, 1869, vested one-third of the title in Eddy, Shavor and Corse.

Eddy was in no proper sense a Trustee, and in a court of equity each of the parties to that instrument will be considered as invested with a one-ninth interest in the title; for where a deed is made to three persons, the presumption of law is that each takes an undivided third, in the absence of proof that the respective interests are otherwise.

On March 27, 1879, Corse assigned all his interest (one-ninth) to Caroline G. Caswell.

See page 1628 of Record.

On January 16, 1880, Caroline G. Caswell assigned this interest to Herbert M. Caswell.

See page 1640 of Record.

On the same day Herbert M. Caswell assigned this interest to Horace T. Caswell, the respondent on this appeal.

See page 1641 of record.

To quiet any possible differences between Samuel R. Clexton and Horace T. Caswell as to this one-ninth interest, the following further assignments affecting the "Corse" interests were made.

On March 1, 1880, Albert C. Corse made an assignment of his interests to Samuel R. Clexton.

See page 1641 of Record.

On March 9, 1880, Clexton assigned to Caswell the "Corse" interest.

See pages 1641-2 of Record.

All of the above assignments were duly recorded and filed.

See Order of Court, page 1641 of Record.

The above assignments vested in Caswell the one-ninth of the patents and one-ninth of all profits and damages for its past use and one-ninth of the recovery, to wit, $7,000.

Second.—As to Clexton's beneficial title.

Shavor, under the same assignment October 23, 1869, owned one-ninth of the patent.

Shavor died in 1878.

See page 728 of Record, Corse's Testimony.

Shavor's personal representatives conveyed the "Shavor" interest to Clexton, March 3, 1880. This assignment is recorded, and was filed by order of court.

See pages 1638-9 of Record.

This assignment vested in Clexton one-ninth of the patent and one-ninth of the profits and damages for its past use, and one-ninth of the recovery, to wit, $7,000.

As we have seen above, Eddy owned individually, under the said assignment of October 23, 1869, one-ninth of the patent. All profits and damages for the infringement of that one-ninth which had accrued to Eddy up to March 31, 1879, were assigned by Eddy to Cipperly and Stannard by Eddy's general assignment of March 31, 1879, and were thereafter assigned by Cipperly and Stannard to Samuel R. Clexton, by assignment of January 7, 1880.

Both these assignments are in evidence.

See pages 1632–6 of Record.

Through these two assignments Clexton is entitled to $6,125, in addition to the $7,000 due him on the Shavor interest, *i. e.*, Clexton is entitled altogether to $13,125 of the recovery, and Caswell to $7,000.

XIV.

Both Caswell and Clexton were not only *proper*, but also *necessary* parties to this suit.

Eddy was but their *nominal* Trustee under the assignment of October 23, 1869, above mentioned (and Eddy's stipulation of June, 1878, by which he became a party to this suit, "*fixes and determines*" all of his rights and interests individually and as Trustee by that assignment).

Where the Trustee is merely nominal, the *cestui que trust must* be made a party.

Malin *v.* Malin, 2 John. Ch. R., 238, and at p. 239.

A *cestui que trust must*, in all cases, be made a party.

Kirk *v.* Clark *et al.*, Precedents in Chancery, p. 275.

"It is, therefore, the ordinary case of a Trustee prosecuting "a claim for the benefit of the *cestui que trust*, in which the "latter should be made a party."

Fish *v.* Howland, 1 Paige, at pp. 23–24.
Perry on Trusts, § § 873–4.

In this suit Caswell and Clexton were imperatively needed as parties.

Eddy was a bankrupt, a fugitive from the State, and hostile to his *cestuis que trust*. He shamefully neglected his duties, and wantonly obstructed Caswell and Clexton in their attempts to guard their valuable interests involved in this suit, refused to permit his name to be used, or anything to be done, at the most critical stage of the litigation in which the "one-third" interest was especially at stake. Within six weeks after the court made Caswell and Clexton parties, and it was clear that the one-third interest would be attended to, even against Eddy's will, Eddy is said to have made a complete transfer of all his interest to Campbell.

See Caswell and Clexton's motion papers to be made parties, at pages 1569–1573 of Record.
See order of court admitting them as parties, page 1576 of Record.
See alleged deed, Eddy to Campbell, page 1658. of Record.

Eddy would have sacrificed not only his trust interest, but the individual interests that he owned prior to March 31, 1879, but for the court permitting Caswell and Clexton, the purchasers of such beneficial and individual interests, to come in, show their interests and defend.

The Circuit Court fully recognized Eddy's faithless and hostile conduct, and permitted the solicitor for Caswell and Clexton to continue as solicitor for Eddy as Trustee, and denied the motion of Eddy as Trustee for a substitution. The order denying this motion was made March 11, 1880.

See page 1643 of Record.

The date of the alleged deed from Eddy to Campbell, is March 20, 1880 (see page 1658 of Record). *Eddy was clearly in collusion with Campbell.*

We may, therefore, fairly charge, in the language of the United States Supreme Court, that Eddy had proved "faithless to his trust," and here, as there, the *cestuis que trust* were treated as the real parties.

Littlefield *vs.* Perry, 21 Wall., at p. 223.

" When a Trustee comes into equity claiming its protection
" for his legal title, as against the *cestuis que trust*, it is com-
" petent for the court to declare that title subject to the trust,
" and to restrain the Trustee from asserting any further claim
" in violation of this trust."

Blake *vs.* R. R. Co., 56 N. Y., p. 493.

Clexton's right to protect the choses in action he bought from Cipperly and Stannard is equally clear.

A licensee can bring a suit and use his licenser's name in an action at law, even against the will of such licenser.

See Goodyear *vs.* McBurney, 3 Blatch., 32.

In equity, the licensee can sue, joining the licenser with him.

Here, Clexton's appearance in this suit in which Eddy, his assignor, already was a party, was *proper*, and because of Eddy's evident purpose not to protect the interests assigned to Clexton, such appearance was *necessary*.

SECOND.

As to the rights, if any, of Christopher C. Campbell under the alleged assignment of March 20, 1880, *purporting to be executed by Eddy to Campbell.*

See page 1658 of Record for such instrument.

I.

The court filed this instrument on August 18, 1880, on the condition that it should be "*without prejudice to the rights of* "*any parties in interest, except those who have signed the agreement* "*of March* 20, 1880, *and the assignment from Eddy to Wooster.*"

See Order of Court, page 1657.

The order, therefore, specially limits the parties who are to be affected by it, and thereby excludes any attempt to show that the interests of Clexton, Caswell and Eddy, as their Trustee (they not being among the parties mentioned in the order), are in any way affected by such order.

The final decree shows this still more strongly. It permits Campbell to have the $875 which belonged to Eddy, but it decrees Eddy *individually*, and, as Trustee, to be the owner of the one-third of the patent.

See Final Decree, page 1664 of Record.

It was not intended that Eddy's one-ninth interest in the patent should vest in Campbell, as Clexton is vitally interested in that one-ninth.

See Clexton's Appeal, No. 1098.

The decree accordingly ignores Campbell's claim of ownership. It was purely discretionary with the court whether to make the order of August 18, 1880, or not.

It was in its discretion to make such order on terms, and it did so. The terms were, in effect, that such alleged assignment of March 20, 1880, should not be construed as a transfer of any title from Eddy to Campbell, or of any of Eddy's interest to Campbell, except Eddy's part of the money recovery, to wit, $875.

The final decree, as above seen, was entered accordingly.

II.

Therefore Campbell cannot claim in this court, as against Clexton, Caswell, and Eddy, as their Trustee, that Eddy transferred any of the legal title to the patent to Campbell.

So far as Eddy had individual interests in that title and damages for its past use, Clexton was interested therein.

So far as Eddy, as Trustee, had such interests, both Caswell and Clexton were interested therein.

III.

Transfers *pendente lite* do not affect such litigation.

In the Circuit Court there was an action pending between Eddy, Clexton and Caswell.

The instrument of March 20, 1880, being made, if at all, pending such litigation, cannot, on well settled principles, affect such litigation.

The final decree recognizes that principle.

IV.

The instrument of March 20, 1880, is, and purports to be, the instrument of Eddy individually. It nowhere conveys a one-third interest in the patent, or one-third of the damages for its use. It conveys Eddy's *own interest*, if anything.

See Instrument, page 1658–9 of Record.

Eddy, *individually*, under the opinion of the court (see page 1651 of Record), owned one-ninth of the patent, and all damages for its use subsequent to March 31, 1879, and $875 of the recovery.

He had other interests *as Trustee* for Caswell and Clexton, to wit, two-ninths of the patent, and two-ninths of claim for its past use, and also had interests as assignor for Clexton of all choses in action for the use of his (Eddy's) individual one-ninth that had accrued prior to March 31, 1879.

It will not be presumed that a deed purporting to assign simply Eddy's interest (he having such), in fact carries also

such interest as Eddy may have *as Trustee*, or *as assignor for his assignee.*

Courts do not presume fraud.

The presumption is the other way, *i. e.*, that Eddy intended to convey, and did convey, his *individual* interest only, if anything.

Therefore, the interests of Caswell and Clexton as *cestuis que trust*, and of Clexton as assignee of choses in action, accruing to Eddy prior to March 31, 1879, are in no way affected by the instrument of March 20, 1880, as Eddy's alleged deed neither purports to, nor does in fact, convey them.

V.

Campbell had actual notice of the interests of Shavor and Corse, for Campbell and Eddy both executed the stipulation of June, 1878, wherein Eddy *fixed and determined* his rights individually and as Trustee, by the assignment of October 23, 1869, and in the same stipulation Campbell admitted such to be the case, unless the contract of October 7, 1871 (specified in stipulation) affected such assignment.

See Stipulation of June, 1878, page 654 of Record.

The evidence as to the cancellation of the contract of October 7, 1871, was taken in February, 1880, and argument had thereon March 11, 1880.

See pages 1579-1634 of Record.

Eddy's general assignment to Cipperly and Stannard, and the assignment of Cipperly and Stannard were filed in court in February, 1880, in presence of Campbell's counsel. The assignment to Clexton was recorded January 16, 1880.

See page 1616 of Record.

See page 1635-6 of Record.

The Shavor deed to Clexton was recorded in Patent Office on March 5, 1880, and filed by order of court, on March 11, 1880.

See pages 1638-9 of Record.

All the assignments vesting the Corse interest in Caswell, were recorded in the Patent Office, and filed in court by order of court, on or before March 11, 1880.

See pages 1640–2, 1628.

Eddy's alleged deed to Campbell is dated March 20, 1880.

Campbell had therefore both actual and constructive notice of the rights of Clexton and Caswell, and if he took anything from Eddy by the March 20, 1880, instrument, he took it subject to the equities existing between Eddy and Caswell and Clexton. It follows necessarily that Clexton's and Caswell's right to recover $13,125, and $7,000, respectively, is in no way affected by the instrument of March 20, 1880.

VI.

Campbell claims that the alleged Shavor and Corse assignment to Eddy in trust, dated December 18, 1876 (see page 576, of Record), in some way or other permits Eddy to sell the one-third interest to Campbell, free of any trust on part of Campbell. This alleged assignment December 18, 1876, is discussed under the First subdivision of this Brief. Point XIII.

It is enough to say here—

First.—That the stipulation of Eddy, of June, 1878 (signed by Campbell also), has formally, for all the purposes of this suit, *fixed and determined Eddy's rights and interest, individually and as Trustee*, in the *assignment of October* 23, 1869, and not in the alleged one of December 18, 1876.

The stipulation, of June, 1878, was acknowledged September 11, 1878, and filed in court Sept. 13, 1878, with full knowledge that the alleged assignment of December 18, 1876, was then on file—having been filed June 29, 1878.

See for Stipulation page 654 and 656 of Record; for December 18, 1876, instrument, see page 576 of Record.

Second.—The alleged assignment of December 18, 1876, recites that the purpose of making it is for the *sole* purpose of giving one person power to settle with *infringers*. It then purports to vest Eddy in trust "with full power to enforce "*settlement and payment* for the past or future use of said "patent, and hereupon and hereby the said Charles Eddy is "vested with full and absolute power over, and control of any "and all settlements, and to settle and receipt for, and to sign "any and all necessary papers concerning either the past or "future use of the said inventions and patents, or either one "or more thereof, in *settlement and payment* for such use by "and with person or persons, corporations, government or any "body whomsoever."

See page 576 of Record.

This is a bare power of attorney for the *sole* purpose of making settlements and payments with *infringers*. A power to sign papers in *settlement and payment*, means with *infringers*. Indeed, the express recital is that such is the SOLE power given to Eddy.

Such a power cannot authorize Eddy to *give* the infringements and patent away; nor to settle with a *stranger* other than an *infringer*.

A power to enforce collection and settlement and *payment* of a debt is no authority to sell the debt to one not the debtor. Such a sale does not *extinguish* the debt, and the attorney has not effected a settlement *and payment* of the debt.

So the use of the patented improvements has not been settled and *paid* for by Eddy's alleged *sale* to Campbell. If such a sale is payment for such use, James must be entitled to a reduction of one-third on the recovery.

Third.—For reasons stated in Point XIII, subdivision First, page 19 of this brief, Eddy, as Trustee, received nothing from Shavor and Corse by this alleged assignment of December 18, 1876.

It was a power of attorney only; such power was not coupled with an interest, and was therefore revocable at the will of Shavor and Corse.

Eddy's stipulation of June, 1878, is conclusive proof that such power has been revoked.

Moreover, Caswell and Clexton, out of abundance of caution, long before March 20, 1880, revoked such power, and notified Campbell of such revocation. This is not of record. It is stated to show the wisdom of looking to the assignment of October 23, 1869, for Eddy's interests and rights. This is what the Circuit Court did.

THIRD.

We now come to the rights of Christopher C. Campbell on the one hand, and the rights of Eddy, Caswell and Clexton on the other hand.

Under this head we have nothing to do with the rights of Eddy, Caswell and Clexton, as between themselves discussed in subdivision *first* of this brief. Nor do we have anything to do with the alleged assignment of March 20, 1880, executed by Eddy to Campbell discussed in subdivision *second* of this brief.

I.

Norton's patent was issued April 14, 1863, and was assigned by Norton to Jacob Shavor and Albert C. Corse, April 20, 1863. Such assignment was recorded March 8, 1864.

See page 462 of Record.

Shavor and Corse *never* reassigned this patent to Norten.

See Testimony of Eddy, pages 759–764 of Record.
See Testimony of Corse, pp. 728–734, and also pp. 752–3 of Record.

But Norton put on record in the Patent Office an alleged reassignment by Shavor and Corse to Norton.

This alleged reassignment to Norton was recorded in 1869, but is *dated* February 23, 1864.

See pages 467–471 of Record.

From 1864 to 1869 Shavor and Corse spent, through Norton, $18,500 on this invention.

See Eddy's Testimony, page 764 of Record.
Corse's Testimony, pp. 733–5 of Record.

Part of this $18,500 belonged to the firm of Eddy, Shavor & Corse, and in settling up the affairs of that firm, Shavor and Corse agreed with Eddy that Eddy should have one-third of their interest in this patent.

See Eddy's Testimony, page 563 of Record.

On hearing of the recording of the alleged reassignment Eddy went to Washington in October, 1869, authorized by Shavor and Corse to effect a settlement with Norton.

See Corse's Testimony, page 751 of Record.
Eddy's Testimony, page 761 of Record.

A settlement was effected in October, 1869, by Eddy with Norton, by which settlement Norton assigned to Eddy, in trust for Eddy, Shavor & Corse, the undivided one-third of this patent. This is the assignment dated October 23, 1869, and recorded October 25, 1869.

See Agreement, page 1251 of Record.
See Assignment, page 1147 of Record.

Norten thereafter assigned his interest in the patent to Helen M. Ingalls by an assignment, dated October 23, 1869, but not recorded until August 1, 1870, more than three months after the assignment to Eddy in trust.

See page 478 of Record.

On August 15, 1870, in a written agreement with one W. W. Secombe, Norton recognized that Eddy, as Trustee, owned said one-third of the patent, and agreed that Secombe should have one-fourth of the patent, *provided* Norton recovered from Eddy, Shavor & Corse said one-third of the patent.

See page 1152, near bottom.

On October 4, 1870, Miss Ingalls made an agreement in writing with Secombe, referring to this agreement between Norton and Secombe, and ratifying and confirming it as if made by her.

See page 1153 of Record.

March 4, 1871, Miss Ingalls assigned her interest in the patent to W. W. Secombe.

See page 1154 of Record.

On October 7, 1871, Secombe, Eddy, Shavor and Corse executed a contract as to the division of $62,000, in process of recovery from the United States on a *certain* claim.

See page 602 of Record.

Secombe reassigned to Ingalls July 10, 1873.

See pages 1154–6 of Record.

Ingalls assigned to Campbell, the appellant, January 2, 1877.

See pages 1157–9 of Record.

Campbell began suit June, 1877, against James.

James set up the non-joinder of Eddy, in trust for Eddy, Shavor & Corse.

See page 61 of Record.

Thereupon Eddy and Campbell executed the stipulation of June, 1878, and on that stipulation and on Campbell's motion, Eddy was made a defendant in trust for himself, Shavor and Corse on September 13, 1878.

See page 655 of Record.

The stipulation of June, 1878, contains the following admissions and agreement, to wit:

Eddy, as Trustee, "claims that his rights and interests "in the subject matter of this suit are fixed and determined "by an assignment from Marcus P. Norton to him in trust "of a one-third interest in the patent dated April 14, 1863,

"and its reissues referred to in the pleadings in this case, "which said assignment is dated October 23, 1869, and a certi- "fied copy of which is now in evidence, and by a contract of "even date with said assignment now in evidence, and that "said complainant denies this, and claims that said Eddy's "rights and interests are fixed and determined by an instru- "ment in writing, dated October 7, 1871, and executed by "Charles Eddy, Jacob Shavor, Albert C. Corse, and W. W. "Secombe, a certified copy of which is now in evidence. And "it is further stipulated and agreed that upon the pleadings "and evidence as they now stand, and without any further "evidence or pleadings in the case, unless the court shall "otherwise direct, said court shall decide as to what the rights "and interests of said Eddy in the subject-matter of this suit "are, and shall make such decree in respect thereto as equity "and good conscience may require. And it is further agreed "that if there is recovery in said suit against said defendant, "James, the court shall determine the rights respectively "thereto of complainant, and said Eddy, as equity and good "conscience may require. And said complainant further "agrees that the said assignment of October 23, 1869, from "Marcus P. Norton to Charles Eddy, in trust as aforesaid, was "a valid assignment, not affected by any prior or cotempora- "neous assignment by said Norton to Helen M. Ingalls, or "or other written agreement to which said Eddy is a party, "excepting the one hereinbefore referred to, and dated October "7, 1871."

The stipulation is executed by Christopher C. Campbell and Charles Eddy, is approved of by Marcus P. Norton and Helen M. Ingalls, and Mr. George H. Williams is one of the subscribing witnesses.

The stipulation agrees that Eddy's rights individually and as Trustee, are either in the October 23, 1869 assignment, or in the October 7, 1871 contract, and Campbell admits that the October 23, 1869 assignment, is a valid assignment, not affected by any prior or cotemporaneous assignment by Norton to Ingalls (thus excluding the assignment dated October 23, 1869, recorded August 1, 1870, see page 478 of Record), nor affected by any other written agreement to which said Eddy is a party, excep

the agreement of October 7, 1871 (thus excluding (1) the agreement of October 23, 1869, see page 1251 of Record; (2) the alleged assignment of Shavor and Corse to Eddy, in trust, dated Dec. 18, 1876, see page 576 of Record.

The effect of such stipulation puts the rights of Eddy, Shavor, and Corse, on either the October 23, 1869, assignment, or on the October 7, 1871, contract.

The issue thus raised between Campbell on one hand, and Eddy, Shavor and Corse (or their assigns, Caswell and Clexton) on the other hand, was the *only* issue litigated in the Circuit Court between these parties.

Eddy, under the stipulation, had the right to take further testimony on this issue, for it provided that the court could direct further testimony to be taken.

See Stipulation, June, 1878, page 655 of Record.

Eddy neither took further testimony, nor did he appear in the suit until, in December, 1879, his *cestui que trust* Caswell insisted on it.

See Caswell's affidavit, page 1574 of Record.

Permission was given by the court, Dec. 23, 1879, to take testimony as to the cancellation of the contract of October 7, 1871.

See Order, pages 1567–8 of Record.

Such testimony was taken, and the contract satisfactorily proved to have been cancelled in March, 1872.

See Testimony, pages 1582–1636 of Record, and particularly pages 1623–5 of Record.

See Opinion of Court, pages 1646–1651 of Record,

The order of December 23, 1869, was granted on certain terms.

See Order, page 1568 of Record.

These have been fully complied with.

See Campbell's Notice of Motion (near end of it) pages 1652–3.

The Circuit Court decreed that Campbell owned but two-thirds of the patent; that the other one-third was owned by Eddy, Caswell and Clexton.

See Final Decree, page 1664 of Record.

II.

The above plain recital of facts, commencing with April 14, 1863, and ending with the final decree is in itself a convincing proof that Campbell owns but two-third of the interests involved in this suit, and that the other one-third belongs to Eddy, Caswell and Clexton.

III.

Campbell may say that Eddy, as Trustee, received nothing by the assignment of October 23, 1869, from Norton, as he claims that Norton had already assigned everything to Miss Ingalls.

The answers to this claim are numerous and convincing.

1st. The stipulation of June, 1878, executed by Campbell and approved of by both Norton and Ingalls, "agrees that the "said assignment of October 23, 1869, from Marcus P. Norton "to Charles Eddy, in trust, as aforesaid, was a valid assign-"ment, not affected by any prior or cotemporaneous assign-"ment by said Norton to Helen M. Ingalls."

See page 655 of Record.

2d. On August 15, 1870, Norton, in writing, admitted that Eddy, as Trustee, owned one-third of the patent, through the settlement October 23, 1869, and agreed that Secombe should have one-fourth of the patent, *provided* Norton regained from Eddy, Shavor and Corse that one-third.

See page 1152, near bottom.

On October 4, 1870, Miss Ingalls made an agreement, in writing, with Secombe, referring to this agreement between Norton and Secombe, dated August 15, 1869, ratifying and confirming it as if made by herself.

See page 1153 of Record.

3d. The date of Norton's assignment to Helen M. Ingalls, is October 23, 1869, but it was not recorded until August 1, 1870—more than three months after its execution. It is, therefore, void, as against a *bona fide* purchaser for value without notice.

U. S. Rev. Stat., 4898.

Eddy, Shavor and Corse were such purchasers from Norton of their one-third.

See Testimony, Eddy, pages 763–4 of Record.

4th See Addenda to this Brief

IV.

The agreement of October 23, 1869, collateral with the assignment of October 23, 1869, in no way affects the assignment of October 23, 1869.

See that Agreement, page 1251 of Record.

The stipulation of June, 1878, admits that the assignment of October 23, 1869, is valid, and is not affected by any written agreement, except the written agreement of October 7, 1871.

See Stipulation, page 654 of Record.

Eddy, Shavor and Corse executed to Norton the releases mentioned in the agreement of October 23, 1869.

See Eddy's testimony, pp. 764. Answer to questions 79, 80.

V.

Counsel for Caswell and Clexton understands that Campbell admits now the cancellation of the contract of October 7, 1871.

See Contract, page 602 of Record.

A few words are, however, here added as to this cancellation:

It is conclusively proved that the agreement of October 7, 1871, was cancelled by consent of parties on March 30, 1872, more than a year before the assignment by Secombe to Ingalls, which took place on July 10, 1873.

There is no conflict of evidence as to the cancellation, but it is conclusively proved.

Norton did not contradict the testimony.

The agreement (called Secombe *Original*, to distinguish it from the certified copy used on the James trial), appears at page 1623 of this Record, and the endorsements of cancellation on it, with letters, &c., showing the authority given by Secombe to Norton (who acted for Secombe in the matter) to cancel it, appear at pages 1624 and 1625 of the same.

Norton, on behalf of Secombe, cancelled it by an endorsement at page 1625, and Green, who represented the other parties, also cancelled it, and the paper was surrendered to Green as a cancelled instrument.

See Green's testimony, pp. 1585–7, also p. 1597

The names of the parties were erased by Norton.

See Green's testimony, pp. 1598–9; also pages 1587, 1589, 1590. Also Corse's testimony, p. 1615. Also stipulation as to Ransford's testimony, 1615.

Green had authority from Eddy, Shavor and Corse to procure the agreement to be cancelled, and he did it at their request, and it was approved by all of them after it was done.

See Green's testimony, pp. 1586–7; 1607–8. Corse's testimony, pp. 1612–3.

The authority to cancel, given by Secombe to Norton, is also proved conclusively.

Green called on Secombe on behalf of Eddy, &c., and demanded that the agreement be cancelled, and Secombe said he "would attend to it right away."

See page 1586 of Record, Green's testimony.

Either that day or the next, Norton produced and cancelled the agreement.

See Green's testimony, pp. 1585–6; 1595–6; 1600. Also Exhibits, pp. 1624–5.

Norton's authority was by letter from Secombe.

See page 1624 of Record.

This letter is proved to be in the handwriting of Secombe.

See Holt's testimony, p. 1582 and *seq.*, and Drinker's testimony, pp. 1584 and 1585; and Green's testimony, p. 1585 and p. 1599.

And there is no contradiction on this point. Norton, who produced and acted on the letter, did not venture to deny it.

And Norton does not deny either the authority or the cancellation.

The letter from Norton to Eddy, of March 25, 1872, only five days before the cancellation, evidently contemplates it.

See page 1622 of Record.

And Norton, who produced the letter on that occasion, does not venture to swear that it was not written by W. W. Secombe.

Green noted it as being done on March 30, 1872, while the memorandum by Norton is dated April 3, 1872.

See p. 1625.

But Green swears that Norton's memoranda were written on March 30th, and that April 3d is an error, to which Norton's attention was called, and he said it was immaterial.

See pp. 1597–8–9, 1600.

And Norton does not deny all this, nor any of our testimony as to the cancellation.

The contract was not an *assignment*, or anything which touched the title.

And not being under seal, or required to be under seal, even

if it was an *assignment* (see Van Ostrand *vs.* Reed, 1 Wend., p. 431, near middle), it could be cancelled by parol.

Even contracts which are required to be in writing by the Statute of Frauds, may be modified or cancelled by parol.

See Cummings *vs.* Arnold, 3 Metcalf (Mass), 486, and at p. 489.

Goss *vs.* Lord Nugent, 5 Barn & Adol., at top of p. 65.

But this agreement of October 7, 1871, not being an *assignment*, and hence not being required to be in writing, might be cancelled or rescinded by any acts which indicated the intention of the parties.

Not even an express agreement was necessary.

See Thrasher *vs.* Bentley, 1 Abb. New Cases, 39, and at page 45, where it is said:

"By their declarations, their acquiescence in declarations, "and their act, they may come to an understanding that the "contract should be annulled, and not held as binding by "either upon the other.

"A recision may be by consent. It need not be expressed "as an agreement."

As for the authority to Norton to cancel (p. 1624), it was ample. It need not have been in writing. Even as to lands, under the Statute of Frauds (except in some few cases where the statute requires the authority of the agent to be conferred by writing), a verbal authority to the agent is enough.

See Munn *vs.* Worrall, 5 N. Y., at p. 243.

Whatever, then, was the effect of this instrument, it was cancelled by Secombe before he transferred his rights to Ingalls.

Neither the cancellatien, nor the agreement of October 7th, 1871, were entitled or required to be recorded, as they were neither "an assignment" or a "grant or conveyance."

It is well settled that nothing which does not come within the recording acts is entitled to record.

See Brooks *vs.* Byam, 2 Story, 525, and at pp. 541 and 542.

Hamilton *vs.* Kingsley, 17 Patent Office Gazette, 147, and at p. 150.

Even a *license* is not within the recording acts.

Farrington *vs.* Gregory, 4 Fisher's Patent Cases, 221, and at p. 223.

And see Chambers *vs.* Smith, 5 id., at p. 14.

The language of the court in Gillig *vs.* Maass, 28 N. Y., at p. 212, applies so well here, both as to the point that the recording of a non-recordable instrument is a nullity, and as to the nature of this merely personal agreement, that we quote it:

"It was not a paper entitled to record, * * * * "and hence its record was not notice—even to subsequent "purchasers. * * * In terms and effect, it was a mere "personal contract between the two holders of mortgages. * "* * * No interest in the mortgage itself, no title or "right to the prior bond and mortgage, was transferred to "Jones."

Independently of the recording acts, an assignee can only take the interest of his assignor.

Neither the agreement of October 7th, 1871, nor its cancellation, being recordable, it follows that, even if Secombe *had* assigned to Ingalls his interest in the personal contract contained in the agreement, the latter would have taken nothing, since the agreement had been cancelled before Secombe transferred to Ingalls.

But the result would be the same on these proofs, even though the cancellation was recordable.

An unrecorded instrument is perfectly good except as against "purchasers for value and without notice."

See Brooks *vs.* Byam, 2 Story, 525, and at p. 552, near top.

Perry *vs.* Corning, 7 Blatch., 195, and at p. 200, near foot, and p. 201, near foot.

Pitts *vs.* Whitamn, 2 Story, 609, and at pp. 615, 616, 617 and 618.

And if the agreement ought to have been recorded, and the complainant claims to have taken Secombe's interest without notice of it, the burden is on him to plead and prove it, which is not done.

See Perry *vs.* Corning (*supra*), head note, p. 195, and at foot of p. 201, and top of p. 202.

VI.

The rights of Eddy, Caswell and Clexton to the "one-third" would seem to be conclusively established. But Campbell's counsel, in their petition of appeal, rely on a certain alleged private resolution of Congress, dated July 14, 1870, and a certain alleged report to Congress, by John A. J. Cresswell, dated February 25, 1871, as a means of proving that Eddy, Caswell and Clexton have no interest in this suit.

See pages 502–6 of Record for those papers.

This claim is absurd. It is difficult to understand why Campbell's counsel take this position.

Congress and the President together cannot deprive any "person of life, liberty or property without due process of "law."

That was a queer sort of a court! Was Mr. Cresswell a Referee appointed to hear and determine this matter?

He hardly constituted a supreme court; nor does it appear that he was an inferior court. Such are the only courts in which the judicial power of the United States is invested.

Mr. Cresswell's report does not have the usual decisive character of decrees or judgments; he *believes* Miss Ingalls to be the owner of the patent; he cannot make up his mind what the owners of the patent ought to have as compensation, and he very wisely sends report, exhibits and testimony (which, by the way, are no where in this record) back to Congress, where it all sinks into oblivion, until appellant's counsel digs up some portion of it to present to this court as evidence of the appellant's title!

Appellant's counsel cannot seriously believe that these two papers have any bearing on the issues in this suit.

These papers have not been properly proved in evidence.

See page 75 of Record when they were offered in evidence.

All the alleged proceedings before Mr. Cresswell are, so far as Eddy, Shavor, Corse, Caswell and Clexton are concerned, *res inter alios acta.*

Campbell, in the stipulation of June, 1878, admits that the rights of Eddy as Trustee are either absolutely in the assignment of October 23, 1869, or in that assignment as affected by the contract of October 7, 1871.

See Stipulation, page 654 of Record.

VII.

The stipulation of June , 1878, "did not enlarge what "would have been before the court, with Eddy as a party de- "fendant, without such an agreement, for it would all the "while be necessary to determine his (Eddy's) rights, in order "to settle what would be left to the plaintiff, as the founda- "tion of any decree that might be made in his favor."

Opinion of Court, page 1647.

FOURTH.

The decree of the Circuit Court should be affirmed with costs and disbursements of the appeal, to be paid by Christopher C. Campbell to Samuel R. Clexton and Horace T. Caswell.

Dated January, 1881.

EDWARD D. BETTENS,
Of Counsel,
New York City,
New York.

United States Supreme Court.

CHRISTOPHER C. CAMPBELL, Assignee in Trust, *Appellant*, *vs.* THOMAS L. JAMES ET AL., *Respondents.*	No. 1101.

Addenda to Brief for Samuel R. Clexton, Horace T. Caswell, and Charles Eddy, their Trustee.

Campbell *now* claims that there was no settlement between Norton on one hand and Eddy, Shavor & Corse (from whom Caswell and Clexton get their interests) on October, 23, 1869.

See agreement, page 1251 of Record.
" assignment, page 1147 of Record.

He claims that Norton had assigned *everything* to Miss Ingalls prior to October 23, 1869, and that consequently on October 23, 1869, Norton had nothing to transfer to Eddy.

We therefore, in these addenda, present to the court a more minute history of the events culminating in the settlement of October, 1869, than appears in our original Brief.

The date of the patent involved in this suit is April 14, 1863. Inventor, Marcus P. Norton.

Norton, the inventor, and Jacob Shavor and Albert C. Corse, capitalists of Troy, New York, entered into an arrangement by which the title to the patent was to be transferred to

Shavor and Corse, and Shavor and Corse were to pay the expenses necessary in obtaining compensation for the use of the invention, and one-half of the net proceeds was to belong to them, the other half to Norton.

See Eddy's Testimony, page 751–2.

Thereupon Norton assigned to Shavor and Corse the patent, by assignment, dated April 20, 1863, and recorded March 8, 1864.

See Assignment, page 462 of Record.
See Bill of Complaint, page 7 of Record.
See Amended Bill of Complaint, page 25 of Record.

August 23, 1864. Patent surrendered by Shavor and Corse; new letters re-issued to them. Mr. Norton prepared the papers for such re-issue.

See Re-issue, page 463 of Record.
See Corse's Testimony, page 733, answer to question 60.

October 23, 1864. Shavor and Corse obtained a verdict against Edmund Hoole in U. S. Circuit Court, Northern District of New York, for infringement of the re-issued letters patent. Mr. Norton was complainant's witness.

See page 515–537 of Record, and particularly page 537.

Norton, in that trial, read in evidence his assignment of April 20, 1863, to Shavor and Corse.

See page 152 of Record.

1867. Shavor and Corse brought suit in the Court of Claims against the United States, for compensation for the use by the Government's officers of the patented improvement. Norton was the attorney for Shavor and Corse, and also a witness.

In their petition Shavor and Corse swear "that the entire "title in said invention and patent is now fully vested in the "said Shavor and Corse," (page 1329,) and Norton swears

"I have no interest in the claim which is the subject matter "of inquiry." (Page 1334.)

See proceedings in such suit, pages 1320 to 1341.

Between March, 1864, and July, 1869, Norton wrote many letters to Shavor and Corse about this patent, admitting that they were the *owners* of it; never claiming to have any re-assignment, and when in 1866, 1867 and 1868, trouble began to brew between Norton, Shavor and Corse, Norton's piteous cry was for them to "*assign the patent back to me* . . . so that "I can have my invention and my patent back again."

See Norton's letter to Shavor, April 21, 1867, pages 1264–6 of Record.

Again he writes to Shavor, "you have an assignment of the "whole patent, *and I have simply nothing.*"

See letter, April 25, 1867, pages 1244–6 of Record.

Again: "Had you *re-assigned* my patent as I proposed when "you were finding so much fault with me, I could, before "now, have paid you every dollar back. I *now ask you to do* "*so at once* . . . The stamp must come back unto my hands, "and if not done on my return, I will commence a suit in "Equity compelling you to return to me the title."

Letter to Shavor, June 27, 1868, page 1266 of Record.

Again: "I think that you and Shavor ought to assign to "me my full one-third part. Now I have nothing to show."

Letter to Corse, March 15, 1869, page 1269 of Record.

Over one hundred of Norton's letters written to Shavor and Corse between March, 1864, and July, 1869, and of like purport to the above letters, are in evidence. They are printed at pages 1160–1270 of Record.

During this same period Shavor and Corse, through Norton, as their attorney, made many applications to Congress and the Postmaster General for compensation for the use of this patent.

See Def'ts ex., 55, page 1183 of Record.
" " 112 " 1235 "
" " 113 " 1237 "
" " 122 " 1249 "
" " 165 " 1361 "

During the same period Norton stated to many persons that Corse and Shavor owned the patent.

See Testimony of Baldwin, pages 728–3 of Record.
" " Weed, pages 987–990 "
" " Merriman, pages 996–7 "
" " Corse, pages 752–3 "

May 3, 1869. Shavor and Corse revoked Norton's authority to act for them.

See Def'ts Ex. No. 121, A & B, pages 1247–8 of record.

July 24, 1869, the alleged re-assignment from Shavor and Corse to Norton, dated *February* 23, 1864, was recorded.

Corse and Shavor knew nothing of this alleged re-assignment until after it was recorded in 1869. They never executed it, and Corse (Shavor being dead) gives his reasons why it could never have been executed by them.

See Corse's Testimony, pages 730–3; 752–3; answer to question 270, page 753.

This alleged re-assignment is Defendant's Exhibit 126, page 1254, was offered in evidence at page 752, and was proved to be in Norton's handwriting at page 752.

Norton retouched the words and letters both of the body of the instrument and the jurat, (see pages 752 and 796,) and many other curious things are pointed out by the expert Dr. Ward, (pages 795–799.) Twice the number of revenue stamps are affixed to it than was required in 1864.

See 12 Stats. at Large, 479, Act of July 1, 1862.

Norton's assignment to Shavor and Corse is dated April

20, 1863; it was not executed until about *February*, 1864, (see Norton's testimony, answer to cross-question 177, page 162;) it was recorded March 8, 1864; Shavor and Corse's ownership was not generally known—not even to Eddy, their partner, on May 17, 1864.

See Norton's letter, May 17, 1864, page 1259.

The alleged re-assignment is *dated* February 23, 1864.
Norton swears it was *executed* on February 23, 1864.

See Norton's testimony, answer to cross-questions 79 and 80, page 148.

It recites that Shavor and Corse understand that the committee of the House of Representatives objects to rewarding speculative assignees, and to remove that objection, they, Shavor and Corse, execute this alleged re-assignment to Norton. It is to be noted—

(1.) That at no time and in no place between the date of that alleged re-assignment in 1864, and the date of its record in 1869, does Norton refer to this alleged re-assignment or tell anybody or committee about it.

(2.) The first information that Shavor and Corse ever had of any such objection was in 1867, in a letter from Norton to Shavor.

"Now, I may as well tell you one thing which has been a "source of trouble as to amount of compensation, especially "in committee. It is this: Dennison and the committee "look on the case and say that the Government were not re-"warding the inventor and patentee, but were paying assignees "who were a set of speculators."

Norton's letter to Shavor, January 2, 1867, page 1262.

(3.) In 1866, Norton wrote as follows to Dr. Baldwin:

"We, (Shavor, Corse and Norton,) have never for these "long years had a scrap of writing between us in our con-

" tracts and various agreements. *I have never asked any from*
" *them either.*"

Norton to Dr. Baldwin, June 22, 1866, page 1261.

Shavor and Corse for some time prior to 1869, had been in partnership with Charles Eddy. Such partnership was dissolved in February or March, 1869. On such dissolution it was discovered that $18,500 of the firms money had been spent by Shavor and Corse, on this patent, and to satisfy Eddy he was given an interest in the patent by Shavor and Corse.

Thereafter, on hearing of the recording of this alleged reassignment, Mr. Eddy went to Washington to make such arrangements as he thought fit.

See Corse's Testimony, page 751 of Record.
" Eddy's Testimony, page 761–'2 of Record.

Eddy saw Norton, and on October 23, 1869, the written agreement, dated October 23, 1869, was executed.

See Agreement, page 1251.

The third paragraph of that agreement conveys to Eddy in trust for Eddy, Shavor & Corse the undivided one-third part of the patent and its re-issue.

On the same day Norton executed a formal assignment (separate from any other agreements) to Eddy, as such trustee, of an undivided one-third of this patent. This was recorded October 25, 1869.

See Assignment, pages 1147–8.

Mutual releases of all indebtedness, required by paragraph 1st of agreement of October 23, 1869, were then exchanged.

See Eddy's Testimony, page 764.

Norton now claims that on October 20, 1869, he had assigned everything to Miss Ingalls, and that therefore *nothing* was assigned to Charles Eddy on October 23, 1869.

Norton's assignment to Miss Ingalls is dated *October* 23, 1869, and was recorded on August 1, 1870.

The Court's particular attention is called to the fact that the date of the Ingalls assignment is October 23d, and not October 20th.

See Assignment, pages 1150–1. And see especially the *Exhibit itself* transmitted to this court by the Circuit Court.

Neither Eddy, Shavor nor Corse ever had any knowledge of this Ingalls assignment until long after October 23, 1869.

See Eddy's Testimony, pages 762–3.

Norton has been Miss Ingalls authorized agent ever since the execution of the assignment to Miss Ingalls.

Mr. Norton swears that "*at the time I (Norton) made the as-*
"*signment to her (Miss Ingalls) the arrangement was that I should*
"*act for her, and exercise my own judgment in any matter con-*
"*cerning that patent.*"

See Norton's answer to cross-question 173, page 161.

He swears that he then assigned to Eddy in trust the one-third, *informed Miss Ingalls of it, and she did not object.*

See page 161, end of answer to cross-question 172.

On August 15, 1870, Norton, in writing, agreed with W. W. Secombe to transfer one-fourth of this patent to Secombe, *provided* Norton *recovered* from Eddy, Shavor & Corse the one-third they *held* under the settlement of October 23, 1869.

See page 1152, near bottom.

This was recorded November 1, 1870.

On October 4, 1870, Miss Ingalls, in writing, referring to this Norton-Secombe agreement of August 15, 1870, ratified and confirmed it as if made by herself. This also was recorded November 1, 1870.

See pages 1153–4 of Record.

Campbell offered in evidence a report of a Senate Committee, dated July 6, 1870.

See page 75 of Record for the offer.

See page 499–502 for the Report.

The complainant is bound by the statements of that report. That report shows that as late as July 6, 1870, Norton was a *petitioner* to Congress for a settlement and for compensation for the use of this patent, in *conjunction with* Eddy as trustee for himself, Shavor and Corse.

The report does not contain a word about Miss Ingalls; she is *not one of the Petitioners.* The whole scheme of an assignment to Miss Ingalls was evidently an afterthought of Norton's. As long as Norton and Eddy, as Trustee, could have acted together there never would have been any assignment to Miss Ingalls.

The friendly relations between Norton and Eddy, as Trustee, fell through, and on August 1, 1870, (25 days after the date of the above report,) the assignment to Ingalls, antedated to October 23, 1869, is recorded.

See Assignment, pages 1150–1.

Since then Mr. Norton has persistently endeavored to put the date of that assignment back to October 20, 1869.

In the court below he deliberately printed it as of that date, thus falsifying the record. Before the record was transmitted to this court the date was corrected in the printed copy that was sent up.

See such Record.

But curiously enough, it is printed even in this record thus "twentieth (twenty-third,") and at bottom of page, "word "twentieth" erased in red—Printer."

The assignment to Miss Ingalls is dated October 23, 1869, and not October 20, 1869, and is correctly printed at page 1150 of this record.

The original Exhibit offered by Campbell is before this court, and an inspection thereof will show that this is so.

It is evident that Norton in 1869, never assigned, and never could have assigned to Miss Ingalls, any interest in the patent, until *after* the settlement with Eddy, Shavor and Corse on October 23, 1869.

Until such settlement was completed, Shavor and Corse owned the *whole* title, and Norton, to use his own language, *had simply nothing.*

Letter of Norton to Shavor, April 21, 1867, pages 1264–6 of Record.

We maintain that the assignment of October 23, 1869, Norton to Eddy in trust, was by way of a further assurance of the title of Shavor and Corse, (and Eddy who took from them;) the recorded alleged re-assignment was a cloud on their title; the assignment of Norton to Eddy in trust removed that cloud as to one-third of the title; but until such settlement on October 23, 1869, Norton had nothing to convey to Miss Ingalls—for the alleged re-assignment was, we insist, a barefaced forgery.

WASHINGTON, *January*, 1881.

EDWARD D. BETTENS,
Of Counsel.

United States Supreme Court.

THOMAS L. JAMES,
Appellant,
vs.
CHRISTOPHER C. CAMPBELL ET AL.,
Respondents.

No. 945. Reply

Brief for Samuel R. Clexton, Horace T. Caswell, and Charles Eddy, their Trustee.

Clexton is the appellant in appeal numbered 1098 on this calendar. Clexton, Caswell and Eddy, as Trustee, are respondents in the appeal numbered 1101 on this calendar.

The court's attention, on this, James' appeal, is respectfully called to the brief of counsel for Clexton, filed in appeal number 1098, and to the brief of counsel for Clexton, Caswell and Eddy, their Trustee, filed in appeal number 1101.

The title of Eddy, Shavor and Corse, (and Clexton and Caswell, their assigns,) is in no way connected with that of Secombe, Ingalls and Campbell. Shavor and Corse owned the *whole* patent in 1864.

See Assignment, page 462 of Record.

They never re-assigned any part of that title to Norton.

See Addenda to brief for Clexton, Caswell and Eddy, their Trustee, filed in appeal No. 1101.

They took from Norton, on October 23, 1869, an assign-

ment of one-third of the patent, by way of a further assurance of their title because the record of that title in the *Patent Office* was endangered by this alleged re-assignment.

See same Addenda.

This was in effect a ratification of the alleged re-assignment by Shavor and Corse to Norton, to the extent of two-thirds of the patent; whilst at the same time Eddy, Shavor and Corse got a clear *record* title to the one-third, which in fact Shavor and Corse had owned ever since 1864.

That one-third of the patent goes back to 1864, and it is well established that the owners of such one-third are entitled to the benefit of any re-issue taken out by the owners of the other two-thirds.

This one-third was never assigned to Mr. Norton, nor to Miss Ingalls, nor to Secombe, nor to Mr. Campbell.

It is clear, therefore, that defects in the title of Norton, Ingalls, Secombe or Campbell in no way affect or concern the owners of this one-third.

If Campbell be thrown out of court because of any defect in his title, Caswell, Clexton and Eddy, as their Trustee, are still entitled to their recovery of $21,000 against James.

They are as much complainants against James as Campbell is. A decree that Campbell do not recover against James, because he has no title to the patent, ought not to prevent Caswell, Clexton and Eddy, as Trustee, from recovering their $21,000—if their title is good.

It is well established in this country that when the court "has jurisdiction of the parties it grants the appropriate relief "without regard to whether they come as plaintiff or defend-

ant." Waite Ch. J., Littlefield *vs.* Perry, 21 Wallace, 205. Meyer *vs.* Delaware Co., S. C. U. S., October Term, 1879, Leg. News, Jan. 3, 1880.

Because Campbell cannot recover is surely not a sufficient ground, in itself, for refusing a recovery to Caswell, Clexton and Eddy, their Trustee.

If Campbell is not the proper party to this suit as owner of the two-thirds of the patent, the court has ample power to bring in the real owner.

The decision as to the *validity* of the patent, and the *damages* and *profits* to be recovered has been made; to whom the patent and such damages and profits belong is another matter. One-third of such patent, damages and profits belong to Caswell, Clexton and Eddy, their Trustee. If Campbell does not own the other two-thirds, the real owner can be brought in and made a party.

And it was well observed by the circuit court that "In these "causes the pleadings cover all the grounds of claim upon and "defense by the defendant, (James,) as well to that part claim-"ed by Eddy as in respect to that claimed by the plaintiff, "(Campbell,) and the evidence has been taken in respect to "all the issues made, and considered as bearing upon them. "Under these circumstances, at least, it seems proper that the "rights of Eddy and of those claiming under him, as Trustee, "to the fruits of the infringement of defendant, (James,) "should be considered and determined."

See opinion of court, page 1650.

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, A. D. 1880.

THOMAS L. JAMES, *Appellant*, *vs.* CHRISTOPHER C. CAMPBELL, *et al.*, *Appellees.*	No. 945.

Brief for Christopher C. Campbell.

This is a suit in Equity by Christopher C. Campbell against Thomas L. James for the infringement of Letters Patent, by using and causing to be used "a new and useful improvement in post-office post-marking and canceling hand-stamps, of which Marcus P. Norton is the first and original inventor.

Complainant's title is as follows:

1st. Patent to Marcus P. Norton, dated April 14, 1863. (R. 454.)

2d. Assignment by Marcus P. Norton to Jacob Shavor and Albert Corse, dated April 20, 1863. (R. 461.)

3d. Reissue of patent to said Shavor and Corse, August 23, 1864. (R. 462.)

4th. Re-assignment by said Shavor and Corse to said Norton, dated February 23, 1864. (R. 467.)

5th. Reissue of patent to said Norton, dated August 3, 1869. (R. 471.)

6th. Assignment by said Norton to Helen M. Ingalls, dated October 20, 1869. (R. 478.)

7th. Reissue to Helen M. Ingalls, dated October 4, 1870. (R. 479.)

8th. Assignment by Helen M. Ingalls to W. W. Secombe, dated March 4, 1871. (R. 487.)

9th. Re-assignment by said Secombe to said Ingalls, dated July 10, 1873. (R. 493.)

10th. Assignment by Helen M. Ingalls to C. C. Campbell, complainant, January 2, 1877. (R. 31.)

Copies of documents constituting the foregoing chain of title, duly certified by the Commissioner of Patents, are in evidence in the case, thus making *prima facie* a complete title in complainant.

Defendant has attacked the 4th, 6th and 9th items in said chain of title.

A.

As to the re-assignments by Shavor and Corse to Norton, February 23, 1864. Item No. 4.

The answer admits the execution of this re-assignment, but says it was not so executed as to be entitled to the advantages of record; that it was obtained by fraud and misrepresentation; that it was through mistake, fraud, misrepresentation, by or on behalf of said Norton, accident and misunderstanding of its purport, terms and legal effect. Pl., 58.)

Due objection was made to any evidence by complainant under this part of the answer, and none was admissible—

1st. Because it is unintelligible and wholly indefinite. No one can tell from it whether this assignment was procured by accident or mistake or by fraud. No one can tell whether it was made in good faith or bad faith. If by accident, how and to whom did this accident happen. If by mistake, how and by whom and about what was the mistake. If by fraud, how and by what means and who committed it. A general allegation of fraud is an allegation of a conclusion of law from facts, which facts are not pleaded. (Gear *vs.* Grosvenor, 6 Fisher, 314; Story's Eq. Pl., sec. 251*a*.)

No evidence was given corresponding to the allegations of the answer, but an abortive attempt was made to show that said re-assignment was a forgery. All or very nearly all the evidence from page 728 to page 795, and all the exhibits from page 1160 to page 1269 R. are directed to this end. It is not competent under said allegations to prove said instrument a forgery. There is not a particle of evidence to show that Norton said or did anything to mislead or deceive Shavor and Corse at the time they executed the said re-assignment. Complainant, by the advice of his counsel, has introduced no rebutting evidence upon this point.

1. Because defendant's evidence is inadmissible under the pleadings.

2. Because it does not prove any accident, mistake or fraud in the making of said re-assignment.

3. Because it shows satisfactorily that Shavor and Corse did sign, seal and acknowledge said instrument.

4. Because James cannot justify his infringement of Campbell's patent by complaining of Norton's alleged fraud upon Shavor and Corse. Shavor and Corse not complaining, nobody can complain. Such a defense is not available for defendant James. The right to complain of a fraud is not a marketable commodity. Story's Equity, sec. 1040, note *g*.

5. Because the evidence was wholly immaterial for the following reasons:

Norton, after the patent was reissued to him, August 3, 1869, was claiming compensation from the Post-office Department for the use of his stamp. Shavor & Corse contested his right, denying said re-assignment. On the 23d day of October, said Shavor & Corse, with Eddy, took an assignment of one undivided third interest in said patent of August 3, 1869 (R. 1149), and agreed to settle all differences and disagreements between them and Norton as to the ownership of said stamp. Mr. Eddy testifies, R. 761, as follows:

"A. Mr. Norton claimed that he was the owner by virtue of a re-assignment from Mr. Shavor & Corse of the patent of 1863, known as the Norton stamp patent; Mr. Shavor and Mr. Corse claimed that they had made no such assignment, and that all differences were to be considered amicably settled by this instrument, and the assignment, which was a part of this transaction by Mr. Norton to Chas. Eddy & Co., or Chas. Eddy, Jacob Shavor and Albert C. Corse, composing the firm of Chas. Eddy & Co., and the several releases named in said agreement."

See written agreement, R. 1251.

Shavor & Corse, by this agreement, are estopped from objecting to the patent to Norton of August 3, 1869. They ratified and took title under it. They are estopped by said settlement as to all questions about said patent of an antecedent date, and the defendant, if he had any rights, would of course be estopped in the same way.

Perhaps it is proper to say, as to the recording of said reassignment, that all the evidence goes to show that the assignment by Norton to Shavor & Corse was with the understanding that the latter were to furnish the means for prosecuting a claim against the Government for the use of the patented stamp, and have a portion of the proceeds. Con-

troversy arose between the parties as to these means. Shavor & Corse set up an absolute right to the whole patent, sold one-third to Eddy, and claimed the other two-thirds for themselves, and then notified Norton, who was in Washington attending to said claim, that all his authority to act in the matter was revoked, and it was then, and not till then, that Norton put said re-assignment on record. (R. 1247, 766.)

B.

As to item 6th, the assignment by Norton to Ingalls. This assignment is proved, and is perfect, but defendant, in his answer, alleges that on or about the same date said Norton assigned one-third interest in his said patent to Charles Eddy. Two points appear to be made by defendant upon this allegation.

1st. That Eddy ought to be a party to the suit, and defendant prays that he may be made a party before the termination of the case.

2d. That Ingalls had no right to surrender the patent assigned to her, and obtain the reissue of 1870.

Eddy, by his own consent, and by the order of this court, has been made a party to the suit, "as fully in all respects as though he was an original party thereto," and therefore all remaining questions as to said assignment to Eddy are between him and complainant. Defendant has no interest in the assignment, except to have Eddy before this court, so that he will be bound by its decision.

There is no evidence that Eddy joined with Ingalls in surrendering the patent of 1869, or that he consented to it, but he has since ratified and accepted it. On the 7th day of October, 1871, W. W. Secombe was the assignee in trust of the patent of 1870, the one on which this suit is brought by assignment from Ingalls, dated March 4, 1871. On the said 7th of October, Eddy, Shavor & Corse made an agree-

ment with said Secombe, by which they recognize his right in "Norton Post-office Cancelling Stamp" as such assignee, and agreed to receive from said Secombe, out of the proceeds of said stamp, a certain sum of money "in full payment and satisfaction of their claim and demand" thereto. (R. 602.)

Moreover, Eddy is now before this court, not only not objecting to said patent of 1870, but claiming a part of the recovery for the infringement thereof by defendant. To hold that defendant, an infringer, may object that Eddy was not consulted about the reissue of 1870, while Eddy is in court saying in effect not only that he does not object, but is satisfied, would be a very singular, not to say absurd ruling. Ingalls had an assignment of the entire patent of 1869. Eddy had a subsequent assignment of one-third thereof. Eddy's assignment takes precedence of the other, because it was first recorded, if Eddy insists upon it. To insist upon this, however, is the exclusive right of Eddy or his assignee. As against an infringer claiming nothing under said patent, the assignment to Ingalls is good for the whole of it.

Judge Ingersoll, in Potter *vs.* Holland, 1st Fisher, 336, says, speaking upon this subject:

"This consent may be manifested either by joining in the surrender with the patentee, or by previously authorizing it, or by subsequently *ratifying* or *approving* it. And taking advantage and benefit of it would be a ratification, and when consented to the rights of the party so consenting in and to the old patent are forever gone."

C.

As to the 9th item, the re-assignment of Secombe to Ingalls of July 10, 1873.

On the 4th of March, 1871, Ingalls made an assignment to W. W. Secombe of three patents—one-third interest in the patent of August 9, 1859, for cancelling stamps by cutting; a patent dated July 13, 1869, and the patent of October 4, 1870, upon which this suit is brought. (R. 487.) On

the 10th day of July, 1873, The Secombe Manufacturing Company and W. W. Secombe, president, executed to said Ingalls a re-assignment of various patents, described as follows: "For and upon improvements in hand-printing and dating stamps, post-office post-marking stamps, internal revenue dating and cancelling stamps, and for other improvements, not necessary here to name, among which were letters-patent of the following dates, to wit: January 14, 1862; December 16, 1863; August 4, 1865; and also during the years 1870 and 1871. This re-assignment refers to the several deeds of assignment on record from Marcus P. Norton and also from Helen M. Ingalls to the Secombe Manufacturing Company, or to W. W. Secombe, as president, for greater certainty of description. It further explains itself as follows: "Meaning to convey, and we do hereby convey unto her, the said Helen M. Ingalls, each and every claim, right, title, and interest we now have, or can or would have in any of said inventions, improvements, or letters-patent, by means or reason of any contract between us, or any of us, and the said Marcus P. Norton and Helen M. Ingalls, or either of them, unto or for the said inventions and said letters-patent, or either of them." This re-assignment is signed and sealed as follows: "Secombe Manufacturing Company. [Seal.]" W. W. Secombe, [Seal,] president." (R. 493.)

Defendant, in his answer, does not deny that this re-assignment describes and embraces the patent in suit, filed October 4, 1870, but avers that the right thereto was invested in W. W. Secombe individually, and that said re-assignment did not divest him of such right. Norton testifies that he drew this re-assignment without the patents and assignments to which it refers before him, and therefore the general, and to some extent inaccurate, manner in which they are described. (R. 434.) As matter of law, if W. W. Secombe held the title to any of the patents embraced in said re-assignment, such title thereby passed, and the appending of the word "president" to his name was of no effect.

Manifestly, however, the intent of the parties was to convey in said instrument the patent in suit, and the use of the word "president" was a mistake.

1st. No assignment was ever made by anybody to W. W. Secombe as "president." Assignments were made to The Secombe Manufacturing Company, and to W. W. Secombe.

2d. No assignment was ever made by Ingalls to Secombe except that one above referred to of March 4, 1871.

3d. This re-assignment embraces the patents issued during the years 1870 and 1871. The patent in suit was issued in 1870.

4th. Reference is made to the assignments on record for a more full and perfect description and understanding of the inventions and letters-patent re-assigned, and by these any mistakes or misdescriptions in the re-assignment are to be corrected.

This reference to the several deeds of assignment make them a part of the said re-assignment.

In Izard *vs.* Montgomery (vol. 1 Nott & McCord, S. C. Reports, page 381), the court say: "A reference in a deed to a will not executed according to the Statute of Frauds will have the effect of incorporating it with and making a part of the deed."

In Everett *vs.* Thomas (1st Iredell, N. C. Law, 256), the court say: "We do not doubt that by a proper reference of one deed to another, the description of the latter may be considered as incorporated into the former, and both be read as one instrument for the purpose of identifying the thing conveyed."

In Sewell *vs.* Henry (9th Ala., 30), the court say: "Two writings connected by a reference of one to the other may be considered and construed as parts of an entire transaction, and as if they were embodied in one instrument."

In Sawyer *vs.* Hammitt (15 Maine, 44), the court say: "The law will not suppose one to be ignorant of that to which his contract refers, but will imply notice of it, whether he have actual knowledge of it or not, when referred to in a contract to which he is a party. That the re-assignment refers to the assignment by Ingalls to Secombe of March 4, 1871, is perfectly clear, for it speciffes the letters-patent of Dec. 16, 1862, contained in that assignment."

If there are any doubts as to the construction of the said re-assignment, those doubts are to be resolved against Secombe.

In the case of The City of Alton *vs.* The Illinois Transportation Company (12 Illinois, 58), the court say: "When a deed is so drawn that some will read it one way and some another, is is a well-established rule that that meaning shall be adopted which is adverse to the interest of the grantor."

5th. One of the patents named in said assignment is dated December 16, 1862; one of the patents named in said re-assignment is dated December 16, 1862; so that it is perfectly clear that this assignment of March 4, 1871, was in the minds of the parties, and therefore is referred to in the general terms of the re-assignment "for a more full and perfect understanding" of what was re-assigned. This re-assignment speaks of the patent of December 16, 1862, as assigned to the "Secombe Manufacturing Company," which shows that it was written from a bad memory as to names and dates, for it was assigned to W. W. Secombe, as the said assignment of March 4, 1871, shows.

6th. According to the clause of said re-assignment, above cited, every invention and improvement in post-office stamps, which said Secombe held by reason or means of any contract with Helen M. Ingalls, was re-assigned to her.

Considerable evidence has been offered by defendant to show that Norton did not understand that said assignment embraced the patent of October 4, 1870, now in suit.

To this evidence there are two objections:

First, and a fatal one is, that defendant, having said re-assignment before him, as his answer shows, did not deny that it contained said re-assignment, but simply makes the point that a conveyance by W. W. Secombe with the word "president" attached to his signature, does not transfer a title conveyed to said Secombe with such an attachment to his name. Defendant cannot admit or claim one construction of a contract in his answer, and then set up another and different construction upon his evidence.

Second. If the words and terms of the re-assignment are broad enough to embrace said patent, then such evidence is immaterial.

But, if Norton is to be believed, there is nothing in this evidence; for on R. 165, is the following question:

Question by defendant's counsel: "Do you not know that the patent Division A, 4143, (the patent in suit,) is not canveyed by that re-assignment?" referring to the one in question.

Answer. "I don't know any such thing; but, on the contrary, I know that it is. I absolutely and personally know that fact, and that that was the intention of that instrument which I drew myself on the day it was executed."

Defendant's chief reliance to show that such was not the understanding of Norton is upon a letter written by him to Shavor (R. 1394), dated November 27, 1876, in which he states that he had written to Secombe for a re-assignment, and upon certain letters by Norton to Secombe, with a blank re-assignment, found on R. 448 and 449.

These papers, in some respects, appear to be inconsistent with Norton's statement of his understanding of the re-assignment, and in other respects they confirm it.

Norton testifies in answer to a question by defendant's counsel, that on his way to Washington in March, 1876, he

made a new and verbal arrangement with Secombe as to the patent in this suit, (R. 428) and the said letters to Secombe fully corroborate this testimony.

Norton, not supposing that there was anything upon record to show that the assignment by Ingalls to Secombe was not in force, was willing to let Secombe go on under that assignment, if he would carry out this new and verbal arrangement.

He explains his application for the re-assignment on R. 165–166.

One circumstance is almost conclusive as to the intent of the parties when this re-assignment was executed. That is, Ingalls at that time delivered up to Secombe the declaration of trust which he had made to her in connection with the assignment to him of the patent in question. (R. 252.)

Another circumstance is that this re-assignment admits a claim for professional services by Norton, for which and other causes it seems he had sued Secombe and the Secombe Manufacturing Company, and by this re-assignment their business matters as to patents were to be closed and settled. (R. 443.)

Taking the said assignment by Ingalls to Secombe of March 4, 1871, and the declaration of trust (R. 487–596), and they amount to this: Secombe was to take the assignment, manage and prosecute the claim against the Government, pay the expenses, and retain two-fifths of the proceeds, paying the other three-fifths to the family of Mr. Norton, and the fact that he was holding simply as trustee appears upon the face of the assignment.

Complainant in his bill alleges that Secombe had wholly neglected and refused to carry out this arrangement, and defendant, in his effort to show that it was not the intent of the parties to include the patent in question in the re-assignment, completely proves this allegation.

If said brother is an administrator in Minnesota, he cannot be made a party to this suit. (Caldwell *vs.* Harding, 5 Blatch., 501.)

This suit is for an injunction as well as for damages.

"Any party aggrieved," under section 17 of the act of 1836, 5 Statutes, 124, may maintain a suit to enjoin the infringement of a patent, and it was so held in Hussey *vs.* Whitley, 2 Fisher, 122.

Miss Ingalls, or her assignee, who brings this suit, is not only aggrieved, but the only party aggrieved by the infringement of defendant.

Secombe was furnished with copies of the bill in this case. He then disclaimed all interest in the suit, gave up certain papers in his possession, &c. (R. 436.) His brother, though notified at an early day of the proceedings in this case, makes no claim on behalf of the estate of Secombe, but long after the evidence is closed is induced to furnish to defendant's counsel some papers, which can only be understood by the circumstances under which they were written, and these the said counsel put forward *vicariously* to justify defendant's infringement of the patent.

To say nothing of the re-assignment, does not this evidence show an *estoppel in pais?* Would it not be a vain and useless thing, under these circumstances, to make Secombe's administrator, if he had one, a party to this suit, which is all that the defendant in any event can ask?

Judge Wheeler, in deciding the case in the court below, says:

"Norton conveyed this and other patents to Helen M. Ingalls. She, for a nominal consideration, conveyed the legal title to them to William W. Secombe, in trust for herself, her sister, and her sister's children, with power of management and sale, the net proceeds to be divided, two-fifths to himself, and the remainder to be paid over to them, according to a declaration of trust referred to in the deed. Secombe was president of the Secombe Manufacturing Company, which in some way held title to some other of Norton's

patents. The Secombe Manufacturing Company and Secombe, president, subsequently made conveyance of patents to Ingalls. The plaintiff derives title from her; and no other conveyance from Secombe to her is shown. The defendant claims that Secombe's title would not pass by that deed, and that, if it would, the description of the patents conveyed does not include this one.

"The deed recites the issuing of the patents, her desire to purchase, and that she has purchased of the Secombe Manufacturing Company, and of William W. Secombe, president, the patents, and declares that, in consideration of one thousand dollars and other considerations, the said Secombe Manufacturing Company, and William W. Secombe, president, do sell, assign, and convey them to her; and it was executed by the signature of the Secombe Manufacturing Company, with seal, and by William W. Secombe, president, and another seal. It is obvious that there were intended to be, and were, two grantors in that deed. One was the company, and the other was Secombe. The execution for the company in the name of the company was good for the conveyance of its interest. The execution by Secombe, although the addition to his name of '*president*' was made, was a good execution of the deed for himself, and good for that only, and not good to convey any interest for the company, even though that had been the intention. That execution made the instrument his deed, and it would carry whatever title he had in the subject of the conveyance. (Combe's case, 9 Co. Rep., 75. Clark *vs.* Courtney, 5 Pet., 319. Isham *vs.* Bennington Iron Co., 19 Vt., 230. Miller *vs.* R. and W. R. R. Co., 36 Vt., 452. Brinley *vs.* Mann, 2 Cush., 337.)

"The description of the subjects of the conveyance is very general and broad in some of its parts. It commences by reciting that 'at various times, and under several and different dates, letters-patent were issued, upon the application of Norton, for "improvements in hand-printing and dating stamps, post-office, post-marking stamps, internal revenue

dating and cancelling stamps, and for other improvements not necessary here to name; among which were letters-patent of the following date, *to wit:* January 14, 1862; December 16, 1862; August 4, 1865, and also during the years 1870 and 1871."' It then refers to the deeds of assignment from Norton to Ingalls, among others for a more full description of the patents conveyed, and ends by adding: 'Meaning to convey, and we do hereby convey, unto her, the said Helen M. Ingalls, each and every claim, right, title, and interest we now have, or can or would have, in any of said inventions, improvements, and letters-patent' by means or reason of any contract between us, or either of us, and said Marcus P. Norton and Helen M. Ingalls, or either of them, in, to, or for the said inventions and said letters-patent, or either of them,' &c. The reference to the patent, by stating the inventions covered, includes this one, and it is quite obvious, from the sweeping character of the instrument, that this and all other patents upon those subjects were intended to be included.

"It may be that, as the conveyance to Secombe was wholly *in trust*, upon the evidence carefully examined, such refusal to perform *the trust* would appear as to cause the title to *revert*, and it may be that the interposition of a court of equity would be necessary for that purpose. But that subject has not been examined here, for the reason that the *re*-conveyance appears to be amply sufficient."

As to the validity of the reissues—

Mr. Justice Clifford lays down the undoubted law upon this subject as follows:

"Reissued patents are presumed to be for the same invention as the original, and will only be adjudged to be void because for a different invention where it clearly appears that the reissue contains some new feature of a material character not described, suggested, nor substantially indicated in the specifications, drawings, or Patent Office model." (Thomas *vs.* Shoe Man. Co., *Official Gazette*, vol. 16, page 541.)

Judge Wheeler, in his opinion in this case, says:

"If the reissues are for any other, or substantially different, invention from that described in the original, they are unquestionably void. That the specifications or claims of the patent are different, the invention or discovery remaining the same, is of no consequence. The very object of the reissue is to correct the patent so as to make it conform to the invention. The principal objection to these reissues is the specification of a metal canceller in the combination, as well as cancellers of wood, cork, or other elastic material. If a metal canceller had not been mentioned or alluded to, it might well be said that it did not enter into nor form part of the conception of the inventor; but it was mentioned in the original. It was mentioned as not being so useful or desirable in the combination as an elastic one; but nevertheless it was mentioned as forming a part of an arrangement not patented or desired. The inventor or owner, when the reissues were applied for, desired it, the invention comprehended it, and the patent was made to cover it. The original patent also mentioned a canceller of any suitable material as a part of the combination."

If the court will look at the drawings of the original patent (R. 458) and at the drawings of the reissues (R. 481 and 471), they will see that they are identically the same, the only variance being a more particular description in the latter.

There is nothing in the reissues that is not contained or clearly suggested in the drawings and specifications of the original patent.

The specification of the reissue in 1864 and of the subsequent issues say that the cancelling device may also be made of "iron, steel, or similar material," which statement does not occur in the specifications to the original patent; but the latter specifications show in effect that the inventor had experimented with a canceller made of "solid metal," and that he considered the "wood, cork, and rubber, or similar

material," more effective for purposes of cancellation. Certainly a canceller of iron or steel is here suggested.

Let it be noticed that Norton's reissue of 1864 (the others are like it) was under the act of 1836 (5 Statutes, 122), which does not contain the restrictive provisions as to reissues contained in the act of 1870.

Moreover, a mere substitution of one material for another, such as iron for wood, or wood for bone, is not an invention or a substantial change in the construction of an invention. (Hotchkiss *vs.* Greenwood, 11 How., 248. Battin *vs.* Taggart, 17 How., 83. Powder Co. *vs.* Powder Works, 98 U. S. R., 136.)

A patentee has a right to restrict or enlarge his claim in a patent, so as to give it validity and to effectuate his intention. (Imhauser *vs.* Bourke, 101 U. S. R., 647. Herring *vs.* Nelson Blatchford, R. 301. Allen *vs.* City of New York, *Official Gazette*, Vol. 17, page 1281.)

INVENTION.

On page R. 453 will be found the copy of a paper, date, August 7, 1854, signed Marcus P. Norton, and duly certified by the Commissioner of Patents, and which purports to be an "additional description" to a caveat by said Norton for a machine for mailing and folding letters, filed October 20, 1853, in the Patent Office. Said paper contains a description of the combined post-office stamp, for the use of which this suit is brought, and if it was made at its date there can be no doubt that said Norton was the first and original inventor of said stamp.

D.

Defendant has made an effort to show that this "additional description" was surreptitiously put upon the files of the Patent Office at some unknown time, from which an inference is claimed that it was not made, as it purports to be, on the 7th of August, 1854.

All and the only evidence adduced upon this point by defendant is a copy of certain proceedings in the Patent Office (R. 1,348), carried on there for the purpose of depriving Marcus P. Norton of the right to practice as an attorney in said office. These proceedings consist of certain charges against Norton, the appointment and report of a committee, and the order of D. M. Leggett, Commissioner, debarring Norton, with an endorsement upon said "additional description" by said Leggett, that it had been surreptitiously filed and was not to be regarded as a valid part of the said caveat of October 20, 1853.

Objection was made to the evidence (R. 881), and it is now insisted that it is wholly incompetent to affect the value of said "additional description" in this court, or the rights of the parties in this case. Said proceedings were *quasi*-criminal, in behalf of the United States, to punish said Norton for malfeasance in his office as an attorney of the Patent Office. To illustrate this objection: Suppose John Doe holds a negotiable promissory note, purporting to be made by Richard Roe to John Jackson, an attorney of this court, and endorsed by the latter to said Doe. Jackson is charged with having forged the name of said Richard Roe, and application is made for his expulsion from the bar upon this ground, and it is so ordered. Thereafter John Doe brings a suit upon said note against Richard Roe, in one of the courts of the State. Is a certified copy of the proceedings here for the expulsion of said Jackson competent evidence for any purpose in that suit? Mr. Greenleaf says (vol. 1, page 574,) that a verdict and judgment in a criminal case, though admissable to establish the fact of the mere rendition of the judgment, cannot be given in evidence in a civil action to establish *the facts upon which it was rendered.* (See also Harger *vs.* Thomas, 44 Penn. St., 128, and Bennett *vs.* Fuller, 49 Penn. St., 155.) Moreover, said evidence is inadmissable because the parties to said proceedings and the issues involved were entirely different from those in this case.

When Leggett made the endorsement upon said "additional description," in September, 1871, the patent for the invention therein described did not belong to Marcus P. Norton. Rights of third parties intervened. Can the rights of such parties be prejudiced or destroyed without their day in court? Leggett had no jurisdiction over said "additional description" of 1854. His predecessors in office had passed their judgment upon its validity and value, and had granted patents and reissues for the invention it describes. Nobody was attempting to use it at that time in the Patent Office. Leggett had no more right to declare said "additional description" invalid in his proceedings to debar Norton, than he had to declare the patent which had been issued in conformity therewith invalid. They were *res adjudicata*. Complainant has a right to cross-examine the witnesses by whom the false date of this "additional description" is asserted, to contradict them if necessary, and he is also entitled to the judgment of this court upon the value of such testimony. He cannot be cut off by an extra judicial judgment or *ex parte* order of the Commissioner of Patents. That order, if it has any force, has none beyond his subordinates. Norton's testimony (R. 396.) shows that the above-named proceedings against him were a "put up job," and a shameful abuse of power.

E.

Independent of Norton's testimony, which is full and clear to the effect that said "additional description" was made when it purports to be, there are convincing record proofs to the same end. On the 7th of August, 1857, Norton addressed a letter (R. 142.) to the Commissioner, in which he says: "I send to-day an 'additional description' of my machine for mailing and folding letters," &c. This letter, it is admitted, was received at the Patent Office about the time it bears date. What and where is that "additional description" if the one in question was not the one referred to in

that letter? Nobody pretends that any other has ever been seen or heard of in the Patent Office. Norton's power of attorney to Hodges, dated March 11, 1854, and filed in the Patent Office March 14th, 1854, (R. 455.) speaks of a patent for a *post-office letter-stamp* and a way-bill folding machine.

Moreover, said "additional description" bears upon its face intrinsic evidence that it was made as a part of the caveat for the mailing and folding machine.

F.

Shavor & Corse, assignees of Norton, sued Edmund Hoole in June, 1864, for the manufacture of post-office stamps identically like the one described in the patent, for an infringement of which this suit is brought. Thomas D. Stetson, an experienced expert, and probably known to this court as such, testifies that he prepared the defense in that case (R. 924), and after searching the Patent Office and the records of the English and French patents, set up in the amended answer all defenses that he could discover. Hoole set up the patent of 1859 for an invention made by Norton and assigned to Ransford & Low, by which the post-office stamp was cancelled by cutting, and then says, in his amended answer, "If the said patent of 1863, reissued in 1864, be so held to contain any point in said stamps so made by defendant not contained in said 1859 patent, which had been contained in the caveats of said Norton *dated 1853 and 1854*, or had been invented by said Norton at an earlier date than May 2, 1859, such point was conveyed to the said Ransford & Low, and through them to the present owners of the 1859 patent by the deed of assignment executed by said Norton, dated May 2, 1859, and recorded in liber G 5, page 73, and for the further reason that if it shall be held to have been not so assigned, then that it had been either abandoned or was fraudulently concealed by said Norton." (R. 533.) Now, this answer shows that Ransford & Low claimed that said

caveats of 1853 and 1854 were assigned to them on the 2d day of May, 1859, so that said caveats must have been in existence at that time, which was eleven years before Legget made his discovery that the one of 1854 was surreptitiously filed. The foregoing words "either abandoned or was fraudulently concealed," evidently refer to the antecedent words, "or had been invented by said Norton at an earlier date," meaning that if there was any point in the patent on which that suit was brought invented by Norton prior to May, 1859, and not contained in said caveats of 1853 and 1854, and so not assigned, it had been abandoned or concealed. This answer was filed seven years before Legget's remarkable discovery.

Is there any difficulty in supposing that if this "additional description" was in existence in 1859, it was made and filed in the Patent Office in 1854? Why did not Stetson detect this alleged fraud when he was diligently searching for a defense in the Hoole case? No question was made about this "additional description" till Norton became involved in a bitter fight with Robertson about a dating-stamp, and with Green, Ransford and other owners of the patent of 1859. Meanwhile copies of this "additional description," certified by the Commissioner, were used in Congress, in the Departments, and before the courts without objection, and this copy in this case was made and certified in 1868. Another thing not to be forgotten is that some of the Departments of the Government, including the Patent Office, have been actively interested in defeating Norton's patent, for the invention described in said "additional description," because he and his assignees have contended that the Government and its officers were liable in a large amount for its use. To show the possibilities of this case: On page 458 and following will be found the drawings and specifications of Norton's original patent of 1863, of which the one in suit is a reissue. Defendant has introduced in his Exhibit No. 149 an alleged duplicate of the model filed in the Patent Office by Norton when said patent was issued.

To this Exhibit a bag is attached, said to contain sharp points, to show that the mode of cancellation by this instrument is to perforate instead of blot the postage-stamp. There is not a sign or word in the drawings or specifications to indicate that such a thing was thought of by the patentee at that time, and he swears that no such thing was attached to the model. Who committed this fraud? Has Norton been trying, in this way, to defeat his own patent? Possibly it has occurred to some one that if it could be made to appear that Norton's canceller cut the postage-stamp with sharp points, it was no better than one cutting it with knives.

G.

Defendant's counsel being too good a lawyer to believe much in Leggett's proceeding, after scouring the country with his circulars, has found three or four witnesses who have tried to swear that they were separately the inventors of the combined post-office stamp at some time prior to August 7, 1854, the date of said "additional description."

One Riley, formerly of the post-office in New-York, swears, if he swears to anything, that the combined stamp now in use was introduced into that office as early as 1853; that before that time he invented a thing that in its use accomplished the same results. But his testimony is so confused, uncertain and contradictory that it amounts to nothing. He is completely contradicted by Dix, Yeomans, Ryer and Corbett and other witnesses for defendant, and his statements are so inconsistent with everything else in the case, and so ridiculously false and absurd as to need no further attention. (Riley, R. 860. Ryer, R. 843. Dix, R. 849. Yeomans, R. 835. Corbett, R. 855.)

Charles E. Wheeler, of Cleveland, is another witness who testifies that he tied together with twine a post-marker and canceller in 1853. He applied, in 1863, for an interference with Norton's patent, but his claim was rejected. It is difficult to resist the conclusion that Wheeler's statement as to said date is worse than a mistake.

1st. He swears that said contrivance was made after the order by the Post-office Department, that the post-marking and cancelling of letters should be separately made. (R. 669.) It is beyond question that this order was made in 1860.

2d. On the 28th of November, 1863, Wheeler addressed a letter to Assistant Postmaster-General Zevely, asking for an increase of his salary on account of his having invented the combined post-office stamp and among other things he says: "My object in addressing you is to secure, if possible, your co-operation in the matter; and as you may have forgotten the circumstances, allow me to state that, about the first of July, 1861, the Department issued an order discontinuing the cancelling of stamps with the dating-stamp, and requiring that thereafter the regular cancelling-stamp should be used for that purpose. We followed instructions one day after receipt of the order, with two separate stamps. It was about all one man could do before to stamp our letters, circulars, and newspapers, and, by the change, it would require twice the labor. The idea struck me that, by a combination, all might be done as required by one operation, and immediately took the stamps to a locksmith and had them soldered together. The order and receipts you will find among your records. The smith's name is Jacob Schwartzenburgh." (R. 595.)

On the 7th of May, 1864, E. Cowles, then postmaster at Cleveland, addressed a letter to Postmaster-General Blair, written, as Wheeler admits, at his instance, in which Cowles, referring to the combined post-office stamp, says: "I have every reason to believe that the original inventor of that stamp is a clerk in this office. He invented it immediately upon the receipt of the order issued by Postmaster General Holt, several years ago, requiring a separate stamp to be used in cancelling the stamps on letters." (R. 566.)

Holt was Postmaster-General from March 14, 1859, to July 18, 1861.

Several witnesses have been introduced to sustain Wheeler, as follows: Bishop (R. 704), Cottrell (R. 713), Coon (R. 721), Warner (R. 999), Albinger (R. 1003), Nott (R. 1012), Beardsly (R. 1023).

Respecting this testimony it may be remarked, First, Coon and Warner testify simply as to the different locations of the post-office in Cleveland. Bishop and Cottrell were the two witnesses called to corroborate Wheeler before Complainant introduced rebutting evidence. Bishop had charge of the penny-post in the Cleveland post-office in the latter part of 1853 and fore part of 1854, while the post-office was on Water street. Coon testified that the office was removed from the Herald building to Water street July 1,1853. Bishop testifies that at first in the office on Water street a separate stamp was used, and that afterward Wheeler's contrivance was introduced. Cottrell testifies that in the years 1852 and 1853, and while the office was in the Herald building, he was accustomed to call at the office for love-letters, and five or six times he looked through the delivery window and saw Wheeler using said contrivance. Complainant called certain witnesses in answer to the foregoing, and supposed the case was closed upon that point, but long afterward defendant unfairly reopened it by calling Warner, Albinger, Nott, and Beardsly. Albinger testifies that he went into this office on Water street in the fall of 1854 as a porter, and that at that time the single stamp was used; subsequently Wheeler's contrivance was used. Nott testifies that he was in this post-office from October, 1852, to March, 1853, while it was in the Herald building, and that Wheeler made and introduced his contrivance during that time. Beardsly says that he was in this office three weeks in 1854 or 1855, and that Wheeler's contrivance was then used, but states emphatically that it was in consequence of the order from Washington to post-mark and cancel separately that this contri-

vance was used. These witnesses depend wholly upon their their memory as to these dates. They evidently testify as they have been prompted by Wheeler and others. Independent af any contradiction the inference is irresistible from what Wheeler and his witnesses say, that said contrivance was not made until after the order referred to was made by Postmaster-General Holt.

H.

Complainant has introduced A. L. Bassett (R. 207), who was a clerk in the Cleveland post-office for about a year in 1855 and 1856, and there as stamping clerk from 1859 to 1863.

James McGough, who was an employe in said office for sixteen years, commencing in the Herald building. (R. 187.)

Henry C. Cook, who was a stamper in said office in 1859. (R. 195.)

Henry A. Mastick, who was a clerk in said office in 1850 and 1851; also in 1854; also from 1861 to 1863. (R. 199.)

James R. Haskell, who was assistant postmaster in the Cleveland office from the spring of 1849 to April, 1853. (R. 213.)

Daniel L. Wood, who was mail agent, and worked in said office in 1853 and 1854. (R. 225.)

Letter envelopes post marked Cleveland, Ohio, in 1854, showing that the single stamp was then used, are also in evidence. (*Ibid*, 421, 433, 434.)

All these witnesses for Complainant flatly contradicted Wheeler and those called to his support, and show that nothing but the single stamp was used in that post-office until after said order by the Postmaster-General.

I.

E. S. Zevely. and John Zevely, his son, are two other witnesses discovered by defendant's counsel in Wheeling, West

Virginia, who undertake to testify that the former, while he was postmaster at Pleasant Grove, Maryland, in 1853, used two pieces of wood joined together, by which the postage stamp was cancelled and the letter post-marked at the same blow. (R. 927, 952.)

John H. Zevely swears that he was seven years old at that time, so that from that fact alone his evidence as to what his father did as postmaster at that time is of no value.

E. S. Zevely's statements are so confused and contradictory that it is difficult to define his testimony; but among other things he says: That he did make and use said wooden contrivance at the Pleasant Grove Post-office in 1853. This post-office was kept, the son says, in the shop; the father says in the dwelling-house, where there was no village, and with two other offices was located on a route thirty miles long, with two mails a week, and was in every sense a one-horse post-office. Witness says that he frequently sent out in a mail from that post-office thirty thousand circulars, and he conveys the idea that the object of said contrivance was to facilitate the post-marking and stamp-cancelling of said circulars, bnt he afterwards explodes that idea by saying that the circulars were open and were sent with the postage unpaid. He further states that he commenced making stamps for the Post-Office Department in Washington in 1850, and that he had four different written contracts with said Department to manufacture such stamps from said date up to 1871, exclusive of four years from 1859 to 1863. He further states that he furnished hundreds and thousands of the combined post-marking and stamp-cancelling instruments to the Department during that time. That Deacon Gray was stamp agent for most of the time between 1863 and 1871. He and his son both swear positively that he resigned the post-office at Pleasant Grove and moved to Cumberland, Maryland, in 1853, and that said post-office was then discontinued.

On R. 544 will be found a certified copy of a contract with E. S. Zevely, dated April 1, 1863, for making

single stamps. On R. 550 will be found certified copy of another similar contract, dated April 1, 1867.

W. S. Davis, who is now and has been for twenty-two years, assistant superintendent of the Blank Agency Division of the Post-Office Department, testifies that these two are copies of the only contracts with E. S. Zevely on file in the Department. And he further swears positively that said Zevely never furnished a single combined post-office stamp and canceller to the Department; and that the said Deacon Gray was appointed and took charge of the Blank Agency July 1, 1869, (R. 134.)

On R. 537 will be found a certificate of the Postmaster-General, showing that E. S. Zevely was appointed postmaster at Pleasant Grove on the 28th of January, 1850; that he was reappointed on the 10th of January, 1855, and that the office was discontinued April 1, 1856.

On R. 547 will be found copy of a proposal made by E. S. Zevely to the Post-Office Department in 1862 or 1863, to furnish it with "Norton & Co.'s patent combined stamp with their permission." Comment is unnecessary.

After the time was fixed for the argument of this case in the circuit court and the briefs were all prepared, defendant gave notice of a motion to open the record and introduce new evidence just discovered; and to obviate delay and enable the court to see and hear the witnesses to be called, complainant agreed to waive all objections and allow the testimony to be taken orally before the court at the time of the argument. Accordingly several witnesses were called, only two of whom testified to anything of consequence. These were William M. Ireland (R. 1422) and John P. Rees (R. 1406.) Ireland testifies in substance that in 1849, and in the Philadelphia post-office, he fastened to the side of a postmarker a stamp-canceller; that this device was used accordingly till 1853, and then it disappeared; that he left the office in 185 ; that he returned there in 1861, at which time separate post-markers and cancellers were used and continued to be used until 1863, when he suggested and caused

to be made and used a combined post-marker and stamp-canceller, just before the Government commenced furnishing such instruments for the use of the office.

Ireland's statements, as to what he did in 1849, are not entitled to credit.

1. Because, at that time he was a mere boy, only fifteen years of age, and his duties were not such as to direct his particular attention to the stamping of letters.

2. He evasively admits that what he did was after orders from the Post-Office Department; that the post-mark should be apart from the postage stamp; and all the evidence shows that the first order of this kind was issued in 1860.

3. This suit was pending for two years. Ireland knew of its pendency. Circulars were sent by the United States District-Attorney, as defendant's counsel, to the post-offices of the country, including that of Philadelphia, for evidence to anticipate Norton's invention. Ireland was on intimate terms with Parker, the special agent of the Post-Office Department, but nothing was heard or known of this evidence until the case was ready for argument, when its sudden discovery was as wonderful as its aptitude to the exigencies of the case.

4. Ireland was chief clerk of the Third Assistant Postmaster-General for a part of the year 1864, and from 1867 to 1876, and well knew of the contest going on during much of that time in the Post-Office Department, before Congress and in the courts, about the use by the Government, of Norton's combined post-marker and stamp-canceller; yet he never told the Postmaster-General — is not certain that he ever told anybody in the Department during all that time of his discovery in 1849.

5. Ireland having left the Philadelphia post-office in 1855 returned in 1861, and though the business of the office had greatly increased he saw the separate post-markers and can-

cellers used for two years before it occurred to him to suggest the combined instrument. Such an instrument had then been in use in the New York post-office for about two years, and before the Department in Washington for a much longer time.

6. It is incredible that if a combined post-marker and stamp-canceller was used in the Philadelphia post-office from 1849 to 1853 that it should then be laid aside, as the business increased, and be utterly forgotten until 1863.

7. His testimony shows that he in fact always recognized Norton as the inventor of the combined stamp.

8. He is expressly contradicted by Mr. Norton.

William P. Rees, a poor old man who remembers nothing not fitted to the exigencies of defendant's case, is brought forward to say that, in 1845, in the Philadelphia post-office, he attached a rater to a post-marker which was used there for a while and then cast away, and nothing of the kind has since been seen or heard of in that office. He left the office in 1851, but though he has never thought of the matter since, pretends that he now remembers the alleged display of Ireland's early genius.

Judge Wheeler saw and heard these witnesses and did not believe what they said, and this court, upon reading their testimony, cannot fail to reach the same conclusion.

It will be noticed defendant has offered no writing or record of any kind to anticipate said "additional description" of 1854. No reliance can be placed upon the best and most honest memories as to what was said and done in the course of business twenty-five years ago, especially when they conflict with writings made at or about the time. To make the most of the testimony given by defendant it only shows abandoned experiments. The things that were made, if as represented by said witnesses, were crude, imperfect contrivances, used a little while and then thrown aside.

Judge Wheeler says of these witnesses:

The defendant has introduced evidence tending to show that what is claimed to be the same invention was made by various other persons, and put into use at several post-offices prior to that date even, to wit, 1859. The most prominent are at the Philadelphia office, by William M. Ireland, in 1851; at the New York office, by James J. Riley, in 1852; at the Cleveland office, by Charles E. Wheeler, in 1853; and of these, that at the Cleveland office seems to be most confidently relied upon. If the question in respect to use at this office was to be determined upon a fair balance of proof, and upon the parol evidence alone, the balance might turn in the defendant's favor; but the evidence to defeat the patent by showing an invention *prior* to a clearly established one of the patentee ought to be as clearly established, to the extent, at least, of removing all fair and reasonable doubts. There is in the case important written evidence upon this point, and the whole is to be weighed together. Wheeler himself, on the twenty-eighth day of November, 1863, wrote to A. N. Zevely, Asssistant Postmaster-General, that he made the invention about the first of July, 1861, and that an order from the Department then issued led to it. On the seventh day of May, 1864, E. Cowles, postmaster at Cleveland, by whom Wheeler was employed, and at his instance, wrote to the Postmaster-General that the invention was made immediately upon the receipt of a certain order issued by Postmaster-General Holt. That order was issued at about the time of the invention stated by Wheeler in the letter, and could not have been issued long before. These deliberate statements, made by two persons separately, and at so near the time of the transaction in question, and giving circumstances accompanying it which in fact existed as they stated, and made with a claim of first invention which would interest them to state that the invention was made as early as the facts would warrant, and made in writings now produced, far outweigh in reliability statements made wholly from

memory fifteen years later, and further from the transaction. Taking the whole into account, the defendant has not shown by the requisite measure of proof that Wheeler invented what he did, before Norton did what he did.

The direct testimony as to what Riley invented is contradictory and unsatisfactory. Riley testifies that the instrument which he invented was made by Mr. Hoole, who is understood to be the manufacturer of stamps for the New York office. Hoole was sued by Shavor and Corse for infringing this patent, pleaded to the action, and a trial, verdict and judgment against him were had. He did not show this invention of Riley, which, according to Riley, he must have known of, in that defense. This goes strongly to show that Riley's statements are not correct.

Ireland was a boy fifteen years old in the Philadelphia office in 1851. He was also there, in the same employment, in 1861. He doubtless did do in 1861 what he says he did in 1851. At this distance of time he may have carried back in his mind what he did, with the associations of 1861, to the same associations existing in 1851. When he made it in 1861, he remarked to others that it was his, without stating that he had made it previously. It is manifestly difficult to distinguish occasions in memory after so great a lapse of time.

Prior to 1860 there was nothing to call the attention of those employed in post-offices, imperatively, to the necessity of such an invention; while, in the latter part of that year, the strict requirements of the Post office Department about cancelling postage-stamps separately, and the increased use of the mails consequent upon the war in 1861, brought the subject sharply up. This brought out contrivances for the same purpose in post-offices in various parts of the country, and more probably gave rise to those particularly mentioned, as well as to others about which evidence was given, but which have not been particularly discussed here.

J.

Several witnesses have been introduced by defendant to show that in the latter part of the year 1860 or the fore part of 1861, and after the said order of the Postmaster-General a canceller was tied, riveted, or brazed to the post-marker in three or four different post-offices in the country, and the evidence seems to establish the fact. These, however, were all abandoned, and the combined stamp as described in the patent in question, substituted. Conclusive evidence is given by complainant to show that these instruments were introduced after Norton had made, perfected, and furnished to the Post-office Department for experimental use said combined stamp.

On page R. 598 and following will be found the copy of an itemized account, made at the dates stated, taken from the books of Cyrus A. Sherwood, which shows two facts:

1st. That he manufactured stamps for Norton as early as January, A. D. 1857.

2d. That Norton was experimenting in the construction of stamps from that date till January, A. D. 1865.

Sherwood testifies (R. 139) that he first made a stamp for Norton that would post-mark a letter and cancel a stamp at the same time, in 1857, though it differed somewhat in form from the stamp in this case.

W. S. Davis, who was in 1858 assistant superintendent of the agency, having charge of stamps in the Post-office Department, testifies that he first saw Norton's combined post-marking and stamp-cancelling instrument, with an iron canceller for blotting postage stamps, in the latter part of that year, (R. 134.)

Hon. Horatio King testifies that, as Assistant Postmaster General, having supervision of the stamp business in the Department, he had conferences and conversations with Norton about his combined post-office stamp as early as 1859, and that he never knew or heard of such a thing before Norton's stamp was presented to him. (R. 130.)

On the 11th of April, 1859, Norton wrote to Mr. King, referring to former correspondence on the subject, and asking that his post-marking stamp, which post-marked the letter at the left of the postage stamp, and erased the stamp at the same operation, might be tested in the Troy post-office. (R. 548.)

On the 4th of May, 1859, Mr. King wrote to the postmaster at Troy, authorizing him to use "Norton's improved marking stamp" for three months. (R. 557.)

Norton testifies that in the fall of 1854, and also winter of 1857–'58, he presented his combined post-office stamp to the Department in Washington. (R. 143.) Judge Wheeler says:

"There is much controversy as to when, in fact, Norton first produced this invention. The application was made Jan. 5, 1863; but *that* date is not early enough to anticipate the knowledge and use of the invention by others clearly shown: therefore it rests upon the complainant to establish *prior* invention by Norton. It clearly and satisfactorily appears, from all the evidence, that he produced it before May 4, 1859. By letter dated that day, Horatio King, First Assistant Postmaster-General, authorized the postmaster at Troy, N. Y., to use for post-marking letters at that office, for the term of three months, one of Norton's improved stamps. Norton was an inventor of other improvements in such stamps; aud there is a question as to whether the stamp referred to in that letter was this one or some other. King's testimony and correspondence settle it that this is the one. After he went out of office, he was employed by Shavor and Corse to assist them about obtaining compensation for the use of this stamp, and was kept familiar with it all the while, and his testimony is, that this is the one.

"General John A. Dix was appointed postmaster at New York early in 1860. In August of that year he wrote to King about a similar contrivance which he had got up, and in a reply directed by King was warned that there was *a prior* invention, which might subject that office to a heavy charge, if his contrivance was used. This enables King to testify, with positiveness that entitles it to credit, that he had correspondence with Norton about this stamp before that time. One form of this instrument had a canceller made of cork. Norton permitted it to be used at the New York office to

test it. Its use commenced there soon after the correspondence of Dix with the Department in 1860, and it was found there when Abram Wakeman became postmaster in 1861, or thereabouts, as is shown by his letter to the Third Assistant Postmaster-General, dated Jan. 3, 1863. This correspondence, which does not depend upon mere memory for dates and circumstances, identifies this stamp very clearly. The complainant claims that the invention was made in 1853 or 1854, and described in an additional description of a caveat, filed about Aug. 7, 1854. This additional description produced from the caveat files does not appear to have ever been officially filed by the custodian of the records, and is admitted to be a copy made in 1864, said to have been put into the files by mistake, in place of the original, which is not produced. The defendant has put in evidence the record of proceedings by the Commissioner of Patents, disbarring Norton as solicitor of patents, for surreptiously placing this copy in the files, and adjudging it to be no part of the files; and claims that this destroys the effect of it as evidence. No evidence on which the Commissioner acted, nor any showing the misconduct of Norton, is produced. Norton testifies that the original was duly filed, and afterward copied, and the copy returned to the files, by mistake, as he supposes. The plaintiff claims that the action of the Commissioner legitimately shows nothing on this question, and that Norton's testimony is all the evidence there is properly bearing upon the subject. The defendant has introduced a letter from Norton to Wakeman, postmaster at New York, dated Feb. 6, 1864, when Norton was interested in this patent as part owner, stating that "the *double cancelling stamp now* used by you in your post-office *is my invention* as far back as the year A. D. 1856, as I can most fully and satisfactorily prove. It was patented to me in the early part of the year 1863, upon an application made by me a long time before then. I had several such stamps made in 1858, as I can prove by the person who made them," for the purpose of impeaching the testimony of Norton as to the caveat. The caveat as such, long before the application for the patent, ceased to be operative, because not followed up. The only use the copy found can be is as a piece of evidence. The judgment of the Commissioner, as such, extended only to the exclusion of Norton as solicitor, and not to the effect of the paper as evidence *en pais* (Act of July 8, 1870, sect. 16; Rev. Stat. U. S., sect. 487), although its effect upon the instrument as a caveat of

record might be greater. (Robertson *vs.* Secombe Manufacturing Company, 10 Blatch., 489.) What the weight of the evidence produced, and legitimately bearing upon the question, as to whether there was in fact an original paper of which the one now in the files is a copy, is not now considered, because it does not appear to be material. This letter of Norton's and its connection is stated, however, because, in connection with the evidence before stated, as to *when* he actually produced the patented article, it does appear to be somewhat material. It was introduced by the defendant as evidence. The part relied upon was that inconsistent with what Norton and the plaintiff now claim. But when so put in, it was legitimate evidence, according to what should appear to be its just weight, as well as to those parts in favor of, as to those against them. This is a well settled rule in respect to evidence of admissions. (Stead *vs.* Heaton, 4 T. R., 669; Davies *vs.* Humphries, 6 Mees & Welsh, 153; 1 Green Ev., § 201; Wright *vs.* Williams, 47 Vt., 222.) The latter tends to show that Norton actually had such stamps made in 1858. It was written before there was any controversy as to this fact, and is strongly corroborative of the correctness of the finding, that the invented and patented instrument was brought forward before May 4, 1859.

K.

Copies of several patents have been offered by defendant to show priority of invention in others, but they are so clearly irrelevant that further notice of them is not necessary, excepting perhaps the patent of 1859 to Low & Ransford. (R. 121.)

Norton, in the course of his experiments, seems to have invented a mode of cancelling stamps by cutting them with a series of knives attached to a stamp with revolving dates, and for this the patent of 1859 was issued to Low & Ransford, his assignees.

Nothing is claimed as an invention by this patent except these knives. As to this invention it may be remarked :

1st. It differs in the materials from which it is made, in the form of its construction and in the result produced from the invention in suit.

2d. All the witnesses who speak upon the subject testify that it was worse than useless, and was of no value as an improvement of the post-office stamp. It was frequently tried, and its use wholly abandoned. (R. 542, 841, 846.) When an invention is found to be worthless, a patent for it is invalid and fails. (Bliss *vs.* City of Brooklyn, 6 Fisher, 291.)

3d. Samuel P. Kettle, expert for complainant, and J. W. Robertson, expert for defendant, both testify in effect that the patent of 1859 and the patent in suit are for different inventions. (R. 103–909.)

4th. Norton invented the combined stamp now in use prior to 1859; if Ransford and Low took that stamp and changed it, substituting knives for cutting, instead of cork or rubber or iron for blotting, and obtained a patent for that change as an improvement, and subsequently, in 1863, Norton obtained a patent for said combined stamp, invented as aforesaid, the patent of 1863 would relate back to the time of the invention and is good as against the patent of 1859. (Fales *vs.* Wentworth, 5 Fisher, 305.)

5th. Admitting all that can be claimed for the patent of 1859, the use of the combined stamp made in accordance with the patent in suit, would be no infringement of it, for the cutters or knives are not employed in the latter. Mr. Justice Davis says, in Eames *vs.* Godfrey, 1st Wallace, 78: "The law is well settled by repeated adjudications in this court and in the circuit courts of the United States, that there is no infringement of a patent which claims mechanical powers in combination, unless *all* the parts have been substantially used. The use of a part less than the whole is no infringement." See, also, Gould *vs.* Rees, 15 Wallace, 187; Seymour *vs.* Osborn, 11 Wallace, 548.

TWO YEARS PRIOR USE.

Norton's patent of April 14, 1863, was issued under the acts of 1836 and 1839, and therefore it and its reissues are to be adjudged under those acts. (Colgate *vs.* Western Union Tel. Co., pamphlet copy, 130.)

L.

To sustain the defense on the ground of prior use it is necessary to show that the thing patented was in use more than two years, by the consent of the patentee, before application was made for his patent, or that the invention was abandoned to the public. Mr. Justice Woodbury, in Allen *vs.* Blunt, 2 Woodbury & Minot R's, 143, says:

"Hence, whatever may have been thought on this in England, as in Dolland's case, in the special language of their laws (2 Hen. Black, 487), or by Phillips here, page 395, before the act of 1839, it is clear under that act and the act of 1836, the intervening use in order to defeat a prior invention must be public and *with the consent of the inventor* and continue two years."

See, also, Pierson *vs.* Eagle Screw Co., 3 Story R., 408.

Curtis on Patent Law says, sec. 390:

"Of course mere delay to take out a patent unaccompanied by public use or sale of the same with *the consent* or *allowance* of the patentee before his application, however long may be the interval between the completion of the thing and the application, will have no effect upon the patent."

Parks *et al. vs.* Booth, Vol. 17, *Official Gazette*, page 1089.

No pretext is made that Norton, prior to his application for his patent of April 14, 1863, had any knowledge of the alleged use of anything like the stamp described in that patent anywhere except in the New York City and Troy post-offices. Assistant Postmaster-General King, upon the application of Norton, ordered the use of said stamp for three months in 1859 in the Troy post-office, for the purpose of testing its value. General Dix was postmaster in New York in August, 1860, and claims that at that time he caused a canceller to be soldered to the ordinary stamp, so that a letter could be post-marked and the postage stamp cancelled separately at one blow. His attention was called to an affidavit

made by him in February, 1864, in which he stated: "I found that Norton was an older inventor of the said stamp and cancelling device than I was. He consented to my using the same in the New York office, with a view of giving it a thorough trial, without charge for such use." His attention was also called to another part of the same affidavit in which he said: "I have no claim prior to his. I then believed and now believe the said invention was his as the original and first inventor and to be valuable and useful for the purposes aforesaid." General Dix does not remember the making of this affidavit but affirms its correctness by saying that these statements accord with what he had always said upon the subject. (R. 853.)

That the combined stamp was used in the New York post-office for the purpose of testing its value is evidenced by letters written at that time. On the 25th of July, 1862, Norton received a letter from the Post-office Department informing him that his letter of a prior date would be referred to the postmaster at New York for a full report as to his stamp, &c. (R. 541.) On the 7th of October, 1862, Norton received another letter from the Department from which it appears, that on the 2d of the same month he had suggested to the Postmaster-General cancellation by cutting the postage stamp as an improvement upon his "post marking and cancelling stamp," as originally presented, and doubts were expressed in that letter as to the value of the cutting device. (R. 541.) On the 3d of January, 1863, the postmaster in New York reported to the Post-office Department, that, at its request, he had been testing Norton's "double post-marking and cancelling stamp iron" in various ways, and had found it indispensable to that office. (R. 542.)

Mr. Norton states as to the arrangement in New York, and his delay in applying for a patent as follows:

"In the fall of the year 1860, the Post-office Department expressed a willingness or desire to use the invention above referred to, and contained in the bill in this suit, and had

some correspondence with the postmaster at New York with reference to the same. I consented that that invention might be used by the Government or Post-office Department simply and only for trial tests or experimenting; those tests or experiments were commenced in the post-office in the city of New York some time in the fall of 1860, or the early winter of that time; those experiments were continued during the year 1861, and for some time in the year 1862, at which time I called at the Post-office Department and made inquiries as to whether the tests that had been made were satisfactory to that department. I was told that no satisfactory answer could be given me at that time because no application of reference in writing had been made to the postmaster in New York; within a few days after that time I wrote a letter to the Postmaster-General requesting him to refer that invention to the post-office at New York for experimental tests; a few days afterward I received a letter from the Post-office Department saying, among other things, that my invention had been so referred, and in due time would be reported upon; on the 3d day of January, 1863, a report was made by the postmaster in New York to the Post-office Department, saying, among other things, that the tests or experiments had proven entirely satisfactory to the post-office at New York, and recommended the general adoption by the Post-office Department of that invention. On the 5th day of January, two days after that report was made, I filed my application for a patent on this invention in the Patent Office of the United States. Had the postmaster at New York made that report at an earlier time after December, 1860, I should have filed the application for a patent as soon as it could have been done, having my model and drawings prepared for that purpose some time in the early winter of 1861." (R. 143.)

Judge Wheeler says upon this point:

"This patent was granted while the Act of 1836 and that of 1839, in respect to the defense of public use and sale of the invention were in force. By the provisions of the Act of 1836, Sect. 15, it was only public use, or being on sale, with the consent and allowance of the patentee, before the application for a patent, that would defeat the patent. The Act of 1839 did not change the character of the public use, or being on sale, that would defeat a patent, but pro-

vided that no patent should be held invalid by reason of them, unless "such purchase, sale, or prior use, has been for more than two years prior to such application for a patent," Sect. 7. (Andrews *vs.* Carman, 13 Blatch., 307. Elizabeth *vs.* Pavement Co. 97 U. S. 126.) No use shown, except that at the New York office, was with the knowledge even of the patentee. The application was filed Jan. 5, 1863, so that a sale or use to defeat the patent must have been prior to Jan. 5, 1861, while General Dix was postmaster there. It is not very clear upon the evidence that this invention actually got into use there before that time, and this defense, like others of the same class, ought to be made out by clear proof. But, whether it was so in use before that time or not, it is quite clear, from all the circumstances attending the use, whenever it was had, that it was not a public use within the meaning of the statute, but a private use for testing the invention, and informing the inventor as to its perfection and usefulness, with the design on his part, all the while, to procure a patent for it, when it should prove to be ripe for that purpose. (Elizabeth *vs.* Pavement Co., 97 U. S. 126.) The correspondence between the inventor and the postmasters, and between them and the post-office departments, abundantly show this."

M.

To succeed with this defense of prior use the defendant must show what amounts to an abandonment to the public of his invention by Norton, and it must be clearly proven, and is not favored. (Jones *vs.* Sewall, 6 Fisher, 363.)

No case, it is believed, can be found where prior use, accompanied by an *assertion* of the inventor's right, has been held to invalidate his patent. (Mellus *vs.* Silsbee, 4 Mass., 108; Shaw *vs.* Cooper, 7 Peters, 319; Pennock *vs.* Dialogue, 2 Peters, 1.)

"It is also clear that where the act or acts of user were by way of experiment in order to perfect the invention the inventor does not lose his right." (Curtis Patent law, 387–389.)

Mr. Justice Story says in Wyeth *vs.* Stone, 1 Story R., 373, that to take away the right of inventor to his patent "the

public use must be either generally allowed or acquiesced in or at least be unlimited in time or extent or object."

No circumstance can be found in this case to indicate that Norton ever abandoned or intended to abandon his invention to the public, but on the contrary, his efforts since 1859 to have his right therein recognized have been remarkable for continuity and persistency.

N.

As to prior use: Must be with consent of inventor; clear proof required. (Jones *vs.* Sewall, 6 Fisher, 364.) Use must be more than two years with consent of inventor. (Sisson *vs.* Gilbert, 5 Fisher, 109.) Presumption against prior use. (Brown *vs.* Whitman, 5 Fisher, 526.) No delay in applying for a patent a bar unless the invention has been in use for more than two years with consent of inventor. (Russell *vs.* The Eden Manufacturing Co., 5 Fisher, 641.) Use must be public and common and with consent of inventor to defeat patent. (Amer. H. and L. Co. *vs.* Amer. Tool Manuf'g Co., 4 Fisher, 284.) No time elapsing after an invention before application for patent a bar if the invention has not been abandoned to the public, or been in public use with the consent of the inventor. (Wood *vs.* Cleveland R. R. Co., 4 Fisher, 557.) Prior use for two years must be with the consent of the patentee. (Bartholomew *vs.* Sawyer, 1 Fisher, 520. Ransom *vs.* N. Y., 1 Fisher, 273.) The two years' prior use must amount to abandonment. (Sanders *vs.* Logan, 2 Fisher, 173.)

O.

As to the right of the inventor to experiment: Experimental use allowed. (Nich. Pave. Co. *vs.* Elizabeth, 6 Fisher, 428.) An experimental use allowed that does not amount to a fraud upon the public. (Sisson *vs.* Gilbert, 5 Fisher, 109.) Inventors have the right to experiment before taking out patent. (Cox *vs.* Greggs, 2 Fisher, 177.)

P.

All the things used in 1860, including the one referred to by General Dix, claimed to be like Norton's invention, were nothing more than abandoned experiments. (Murphy *vs.* Eastman, 3 Fisher, 308. Hayden *vs.* Suffolk Manuf'g Co., 4 Fisher, 102, and Piper *vs.* Brown, 4 Fisher, 184.) They were more or less imperfect, and were laid aside, and the stamp according to Norton's patent substituted. (Allman *vs.* Holley, 6 Fisher, 538.)

Q.

Norton having followed up his invention with experiments for its improvement and the obtaining of a patent, is entitled to have such patent declared valid as against others who were negligent or less diligent in asserting their rights. In a race of diligence, he who perfects his invention and obtains a patent must be held to be the first inventor. (Taylor *vs.* Archer, 4 Fisher, 455. Reeves *vs.* Kingston Bridge, 5 Fisher, 462. National F. O. Co. *vs.* Arctic O. Co., 4 Fisher, 519.

R.

Various allegations are made in the answer as to Norton's patent of 1863 and its reissues, to the effect that they were obtained by frauds and misrepresentations, and are unlawful, invalid, &c. To all these it is a sufficient answer to say:

1st. That as the facts upon which these mere conclusions of law are founded are not set up, the defendant upon such a state of pleadings cannot avail himself of those defenses. (Gear *vs.* Grosvenor, 6 Fisher, 314.)

2d. Patent cannot be impeached collaterally for fraud. (Eureka Co. *vs.* Bailey Co., 11 Wallace, 488. Rubber Co. *vs.* Goodyear, 9 Wallace, 788.) Decision of Commissioner cannot be impeached collaterally. (Dorsey *vs.* Marsh, 6 Fisher, 395. A. Wood & P. Co. *vs.* G. F. Co., 4 Fisher, 324. Crompton *vs.* Belknap Mills, 3 Fisher, 547.)

S.

3d. When the Commissioner reissues a patent, it is conclusively presumed that all the facts necessary for that purpose were before him, and the Court can make no inquiry upon that subject not arising upon the face of the patents. (Weber *vs.* Gill, 6 Fisher, 93. Carver *vs.* Boston Elastic Co., 5 Fisher, 96.) Action of Commissioner in granting reissue final and conclusive. (Chicago Co. *vs.* Busch, 4 Fisher, 401. Putnam *vs.* Am. B. O. Co., 4 Fisher, 470.)

4th. No evidence has been adduced by defendant to show any fraud as alleged in the answer.

He has produced a certified copy of the file-wrapper and its contents as to Norton's patent of April 14, 1863, but for what purpose does not appear. They were objected to, and are not evidence. (Westlake *vs.* Carter, 6 Fisher, 521.)

T.

Defendant alleges that if Norton was an inventor as described and claimed in his patent of April 14, 1863, the thing he invented was of no utility or value.

To this there are two conclusive answers:

1st. The use of said invention by defendant is not only evidence of its utility, but he is thereby estopped from denying its value. (Smith *vs.* O'Connor, 6 Fisher, 473. Whitney *vs.* Mowry, 4 Fisher, 208. Hays *vs.* Sulsor, 1 Fisher, 533.)

2d. One of defendant's predecessors says: "The design of Mr. Norton is indispensable to us." (R. 542.) Postmaster-General Randall says as to Norton's cancelling stamp, "The Department has already saved several hundred thousand dollars by its use, and I have no doubt will continue to save large sums by its future use." (R. 555.)

Postmaster-General Creswell says: "The combined stamp has been demonstrated by continuous use during nearly eight years to be valuable in large post-offices and in the railway service. It is impossible to estimate with any degree of accuracy the amount of money which had been or which may be saved by its use." (R. 503.)

On R. 494 will be found the report of the Committee on Post-offices and Post-roads of the House, and on R. 497–499 two reports from the Committee on Post-offices and Post-roads in the Senate, all of which affirm the great utility of Norton's combined stamp.

All the witnesses on both sides in this case who speak upon the subject testify to its value as a labor-saving machine.

Defendant has made a feeble effort by the testimony of his expert, Robertson, to show that there was no invention about Norton's combined stamp, and therefore it was not patentable. His testimony, if it had any force, is not competent, for no such defense is made in the pleading. The answer denies the patentability of Norton's stamp because it had been anticipated by others, and not otherwise. Robertson produces a small clothes-marker and shows that if it was made over and into something else it would answer the purpose of Norton's stamp. The clothes-marker and the testimony with it are not admissable, because no notice of them was given in the answer as required by statute. (Railroad Co. *vs.* Dubois, 12 Wallace, 47.) Norton's experiments from 1857 to 1865, as evidenced by Sherwood's books (R. 598); the correspondence of the Post-office Department, showing that various devices for post-marking and stamp-cancelling were tried in the post-offices; the numerous patents and models offered by defendant; continuous experimenting in the New York post-office, as testified to by Yeomans, Ryan, and others (R. 841 and 846), by which the superiority of the Norton stamp over all others was demonstrated;—all these show that ingenuity upon this subject has been taxed, and by Norton alone with success.

Postmaster-General Creswell says of the Norton stamp: "Simple as it is, no other device has been hit upon that will do the work of this one without adding largely to the number of stamping-clerks employed, and consequently increasing the expenses of the Department." (R. 503.)

Robertson is the man who had a bitter controversy with Norton about the revolving dating-stamp, and though a swift witness for the defendant, his cross-examination shows an utter failure to swear away Norton's patent. He is also completely demolished by Mr. Kittle, the expert for complainant.

That Norton's combined stamp is patentable, appears from the following authorities: Forsyth *vs.* Clapp, 6 Fisher, 339. Penn. Salt Co. *vs.* Thomas, 5 Fisher, 151; Bailey W. & M. Co. *vs.* Lincoln, 4 Fisher, 379; Dennis *vs.* Eddy, 4 Fisher, 427; Watson *vs.* Cunningham, 4 Fisher, 531; Woodson *vs.* Simpson, 3 Fisher, 105; Purnell *vs.* Illinois Railroad Co., 3 Fisher, 333; Eames *vs.* Cook, 2 Fisher, 151; Flatbush *vs.* Cook, 2 Fisher, 671; Maury *vs.* Sizer, 1 Fisher, 17; Carver *vs.* Rice, *id.*, 198; Stanhope *vs.* Elkinton, *id.*, 350; Bell *vs.* Daniels, *id.*, 378; Mulford *vs.* Pierce, 14 Blatch., 141.

These cases hold that a combination of old elements, so as to produce a new and useful result, is patentable; that uitlity is evidence of patentability; that apparent simplicity of structure, if new and useful result is produced, is not a valid objection, and that patents have been granted and upheld for combinations as simple as Norton's combined stamp.

Judge Wheeler says: "That its production did involve the exercise of inventive faculties and skill is apparent from the various steps, trials, and tests by which it was reached, from the fact that so many other patents have been granted upon attempts approaching the same object without accomplishing it, and from the fact that the patent has sustained a suit for infringement of it against a party using the invention in fulfillment of a government contract."

U.

Aside from the above considerations, complainant's case stands upon other and impregnable grounds.

Mr. Ferry, in his report from the Committee on Post-offices and Post-roads of the House, in July, 1866 (R. 494), says of the stamp in question:

"The invention having been sufficiently proved, and its utility satisfactorily tested by uninterrupted use in various post-offices of the States, application was made to the Thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already referred to. Another claimant to said invention appearing, the committee of that Congress who were then considering the subject of compensation, decided that, since the validity of the title to the same was called in question, *that* should first be determined by the courts, and the case was accordingly thereupon remanded.

"By a transcript of the proceedings and judgment, now submitted as rendered in the United States Circuit Court of the Northern District of the State of New York, it appears that the question of validity of title was tried, and decided in favor of the patentees, Shavor and Corse. Again, therefore, the patentees appear before the present Congress, claiming a suitable remuneration for their invention, on condition of an assignment of all their right and title to the same to the United States."

Reference is here made to the suit of Shavor & Corse *vs.* Hoole (R. 514). Hoole was sued for an infringement of Norton's patent, in making stamps according to the description in said patent. His defense was prepared by an able expert, Mr. Stetson, and his counsel was the well-known and experienced attorney in patent cases, Mr. Gifford. The jury in that case, under the instructions of the court, found that—

1st. Norton was the first and original inventor of said stamp.

2d. That it was useful and valuable.

Some effort has been made to weaken the force of this verdict, upon the ground that Hoole, after filing his answer and fixing a day for trial, did not appear.

Verdicts given without trial and without collusion are of as much weight as any. (Potter *vs.* Fuller, 2d Fisher, 261.) Verdicts for nominal damages at law approved. (Clark *vs.* Fire Co., 2 Fisher, 233.) Not a particle of evidence is adduced to show collusion, and Mr. Hoole, in his deposition before the Court of Claims (R. 539) says:

"I was made a party to a proceeding instituted in the United States Court for the Northern District of New York to test the validity to this patent. I did not defend that suit at the instance of the United States. They did not give me any instructions in relation to it. I was not present at the trial; neither was my counsel, Mr. Gifford, of this city, who was to have been there, but did not get there, but he left the case in the hands of my expert in the case, who was present. I was not there, by advice of my counsel, Mr. Gifford. I called no witnesses for the purpose of proving the facts set up in my answer. Three witnesses, however, were subpœnaed, but it was not considered expedient by my counsel to try the case. I commenced the thing, believing that Marcus P. Norton was not the inventor of the patent. I came out of it believing that he was. The failure of my efforts to procure testimony to the contrary was the cause of my believing that Mr. Norton was the original first inventor.

Shavor and Corse sued the United States in the Court of Claims, upon an alleged contract for the use of Norton's stamp.

Issues were made in that case as to the invention and the utility of said stamp, and evidence given thereon.

The court found that there was no contract as alleged; but they also found that Marcus P. Norton's *invention* for post-marking and stamp-cancelling letters "had been of great use and value to the United States." (R. 332.)

Claims for the use of this invention were before the Thirty-eighth Congress, 1864 and 1865. Reports were made from

the Committees of Post-offices and Post-roads of the Senate and House in the Thirty-ninth Congress, 1866 to 1869, the former recommending the payment of $50,000 and the latter $100,000, which latter was adopted by the Senate. Reports were made from said committee of the Senate in the Forty-first Congress, 1869 and 1870, and the Forty-second Congress, 1871 and 1872. (R. 494, 497, 499, 506.)

Postmaster-General Creswell in 1871 investigated, by direction of Congress, the questions as to Norton's invention, and made a report thereon. (R. 503.)

All these judicial proceedings, investigations and reports hold and affirm that Norton was the first and original inventor of the combined post-marker and stamp-canceller, and that it is of great utility and value.

These proceedings estop the United States from now controverting those facts. It is inequitable at this time to question the correctness of the uniform judgments of courts, committees of Congress and Department officers upon this subject, covering a period of so many years.

V.

Defendant, as to infringement, denies that he is now using or has ever used any machine or device for the post-marking of letters or cancellation of the postage stamps thereon which is an infringement upon or violation of any right secured, if any there be, to the said Norton by said letters-patent of April 14, 1863, or to him or his assignees by any of the issues of said letters-patent.

This is no denial of infringement. It is a denial of a conclusion of law. If the infringement is not explicitly denied in the answer, it must be taken as admitted. (Stuart *vs.* Shartz, 6 Fisher, 35; Agawam Company *vs.* Jordan, 7 Wallace, 609.)

Infringement is also proven. (R. 131, 133.)

As to the liability of the defendant, two points are made in his behalf—

1st. That letters-patent do not exclude the officers and agents of the Government from using the patented article in the public service.

2d. The defendant infringed the Norton patent (if he infringed at all) as postmaster of the city of New York.

To these points there are several sufficient answers—

1st. Section 5 of the Act of 1836 (5 Statutes, 117), provides that "every patent shall contain * * * and in its terms grant to the applicant or applicants, his or their heirs, administrators, executors and assigns * * * *the full and exclusive right and liberty* of making, using and vending to others to be used the said invention or discovery," &c. How can this right be full or how can it be exclusive if all the officers and agents of the Government can use the invention at pleasure?

2d. It was the intent and understanding of Congress that the officers and agents of the Government were excluded from the use of a patented article.

Section 1673 of the Revised Statutes provides that "No royalty shall be paid by the United States to any one of its officers or employes for the use of any patent," &c.

This clearly implies that the United States are bound to pay for the use of a patent outside of this prohibition.

Section 1537 provides that no patented article shall hereafter be purchased or used in connection with any steam vessels of war until the same has been submitted to a Board, &c. Here is a clear implication that war vessels of the Government have no right to use a patented article without acquiring the right under the patent.

3d. Acts have been passed by Congress for the relief of persons whose patented inventions have been used by the Government. (U. S. Statutes, vol. 17, page 677.)

4th. All of the proceedings in Congress relative to the patent in question indicate no doubt as to the obligation of the government to pay for the use of a patented article.

5th. Contracts have been made by the Departments of the Government to pay for the use of patented articles. (U. S. *vs.* Burns, 12 Wallace, 252.)

6th. All the authorities are clear to the effect that what the patentee acquires under his letters-patent is property. In McCowl *vs.* Everest *et al.*, 1 Wood's R., 201, Judge Wood says: "The property in a patent is just as much under the protection of the law as property in lands. The owner has the same right to invoke the protection of the courts, and when he has made good his claim to his patent and shown an infringement of it, it is the duty of the court to give him the same relief meted out to suitors in other cases." (Colgate *vs.* Mt. Ocean Tel. Co., *Official Gazette*, vol. 17, page 194.)

Now if a patent right is private property it is under the protection of Article 5 of the Constitution, which provides "nor shall private property be taken for public use without just compensation."

The General Government is bound by its contracts. (Sinking Fund Cases, 99 U. S., 719.)

A grant is a contract. (Fletcher *vs.* Peck, 6 Cranch., 87.)

In McKeever *vs.* The United States, 14 Ct. of Claims, 422, after a thorough discussion of this question the court holds that the General Government is bound by its letters-patent.

Defendant relies upon Feather *vs.* The Queen, 6 Best & Smith, Q. B. Reports, 257, in which it is held that a patent does not preclude the Crown from the use of the invention protected by the patent.

Whatever may be the rule in England, and though the Government here is not bound by the limitations and prohibitions of some statutes, the doctrine of this country is that the Government has no right to change or violate a grant which it has absolutely made and under which property rights have been acquired.

The English idea goes upon the assumption that the King can do no wrong, and as the infringement of a patent is a tort, it follows that the King cannot infringe. Furthermore an English patent is a special favor granted by the Crown to one subject to the exclusion of other subjects, but without prejudice to the royal prerogative. Chief-Justice Cockburn, in delivering the opinion of the court, in Feather *vs.* The

Crown, *supra* says: "It appears to us on the other hand, that there are parts of the letters-patent from which it is to be inferred that the Crown was not to be bound. The grant is of special license, full power and sole privilege and authority, &c., terms which appear referable to a right confined as against the fellow-subjects of the grantor rather than as against the Crown. This is followed by a prohibition to all and every person and persons, bodies politic and corporate, and all other of our subjects whatsoever against making, using or practicing the invention upon such pains and penalties as can or may be justly inflicted on such offenders for their contempt of this our royal command, and such offenders are further answerable to the patentee in damages. It is obvious that none of these provisions by which the exclusive right of the patentees are protected can be applicable to the Crown; all tend to show that the privilege was intended to be against fellow-subjects."

Letters-patent in this country grant the "full and exclusive right" and there is no room for inference or any ground to suppose that the officers and employes of the Government are not thereby, with respect to the right granted, put upon the same footing with other citizens of the country. Mr. Justice Field says in United States *vs.* Burns, 12 Wallace, 252: "An officer in the military service, not specially employed to make experiments, with a view to suggest improvements, devising a new and valuable improvement in arms, tents or any other kind of war material, he is entitled to the benefit of it, and to letters-patent for the improvement from the United States equally with any other citizen not engaged in such service, and the government cannot, after the patent is issued, make use of the improvement any more than a private individual without license of the inventor or making compensation to him."

As to the point that defendant was postmaster in New York, Chief-Justice Cockburn, in Feather *vs.* The Queen, *supra*, says:

"But in our opinion no authority is needed to establish that a servant of the Crown is responsible in law for a tortuous act done to a fellow-subject though done by the authority of the Crown, a position which appears to us to rest on principles which are too well settled to admit of question, and which are alike essential to uphold the dignity of the Crown on the one hand and the right and liberties of the subject on the other. We entertain no doubt that if the effect of the letters-patent had been to exclude the Crown from the use of the invention an action could have been maintained by the patentee against any one by whom the invention had been used in the public service. On the other hand, as the infringment of a patent right constitutes a tort or wrong in the proper sense of the term, and as no wrongful act can be alleged against the Crown, we are of opinion that even if our opinion upon the first question had been in favor of the suppliant a petition of right would not be open to him as a means of redress." (See also Entick *vs.* Carrington, 2 Wel., 275; Money *vs.* Leach, 3 Burr, 1742; Mostyn *vs.* Fabrigos, Cowper, 161; Johnston *vs*, Sutton, 1 Term Rep., 502; Wils *vs.* McNamara, 1 Term Rep., 536; Sutherland *vs.* Murray, 1 Term Rep., 538.)

Judicial or *quasi* judicial officers are not personally liable for an error of judgment, but it is well settled in this country that ministerial and executive officers are personally liable for an injury to person or property not authorized by law, and good intentions or orders from superior authority do not excuse them.

Marshals, sheriffs and constables are liable for injuries resulting from their official acts not warranted by law. In Buck *vs.* Colbath, 3 Wallace, 334, Mr. Justice Miller, in delivering the opinion of the court as to the liability of U. S. marshals in executing ordinary writs of attachment or execution, says:

"The officer has a very large and important field for the exercise of his judgment and discretion. First, in ascertaining that property on which he proposes to levy is the property

of the person against whom the writ is directed; Secondly, that it is property which by law is subject to be taken under the writ; Thirdly, as to the quantity of such property necessary to be seized in the case in hand. In all these particulars he is bound to exercise his own judgment and is legally responsible to any person for the consequences of an error or mistake in its exercise to his prejudice. He is liable to plaintiff or defendant or to any third person whom his erroneous action in the premises may injure. And what is more important to our present inquiry, this court can afford him no protection against the parties so injured. (See also Weber *vs.* Henry, 16 Mich., 399; Rhodes *vs.* Patterson, 3 Cal., 469; Hallowell & Bank *vs.* Howard, 14 Mass., 181; Walcot *vs.* Pomeroy, 2 Pickering, 121; Campbell *vs.* Phelps, 17 Mass., 244.)

Military and naval officers of the Government are liable for their official acts not warranted by law.

Little *et al vs.* Baneme *et al.*, 3 Cranch, 170, is a case in which it was held that a commander of a ship-of-war of the United States, in obeying his instructions from the President of the United States, acts at his peril. If those instructions are not strictly warranted by law he is awswerable in damages to any person injured by their execution.

In Mitchell *vs.* Harmony, 13 How., 115, it was held that a military officer in the discharge of his official duty was liable for private property which he had caused to be destroyed, Mr. Chief-Justice Taney, in delivering the opinion of the Court, says: "And upon principle, independent of the weight of judicial decision, it can never be maintained that a military officer can justify himself for doing an unlawful act by producing the order of his superior."

Burns *vs.* Clarke, 5 Otto, 204, is a case in which a military officer was held liable for property destroyed, for the reason that the *locus in quo* was not Indian country, as he supposed it to be.

Mr. Justice Clifford, in delivering the opinion of the Court in the case of Comnegys *vs.* Newton, 4 Otto, 234, says: "Pub-

lic employment is no defense to the employe for having converted the private property of another to public use without his consent and without just compensation. Agents of the public have no more right to take such private property than other individuals." To the same effect is the decision of the Court in Brady *vs.* The Atlantic Works, 4 Clifford, 408, Judge Wheeler says:

"One ground upon which the defendant claims he does not infringe is, that, in all he has done, he has acted as the officer of the Government in the performance of his duties for the benefit of the Government, and that the monopoly granted, in granting the patent, did not extend to nor cover any use by the Government. But the exclusive use of the invention granted to the patentee is property; and this property is now owned by the plaintiff. The grant saved nothing for the use of the Government; it was exclusive absolutely throughout the United States. It was granted by express law of Congress, pursuant to the Constitution, without which it could not exist. But all property is upheld by law, either expressly or impliedly enacted or adopted, all of which is the law of the land, the same as the satutes upholding patents are. This property, like all other private property recognized by law, is exempt from being taken for public use without just compensation by the supreme law of the land. (Amended Constitution of the United States, Art. V.); nor can it be so taken by any officer, at will, in time of peace, leaving the owner to seek compensation. Mitchell *vs.* Harmony, 13 How. 115. The property in a patented invention stands the same as other property in this respect. (United States *vs.* Burns, 12 Wallace, 246. Cammeyer *vs.* Newton, 94 U. S. 225.)

There was no law that required Mr. James to use Norton's invention. There was no order of the Postmaster-General requiring him to use it. The instruments he used were made in New York city under his directions; were paid for by him, and charged according to his judgment. (R. 1506.)

Defendant says, in his answer, that he has acted in this matter "with the consent, approbation and approval, and under the direction of the Postmaster-General." Assuming that he

used Norton's invention this averment does not show that he was required or commanded to do so by the Postmaster-General. It does not appear that the use of the invention was not his voluntary act.

The averment is fatally defective in all respects. Mr. Justice Field, in Bean *vs.* Beckwith, 18 Wallace, 515, says: "Whenever one justifies in a special plea an act which in itself constitutes at common law a wrong upon the process, order, or authority of another, he must set forth substantially and in a traversable form the process, order, or authority relied upon, and that no mere averment of its legal effect without any other statement will answer.

X.

No notice is taken by defendant of complainant's claim for damages, and of course the allegations of the bill in that respect are admitted.

Y.

Very much of defendant's testimony has been directed to an attack upon the veracity of Mr. Norton. Early in the history of this stamp business he fell into a controversy with Green, Ransford, and their coadjutors, by whom he has been pursued with an untiring and merciless hostility. While the Post-office Department and the Committees of Congress have acknowledged the great public utility and benefit of Norton's combined stamp, these men, by their machinations, have managed to defeat all claims upon the Government for its use. They were the chief actors in the proceedings to expel Mr. Norton from the Patent Office. They instigated the indictment, a copy of which has been thrust into this record, to create prejudice against Norton it must be supposed, for it has nothing to do with the case. When this suit was commenced, squat like a toad at the ear of Eve, they made themselves the advisers of defendant's counsel, and under their inspiration the defense has been carried on,

as though its chief object was to punish and destroy Norton. To this end the confidence of private and professional correspondence has been violated. Whatever malice or falsehood has left upon the records or files of the Departments has been forced into service, and, finally, a mighty effort was made with the money and detective power of the United States to impeach his testimony. This last was a wretched failure and sixteen witnesses (including the said Green and Ransford, whose evidence in another case is offered in this,) testify for defendant upon this point, several of whom have had personal difficulties with Mr. Norton, and others say little to his prejudice.

Seventy-four of his neighbors and acquaintances come forward to bear evidence in his favor. Ought not this overwhelming defeat of an attempted impeachment to strengthen Mr. Norton's testimony in this case? This suit is between Campbell and James. Norton is not a party to it. What he has said and done, therefore, is of no consequence, if the evidence proves the plaintiff's right of recovery. If Norton had not been called as a witness, defendant would have argued that complainant was afraid to call him. Upon the record and documentary evidence, it is believed the case is good without Norton's testimony.

Struggling in misfortune and sickness for a great number of years, with his personal enemies on the one hand and the power of the Government on the other, it is not to be wondered at if Mr. Norton has been drawn into some apparent inconsistencies of word or action, but there is nothing material in this, which cannot be satisfactorily explained by the light of surrounding circumstances.

Let it not be forgotten that defendant is a mere infringer; he does not pretend to be an inventor, or claim under any patent. He has simply appropriated another man's property. He now tries to defend his own wrongful act by showing that Norton has dealt unjustly or unfairly with A., B., or C. A., B., and C. are strangers to defendant, and to this suit. They are not complaining of Norton. This defendant

is not their guardian. He cannot wrong complainant because Norton has wronged somebody else. Where an infringer has seized and used a patented invention without any pretense of right, the court will be slow to grant him protection in his tort, because he can throw mud at the inventor.

To protect the defendant the Government has interposed. Its money, its influence, and its officers have been at his service. Time and again the public authorities have acknowledged that Norton was the inventor of the stamp used by defendant, and that it was of great valne to the country; but now they seem determined, by means of this suit, to destroy if possible those acknowledged rights.

It is confidently believed that this injustice cannot prevail, and that the prayers of the complainant will be granted by the court.

BRIEF ON EXCEPTIONS TO MASTER'S REPORT.

MASTER'S REPORT.

OPINION OF CIRCUIT COURT THEREON.

The complainant, Campbell, and defendant, James, have both appealed from that part of the decree of the court below overruling their respective exceptions to and confirming the Master's report.

Complainant claims that the Master's allowance to him was not as much as it ought to have been, and said defendant claims that he is not chargeable with any damages or profits, and that the Master's report should have been to that effect. Both appeals may be disposed of in one argument.

Complainant's exceptions are as follows:

EXCEPTION No. 1.

For that the said Master, after finding the fact to be that time was saved in the making up and in the despatch of the mails for transportation by the use of the machine or device containing the said new and useful improvements in post-office post-marking and cancelling hand-stamps described in the specifications, shown and illustrated in the drawings, and embraced in and covered by the several claims of the letters-patent, specified and described in the bill of complaint in this suit as "*Division A*," dated the 4th day of October, A. D. 1870, and No. 4,143, the same being a *reissue* of the *letters-patent* mentioned in the bill of complaint as having originally been granted and issued to Marcus P. Norton on

the 14th day of April, A. D. 1863, held and decided that he could make no allowance of damages or profits therefor, because the *pecuniary* value of the time so saved was not proven.

Whereas, the said Master should have made an estimate of the value of such time, taking into consideration all the evidence and circumstances of this case, and allowed the same as damages or profits.

EXCEPTION No. 2.

For that the said Master, after finding the fact to be that "more perfect and efficient work is done by the said combined patented instrument, both in the making of the postal mark and in the cancellation of the postage stamp, than by any other instrument known or used in the post-offices prior to the use of such combined instrument," held and decided that he could make no allowance of damages or profits therefor because the *pecuniary* value of the said superior advantages of the said combined instrument was not proven.

Whereas, the said Master, taking into consideration all the evidence and circumstances of the case, should have made an estimate of the value of said superior advantages, and allowed the same as damages or profits.

EXCEPTION No. 3.

For that the said Master, after finding the fact to be that the use of the said machine or combined instrument had conduced to the regular and speedy transmission of matter through the mails, held and decided that he could make no allowance of damages or profits therefor, because the *pecuniary* value thereof was not proven.

Whereas, the said Master, taking into consideration all the evidence and circumstances of the case, should have made an estimate of the value of said advantages, and allowed the same as damages or profits.

EXCEPTION No. 4.

For that the said Master, after finding the fact to be that the saving of space or room was an advantage derived from the use of the said machine, or combined instrument, held and decided that he could not make an allowance therefor, because the "New York post-office is a building owned by the government, and more space could be provided if necessary, without additional cost either to the postmaster or the Government of the United States."

Whereas, the said Master should have allowed the value of said advantage as damages or profits on the evidence produced before him on that subject.

EXCEPTION No. 5.

For that the said Master found the gains and profits accruing to said defendant, Thomas L. James, in the *Third* Division of the New York post-office, from April 1, A. D. 1873, to January 1, A. D. 1877, to be the saving of the salaries of six clerks during said time, at an annual salary each of $700, amounting to $15,750.

Whereas, the said Master should have found the said gains and profits, during said period, to be the saving of the salaries of twelve clerks, at an annual salary of $700 each, amounting to $31,500.

EXCEPTION No. 6.

For that the said Master found also that the gains and profits accruing to the said defendant, Thomas L. James, in the said *Third* Division of the New York post-office, from January 1, 1877, to January 1, A. D. 1880, were the saving of the salaries of nine clerks therein, at an annual salary of $700 each, amounting to $18,900.

Whereas, the said Master should have found the said gains and profits during said period to have been the saving of the salaries of eighteen clerks, at an annual salary of $700 each, amounting to $37,800.

EXCEPTION No. 7.

For that the said Master found, as a part of said defendant's gains and profits, the saving of the salary of one clerk in the "Foreign Department," from April 1, A. D. 1873, to January 1, A. D. 1880, at an annual salary of $700, amounting to $4,725.

Whereas, the said Master should have found, instead thereof, the saving of the salaries of two clerks, at an annual salary of $700, amounting to $9,450.

EXCEPTION No. 8.

For that the said Master found, as a part of said defendant's gains and profits, the saving of the salary of one clerk in the "Fourth Division," from April, 1873, to January, 1880 (a period of six years and nine months), at an annual salary of $700, amounting to $4,725.

Whereas, the said Master should have found, instead thereof, the saving of the salaries of two clerks, at an annual salary of $700 each, amounting to $9,450.

EXCEPTION No. 9.

For that the said Master found, as a part of the said defendant's gains and profits, the saving of the salaries of four clerks "in the various city stations of the post-office," from April 1, A. D. 1873, to January 1, 1880 (a period of six years and nine months), at an annual salary of $700 each, amounting to $18,900.

Whereas, the said Master, instead thereof, should have found the saving of the salaries of eight clerks during said period, at a salary of $700 each, amounting to $37,800.

EXCEPTION No. 10.

For that the said Master found the total amount of said gains and profits to be $63,000.

Whereas, he should have found them to be $136,000 (one hundred and thirty-six thousand dollars).

EXCEPTION No. 11.

For that the said Master found and reported the said $63,000 as gains and profits.

Whereas, he should have found the same as damages, upon the whole evidence, as by law provided.

EXCEPTION No. 12.

For that the said Master did not assess the damages of the complainant, Christopher C. Campbell, at $136,000, or any other sum.

Whereas, he should have found and assessed, on the whole evidence, the sum of $136,000 (*one hundred and thirty-six thousand dollars*) to be the damages of the complainant, *Christopher C. Campbell*, in consequence of the infringements stated in said decretal order of September 1, 1879.

These exceptions were all overruled by the court below, and complainant assigns for error the ruling of said court upon each and all of said exceptions.

COMPLAINANT'S CLAIM.

1st. That by the use of said improvement one man has been enabled to do the work which it took two men to perform before said improvement was made.

2d. That clearness and perfection of impression have been accomplished by the use of this improvement which have never been attained by the use of any instrument, before or since said improvement was discovered, and which clearness and perfection of impressions defendant testifies are of great value.

3d. That the use of said improvement has greatly conduced to expedition in the handling and transmission of letters which said defendant also testifies is of great value.

4th. That valuable space or room is saved by the use of this improvement.

AS TO THE FIRST CLAIM.

Let us suppose that a letter is laid upon a table upon which the postage stamp is to be cancelled, and the post-mark made by separate instruments, this may be done in two ways: One man may cancel the postage stamp with a suitable instrument, and then laying it down take another instrument and use it to post-mark the letter; or one man may use one instrument and another man the other, the process is to strike the face of the instrument upon an ink-pad and then apply the inked face to the letter or postage stamp, as the case may be. Now, the first question is, can a man strike the ink-pads with an instrument upon which the cancelling and marking faces are combined, as quickly as he can with an instrument having upon it only one of said faces? No one has pretended to negative this inquiry, and common observation and experience affirm it.

Second. Can a man apply the double-faced instrument to the letters, so as to cancel the postage stamp and make a post-mark thereon outside of the postage stamp, as quickly as he can apply a separate post-marker or a separate stamp-canceller to a letter, so as to make the work of the latter as perfect as the work of the former? Several of the witnesses attempt to negative the inquiry; but the reasons which they give for their opinions show that the opinions are unsound. To a person of ordinary understanding it would seem to be too plain for controversy; that it would take no longer to strike a letter using one handle having two faces attached to it than it would to strike a letter using the same handle with a single face attached to it. Indeed, keeping in view

the fact that clearness and perfection of impressions are necessary, it would seem to be the dictate of common sense that the broader the surface, within reasonable limits, to be applied to the letter, the more expeditiously the instrument could be used. The only reason given why a post-marker alone can be used quicker than the double instrument is this: that with the single instrument a blow may be struck anywhere on the letter away from the address, while with the double instrument the blow must be so struck as to bring the canceller upon the postage stamp. Considering that the space upon the face of a letter in which the blow by the single or double instrument must necessarily be struck varies from three to five inches one way, and from one to two inches the other way, it seems absurd to say that it would take any more time to direct a blow to one than to another part of this space.

Be this, however, as it may, it is obvious that more care and skill and time are required to imprint accurately upon a letter words and figures with a small upright instrument like the old-fashioned post-marker than with the larger, better adjusted and carefully balanced combined instrument now in use.

That a man can apply the double instrument to a letter so as to do efficient work as often as he can the single post-marker in a given space of time, is manifest from the nature as well as from the evidence in the case.

But, it is said that the separate canceller can be used quicker than the combined instrument. One reason for that opinion is, that a roller can be used, and another reason is, that several stamps can be effaced with one inking of a separate instrument. The question is not what can be possibly done by way of experiment or otherwise; but, the question is, in the ordinary transaction of business, if a separate canceller was used, would a given number of postage stamps be cancelled, as effectually and in less time than they are now

the use of the combined instruments. Let it be remembered that all the witnesses say, that the effectual cancellation of the stamp is very important. Steel has been adopted in place of cork or rubber or wood, because it is said to break the enamel or fibre of the stamp, and thus prevent its re-use. It is evident that while a roller or a canceller used upon several stamps with one inking might to some extent blot the stamps, their re-use can only be prevented by some means that will mar the face of the stamp and at the same time thoroughly impregnate it with ink. The argument or theory of the witnesses seems to be this: That a separate canceller can be used quicker than the canceller in the combined instrument, because the operator must look after the post-marker in using the latter; and they then argue that the separate post-marker can be used quicker than the post-marker in the combined instrument, because the operator of the latter must look after the canceller, thereby assuming what is manifestly untrue—that it is easier, and takes less time to look after two instruments operated separately than it does to look after the same two instruments combined together and operated as one.

There is, of course, nothing in the idea that one instrument is lighter than another; for any instrument can be made of the proper weight. When the statements of the witnesses are carefully scanned, it will be seen that they support the view that twice the number of men now employed would be necessary if the combined stamp were not used. All of the witnesses who speak upon this subject (excepting Mr. Kittle) are employes of the Post-office Department, and testify with evident reluctance in favor of the complainant. Yeomans, Gayler, Lawrence, Steele, Buchard, Bogia, Wareing, Richards, and defendant James, are witnesses, some of whom have very little and others no practical knowledge of stamping; Magee, Beach and Andrews are the practical stampers who testify. Magee, in his answer to questions No. 59 (R. 1523), and 71, 73 and 69 (R. 1524), Beach, in his answers to ques-

tions 48 and 49, (R. 1528,) shows that separate instruments would take twice as much time and labor as the combined instrument. And Andrews, in his answer to question 72 (R. 1535), and to question 79, shows in effect the same thing, though he tries to make it appear otherwise. With these is to be taken the opinion of Mr. Kittle (R. 1485), which ought to be adopted, as his reasons show its absolute correctness to any man of common sense.

Superadded to the saving of clerk hire by the use of the combined instruments, are the following considerations:

1st. The dispatch of business—that is to say one man with the combined instrument, can handle a given number of letters in half the time that would be taken if a separate canceller and a separate post-marker were used, which would of course necessitate two separate handlings of the letters. Expedition in the transmission and delivery of letters is a great object in the postal service—postal cars, letter carrie rs, &c. &c., occasion great expense, and all to this end.

2d. The efficiency and perfection of the work. This is, very important, and after experimenting for years nothing has been found in these respects to equal the Norton improvement.

3d. The saving of space and room—that is to say that two men each operating a separate instrument will take double the room occupied by a man using the combined instrument and accomplish no more, perhaps less, work.

No specific pecuniary value is attached to these considerations by the witnesses, neverthelesss they are "advantages." Reference is made for authority upon this point to the Suffolk Company *vs.* Hayden, 3 Wallace, 315. That was a case when there had been no sales of the patent right or license for the use of it, and general evidence as to the utility of the invention was admitted. The Supreme Court, Mr. Justice Nelson, delivering the opinion, said:

"There being no established patent or license fee in the case, in order to get at a fair measure of damages, or even an approximation to it, general evidence must necessarily be resorted to. And what evidence could be more appropriate or pertinent than that of the utility and advantage of the invention over the old modes or devices that had been used for working out similar results. With a knowledge of these benefits to the persons who have used the invention and the extent of the use by the infringer, a jury will be in possession of material and controlling facts that may enable them in the exercise of a sound judgment to ascertain the damages, or, in other words, the loss to the patentee or owner by the piracy instead of the purchaser of the invention." No witnesses in this case testified to any amount of damages in dollars and cents; but the jury, upon general evidence as to the utility and advantages of the invention, rendered a verdict in favor of the plaintiff of $1,774, which was affirmed by the Supreme Court.

In the late case of Judson *vs* Bradford *et al.* Patent Office Gazette, No. 4, vol. 16, 1879, Mr. Justice Clifford recognizes the decision, and says upon the subject of damages: "Neither party having furnished any definite evidence as to the amount of the injury sustained by the plaintiff the Court is compelled to estimate the same from evidence introduced upon the subject weighed in review of the whole evidence, as the question must be, the Court finds," &c. &c.

Here is a case when the Court "estimated" the amount of damages from general evidence as to the utility of the invention.

It follows from these authorities, that the Court in this case may estimate and fix any amount in dollars and cents which it may consider a fair measure of damages to the complainant, taking into consideration the economy of time and labor, the increase of speed in the transaction of business, the efficiency and perfection of the work, and the saving of

room, which advantages are undeniably accomplished by the Norton invention over the "old modes and devices" that were used before that invention was made. If it is not necessary that the complainant should adduce any evidence as to the money value of these advantages. That is to be fixed by the judgment of the Court.

SEVERAL QUESTIONS ARE MADE BY THE DEFENDANT.

1st. That complainant cannot recover those damages or profits which accrued prior to the date of the assignment to him by Helen M. Ingalls.

The infringements, it is admitted, commenced when the defendant became postmaster in New York, to wit, on the 1st of April, A. D. 1873, so that the accounting must go back to that date irrespective of the question of ownership; it is contended by complainant, that the bill shows, and so does the evidence, that complainant Campbell is the owner of all claims arising out of infringements upon said invention since the reissue of the patent to Helen M. Ingalls, October 4th, 1870. Reference is made to the case of Dibble *vs.* Augar, 7 Blatchford, 86, which affirms the right to assign such claims and in many respects is like the case under consideration. Reference is made to folios 60, 62, 64, 65, 67, 68, 69 of complainant's amended bill (R. 23) to show that the claims accruing before the said assignment are set up and claimed in said bill.

Three exhibits were filed with the Master, upon two of which the handle is directly over the post-marker, and it is claimed that these might have been used instead of the Norton invention; and therefore the measure of damages or profits is the difference between the advantages in the use of these and the Norton invention.

There are several conclusive answers to this claim.

1st. The rule set up here only applies where damages or profits are claimed for an improvement upon what has already been patented when it becomes necessary to determine what the liabilities of the infringer are for the use of the improvement, outside of the use of that which was before patented. Here the claim is for the entire instrument—the combination of the post-marker and stamp-canceller. That claim has been decreed to be good, therefore the measure of damages is the difference between the advantages of using this combination and the use of what was in use before the combination was invented.

2d. When defendant James became postmaster in 1873, the combination of a post-marker and stamp-canceller, with which the letters could be post marked and the postage stamp cancelled at one blow, was covered by complainant's patent, or if not it was covered by the patent of 1859. (R. 1270.) The two Exhibits referred to present such a combination, and therefore they could not be used by defendant without infringing complainant's patent. (See Kittle's testimony.)

3d. In Mowry *vs.* Whitney, 14 Wallace, 651, the Supreme Court says: "The question to be determined in this case is this: What advantage did the defendant derive from usiug the complainant's invention, over what he had in using other processes then *open* to the public and adequate to enable him to obtain an equally *beneficial* result. The fruits of that advantage are his profits."

Was the use of the combination of the post-marker and stamp-canceller, so as to post-mark a letter and cancel the postage-stamp with a single blow, open to the public in 1873?

Again, it is plain to any man of common sense that the use of said Exhibits with handle on one side cannot be made to produce a result equally beneficial as the instrument used

by Mr. James since he became postmaster. This is also clearly established by the testimony. Mr. Andrews states this positively in his answer to question 37 (R. 1533), and gives his reasons on (R. 1532), to wit: that the instruments with the handle over the post-marker are too heavy on the side. This accords with Judge Wheeler's views, and is the plain dictate of common sense. Experiments have been tried for years to find something better or that would produce beneficial results equal to those produced by the Norton invention, but without success. Reference is made to the following evidence on that point: Yeoman (R. 841), Andrews, Ques. 81, 82 and 83. (R. 1536) before the Master. Postmaster Creswell's Report, (R. 503) in which he says: The combined stamp has "been demonstrated by continuous use during nearly eight years to be valuable in the larger post-offices, and in the railway service. Simple as it is no other device has been hit upon that will do the work of this one, without adding largely to the number of stamping clerks employed."

This is proof that nothing was open to the public, that would produce equally as beneficial results.

Mr. James testifies that he never saw or heard of an instrument like defendant's Exhibit No. 4, before this suit was brought, so that it is evident that the use of such an instrument was not open to the public. (R. 1507.)

There is no evidence that instruments constructed like defendant's Exhibits No. 4 and 6, were open to the public in 1873, or have been since that time. Said Exhibits were made since this accounting commenced. There is no evidence that anything like them was ever before made by anybody outside of the original Exhibits in this case. There is no evidence that any such instruments have been made or sold or used anywhere by anybody since 1873.

Judge Sawyer says, in Knox *vs.* The Great Western Quicksilver Mining Company, Patent Office Gazette, vol. 14,

No. 25, 1878: "The comparison must be with machines at the time of the infringement *both known and open* to public use."

4th. Reliance is placed by defendant upon some remarks of Judge Wheeler in his opinion, to the effect that there is a difference between a combined instrument with a handle on one side, and an instrument with the handle in the middle. Manifestly there is such a difference and greatly to the advantage of the latter; but the question is: Is the difference patentable? Norton's patent covers a "metal canceller fastened or secured to the immediate side of the post-marking device." Folio 161, Complainant's, vol. 1. So that the difference between Norton's invention, Exhibit No. 4, is in the location of the handle. Is the removal of the handle an inch or half an inch one way or the other patentable?

Looking at the remarks of Judge Wheeler, it will be seen that he refers to something that Ireland, Riley & Wheeler pretended to have produced in 1851, 1852 and 1853. Judge Wheeler, after deciding that they did not produce any such things as they claim, says, in addition, that if they did, there is a material difference between their productions and the Norton invention. No instruments made in 1851, 1852 or 1853 have been exhibited in this case. Some pieces of wood tied together with twine or wire, under the instructions of defendant's counsel since this suit was commenced, have been brought into Court, and the witnesses, whose testimony Judge Wheeler utterly discredited, are made to say that they made structures like these in 1851, 1852 and 1853. The absurdity of setting up these things for any purpose in this case is only equalled by the falsity of the testimony about them.

The defendant makes the point that he is not liable, because he is a public officer, and none of the advantages infringing the Norton patent are for his personal benefit, but go to the Government.

There is nothing in this point upon principle and authority.

1st. Mr. James shows by his own testimony that he is personally responsible for the infringement of complainant's patent.

He does not pretend that he was instructed by the Postmaster-General to use the combined stamp invented by Mr. Norton, or any other particular kind of stamp; on the contrary, he states that he had laid aside the stamp which he first used, and substituted the one used in the London office, because, in *his judgment*, the latter was preferable, and he acted, therefore, in the matter according to his own judgment. He ordered the stamps in quantity and kind, as he wished; he paid for them, and they were manufactured in New York by his authority.

Section 3860 of the Revised Statutes provides that "the Postmaster-General may allow to the postmaster at the city of New York and to the postmasters of offices of the first and second classes, out of the surplus revenues of their respective office, that is to say, the excess of box rents and commissions over and above the salary assigned to the office, a reasonable sum for the necessary cost of rent, fuel, lights, furniture, stationery, printing, clerks and necessary incidentals, to be adjusted on a satisfactory exhibit of the facts and no such allowance shall be made except upon the order of the Postmaster-General." The business in the New York city post-office, under this section, it is understood, is transacted as follows: Mr. James, by the permission of the Postmaster-General, places in the office of the Assistant Treasurer in New York city a certain amount of the receipts of his office to his credit. He draws against this amount to pay clerk hire and other expenses and is charged therewith. Practically, therefore, Mr. James hires his clerks and pays them out of the proceeds of his office. Whatever, therefore, he

saves in clerk hire by using Norton's invention he primarily saves for himself, though the ultimate advantage is to the Government.

2d. Inventions patented are property to be treated by the Courts, in case of a trespass or tort committed upon them, as houses and goods are treated when a trespass is committed upon them.

3d. If the Court decides that the official character of Mr. James is no defense, and that he is an infringer, it follows that he is liable like any other infringer for the damages and profits occasioned and made by this infringement.

Undoubtedly in a Court of Equity, if two or more infringers are before the Court, and one of them has received all the profits, the Court will enter its decree for profits exclusively against him; but it will not exempt an agent, sued alone, from the payment of profits made by his infringement, when his principal is not amenable to or within the jurisdiction of the Court.

Suppose that Mr. James should take possession of and use a house in New York for a post-office without the consent of the owner, could he defeat a suit against him for the rent of the house by saying that he used it in the public service and not for his private advantage. Suppose he should seize the horses and wagon or the boat of a citizen for the transportation of the mails, and should be sued therefor, could he defend upon the ground that they were seized and used in the public service? If such suits can be defeated upon such grounds, then it follows, as the Government cannot be sued, that private property can be taken for public use without just compensation, which is in the very teeth of the Constitution. If such suits can be maintained at all, then the Court must give to the owners a "just compensation" and a "just compensation" in a suit against a public officer

wrongfully taking private property, is, of course, the same as a "just compensation" for property so taken by a private citizen.

Mitchell *vs.* Harmony, 13 Howard, 115.
Bates *vs.* Clarke, 5 Otto, 204.
Allen *vs.* City of New York, *Official Gazette*, vol. 17, page 1281.

It is immaterial whether the amount awarded against the defendant is called profits or damages. If he is not liable for profits, as such, he is liable for the same amount as damages. Profits and damages are the same thing.

Mr. Justice Strong, in delivering the opinion of the Supreme Court, in Mowry *vs* .Whitney, 14 Wallace, 653, says:

"The profits which are recoverable against an infringer of a patent are, in fact, a compensation for the injury the patentee has sustained from the invasion of his right. They are the measure of his damages. Though called *profits, they are really damages*, unliquidated until the decree is made."

To the same effect are all the authorities. In Brady *vs.* The Atlantic Works, Patent Office Gazette No. 23, vol. 15, 1879, Mr. Justice Clifford, in delivering the opinion of the Court, says:

"Gains and profits are the proper measure of damages in equity suits, except in certain cases where the injury sustained by the infringement is plainly greater than the aggregate of what is made by respondent."

See also Knox *vs.* The Great Western Quicksilver Mining Co., above cited.

In Whitemore *vs.* Cutler, 1st Gallison, 478, Judge Story instructed the jury that if they were of the opinion that an user of the machine is actually proved in this case, *the rule of damages* "should be the value of the use of such a machine during the times of the illegal user."

In Conover *vs.* Knapp, 4 Fisher, 63, Judge Ingersoll, with the approval of Judge Nelson, instructed the jury, "that the actual damages are the profits made by the defendant." See also:

Sewell *vs.* Collins, 1st Fisher, 297.
Page *vs.* Ferry, " " 316.
Bell *vs.* Daniels, " " 380.

In the great case of the Household Co. *vs.* Neilson, decided in the House of Lords in 1843, the Lord Justice Clerk instructed the jury as follows: "The only other point that arises on the supposition of your finding for the pursuer is the question of damages. Damages are claimed of two kinds. You are aware that the amount of the damages arises in regard to, and is of course involved in the consideration of the first issue. The amount of damage you may give according to the circumstances, proved. I must own that I think the damages should have been much more satisfactorily proved, if it was to be proved in pounds, shillings and pence in regard to the colliery. But still there is no contradicting evidence."

"The saving spoken of, viz., two pounds and two shillings per ton, is not contradicted. The answer that was put was this: Be it that the manufacture was conducted at that rate of saving; still, I have not made profit on this whole concern. That is no answer in point of law and no evidence was tendered to show that the saving was overrated. Whether that saving comes to thirty-four hundred pounds, as calculated, it is for you to say. *I am bound to tell you, in point of law, that the pursuer is entitled to claim the benefit arising out of the saving made by his apparatus*," &c.

No exceptions were taken to these instructions, and they were allowed to stand as the unquestioned law of the case. The jury found a verdict of three thousand pounds for the pursuer. (Webster's Reports, 697.)

Section 4921 of the Revised Statutes provides that the complainant shall be entitled to recover the damages "the

complainant has sustained," and this without reference to who has or has not been benefited by the infringement. Some of the Courts, in speaking upon the subject of profits, say that their allowance stands upon the principle of converting the infringer into a trustee for the patentee, as regards the profits thus made.

Any point made by the defendant upon this question may be answered this way:

1st. An infringer is a tort feasor, and is not therefore in fact a trustee for the patentee, by fiction of law the Courts will convert him into such so as to subserve the ends of justice. This is not intended to be restrictive of the rights or remedies of the patentee; but on the contrary, is intended to enlarge them. This doctrine cannot be applied to the defeat a patentee, but may be applied to establish the liability of an infringer. When, therefore, the question arises between a patentee or his assignee and an infringer who claims to be the agent of a party not subject to the jurisdiction of the Courts, this doctrine is inapplicable, or if applicable in such a case, then by another equitable fiction to prevent a failure of justice, the Courts will hold or treat the agent as a principal. The law must be administered as much in one case as another, so as to give the patentee a just compensation for his property, and the Courts have repeatedly decided what this just compensation is.

2d. All the cases hold that the rule of recovery against a public officer who commits a trespass upon private property is precisely the same as the rule of recovery against a private citizen in a similar case. Upon principle, therefore, and all the analogies of the law, the defendant cannot claim any exemption, upon the ground that he is a public officer.

Possibly it may be suggested, as affecting the amount of the complainant's recovery, that the Norton invention is valuable only when used in the post-offices of the country; but there is no force in such an objection.

To hold otherwise, would be to hold that all inventions only adapted to and intended to be exclusively used on railroads, telegraphs, steamboats, fire-engines, &c., might be seized and used without just compensation to the owner. All improvements in fire-arms and ammunition and military equipments intended for the army would be open to confiscation by the Government. Indeed nearly every invention is intended for some particular business or special field of labor outside of which it is of no value; but in the hundreds of cases in the Courts involving such inventions it has never been held that a party pirating such invention and using it in the business or field of labor to which it is adapted is not responsible to the patentee or his assignee for the benefits and advantages resulting to him from such piracy.

In an action at law, where there is no evidence of a license fee or royalties, and none can be produced, as in this case, then the rule of the plaintiff's damages are the profits made by the defendant.

Sec. 4921 of the Revised Statutes gives a court of Equity the same jurisdiction that a court of law formerly had as to damages. Damages alone were recoverable in actions at law and proof as to profits was not material except to show a rule of damages; when, therefore, under said section any circumstance prevents a recovery of profits in a court of Equity a recovery for damages may be had and the profits may be made a rule for such recovery, as in actions at law. Mr. Justice Miller says, in Burdell *vs.* Denig, 2 Otto, 720: "Profits are not the primary or true criterion of damages for infringement in an action at law. *That rule applies eminently and mainly to cases in equity, &c*". Now if the court should be of the opinion that because the defendant is a public officer he is not liable for profits as such, then he should be held liable for damages as such, and the "savings" or "profits" made by the illegal use of the patented invention should be made the rule of such damages.

In the case of Black *vs.* Munson, 14 Blatch., 267, Mr. Justice Hunt says: "In an action in equity (which in this case) profits made by the (assignee) infringer by the use of the improvement constitutes the general measure of damages. Sales, or a royalty established on the other hand constitute the primary criterion of damages in actions at law, but in any court this latter rule can only be applied where there is a fixed and established price at which a license is granted."

Courts of Equity can call the recovery damages or profits, as the equities of the case seem to require, for in such courts they are substantially the same thing, the object being to give to the patentee compensation for the invasion of his rights.

Mowry *vs.* Whitney, 14 Wallace, 653.

Profits, where the claim is not for the manufacture or sale, but for the use of the patented machine, are what the defendant has saved by the use of such machine.

In Conover *vs.* Mers, 11 Blatch., 197.

Judge Woodruff held that the complainant was entitled to recover 80 cents per cord for wood split by a wood-splitting machine patented to complainant and illegally used by defendant, it appearing that there was a saving of 80 cents per cord on the use of the patented machine over the cost of splitting by hand. To the same effect,

12 Blatch, 20.

McKeever *vs.* the United States, 14 Court of Claims, 396, is a case in which the argument against the plaintiff's right of recovery was in many respects like that used by defendant's counsel here, but the court held that the Government was liable on an implied contract for the use of a cartridge box partly invented by the plaintiff, and estimated his damages upon the ground that he had produced the best evidence upon that subject of which the case was susceptible.

The above case, referred to the master by the decree dated 1st of September, 1879, is one somewhat peculiar in its character.

It is for the infringement of a patent, and although against the defendant, James, personally, any recovery which may be had against him will be for "gains, profits and advantages" which have "arisen or accrued," not to him individually, but by his use of it in his official capacity as postmaster of the city of New York. The court has held that the patent, which is the subject-matter of the suit, has been used by him without authority of law; and hence that he is personally responsible, the same as any public officer is, who takes private property for public use without the authority of the owner.

In the presentation of the case to the Master, numerous questions have been raised by the counsel, which it seems necessary to consider and determine, in order that the findings of the Master may be intelligible and reviewable, and that all the points made by the counsel may fully appear on exceptions (if any) which may be taken to the Master's report.

It appears to be conceded, that this invention is one which can be used only by, and be of benefit to, the Government in the conduct of its general postal service. The court says, in its opinion, "Upon the whole case it appears that in fact and in law Norton was the original and first inventor of this patented invention;" and, further, that "the patent is for a *machine* or *instrument* that will do both of these things at one blow," that is, the post-marking of the letter, and the cancellation of the postage stamp. It further appears from the opinion of the court and from the evidence before the court on final hearing, that by a strict requirement or order of the Postmaster-General, made on the twenty-third day of July, 1860, the post-marking and the cancelling of the postage stamp were required to be placed upon all letters separately. It appears that previous to that time the post-mark was stamped upon the postage stamp, and thereby in a measure

acted as canceller of it. This requirement or order of the Post-office Department called for the discontinuance and abandonment of this mode of stamping and cancelling, and required the use of two separate stamps, one for the post-mark and the other for cancelling the postage stamp. It seems to have been this requirement or order of the Post-office Department that brought into use in the New York post-office the combined instrument (see opinion of the Court) by which the post-marking and the cancelling of the postage stamp was done by a combined instrument; that is, by a single blow of one and the same instrument, by one and the same hand, instead of by two blows or impressions made by two separate and distinct instruments, requiring two persons, or the double use of the hand of the same person upon the two instruments.

This invention, it appears, was in use in the New York post-office at least as early as 1861, and was found there in use on the first day of April, 1873, by the present postmaster, James, when he was appointed postmaster, and is still in use there. According to the decree of the court, James is an unlawful user of such patented invention, and an infringer.

The decree sets forth—

"First. That the letters patent are good and valid.

"Second. That Marcus P. Norton was the original and first inventor. * * *

"Third. That the complainant, Christopher C. Campbell, is the exclusive owner *in trust* of such letters-patent.

"Fourth. That the said Thomas L. James has infringed upon the said letters-patent No. 4,143, hereinbefore described, * * * and charged in the said bill of complaint.

"Fifth. That an account be taken of the profits, gains and advantages which have in anywise been received or made, or which have arisen or accrued on account of the infringements aforesaid; and also of the damages in addition thereto, if any, which the said complainant has sustained by reason of the infringements aforesaid.

"Sixth. That the said complainant do recover of the said defendant, Thomas L. James, his costs, charges and disbursements to be taxed.

"Seventh. That it be referred and the same hereby is referred to Kenneth G. White, of the city of New York, to ascertain and take, and state and report to the Court, an account of the gains, profits and advantages which the said Thomas L. James has in anywise received or made, or which have arisen or accrued on account of the infringements aforesaid; and also of the damages in addition thereto which the said complainant has sustained by reason of said infringements."

The Master, having now stated his understanding of the decision of the Court, and what is referred to him under the decree based upon such decision, will consider the questions raised before him by the counsel for the respective parties. It is claimed by counsel for complainant—

First. That by the use of the patented instrument one man has been able to do the work which it took two men to do before the invention of such instrument.

Second. That more perfect and complete work is done by the use of said patented instrument than was attained by any other instrument known or used before or since the patent was granted; that such instrument makes clearer and more perfect impressions of the postal-mark, and also more complete and perfect cancellation of the postage stamp.

Third. That the use of said patented instrument has greatly conduced to the regular and speedy transmission of letters through the mails.

Fourth. That, by the saving of the number of clerks necessary to be employed, valuable space or room is saved in the post-office. Each and all of these, it is claimed, enter into and make part of the gains, profits and advantages derived from the use of the invention.

It is claimed on behalf of the defendant that no gains, profits or advantages are shown to have accrued to or been

received by the defendant, James, *personally* from the manufacture or use of the patented invention; that whatever use he has made of the invention has been as an officer of the United States, and in that capacity alone has he infringed the patent, and if any gains, profits or advantages have accrued, they are for the benefit of the United States, and not for his benefit.

Second. That as to any gains, profits or advantages which have arisen or accrued to the Government by reason of the infringement, there can be no recovery, as there have been no sales of the patented invention, and no profits, strictly speaking, have accrued from its use, as the post-office is not a profit and loss concern; that admitting, for argument's sake, that there has been a saving of time by the use of the combined post-marker and the postage stamp canceling patented instrument, there is no evidence of the pecuniary value of such saving of time offered; that the evidence makes nothing clear except that more clerks would be needed to post-mark and cancel the same number of letters in the same time with the separate instruments than with the patented instruments; that this is not a proper measure of profit; that the salaries of the additional clerks have nothing to do with the question; that the real advantages which the *Government* has received, are two—

First. A post-mark on the envelope, distinct and separate from the cancellation-mark on the postage stamp.

Second. Attaining this result in such time as not to delay the mails.

That there can be no *pecuniary* value attached to these advantages; that the comparison of the patented instrument with separate instruments is unjustifiable; that combined instruments, in which the canceller was attached to one side of the post-marker and where the two were not balanced on the handle, were open to use during the period of infringement and long before the patent was grantsd; that, if it is proper to make any comparison in this case to ascertain the advantages received by the *Government* by the use of the

patented improvement, such comparison should relate to this unbalanced combination.

Third. That the statute which allows damages, in addition to profits, to be recovered in equity, has been construed to mean that damages in excess of or beyond the amount of profits made by defendant may be recovered; and that no damages, as such, to the complainant, are shown to have been sustained.

Fourth. That the time to be covered by the account of the Master should be limited to cover only the infringements that have taken place since the assignment to Campbell (January 2, 1877;) that the account should commence with that date.

Fifth. That as to the alleged advantages other than clerk hire, the evidence does not show satisfactorily that they exist; that no evidence of their pecuniary value has been given, and they cannot be considered in stating an account of profits in equity.

These are substantially all the questions raised before the Master on this accounting; and, as counsel for both parties have made a request of the Master that he would, in his report, consider and pass upon each one of them, he will do so.

The first question (the saving in the number of clerks) raised by the complainant's counsel will be considered last.

As to the second question, it seems from the testimony of all the witnesses called, who are employees in the New York post-office, that more perfect and efficient work is done by the patented combined instrument, both in the making of the postal-mark and in the cancellation of the postage stamp, than by any other instrument known or used in the post-office prior to the use of such combined instrument.

As to the third question, it appears that the use of the combined instrument has conduced to the regular and speedy transmission of matter through the mails, assuming, of course, that had not such combined instrument been used, two separate instruments, one for post-marking and the other

for cancelling the postage stamp, would have been used and no additional clerks been employed.

Fourth. Assuming that an additional number of clerks would be necessary to the proper performance of the work in the post-office, there would be, necessarily, more space or room required for them, and consequently under certain circumstances that would be an advantage or saving derived from the use of the invention in question. It has been proved, before the Master, that there is a saving of the number of clerks, as will hereafter more fully appear. But such advantage or saving, so far as room is concerned, in the New York post-office, or so far as the defendant James is concerned, does not appear to have any pecuniary value in this case, as the post-office in the city of New York is a building owned by the Government, and more space could be provided if necessary, without any additional cost either to the postmaster or the Government.

As to the first question raised by the defendant, that "no gains, profits, or advantages are shown to have accrued to or been received by the defendant, personally," &c., this question is disposed of by the decision of the Court, as already stated in this report.

The second point made by the counsel for the defendant James embraces several questions. The first is, "that no gains, profits or advantages have arisen or accrued to the Government by reason of the infringement, as there have been no sales of the patented invention."

As to the fact of there having been no sales of the patented invention, that, of itself, amounts to nothing, as the claim here is for its use, and it is for such use that any profits made are claimed by the complainant.

Defendant's counsel admits, for argument's sake, that there may have been a saving of time by the use of the combined patented instrument, but that no evidence has been offered of the pecuniary value of such saving of time. This is so. The evidence of saving of time in the making-up and dispatch of the mail, as the Master understands it, is to show

that this is one of the "*advantages*" derived from the use of the combined instrument, and he is asked to take this into the account in estimating or determining what "*gains and profits*" have arisen or accrued to the defendant thereby, complainant's counsel claiming that the Master is authorized and called upon to fix and report some sum as an amount to be awarded for these "*advantages.*" That there has been such advantage, there seems, from the testimony, to be no question; but, as the pecuniary value of such advantages has not been proven, the Master is not authorized, as he understands the decision of the Courts, to merely estimate or conjecture an amount. As to the question raised of the saving of clerks and clerk-hire, that will be, as has been before stated, considered hereafter.

Counsel claims that the real and *only* advantages which have arisen to the Government or to the defendant, are:

First. A post-mark on the envelope, distinct and separate from the cancellation-mark on the postage stamp; and

Second. Attaining this result in such time as not to delay the mails.

That both are great advantages, and that such advantages have been secured to the Government by the invention in question there can be no doubt. It is certified by the order or requirement of the Postmaster-General to be absolutely necessary to the postal service; also by the communications of different postmasters-general to Congress, and the various reports of successive congressional committees, all of which appear in the testimony for final hearing in the case, and which is offered in evidence before the Master; and also by the testimony of each and all of the witnesses from the New York post-office produced before the Master. No evidence is produced showing what the actual *pecuniary* saving by either has been, and hence none can be reported by the Master.

It is claimed by counsel for the defendant, that what he designates as the balancing of the handle, or the placing of it equidistant between the post-marker and the stamp-canceller is a material element of the patented combination, and

that if the handle is not so placed in the center, or equidistant between the two stampers, such an instrument is no infringement of the patent in question; and he urges that, in the ascertainment by the Master of gains, profits and advantages, comparison should be made between the stamper having the so-called balanced handle and a stamper where the handle is not so balanced. He has produced before the Master two instruments which are marked "K. G. W. Master's Exhibits, Nos. 4 and 6," and which he claims are not within the patent, and which are therefore open and free to be used in the post-office; and has produced witnesses as to their recent trial there.

The answers to this claim are:

First. That such claim is not warranted by the opinion of the Court as the Master understands it.

Second. It is not warranted by a proper construction or interpretation of the patent in controversy.

Third. The proofs in the case show, and the decision of the Court also shows, that Norton himself was the first and original inventor of such device; that is, a combined stamper and canceller, in which the handle was not placed in the middle, but on one side, over the postage-stamper. The use, therefore, of such device was not open to the defendant or the Government, and for this reason no comparison in the ascertainment of profits can be made between the two. Further, the witnesses who have been produced on the part of the defendant before the Master, and who are employed as regular stampers in the post-office, say that the instruments Nos. 4 and 6 are not as efficient for the work to be done in the post-office as the instrument heretofore used there, and which the Court has declared an infringement, nor does it produce "*equally beneficial results.*"

And the proofs show that such instrument was never used in the post-office, except experimentally, and then only since the commencement of the proceedings before the Master, and was made expressly for use upon this reference. The Master cannot assent to the claim made by counsel.

It is also claimed, that, under the statute which allows damages, in addition to profits, to be recovered in equity, no damages as such have been proven in this case or can be allowed. No damages apart or separate from profits, as the Master understands it, are claimed. The claim is for the profits made by the defendant, which, under the decision of the Courts, are the same thing as damages and are called damages. As said by the Supreme Court of the United States, in Mowry *vs.* Whitney, 14 Wallace, 653, "Though called profits, they are really damages uuliquidated until the decree is made." And in Patent Office Gazette, No. 23, vol. 15, 1879, the Court says, "Gains and profits are the proper measure of damages in equity suits." Justice Strong says, "The rule of damages should be the value of the use of such a machine during the time of the illegal user." Counsel for defendant also claims that the time to be covered by the account should be limited to the time of the assignment to the complainant, Jan. 2, 1877. But there is no such limitation in the decree or order of reference. And the assignment to Campbell shows not only the assignment of the patent, but the assignment of all past profits and damages. The account should therefore cover the entire period of the use of the patent by the defendant James since he became postmaster; that is, since April 1, 1873.

It now only remains for the Master to determine what have been the pecuniary gains, profits and advantages which have been derived by the use of the invention in the New York post-office during the term of the present postmaster Thomas L. James.

Mr. James himself and various of his subordinates have been examined before the Master on this question. There is some variance in such testimony as to the actual saving in clerk-hire by the use of the invention over and above what would be necessary in case the combined instrument was dispensed with, and two separate instruments to perform the same work were used. Mr. James himself says that in his judgment it would require about one-third more clerks than

are now employed in the stamping departments. Upon being recalled he is asked—

"81. Q. If you had been compelled to separate those instruments and use the post-marker by itself, and the postage-stamp-canceller by itself,it of course would have required additional labor.

"A. Certainly.

"82. Q. Have you examined the subject sufficiently to form an estimate as to the amount of saving in labor in the New York post-office by the use of the combined post-marker and stamp-canceller in place of a separate post-marker and a separate stamp-canceller?

"A. Yes, sir; I have thought the thing over.

"83. Q. You can state it, if you please.

"A. I think I have stated it in my direct examination.

"84. Q. No, sir, you did not state that.

"A. It would cost from seven to nine thousand dollars more a year to cancel separately and post-mark separately."

Mr. Yeomans, the superintendent of the Third Division in the post-office, says that he now employs in his division twenty clerks, and that it would require, in his judgment, nine more to do the same work if separate instruments were used, and that their average would be seven hundred dollars per annum each.

Mr. Gaylor, who is general superintendent of the city department, testifies that he has in his department in the post-office building three clerks engaged in post-marking and cancelling postage stamps on letters with the combined instruments, and that if separate instruments were used for the same purpose he would require one additional clerk. He testifies in relation to the different post-office stations in the city, which are also in his charge as superintendent, that the clerks in those stations are employed, each day of twenty-four hours, eighty-four hours and forty-five minutes in the post-marking and cancelling of stamps on letters. He says that in his judgment it would require one-third more time to do the work if separate instruments were used. Or,

taking Station A as an example, where thirty and a-half hours are consumed each day, it would take ten more hours in a day, or "it might possibly take more than that; it might take twelve hours; but I am not very competent in my opinion about that, because I do not have immediate supervision of any of that work." He has furnished a statement, which is put in evidence, showing the "average number of letters, &c., post-marked daily," "number of clerks employed," "time consumed daily in stamping."

Mr. Lawrence, who is the superintendent of the Foreign Department of the New York post-office, says that if he was called upon to use the separate instruments for post-marking and cancelling postage stamps, "I should want one more man, and should make application for it."

Mr. Steele, who is assistant superintendent of the Third Division (same division as Yeomans), says he thinks if separate instruments were used it would require eight or nine more men.

Mr. Waring, also assistant in the Third Division, testifies to the number of combination stamps used in different years since 1872.

These are all the witnesses called on behalf of the complainant as to the profit or saving arising from the use of the combined instrument; and, as will be seen, all are called from the post-office itself. One other witness (Kittle) was called as an expert to give his opinion as to the use of the combined and separate instruments, and he says that it would "take just about as near double the number as you could imagine" of clerks to do the same work with the separate instruments as it would with the combined instrument.

The defendant has called eight witnesses in his behalf, all to testify as to the use of a combined instrument with the handle placed over the post-marker, and not equidistant between the two stampers. Six of these witnesses used this instrument, or saw it used in the New York post-office, within a few days of giving their testimony. It was used

there experimentally for a few days, and solely for the purpose of being used as evidence on this reference. The other two witnesses were from the Philadelphia post-office, and were examined upon the hearing of the case before Judge Wheeler at Brattleboro', and their testimony is disposed of by him. The Master, in a former part of his report, has disposed of the question sought to be raised by this testimony.

The testimony of some of these witnesses in regard to the use of the combined instrument, as compared with the single instrument, in the New York post-office, is important. They are practical *stampers* there, and, as appears, the most experienced and expert. They are asked by complainant's counsel, on cross-examination, to give their experience, and do so.

Magee says he has post-marked and cancelled with combined instrument 5,500 postal cards in 55 minutes. He is asked how many he could *post-mark* with a single instrument, without the *canceller*, in a minute, and says: "I don't know that I could do a hundred, because it is more difficult to use a single stamp." He is further asked:

"73 Re-D. Q. If you use a separate post-marker simply on a handle, with which you can put the impression anywhere on top of the envelope, why can't you use that as rapidly?

"A. Because, the base of it being so small, you have to take more time to make an impression.

"74 Re-D. Q. Have you ever tried it?

"A. Yes, sir; I tried it this morning for the first time."

Beach says, "I put the post-mark and cancellation-mark on in same time it would take to put *post-mark* on alone with separate instrument.

"47 + Q. It takes you as much time to put that post-mark on the back as it would to put the post-mark and cancellation on the front?

"A. Yes, sir; just the same.

"48 + Q. So you give the post-mark and cancellation-mark in the same time as you give the post-mark with the separate instrument?

"A. Yes, sir."

Andrews says he has stamped with *combined* instrument five thousand postal cards in twenty-three minutes. He says he could not stamp the *post-mark* much faster with a single stamp for a short time, but might stamp a third more if he used it all day.

It results from the testimony, and the Master hereby finds and reports, that the gains and profits which have arisen or accrued to the defendant James under the decree, in the saving of salaries alone, and independent of any advantages which it appears have been derived from saving of time and labor, the better performance of the post-marking, and more complete cancellation of the postage stamp, and speed in dispatching the mail, are as follows, viz.:

The saving of the salaries of six clerks in the Third Division of the New York post-office from April 1, 1873, to Jan. 1, 1877 (three years and nine months), at an average annual salary each of $700..	$15,750
The saving of the salaries of nine clerks in the same division from Jan. 1, 1877, to Jan. 1, 1880 (three years), at an average annual salary each of $700.....	18,900
The saving of the salary of one clerk (in the "Foreign Department") from April 1, 1873, to Jan. 1, 1880 (six years and nine months), at the annual rate of $700...	4,725
The salary of one clerk in the Fourth Division from April, 1873, to January, 1880 (six years and nine months), at the annual salary of $700	4,725
The salaries of four clerks in the various city stations of the post-office from April 1, 1873, to Jan. 1, 1880 (six years and nine months), at an average salary each of $700.....	18,900
Total.....	$63,000

All of which is respectfully submitted.

KENNETH G. WHITE, *Master.*

Dated New York, Jan. 2, 1880.

Judge Wheeler upon the exceptions to the Master report says:

"This cause has now been heard upon the report of the master and exceptions thereto, as to the liability of the defendant, James; and upon the stipulations under which the which the other defendants became parties, and by which their rights as between themseves and the plaintiff were submitted to the court, and the evidence in support of their respective claims, as to those rights.

From the report it appears that the defendant, James, became postmaster at the city of New York, on the 1st day of April, 1873, while the patent in suit was owned by Helen M. Ingalls, and commenced using the patented invention, and has ever since continued the use in performance of his duties; that on the 2d day of January, 1877, she conveyed the patent to the plaintiff, and assigned to him her claims for past infringements; and that the gains and profits to the defendant, James, in the saving of salaries of clerks to perform the duties required of him by the Post-office Department, have been *sixty-three thousand dollars*, due to his infringement.

The principal and controlling questions arising upon the report and exceptions are, whether the plaintiff is entitled to recover in this suit, as well for the infringement *before* the assignment to him, as for that *after;* and whether the defendant, James, is liable to account for the gains and profits received by him as postmaster, either as such or as damages.

It is not pretended by or on behalf of the defendant, but that an assignee of such claims may maintain a suit upon them, in his own name in equity (2 Story's Eq., § 1007); but it is insisted that the bill in this cause does not cover such claim; and that the evidence does not show an assignment of such claim from Miss Ingalls to the plaintiff. It is true, as was stated when this cause was decided on the former hearing, that the pleader does not appear to have framed his bill with that aspect in mind; but what was said then, was

not said upon examination and deliberation, as a full disposition of the question, but only in passing as illustrating the other question then being considered, so the question is open now, whether the bill is sufficient to cover *that* claim. As to that, the bill sets forth the infringement by the defendant, while the patent was owned by Miss Ingalls; and sets forth *in haec verba* the assignment from her to the plaintiff, of the patent; also, of "all the right, interest and claim for and to the past use of said invention and improvements under the said letters-patent;" and besides praying for an injunction and for an increase of damages, "in addition to the profits and gains to be accounted for by the defendant," it has a prayer for "such other aud further relief as shall be agreeable to equity." This, meagerly, it is true, but after all, substantially, sets forth the claim and assignment, and a prayer for relief as applicable to that as to the other parts of the case. Perhaps there should be a special prayer for an account as to either aspect; but, if one is required, it is quite strongly hinted at, if not very aptly inserted. The proof of the assignment consists of the instrument set forth; and that seems to be amply sufficient to cover this claim. The plaintiff is entitled to recover for the whole time, if any one is, as the case now stands, and it appears that he can recover in this suit, if anywhere, without doing violence to any of the settled rules of pleading.

The other is much more the important question. Whatever question there might be, if the subject was new, it now seems to be settled, that savings in cost by infringement of a patent may be recovered as profits. (Cawood Patent, 94 U. S., 695; Elizabeth *vs.* Pavement Co., 97, U. S., 126.) The defendant saved the sum named by using the patented invention. It is said that the Master erred because the defendant might have used another form of stamps, which would not have been an infringement, and that the saving by using the patented invention instead of that would have been much less than the saving reported. It does not appear however, but that such use of the other form would have been an

infringement; and if that appeared, it appears that the other form was not known to the defendant, and that the saving reported was, in fact, saved by substituting the patented improvement for what was known, and would probably otherwise have been used. The saving therefore appears to be wholly due to the infringement.

It is said too, that this patent is for a device that can only be used in the postal service, which is wholly monopolized by the Government of the United States, which could send letters without post-marking them at all, or lessen the frequency of the mails so that the post-marking could be done separate from the cancellation of the stamps by the old method, without increase of clerical force, at its pleasure, thus leaving this patented invention subject, as to use or value, entirely to the will of the Post Office Department, so that the use of it in the postal service, would not deprive the owner of any opportunity to have it used otherwise, and could not damnify him; and, that, therefore, no damages can be recovered in this case; and that no profits can be recovered because there is no party before the Court, or that can be brought before the Court, who has received any. If it were true, that because all those who can make use of a patented invention, could also do without it, and that this fact was shown that no injury resulted to the owner of the patent from such use, and cut off all claim for damages, there are probably few inventions that would sustain claims for damages at all. People could do as was done before the discovery, and leave the inventor to the enjoyment of his invention by himself. But the Master has not reported any damages beyond the profits, and it does not seem that the defendant can be held liable for damages if he cannot be for profits, unless it may be for taking the profits and placing them beyond the reach of the plaintiff. The Post Office Department required the mails to be sent with certain frequency, and that the postage be paid by stamps on letters, and that the letters should be post-marked, and the stamps

cancelled separately, and required that the defendant should do this at the New York office, either himself or by the employment of clerks. The defendant says in his testimony that the clerks are paid by the Government. This is doubtless true in practical effect, so far as he is concerned, still it is to be presumed that the business is done according to the law, and probably did not intend to testify that it was in any respect done contrary to the law. The law is that the Postmaster-General may allow to the postmaster at New York city, and to certain others, out of the surplus revenues of their respective offices, that is to say, the excess of box rents and commissions over and above the salary assigned to the office, a reasonable sum for the necessary cost, among other things, of clerks, to be adjusted on a satisfactory exhibit of the facts. (Rev. Stats., sec. 3860.) The defendant is therefore to be taken to have made this saving out of moneys actually received into his hands from the profits of his office. He saved it by using the invention in the performance of duties which he was required to do, and had just so much more money left in his hands by reason of the infringement when the duties were done. He did this as postmaster, but he was not obliged to do it. He could have refused the office, or resigned it, or have let this invention alone. He was not subject to any restraint, physical or moral, that he could not make subservient to his own choice. His choice was to use this invention and make this gain. When made, it belonged to the Orator. He paid it over to the Government, and it passed beyond his reach and the Orator's unless it is recovered in this suit, and reimbursed to him under the law. He has not these profits now; and would not have them if he had cast the money into the sea; he has had them as he would have had them then. The situation of the defendant is very different from that of the cit, of Elizabeth in Elizabeth *vs.* Pavement Co., 97 U.S., 126. The city had not saved or made anything by the infringement, and was not liable for profits in any view, whether anyone else was or not, and never had been. Here the defendant has paid over to the Government

what belonged to the owner of the patent, but that is no just answer to the claims of the owner, now belonging to the Orator. Justice can only be done by requiring the defendant to restore the gains to those to whom they belong, and leave him to be protected as the law provides; and in doing this no injustice will be done to anyone. That his official character did not excuse the infringement has already been held, upon what seems to be abundant authority, in this case. If he is liable as an infringer as if he were an ordinary individual, he must be liable to the extent of the consequences as an ordinary individual would be without regard to his reckoning over with the Government. His official character is not any shield against the owner of the patent, although it may be a source of indemnity against the consequences.

BRIEF AS TO THE CLAIMS OF CLEXTON & CASWELL.

Campbell, the complainant, has appealed from that part of the decree of the court below recognizing said Clexton & Caswell as having any rights in the subject-matter of this suit.

The question on this appeal arises out of the following facts:

On the 23d of October, 1869, Charles Eddy became the owner of one undivided one-third interest in the re-issued patent upon which this suit is brought in trust for himself, Albert C. Corse, and Jacob Shavor. R. 147.

On the 27th of March, 1879, said Corse conveyed all his interest to Caroline G. Caswell. R. 1628.

January 16, 1880, Caroline G. Caswell conveyed to Herbert M. Caswell. R. 1630.

January 16, 1880, Herbert M. Caswell conveyed to Horace J. Caswell, one of the appellees in this suit. R. 1631.

On the 31st of March, 1879, the firm of Eddy, Corse & Co., consisting of Charles Eddy, Albert C. Corse, Augustus P. Corse, and George C. Baldwin, Jr., made a general assignment for the benefit of their creditors of all their firm and individual property, except such as was exempt by law from levy and sale upon execution to J. Albert Cipperly and Charles N. Stannard. R. 1632.

On the 7th day of January, 1880, Cipperly and Stannard conveyed all the interest of said assignors or either of them in said re-issued patent to Samuel R. Clexton, one of the appellees and an appellant in this suit.

On the 3d of March, 1880, Jonathan Richardson and Charlotte S. Shavor sold and conveyed to said Samuel R. Clexton all the right in said re-issued patent which they had as administrator of the estate of Jacob Shavor, deceased. R. 1638.

On the 9th of March, 1880, Clexton conveyed to Horace T.

Caswell all the right that he acquired from Corse under and through said assignment of Eddy, Corse & Co. and said conveyance of Cipperly and Stannard to him.

Eddy became a party defendant in this suit after the evidence for complainant Campbell and defendant James was closed, upon an agreement with Campbell that the case should be heard upon the pleadings and evidence as they then stood, unless the Court should otherwise order. (R. 1577). Eddy afterward applied to the Court for leave to introduce evidence to show that a certain instrument referred to in said agreement and dated October 7th, 1871, was cancelled. Such leave was granted by the Court.

Caswell & Clexton, under this and without any other or further order of the Court, came in and filed the conveyance and assignments above referred to, and they were thereupon made parties to the suit, and the court directs in the final decree that out of the $63,000 found due from the defendant James, $13,500 shall be paid to the said Clexton and $7,000 to the said Caswell.

Complainant Campbell assigns for error the rulings of the Court below:

1. In allowing the said conveyances and assignments to be filed in this cause or in considering them or either of them as evidence.

2. In allowing the said Clexton & Caswell to become parties to this suit.

3. In allowing and decreeing to said Clexton & Caswell, or either of them, any sum or sums of money or any part o the recovery in this case.

ARGUMENT.

There are no pleadings in the case showing what the alleged rights of said Clexton & Caswell are in the patent in suit, or how they acquired any rights therein, or anything upon which the other parties of the suit can take issue.

Complainant Campbell has had no opportunity to controvert the claims of the said Caswell & Clexton, or to introduce any evidence to show tnat they are not entitled to any portion of the recovery in this case.

The court below erred in ordering that the following assignments or conveyances be admitted as evidence in this suit to wit:

Said conveyances from Albert C. Corse to Samuel R. Clexton, and from said Clexton to Horace T. Caswell, and from said Caroline G. Caswell to Herbert M. Caswell, and from Herbert M. Caswell to Horace J. Caswell, because there were no pleadings or issues in the case to to which they were applicable or under which their value or effect could be tried, and because complainant Campbell had no opportunity to controvert with evidence their validity.

Said conveyances from Albert C. Corse to Caroline G. Caswell, and said assignment by Eddy, Corse & Co. to Cipperly & Stannard, and said conveyance from Cipperly & Stannard to Samuel R. Clexton were illegally and erroneously treated by the court below as evidence in this case, for the following reasons:

1. There was no order of the court below admitting them as evidence, and they were filed among the papers in the case without any leave or order of the court, and after the Master's report was made.

2. They were not evidence, because there were no pleadings or issues in the case under which their value and effect could be tried, and complainant had no opportunity to controvert with evidence their validity.

3. The conveyance from Cipperly & Stannard to Samuel R. Clexton was not acknowledged, and there was no proof of its execution. As to the conveyance by Jonathan Richardson and Caroline S. Shavor, as administrators of Jacob Shavor, there is no evidence that said Richardson and Caro-

line S. Shavor are his administrators, and it does not appear that they had authority to sell or convey the interest of said Jacob Shavor in said patent, of any, and said conveyance is not evidence in this suit for any purpose.

On page 577 of the Record will be found the following conveyance:

WHEREAS, the letters-patent of the United States of America were duly granted and issued to Marcus P. Norton, of the city of Troy, county of Rensselaer, and State of New York, upon certain improvements in post-office post-marking and cancelling hand-stamps, dated and numbered as follows, to wit: January 14, 1862, No. 34,184; December 16, 1862, No. 37,175; April 14, 1863, No. 38,175; reissued August 23, 1864, No. 1,748. Also letters-patent for internal revenue cancelling stamp, dated August 15, 1865, No. 49,432. Also letters-patent for improvement in post-marking and cancelling hand-stamps, issued July 13, 1869, and ante-dated to June 10, 1869, No. 92,688. And also letters-patent for post-marking letters and cancelling postage stamps by cutting the same, and dated August 9, 1859, No. 25,036, and extended for seven years by the Commissioner of Patents. And whereas Charles Eddy, of the city of Troy, county of Rensselaer, and State of New York, has consented to accept the right, title and ownership of each and every of said letters-patent, in trust for the sole benefit of the owners thereof, in accordance with a memorandum in writing of even date herewith. And whereas it is desirable that but one person shall have the management and control of the said patents for the sole purpose of effecting settlements under the same with any and all infringers of the same, or any one or more thereof, or with whomsoever may use the inventions and improvements contained in the said letters-patent or any of them, which settlement for the past or future use may be in any way the said Eddy may deem proper and expedient.

Now, therefore, for and in consideration of the sum of one dollar, and in the further and other valuable considerations which we now and hereby duly acknowledge the receipt of the same, we, Jacob Shavor and Albert C. Corse, of the said city of Troy, county and state aforesaid, have sold, assigned and transferred, and do now now and hereby sell, assign and transfer unto the said Charles Eddy, in

trust, in the manner so as aforesaid stated, all the right, title and interest of every name and description which we now have in, to, or for the said letters-patents, and the inventions and improvements therein named, described and claimed as new and patentable, or in either of them, to have and to hold the same, and each and every thereof, in trust as aforesaid, with full power to enforce settlement and payment for the past or the future use of the said inventions and patents, o either of them; he, the said Charles Eddy, having full and absolute control of each and all of the said several patents hereinbefore named by date as well as by numbers, commencing with the date of each thereof, intending herein and hereby to sell, assign and transfer unto him, the said Charles Eddy, in trust, all our right, title and interest and ownership in any or all the said several letters-patent, from the date of each of the same and until the expiration of the term for which they were respectively granted and issued unto the said Marcus P. Norton. And hereupon and hereby, the said Charles Eddy is vested with full and absolute power over and control of any and all settlements, and to settle and receipt for, and to sign any and all necessary papers concerning either the past or future use of the said inventions and patents, or either one or more thereof, in settlement and paymentfor such use by and with person or persons, corporations, Government, or any body whomsoever.

In testimony whereof we have, on this 18th day of December, A. D. 1876, hereunto set our hands and seal in presence of two witnesses, namely,

C. H. McGrath.
C. G. Eddy.

Jacob Shavor. [seal.]
Albert C. Corse. [seal.]

Recorded January 11, 1878.

No title to the letters-patent in this suit or any part thereof passed from Eddy, Corse & Co. to Cipperly & Stannard, by virtue of said assignment, for the following reasons:

1st. No schedule of the property assigned was attached to said assignment, as required by the laws of the State of New York, Acts of 1778, Chapter 318, and no reference is made in said assignment to said letters-patent.

2.d Said assignment purports to convey the co-partnership and individual property of the said members of the said firm, but at the time it was made (as appears from the above Exhibit) Eddy was the trustee for Shavor & Corse and others interested in said patent, so that their interests were not only joint as between themselves, but were also joined to the interest of other persons. Does said assignment convey property held in trust by Eddy?

3d. Said assignment expressly excludes from its operation and effect such property of the assignors "as is exempt by law from levy and sale under execution." Letters-patent are not subject to levy and sale upon execution. (Stevens *vs.* Cady, 14 How., 531. Stevens *vs.* Gladding, 17 How., 447.) No right in a patent passes to an assignee in insolvency by order of the Court. It can only pass by a written assignment, signed by the owner of the patent. (Gordon *vs.* Anthony, vol. 16, No. 25, *Official Gazette.*

4th. Is property held in trust, according to the terms of the above exhibit, subject to levy and sale upon execution?

While the above cited conveyance remains in full force and effect, it is submitted that Shavor & Corse have no claim against an infringer, or joint owner with Eddy, of said letters-patent. Their claim if any is wholly against Eddy, because by said conveyance, he is invested not only with all their right and title, but "with full and absolute power over and control of any and all settlements, and to settle and receipt for and to sign any and all necessary papers concerning either the past or future use of said inventions," &c., &c.

Corse had no interest in said patent which he could convey to Caswell, nor had the administrators of Shavor any interest which they could convey to Clexton. All the right that Corse & Shavor have, until said conveyance is in some way altered or annulled, is a right to call upon Eddy, their trustee, for an accounting or for the performance of his trust.

Said conveyance above quoted recites: "And whereas Charles

Eddy, of the city of Troy, county of Rensselaer, and State of New York, has consented to accept the right, title and ownership of each and every of said letters-patent in trust for the sole benefit of the owners thereof in accordance with a memorandum in writing of even date herewith." No memorandum is produced, nor is there any evidence as to what it contained, or as to the terms or conditions upon which Eddy accepted said trust, and it was impossible, therefore, for the court below, with any reasonable certainty, to determine what were the respective rights and interests of said Eddy, Shavor & Corse in the patents referred to in said conveyance.

Judge Wheeler seems to think complainant, Campbell, is not interested in the claims of Caswell & Clexton, and therefore has no right to object to their appearance and proceedings in the case, but the decree below takes a part of the money recovered by his suit against James and gives it to Caswell & Clexton *non constat* that it would have been given to Eddy. Eddy had a perfect right, by virtue of the above-quoted conveyance, to litigate or to settle with Campbell as to the interests in the patent so conveyed to him, and the court cannot know that Campbell was not greatly prejudiced by the interference of Clexton & Caswell.

Campbell has a perfect right to resist the payment of any part of the money recovered in this case to an improper party, and it is no answer to say that, if the improper party does not get it, somebody else will. Moreover, it appears that Campbell is the successor in interest to Eddy.

Judge Wheeler held that any title to the patent or any part thereof, vested in Eddy, did not pass by virtue of said assignment for the benefit of creditors, because said assignment exempted from its operation property not subject by law to levy and sale upon execution, and a patent was such property; but he further held that any interest that Eddy had in claims for the infringement of said patent at the time of said assignment passed thereby to the assignees, because they were choses in action.

This latter ruling is erroneous. Can the owner of a patent assign a claim for its infringement, and authorize the assignee to bring a suit thereon in his own name, the title still remaining in the assignors?

Section 4919 of the Revised Statutes provides, "That damages for the infringement of any patent may be recovered by action on the case in the name of the party interested, either as patentee, assignee, or grantee." Does not "assignee or grantee" here clearly mean assignee or grantee of the patent?

Section 4921, providing for proceedings as to patents in courts of equity, clearly implies that the right to recover damages and profits in such courts is incident to the ownership of the patent.

Judge Blatchford, in Gordon *vs.* Anthony, decided this question and held that, "No person can bring a suit for profits or damages for infringement who is not the patentee or such an assignee or grantee as the statute points out. A claim to recover profits or damages for past infringement cannot be severed from the title by assignment or grant, so as to give a right of action for such claim in disregard of the statute. The profits or damages for infringement cannot be sued for except on a basis of a title as patentee, or as such assignee or grantee to the whole or part of the patent, and not on the basis merely of an assignment of a right to a claim for profits and damages severed from such title."—*Official Gazette*, *vol.* 16, *page* 1135.

The Circuit Court had no jurisdiction of theclaims of Caswell & Clexton.

Practically their proceedings if anything was a suit upon alleged contracts and conveyances to recover from Eddy what he had received or was about to receive as the trustee for Shavor and Corse, their alleged assignors.

All these proceedings depend wholly upon the laws of the State of New York, and the ordinary rules of chancery courts. No reference to, or construction of, the patent laws

is involved, or any question made as to the validity of the patent. The papers show that all parties are citizens of the State of New York.

Hartel *vs.* Tilghman, 99 U. S., 547, seems to be conclusive against the right of Caswell & Clexton to prosecute their claims in a Federal court.

THOMAS L. JAMES, APPELLANT, DEFENDANT, *v.* CHRISTOPHER C. CAMPBELL, APPELLEE, complainant, Charles Eddy, Horace T. Caswell, and Samuel R. Clexton, appellees, defendants.	No. 945.

BRIEF FOR THE APPELLANT.

This is an appeal from the final decree of the circuit court of the United States for the southern district of New York in the suit brought by appellee Campbell against the appellant for the alleged infringement of reissue letters patent No. 4143, wherein an injunction on account of profits and an assessment of damages were prayed for.

The appellant is the postmaster at the city of New York, and the infringement complained of consisted in the use for a number of years at the post-office there of nstruments (complainant's model Exhibits A and B) for the postmarking of letters and the cancellation of the postage stamps thereon.

The original patent No. 38175 was issued to Marcus P. Norton as the inventor, on the 14th April, 1863 (1 Rec., 458). It has been three times reissued and assigned

many times. The reissues and assignments present a variety of questions which will be adverted to particularly hereafter.

In place of the original bill an amended bill (vol. 1, record page 23) was filed, which differed from the original chiefly in adding allegations of a reassignment of the patent from Wm. W. Secombe to Helen M. Ingalls (who was Mr. Campbell's immediate assignor), whereas the original contained only allegations of a revester of title owing to the pretended non-performance of the terms of a deed of trust.

The answer was also amended, and as amended (1 Rec., 56) presented the following defenses:

1. Complainant not the owner of the patent (1 Rec., 60, 61).
2. No patentable invention shown (1 Rec., 62).
3. Abandonment (1 Rec., 64.)
4. Two years' prior use in this country (1 Rec., 64).
5. Such use for two years with patentee's consent and allowance (1 Rec., 64).
6. Improvement had been patented before Norton made his supposed discovery (1 Rec., 62, 63).
7. Norton not the first inventor (1 Rec., 63).
8. Reissues void (1 Rec., 62, 60; 58–9).
9. No infringement (1 Rec., 64).
10. No liability to suit under the circumstances shown (1 Rec., 64–5).

The answer contains the statutory notice as to prior patents, use, knowledge, and invention. It is also supplemented by stipulations under which testimony on James's behalf was taken at Wheeling, Cincinnati, and Cleveland (1 Rec., 659, 660), and the English patent of Bern (2 Rec., 882–3) was put in evidence. By a further

stipulation, evidence as to the defenses of prior invention and prior use in the Philadelphia post-office was put in before Judge Wheeler at the hearing (2 Rec., 1404–1447.)

The usual formal replication to the answer was filed, and proofs were thereupon taken and filed by both parties.

Appellee Eddy claims to own a portion of the patent and of the interests thereunder. He was not a party to the suit as originally framed, but after the taking of proofs by Campbell and James had ceased he was admitted on complainant's motion as a party defendant. (For the stipulation between him and Campbell and the order, see 1 Rec., 654–8.)

Appellees Clexton and Caswell also claim interests in and under the patent through Eddy. They were admitted as parties defendant on their own motion still later in the cause. As between Eddy, Caswell, and Clexton, of the one part, and James of the other part, there are no pleadings, and consequently no controversy. They are proper and, perhaps, necessary parties, because without them the court could not satisfactorily determine the extent of Campbell's interests, supposing him entitled to the prayer of his bill in other respects.

The cause was heard in the first instance by the honorable Hoyt H. Wheeler, district judge of Vermont, assigned to hear circuit court cases. He signed an interlocutory decree, in respect to which several errors will be assigned, that Campbell was the exclusive owner in trust of the patent subject to the right of Ingalls and Eddy; then the patent was good and valid; that James had infringed; that Campbell recover his taxable costs,

charges, and disbursements of James; and that it be referred to Kenneth G. White, esq., as master, to state an account of profits and of damages *in addition*, if any.

Thereupon proofs were put in before the master by both Campbell and James; the said master reported that the profits realized from the infringement were the sum of $63,000; and to such report James filed eighteen exceptions. In the mean time proofs were taken between Campbell, of the one part, and Eddy, Caswell, and Clexton, of the other part, and between Eddy, of the one part, and Caswell and Clexton, of the other part, as to the ownership of certain undivided interests in the patent and of the claims thereunder.

The cause then came on to be heard again before Judge Wheeler on said report and the exceptions thereto, and on said proofs as to ownership of interests. After consideration he signed the final decree from which appeal is taken, wherein the exceptions of both parties are overruled, the master's report is in all things confirmed, the interests of the parties other than James are adjudicated, and a recovery from James to the amount of $63,000 and costs is directed in their favor for their respective shares.

ASSIGNMENT OF ERRORS.

The errors apparent in the record, which affect this appellant and invalidate the final decree so far as it is against him, are contained in the findings and direction of the interlocutory and final decrees, which we now refer to, namely:

1. That Campbell is the exclusive owner in trust of said reissue No. 4143, subject to the rights of Helen M. Ingalls and of Charles Eddy thereto, if any.

First specification.—The circuit court should have found that the reassignment referred to in the bill as from Wm. W. Secombe to Helen M. Ingalls, did not convey this patent and that Secombe's title did not revest in Ingalls.

Second specification.—The circuit court should have found that the instrument set out in full in the bill and there called an assignment from Ingalls to Campbell is not an assignment of this patent within the meaning of the patent law, and did not convey to Campbell the title to this patent, and did not invest him with a right to sue in his own name.

2. That the said reissued letters patent No. 4143 are good and valid and that said Norton is the original and first inventor of the improvement described in the original patent and in the several reissues.

First specification.—The circuit court should have found that said improvement had been patented before the supposed discovery thereof by said Norton.

Second specification.—The circuit court should have found that said Norton was not the original and first inventor of said improvement.

Third specification.—The circuit court should have found that said improvement had been known and used by others in this country before Norton made his supposed discovery thereof.

Fourth specification.—The circuit court should have found that said improvement had been publicly used in this country for more than two years before said Norton's application for the original patent, in some places with and in others without his consent and allowance.

Fifth specification.—The circuit court should have found that said improvement, or material parts thereof, had been abandoned to the public before said Norton's application.

Sixth specification.—The circuit court should have found that the specifications, claims, and drawings of said reissue No. 4143 do not show patentable invention.

Seventh specification.—The circuit court should have found that said reissue is void, because it is not for the same invention as the original patent.

Eighth specification.—The circuit court should have found that said reissue is void, because the description of invention therein is vague, obscure, inexact, and misleading, and because the alleged invention or discovery is not particularly pointed out and distinctly claimed.

Ninth specification.—The circuit court should have found that said reissue is void, because based upon an assignment and surrender of the reissue of 1869, which reissue was issued without authority of law (on the basis of a forged assignment of the reissue of 1864 and of an unauthorized surrender of said reissue of 1864) to a person who was not an "assign," within the meaning of the statute allowing reissues, of the persons to whom the original patentee had assigned the original patent.

3. That this appellant has infringed said reissue; whereas the circuit court should have found that there has been no infringement.

4. That said Campbell do recover his costs, charges, and disbursements to be taxed.

First specification.—The circuit court should have decreed that the bill be dismissed with costs to James.

Second specification.—The circuit court should have found specially that Norton was not the original and first inventor of what is claimed in the first claim of the reissue patent in suit; that no disclaimer was entered at the Patent Office before the commencement of this suit; that consequently no costs are recoverable.

5. "That an account be taken of the profits, gains, and advantages which have in anywise been received or made, or which have arisen or accrued," and of the damages in addition thereto, if any, which complainant has sustained, and that the master state, &c., "an account of the gains, profits, and advantages which the said defendant, Thomas L. James, has in anywise received or made, or which have arisen or accrued on account of the infringements aforesaid," and of the damages in addition thereto, if any, which complainant has sustained.

First specification.—The circuit court should have confined the account of gains, profits, and advantages to such gains, profits, &c., as James *himself* has made or such as have accrued *to him*.

Second specification.—The statute which ostensibly gives to complainants in equity, upon a decree for infringement, the right to "recover, in addition to the profits to be accounted for by the defendant, the damages the complainant has sustained thereby," impairs the right of trial by jury guaranteed by the Constitution, and is consequently void.

6. That James's exceptions to the report of the master be overruled, and that said report be in all things confirmed.

Specification.—The conclusion of the report is that "the gains and profits which have arisen or accrued to the defendant James *under the decree* in the saving of salaries alone" are the sum of $63,000. This conclusion is preceded by an opinion stating findings of fact and law (see the report 2, Record, p. 1548.) Each of James's eighteen exceptions to this report were overruled whereas they should each and all have been allowed. Said exceptions are as follows:

I. Said defendant excepts to the master's finding and report, and to his statement of the account, on the theory that the time to be recovered by the accounting commenced when the said defendant first became postmaster, to wit, in April, 1873; because said master should have found and reported that under the case stated in the bill of complaint, such time did not begin earlier than the date of the assignment from Helen M. Ingalls to the complainant, to wit, January 2, 1877.

II. Said defendant excepts to the master's report, for that, whereas it was referred to the master by the interlocutory decree "to ascertain and take, and state and report to the court an account of the gains, profits and advantages which the said defendant Thomas L. James has in anywise received or made * * * by reason of the infringements aforesaid," the master has failed to make any report on the subject.

III. Said defendant excepts to the master's report for that, the master should have found and reported on the uncontradicted evidence of said defendant, that he, said defendant, has not in any manner received or made any gains, profits, and advantages by reason of said infringements.

IV. Said defendant excepts to the following finding in said report: "the Court has held that the patent which is the subject-matter of the suit has been used by him without authority of law, and hence, that he is personally responsible, the same as any public officer is, who takes private property for public use without the authority of the owner." For that it was not referred to the master to make any finding or report upon the subject.

V. Said defendant excepts to the following finding in the report: "as to the first question raised by the defendant that no gains, profits, or advantages are shown to have accrued to or been received by the defendant personally, &c.; this question is disposed of by the decision of the court as already stated in the report." For that said question was not so disposed of, and for that

it was not referred to the master to determine whether or not said question was so disposed of.

VI. Said defendant excepts to the report for that, whereas it was referred to the master to ascertain and take, and state and report to the court, an account of the "damages in addition," which the complainant has sustained by reason of the infringements, nothing has been reported on the subject.

VII. Said defendant excepts to the report for that, under the reference recited in the last exception, the master should have reported that no damages were proved to have been sustained by the complainant by reason of the infringements, no evidence of any damages having been put in before him.

VIII. Said defendant excepts to the finding in the report as follows: "Which, to wit, profits made by the defendant under the decision of the courts are the same thing as damages, and are called damages." For that, profits made by the defendant are not the same thing as damages.

IX. Said defendant except to the following finding in the report, in answer to defendant's claim that unbalanced combined instruments were open and free to be used.

"The answers to this claim are:

"1st. That such claim is not warranted by the opinion of the court as the master understands it.

"2d. It is not warranted by a proper construction or interpretation of the patent in controversy.

"3d. The proofs in the case show, and the decision of the court also shows that Norton himself was the original and first inventor of such device, that is, a combined stamper and canceller, in which the handle was not placed in the middle, but on one side over the postage-stamper. The use therefore of such device was not open to the defendant or to the government, and for this reason no comparison in the ascertainment of profits can be made between the two."

A. Because such claim is warranted by the opinion of the court.

B. Because it is warranted by a proper construction of the patent in controversy.

C. Because neither the proofs nor the opinion of the court show that Norton was the original and first inventor of such unbalanced combination.

D. Because the fact if true, that Norton was such original and first inventor, is immaterial.

E. Because such unbalanced combination is adequate to the work of efficient postmarking and cancelling at a less expense than would be necessary if separate postmarkers and cancellers were used, and was open to the defendant and to the government to use during all the period of infringement as appears from the testimony of master's witnesses Burchard, Bogia, Wareing, O'Connor, Magee, Beach, Andrews, and Richards, and from the testimony as to the unbalanced combined instruments used in the New York, Geneva, Buffalo, Cleveland, Janesville, Cincinnati and Philadelphia post-offices, made and sold by J. H. & E. S. Zevely, and disclosed in the patent of August 9, 1859, prior to the issuance of the patent in suit.

X. Said defendant excepts to the report for that, if saving of expense or salaries is or is shown to be by the evidence a proper measure of gains and profits in this suit, which defendant protests is not the case, the master should have found and reported in lieu of the finding recited in the last exception, on the evidence referred to under E in that exception, that unbalanced combined instruments adequate to the work of efficient postmarking and cancelling at a less expense than would be necessary if separate postmarkers and cancellers were used, were open and free to the defendant to use during all the period of infringement, and that comparison ought to be made between such unbalanced combined instruments and the infringing machines in determining what saving has been made by the use of said infringing machines.

XI. Said defendant excepts to the report for that, in lieu of the items of savings in salaries reported, the same being based upon a comparison of the infringing

machines with separate postmarkers and cancelers, the master should have reported that no evidence of a saving in salaries or expense in using the infringing machines rather than unbalanced combined instruments, is proved by the evidence to have been made.

XII. Said defendant excepts to the report for that, in lieu of the items of savings in salaries reported, the master should have reported on all the evidence before him, that no pecuniary gains, profits, or advantages were proved to have arisen or accrued by reason of the infringements.

XIII. Said defendant excepts to the finding in said report, as follows: "That more perfect and efficient work is done by the patented combined instrument, both in the making of the postal mark and in the cancellation of the postage-stamp, than by any other instrument known or used in the post-office prior to the use of such combined instrument."

A. Because it is not supported by evidence.

B. Because it is contrary to the weight of evidence.

C. Because the testimony before the master of the witnesses from the New York post-office shows that the improvements in postmarks and cancellation marks is not due to the patented features of the infringing machines, but to other causes.

XIV. The said defendant excepts to the finding and report of the master, "that the gains and profits which have arisen or accrued to the defendant James under the decree, in the saving of salaries alone, and independent of any advantages which it appears have been derived from saving of time and labor, the better performance of the postmarking, and more complete cancellation of the postage-stamp, and speed in dispatching the mail, are as follows, viz, &c., &c." (Here follow the items at the end of the report.)

A. Because it is not supported by the evidence.

B. Because it is contrary to the weight of the evidence.

C. Because it is not relevant to any of the matters referred to the master by the interlocutory decree herein.

D. Because it is based on estimate, conjecture, and guess, and not upon any certain data established by evidence.

E. Because the testimony of defendant James that he has neither made nor received any gains, profits, or advantages from the use of the infringing machines is uncontradicted.

F. Because it was not referred to the master by the interlocutory decree herein, to find and report on the question whether, as a matter of law, under the decree gains and profits (if any), which have arisen or accrued, have arisen or accrued to the defendant.

G. Because under the circumstances of the case as developed by the evidence before the master the savings in salaries is not a proper or lawful measure of gains, profits, and advantages arising from the use of the infringing machines.

H. Because the saving in salaries is not shown by the evidence to be a proper or lawful measure of gains, profits, and advantages arising from the use of the infringing machines, there being no evidence to show that the end or purpose accomplished by the use of the infringing machines has a pecuniary value equal to, or greater than, or standing in any ascertained ratio to the salaries of such additional clerks as would be required to accomplish the same end and purpose by other means.

I. Because the gains and profits itemized in this finding are arrived at, as appears by preceding parts of this report, by considering how many additional clerks would be required to accomplish the same result if separate postmarkers and cancelers were used in lieu of the infringing machines, whereas the unbalanced combined instruments (which [as appears from the evidence referred to under E, in the 9th exception] were, prior to the issuance of the patent in suit, used in the New York, Geneva, Buffalo, Cleveland, Janesville, Cincinnati, and Philadelphia post-offices, made and sold by J. H. & E. S. Zevely, disclosed in the patent of August 9, 1859, and are capable of effective use for the purpose of postmarking and canceling at a less expense than would be neces-

sary if separate postmarkers and cancelers were used) were open and free to be used by the defendant during all the period of infringement.

XV. Said defendant excepts to the report because the finding that the saving in salaries, itemized and reported, is gains, profits, and advantages which have arisen or accrued, is inconsistent with and repugnant to the following finding: "No evidence is produced showing what the actual pecuniary saving by either has been, and hence none can be reported by the master," referring to the two advantages, to wit, first, "a postmark on the envelope, distinct and separate from the cancellation mark on the postage stamp," and, second, "attaining this result in such time as not to delay the mails," which constitute the end or purpose for the accomplishment of which the infringing machines have been used.

XVI. Said defendant excepts to the finding and report and to the statement of the account on the theory that by the use of the patented instrument the salary of one clerk has been saved in the foreign department of the New York post-office during all the time between April 1, 1873, and January 1, 1880.

To support this exception said defendant claims that there was no evidence before the master that warranted this finding, and such finding is inconsistent with Mr. James's uncontradicted testimony. (Master's Rec., p. 116, fol. 375. Appeal Rec. 2, p. 1508.)

XVII. Said defendant excepts to the finding and report and to the statement of the account on the theory that by the use of the patented instrument the salary of one clerk has been saved in the fourth division of the New York post-office during all the time between April 1, 1873, and January 1, 1880.

To support this exception said defendant claims that there was no evidence before the master that warranted such finding; and such finding is inconsistent with Mr. James's uncontradicted testimony. (Master's Rec., p. 116, fol. 375. Appeal Rec. 2, p. 1508.)

XVIII. Said defendant excepts to the finding and report and to the statement of the account on the theory

that the salaries of four clerks have been saved in the various city stations of the New York post-office during all the time between April 1, 1873, and January 1, 1880.

To support this exception said defendant claims that there was no evidence before the master that warranted such finding; and such finding is inconsistent with Mr. James's uncontradicted testimony. (Master's Rec., p. 116, fol. 375. Appeal Rec. 2, p. 1508.)

7. That Christopher C. Campbell, the complainant, is the owner in trust of an undivided two-thirds part of the said reissue patent No. 4143.

8. That Charles Eddy, individually and as trustee for Horace T. Caswell and Samuel R. Clexton, is the owner of an undivided one-third part of said reissue patent No. 4143.

9. That the gains, profits, savings, and advantages which have been made or which have arisen or accrued on account of the infringements upon and in violation of the rights under and secured by said reissue patent No. 4143 are the sum of sixty-three thousand dollars ($63,000).

10. That Campbell, the complainant, do recover of James, this appellant, the sum of $42,000, and the taxed costs, $1,470.40, making in all the sum of $43,471.40.

11. That Charles Eddy, individually and as trustee for Samuel R. Clexton and Horace T. Caswell, do recover of James, this appellant, the sum of $21,000.

12. That James, this appellant, pay to the clerk of said circuit court within twenty days from the entry of said final decree, with interest thereon from the date of said decree, the sum of $64,471.40, for the benefit of Campbell, the complainant, Clexton, Caswell, Eddy, and Campbell, assignee of Eddy.

13. That, in default of such payment by James, this

E. Whether the time covered by the account, as stated by the master, is correct.

F. Whether the 13th exception is well taken.

G. Whether the 16th, 17th, and 18th exceptions are well taken.

VII.—Of the rights in this suit of the adverse parties other than Campbell as against James.

VIII.—Of the disposition of the appeal.

I.—Of the Title.

The patent in suit, reissue No. 4143, was granted October 4, 1870, to Helen M. Ingalls, as the assignee by mesne assignments from Norton, the patentee of the original patent, whose wife is Miss Ingalls's sister.

In the bill, Campbell deduces his title from Ingalls, by referring specifically to the following assignments:

Ingalls to William W. Secombe in trust, dated March 4, 1871. (Printed in the record at page 487 of vol. 1.)

The Secombe Manufacturing Company and William W. Secombe, president, to Ingalls, dated July 10, 1873. (Printed in the record at page 493 of vol. 1.)

It is also alleged that Secombe had failed to perform the terms of his trust, and that consequently the title reverted (see amended bill, 1 Rec., 30), and this is the only allegation on the subject in the original bill (1 Rec., 6).

Ingalls to Campbell in trust, dated January 2, 1877. (Printed in the bill, 1 Rec., 31–4.)

We attack the second and third links in this chain.

A. As to the alleged transfer, either by assignment or reverter, from Secombe to Ingalls.

There is no dispute in fact that the assignment of

March 4, 1871, conveyed what title Ingalls then had in trust to Secombe. The bill alleges it, and complainant is bound by his allegations. (Vattier *v.* Hinde, 7 Pet., 252; Langdon *v.* Goddard, 2 Story, 275.) It is essential to Campbell's case, therefore, that a retransfer should be made out.

The alleged reassignment (1 Rec., 493) will first be considered. Our positions with regard to it are that it does not convey anything held by William W. Secombe individually or as trustee, and that the patent in suit is not part of the subject-matter conveyed.

The instrument is signed "Secombe Manufacturing Co. [seal.]" "W. W. Secombe, president, [seal.]" In the second and third paragraphs Secombe is described twice by the words "as president" of the company. Further on he is mentioned five times, and each time, as well as in the signature, he is described by the word "president," the little word "as" being omitted.

Now, in what capacity did Secombe execute this instrument? Was it the intention, deducible from the instrument, to convey his individual interests in the patents described, or did he act merely as agent of the company?

Judge Wheeler held (2 Rec., 1455–6) that the execution above indicated made the instrument Secombe's individual deed, carrying whatever title he had in the subject of the conveyance.

In this we submit the learned judge was wrong.

The cases which he cites show the nature of the error. They are Combe's case (9 Co. Rep., 75); Clark *v.* Courtney (5 Pet., 319); Isham *v.* Bennington Iron Co. (19 Vt., 230); Miller *v.* R. R. Co. (36 Vt., 452); and Brinley *v.* Mann (2 Cush., 337). In each of these cases the ques-

tion was whether a transaction *which by law had to be performed by deed* had been validly performed by an agent who executed the deed by signing his own name and affixing his own seal, and it was held on immemorial technical principles that such execution made the instrument his deed, and not that of his principal, no matter how clear the intention to act for the principal appeared in other parts of the instrument. But some of these very cases point out "a clear distinction between acts done *in pais* and solemn instruments or deeds, as to their mode of execution by an attorney." (Story J. in Clarke *v.* Courtney, *supra*, where Combe's case is cited at large.) Now, an assignment of a patent need not be by deed. Any instrument in writing showing the intention will answer. (Rev. Stats., sec. 4898.) Secombe's seal may be regarded as surplusage; when the law does not require an instrument to be sealed the "presence or absence of that formality is wholly immaterial." (Gibson *v.* Warden, 14 Wall., 247, citing Milton *v.* Mosher, 7 Metc., 244; Tapley *v.* Butterfield, 1 Metc., 515; Despatch Line *v.* Bellamy Man'g Co., 12 N. H., 234.)

It is clear, therefore, that in construing this instrument we are not hampered by the technical rules applicable to deeds. We have only to arrive at the intention of the parties from the terms used.

The first paragraph of the instrument (1 Rec., 493) recites the issuance of various patents, describing most of them very vaguely and none of them with precision.

The second paragraph recites that the "aforesaid" inventions and patents have been assigned to the Secombe Manufacturing Company, and that the several deeds of assignment have been recorded in the Patent Office

March 4, 1871, conveyed what title Ingalls then had in trust to Secombe. The bill alleges it, and complainant is bound by his allegations. (Vattier *v.* Hinde, 7 Pet., 252; Langdon *v.* Goddard, 2 Story, 275.) It is essential to Campbell's case, therefore, that a retransfer should be made out.

The alleged reassignment (1 Rec., 493) will first be considered. Our positions with regard to it are that it does not convey anything held by William W. Secombe individually or as trustee, and that the patent in suit is not part of the subject-matter conveyed.

The instrument is signed "Secombe Manufacturing Co. [seal.]" "W. W. Secombe, president, [seal.]" In the second and third paragraphs Secombe is described twice by the words "as president" of the company. Further on he is mentioned five times, and each time, as well as in the signature, he is described by the word "president," the little word "as" being omitted.

Now, in what capacity did Secombe execute this instrument? Was it the intention, deducible from the instrument, to convey his individual interests in the patents described, or did he act merely as agent of the company?

Judge Wheeler held (2 Rec., 1455–6) that the execution above indicated made the instrument Secombe's individual deed, carrying whatever title he had in the subject of the conveyance.

In this we submit the learned judge was wrong.

The cases which he cites show the nature of the error. They are Combe's case (9 Co. Rep., 75); Clark *v.* Courtney (5 Pet., 319); Isham *v.* Bennington Iron Co. (19 Vt., 230); Miller *v.* R. R. Co. (36 Vt., 452); and Brinley *v.* Mann (2 Cush., 337). In each of these cases the ques-

tion was whether a transaction *which by law had to be performed by deed* had been validly performed by an agent who executed the deed by signing his own name and affixing his own seal, and it was held on immemorial technical principles that such execution made the instrument his deed, and not that of his principal, no matter how clear the intention to act for the principal appeared in other parts of the instrument. But some of these very cases point out "a clear distinction between acts done *in pais* and solemn instruments or deeds, as to their mode of execution by an attorney." (Story J. in Clarke *v.* Courtney, *supra*, where Combe's case is cited at large.) Now, an assignment of a patent need not be by deed. Any instrument in writing showing the intention will answer. (Rev. Stats., sec. 4898.) Secombe's seal may be regarded as surplusage; when the law does not require an instrument to be sealed the "presence or absence of that formality is wholly immaterial." (Gibson *v.* Warden, 14 Wall., 247, citing Milton *v.* Mosher, 7 Metc., 244; Tapley *v.* Butterfield, 1 Metc., 515; Despatch Line *v.* Bellamy Man'g Co., 12 N. H., 234.)

It is clear, therefore, that in construing this instrument we are not hampered by the technical rules applicable to deeds. We have only to arrive at the intention of the parties from the terms used.

The first paragraph of the instrument (1 Rec., 493) recites the issuance of various patents, describing most of them very vaguely and none of them with precision.

The second paragraph recites that the "aforesaid" inventions and patents have been assigned to the Secombe Manufacturing Company, and that the several deeds of assignment have been recorded in the Patent Office.

This paragraph also refers to such recorded assignments for a fuller description of the inventions and patents assigned to said Secombe Manufacturing Company. It concludes by again referring, with some tautology, "to the invention and to the several letters patent mentioned in the said deeds of assignment to the said Helen M. Ingalls by the said Marcus P. Norton and by the said Helen M. Ingalls and said Marcus P. Norton or either of them to the said Secombe Manufacturing Company, *or to William W. Secombe as president of the said manufacturing company*, for a more full and perfect description of the said several letters patent and inventions and improvements so sold and conveyed and herein and hereby sold and conveyed as hereinafter written."

The third paragraph recites the desire of Miss Ingalls to obtain each and every of the "*aforesaid* letters patent, inventions, and improvements now held and owned by the said Secombe Manufacturing Company, or by the said William W. Secombe *as president*."

The fourth paragraph states a consideration of $1,000, and a further consideration that Norton "shall make no claim against the said Secombe Manufacturing Company for professional services rendered." (Note that W. W. Secombe is not named at all here.) It then proceeds as follows, dropping "as" before "president:" "We, the said Secombe Manufacturing Company, and William W. Secombe, president," have sold, &c., unto the said Helen M. Ingalls "each and every of the *said* inventions, improvements, and letters patent."

The fifth paragraph states an intention to convey also every application for reissue or extension then pending in the Patent Office "in which said Secombe Manufacturing Company *or by said William W. Secombe*" President

have or claim any interest. The cı t
said William W. Secombe" gives a
capacity in which Secombe was act

The meaning of the sixth clause is that the company and Secombe, president, relinquish to Ingalls all rights arising out of contracts in respect to *said* patents, &c., between them, or either of them, of the one part, and Ingalls and Norton, or either of them, of the other part; so that they (Ingalls and Norton) shall have the same rights, titles, &c., which they had "at the time of the making and executing of the said several deeds of assignment of *said* inventions, improvements, and letters patent to said Secombe Manufacturing Company, or William W. Secombe, president." Note that the very same assignments are here described as made to "Secombe, president," which are described in other parts of the instrument as made to "Secombe, as president." The "said" inventions and patents are stated first to have been conveyed to the company; they are then described as having been conveyed to the company, or to Secombe, as president thereof; and here they are referred as having been conveyed to the company, or to Secombe, president.

If anything is plain in this clumsily drawn instrument it is that the different forms of expression concerning Secombe have always one and the same meaning, namely, that Secombe is acting as the agent of the company. There is nothing to indicate that he was acting for himself individually. In a common law pleading, and perhaps in a deed of land, the suffix "president" might be construed as mere description of the person, but in informal documents, such as an assignment of patents is, the parties will not be presumed

This paragraph also refers to such recorded assignments for a fuller description of the inventions and patents assigned to said Secombe Manufacturing Company. It concludes by again referring, with some tautology, "to the invention and to the several letters patent mentioned in the said deeds of assignment to the said Helen M. Ingalls by the said Marcus P. Norton and by the said Helen M. Ingalls and said Marcus P. Norton or either of them to the said Secombe Manufacturing Company, *or to William W. Secombe as president of the said manufacturing company*, for a more full and perfect description of the said several letters patent and inventions and improvements so sold and conveyed and herein and hereby sold and conveyed as hereinafter written."

The third paragraph recites the desire of Miss Ingalls to obtain each and every of the "*aforesaid* letters patent, inventions, and improvements now held and owned by the said Secombe Manufacturing Company, or by the said William W. Secombe *as president*."

The fourth paragraph states a consideration of $1,000, and a further consideration that Norton "shall make no claim against the said Secombe Manufacturing Company for professional services rendered." (Note that W. W. Secombe is not named at all here.) It then proceeds as follows, dropping "as" before "president:" "We, the said Secombe Manufacturing Company, and William W. Secombe, president," have sold, &c., unto the said Helen M. Ingalls "each and every of the *said* inventions, improvements, and letters patent."

The fifth paragraph states an intention to convey also every application for reissue or extension then pending in the Patent Office "in which said Secombe Manufacturing Company *or by said William W. Secombe*" President

have or claim any interest. The curious phrase "or by said William W. Secombe" gives a plain hint of the capacity in which Secombe was acting. President

The meaning of the sixth clause is that the company and Secombe, president, relinquish to Ingalls all rights arising out of contracts in respect to *said* patents, &c., between them, or either of them, of the one part, and Ingalls and Norton, or either of them, of the other part; so that they (Ingalls and Norton) shall have the same rights, titles, &c., which they had "at the time of the making and executing of the said several deeds of assignment of *said* inventions, improvements, and letters patent to said Secombe Manufacturing Company, or William W. Secombe, president." Note that the very same assignments are here described as made to "Secombe, president," which are described in other parts of the instrument as made to "Secombe, as president." The "said" inventions and patents are stated first to have been conveyed to the company; they are then described as having been conveyed to the company, or to Secombe, as president thereof; and here they are referred as having been conveyed to the company, or to Secombe, president.

If anything is plain in this clumsily drawn instrument it is that the different forms of expression concerning Secombe have always one and the same meaning, namely, that Secombe is acting as the agent of the company. There is nothing to indicate that he was acting for himself individually. In a common law pleading, and perhaps in a deed of land, the suffix "president" might be construed as mere description of the person, but in informal documents, such as an assignment of patents is, the parties will not be presumed

to have had the nice distinction between "*president*" and "*as president*" in mind.

It should be remembered also that Secombe did not hold the patent in suit absolutely. His title was a trust title. The beneficiaries of the trust to be sure were Ingalls and Norton's wife and children, but of course the instrument must be construed as though there were no kinship between the *cestuis que trust.* An intention on Secombe's part to divest himself of his trust title ought to be expressed clearly.

We have next to consider what the subject-matter of this conveyance is, or rather whether the patent in suit is any part of such subject-matter. Much that was necessarily said on the question of the capacity in which Secombe acted is also relevant here.

We shall attempt first to extract the meaning from the words of the document itself, from the references *aliunde* contained therein, and from the circumstances shown by the record to have existed at the time of its execution; then we shall endeavor to discover the practical construction put upon it by the parties.

The first paragraph recites the issuance of various patents upon Norton's application and petition, describing them vaguely.

The patent in suit was issued to Norton on the 14th April, 1863, under the title in the patent itself, "Improvement in post-office stamps" (1 Rec., 459), and in the annexed schedule, "Improvements in post-marking and canceling revenue and postage stamps," &c., &c. (*idem*). It was reissued to Shavor & Corse as assignees on August 23, 1864, under the title in the patent itself, "Improvement in post-office stamps" (1 Rec., 463), and in the annexed schedule, "Improvements in post-marking letters, pack-

ets, &c., and canceling postage-stamps thereon" (*idem*). It was again reissued to Norton on August 3, 1869, under the title stated in the patent itself, "Post-office post-marking and canceling hand-stamps" (1 Rec., 471), and in the schedule annexed, "Improvements in post-marking letters, packets, &c., and in the canceling of the postage-stamps thereon." (1 Rec., 472.) It was again and lastly reissued to Ingalls as Norton's assignee on October 4, 1870, under the same titles in patent and schedule as last specified. (1 Rec., 480, 481.)

In addition to the patent in suit the record shows that patents having the following titles have been issued on Norton's application:

1. No. 25036, August 9, 1859, for "Improvement in post-marking stamps," or as it is called in the schedule "Post-office postmarking stamp." (2 Rec., 1271.)

2. No. 34184, January 14, 1862, for "Hand-stamps for post-office," or as it is called in the petition, "Improvement in post-office postmarking hand-stamps." (1 Rec., 585–6.)

3. No. 37175, December 16, 1862, for "Postmark and canceling stamp," or as it is called in the schedule, "Improved postmarking and canceling stamp." (2 Rec., 1277).

4. No. 106716, August 23, 1870, for "Improvement in hand-stamps," or as it is called in the schedule, "Improvements in a device or instrument for printing, dating, and canceling internal-revenue or other stamps of value by cutting or puncturing the same." (1 Rec., 625, 626.)

5. Reissue No. 4144, division B, October 4, 1870, for "Improvement in hand-canceling stamps," or as it is called in the schedule, "Improvements in a device or machine for printing, for dating upon, and for canceling

internal-revenue stamps of value by cutting," &c. (1 Rec., 488, 489.)

Turning back now to the first paragraph of the assignment, we find that none of the phrases there used aptly describe the improvement covered by the patent in suit, and that all of them may be well satisfied by limiting them to other patents. The phrase "hand-printing and dating stamps" fits nothing accurately; but it approaches the titles of several patents much nearer than it does any of the titles of the patent in suit. The phrase "post-office postmarking stamps" differs only in a single letter from the title given in the schedule of patent No. 25036, and it is nearly the same as the title given in the schedule of patent No. 34184. The phrase "internal-revenue dating and canceling stamps" could not by possibility relate to the patent in suit.

The phrase "and also during the years 1870 and 1871" is broad enough to cover the patent in suit which was reissued on October 4, 1870, but it is abundantly satisfied, so far as regards the year 1870, by confining it to reissue No. 4144, which was granted to the Secombe Manufacturing Company on October 4, 1870, as the assignee of Ingalls and Norton.

The result of this analysis is that the first paragraph does not *necessarily* include the patent in suit.

The draftsman of the instrument saw that the description of the subject of conveyance lacked precision; accordingly he framed the second paragraph, the sole purpose of which is to identify the patents conveyed. It is said there—

1st. That "the *aforesaid* inventions and letters patent" have been assigned to the Secombe Manufacturing Company, by Norton, and by Ingalls, Norton's assignee.

2d. That such assignments have been recorded and are now of record in the Patent Office.

3d. That reference is made to such recorded instruments for a more full and perfect description of the patents, inventions, and improvements "herein and hereby sold and conveyed."

In the latter part of this paragraph a doubt seems to have entered the mind of the draftsman as to whether he had correctly remembered the form of the assignments to the Secombe Manufacturing Company. Accordingly he indicates that the record may show that the patents had been conveyed to the company directly or to the company by assignment to Secombe as president thereof.

The third paragraph sums the whole matter up in brief, and as plainly as words can do it, by stating that "each and every of the *aforesaid* letters patent, inventions, and improvements" are "*now held and owned by the said Secombe Manufacturing Company or by* the said William W. Secombe as president."

In these first three paragraphs the subject-matter of the conveyance is defined, roughly it is true, but in such manner that by investigation the precise description can be ascertained. There is nothing in the rest of the instrument which alters in any respect a single line of this definition.

The consideration clause in the fourth paragraph shows that the consideration moved to the Secombe Manufacturing Company, so far as it shows anything upon that point. The grant in the same paragraph is of the "*said* inventions, improvements, and letters patent," which means of course those described in the first three paragraphs. The fifth paragraph is confined to applications for reissues and exten-

sions then (in 1873) pending in the Patent Office. In like manner the sixth paragraph is confined to rights arising out of contracts in respect to *said* inventions and patents.

From all this it is plain that *the subject-matter of this assignment is patents held by the Secombe Manufacturing Company, or by W. W. Secombe, as president of said company, and obtained by assignments which are of record from Norton directly, or from Norton through Ingalls.* Was the patent in suit ever so held?

(1) If so, it is Campbell's part to show it. The burden is on him to make out his title.

(2) The assumption that it was would contradict the bill which alleges specifically transmission of title from Ingalls to Secombe, from Secombe to Ingalls, and from Ingalls to Campbell, and so by implication asserts that the title was never in any other person.

(3) Defendant's Ex. 15 H. (2 Rec., 1142–'60) is a bundle of papers in regard to which the Commissioner of Patents certifies that it is a true copy "of all assignments of record" under the patent in suit. It contains no assignment to the Secombe Manufacturing Company or to Secombe as president.

(4) Ingalls testifies that the only persons to whom she ever assigned the patent were Campbell and Secombe, individually. (1 Rec., 779–'80.)

(5) Norton testifies that he never assigned the patent in suit to the Secombe Manufacturing Company or to Secombe as president thereof. (1 Rec., 438.)

It is certain that the patent was never conveyed to the Secombe Manufacturing Company or to Secombe as president thereof, and it necessarily follows that it is not covered by the assignment under consideration.

This conclusion is strengthened by the following circumstances:

(1) Secombe's connection with this patent seems to have commenced shortly before August 15, 1870. On that day Norton agreed under seal to give him ten per cent. of such sum as the Postmaster-General should allow in settlement for the use of the patent (2 Rec., 1152). At this time Norton's assignment to Ingalls had been executed but not recorded (1 Rec., 478–'9). Accordingly, on October 4, 1870 (the day the patent in suit was reissued), Ingalls, under seal, ratified Norton's above agreement (2 Rec., 1153). Throughout this ratification Secombe is referred to individually except when Ingalls states that she has assigned division B (reissue No. 4144 of October 4, 1870) to the Secombe Manufacturing Company "*according to the terms and provisions of a certain memorandum agreement in writing signed by the said W. W. Secombe as president of said company, having authority so to do.*" This shows that Secombe was even so early acting in two capacities, perfectly well understood by himself, by Ingalls, and by Norton. As to division B, and perhaps other patents like it, he dealt with Norton and Ingalls as president of the company. As to the 1863 patent he had advanced money as an individual, and he dealt with them and was recognized by them in his individual capacity. This being so, one cannot help believing that the intention would have been more clearly expressed if the assignment under consideration had been designed to cover the patents held by Secombe as an individual.

(2) It is not remarkable that the Secombe Company should at this time have been willing to part with the patents held by it. For early in 1873 these patents had

been held worthless in the suit brought by T. J. W. Robertson against the company. This suit is referred to several times in the testimony (2 Rec., 894, 920; 1 Rec., 261, 423–'4, 433), and is reported in 10 Blatch., R., 489.

But it would be very strange indeed if Secombe had been willing to surrender his title to a patent in respect to which he had expended at least ten thousand dollars (see agreement appended to his declaration of trust, 1 Rec., 597). Ingalls admits that even the trifling consideration of $1,000, stated in this assignment, was not in fact paid. (1 Rec., 780.)

But there are other matters of still greater significance. This is a case where, owing to the vagueness of the terms used, the practical construction which the parties by their subsequent acts have put upon the instrument carries great and perhaps controlling influence. (Chicago *v.* Sheldon, 9 Wall., 54, bottom; Railroad *v.* Trimble, 10 Wall., 377, middle.)

That Ingalls did not consider that Secombe had conveyed the patent back to her appears very clearly from her assignment to Campbell. (1 Rec., 31; 2 Rec., 1157.) That document recites with tedious particularity every reissue and every antecedent assignment, but it makes no mention of an assignment from Secombe; it recites only that Secombe had failed to perform the terms of his trust, and that, consequently, the title reverted. Moreover, Ingalls, by her agreement of October 4, 1870, made Norton her agent in respect to transactions with Secombe under this patent. (2 Rec., 1153; see also agreement appended to declaration of trust; 1 Rec., 597 and Norton's testimony, 1 Rec., 161, middle, 2 Rec., 1499, 1500.) Norton's acts are therefore her acts. It is

through Norton also that we are able to get at Secombe's views, he having died shortly after this bill was filed and before the replications and answer were put in.

Norton, while under examination as a witness for Campbell, in answer to a question whether, to his knowledge, Secombe claimed, subsequent to July 10, 1873 (the date of the alleged reassignment), any right or interest in or under the patent in suit, answered as follows (1 Rec., 144):

"He never did to me; nor have I ever known that he made, or pretended to make, any claim of the kind stated in the question."

The conclusive contradiction of this testimony which the record presents shows both that Secombe, to Norton's knowledge, did make such a claim, and that Norton, Ingalls's agent, acted for years after 1873 as though Secombe had the title.

On a further cross-examination of Norton, specially ordered (1 Rec., 422) by Judge Blatchford after the proofs had closed, eleven of his letters to Secombe, ranging in date from March 25, 1876, to February 6, 1877, were put in evidence as Defendant's Ex's, 190–201, inclusive. (1 Rec., 423–451.)

We cite especially Ex., 198 (1 Rec., 447), as presenting Secombe's position clearly. Norton there says:

"I have thought you would reconvey the patent, &c., upon the terms mentioned in the paper I inclose herewith, which is to pay you all you have paid out, with interest thereon. This paper will secure that to you, or else Miss Ingalls gets no title. * * * *This saves to you all that you ask in your letter of the 4th instant.*"

The inclosed paper (Ex. 199, 1 Rec., 448) is *a draft reassignment of the patent in suit to Ingalls.* Its terms are not unfavorable to Secombe; and Norton's reasoning,

that if Secombe would "let the title become easy" (Ex. 197; 1 Rec. 446–'7) he could make new arrangements by which money could be raised to pay expenses, and perhaps something could be realized to reimburse Secombe for all his outlays" (Ex. 200, 1 Rec., 450), is persuasive; nevertheless Secombe did not sign the document (Ex. 201, 1 Rec., 451); he evidently preferred to maintain his grip upon the title, as the best security.

As to Norton's views (they are relevant, as he was acting for Ingalls), every letter shows that the position of the parties is considered the same as it had been since Ingalls's assignment to Secombe, in 1871. See especially:

(1) Exs. 192 193, 194, 195, 197 (1 Rec., 442–446), where money is requested to be used in the effort to secure compensation for the patent.

(2) Ex. 196 (1 Rec., 445), where Secombe is asked to help "under the deed of trust you now hold, and now in force, and will be so long as you fulfill its provisions;" and Exs. 197, 193, 192, 191 (1 Rec., 441–446) to the same effect. They show that the deed of trust (under which Secombe got title from Ingalls) was at that time deemed to be still possessed of legal vitality and force.

(3) Norton, in his cross-examination, tries to break the force of these letters by stating that in the spring of 1876 he made a new verbal arrangement with Secombe, part of which was that Secombe was to furnish money, and they were to be *guided* (not bound) by the terms of the old deed of trust, and that it was to such new arrangement that the letters refer. Aside from the inherent improbability of such a verbal agreement; aside from the significant fact that the letters make no mention of it, but do ask Secombe to give up the title;

aside from the implied contradiction the letters as a whole present, there is a direct express contradiction in Ex. 201 (1 Rec., 451), which contains these words: "I would like to make this effort, for the time is most gone for which the patent was granted—there are only two or three years more. *You have had it in your hands more than six years.*"

We have thus analyzed the assignment itself, shown the surrounding circumstances by writings made before this suit was thought of, and out of the mouths of our antagonists demonstrated the practical construction of the parties.

In conclusion, we submit that in this instrument Secombe acted only as agent, and is not bound personally or as trustee thereby. If we are wrong in that we submit further that only his individual interests in the subject-matter described are affected, and that such subject-matter does not include this patent.

Under this head the only remaining question for consideration is the alleged reverter of title from Secombe by reason of failure and refusal to perform the trust.

The assignment of March 4, 1871 (1 Rec., 487), vested all of Ingalls's title in Secombe in trust for herself, her "sister Minnie D., wife of said Marcus P. Norton, and the children of said Marcus P. Norton." Secombe accepted the title subject to this trust, as appears from his cotemporaneous declaration of trust (1 Rec., 596). The consideration stated is nominal. But it appears that Secombe had been at a heavy expense in regard to the patent (1 Rec., 597, bottom; 2 Rec., 1153, 1152), and the motive of the transfer to him was doubtless to give him security for the sums so expended.

Complainant's position upon this matter has been

strangely vacillating. In the recitals of the assignment from Ingalls to Campbell, and in the original bill, nothing else is relied on. In the amended bill prominence is given to the assignment of July 10, 1873, providentially discovered, according to Norton, after the original bill had been filed. (For a diverting account of this discovery see 1 Rec. 165–7.)

In complainant's *prima facie* case not a particle of evidence was given to sustain the allegations as to reverter; no attempt even was made to prove the declaration of trust executed by Secombe cotemporaneously with the assignment from Ingalls to him. Reliance was placed solely upon the assignment. In the *rebuttal* proofs all the evidence there is upon this subject was introduced.

Norton then swore that the following statements in his letter of November 27, 1876, were correct (compare 1 Rec., 168 with 2 Rec. 1394):

"I little care whether he (Secombe) signs the paper I sent him or not, because he has utterly failed in his trust, and the title reverts, at least all the title he ever had. He took no absolute title, but a title subject to a certain trust; whenever the trust fails, then fails the title. He failed in that trust more than four years ago; and when called on for money to carry out the trust, then he refused, and has so refused three or four times, and I have it in writing."

Aside from this this there is not a particle of evidence in the record that Secombe either failed or refused to perform his trust. We submit in regard to it:

(1) The testimony was incompetent in rebuttal. It was duly objected to on that ground, and ought to be disregarded.

(2) The only *fact* stated is that Secombe had refused money. But the purposes for which money was asked are not stated. It may be that they were not such as a prudent

trustee should have expended money upon. Indeed, this testimony (if we may dignify it by that name) is a bundle of *conclusions*, in drawing which Norton has assumed the functions of the court.

(3) Secombe's declaration of trust (1 Rec., 596) did not bind him to advance money absolutely and in any event. The agreement was that *out of any money coming into his hands* he would pay all necessary expenses. It is not shown that in fact any money did come into his hands.

(4) Norton's statement, "He failed in that trust more than four years ago" (reckon from November 27, 1876), is contradicted by his letters to Secombe in 1876, where he speaks of the trust as then in force, and of the title as then vested, and as having been for six years continuously vested, in Secombe. (See Exs. 190–201, inclusive; 1 Rec., 441–451.)

Apart from the utter inadequacy of the evidence, the theory of law on which Campbell stands is unsound. The assignment to Secombe contains no condition or limitation in the legal sense of those words. It vests the full legal title in him, subject to a trust. His cotemporaneous declaration of trust (1 Rec., 596) is an acceptance of the title and of the trust. Complainant's proposition, briefly stated, must therefore be this: when a patent has been conveyed in trust, and is so accepted by the assignee, his subsequent failure or refusal to perform the trust causes the title to revert to the settlor of the trust. No authority sustaining this extraordinary proposition was cited in the court below, and it is safe to say none can be, for it is inconsistent with the principles that lie at the base of legal and equitable titles.

The creation of a trust divests the settlor thereof of all his title in the property settled, and divides the title into

two parts, one legal, vested in the trustee; the other equitable, vested in the *cestuis que trust*. Courts of law recognize only the legal title; consequently, no mere failure or refusal to execute the trust can affect the legal title at all, much less send it back to the settlor, whose interest has wholly ceased. The *cestuis que trust* have a remedy, of course; but it lies in an appeal to the chancellor, who will compel the unfaithful trustee to convey the legal title to a new trustee, or will give other suitable relief. But until there is a decree by the court of equity, there can be no change in the legal title.

In this case Ingalls, the settlor of the trust, happens to be also one of the beneficiaries. But there are others in whom equitable rights of property were vested by the creation and acceptance of the trust. Can it be *seriously* claimed that any act or omission on Secombe's part could deprive them of these rights? That is what the argument for reverter necessarily implies.

Furthermore, patents are creatures of statutes. The right to assign them is purely statutory, and the mode of assignment specified in the statute must be followed. That mode is by an instrument in writing. By such an instrument Secombe got the title, and he can lose it only by the same means.

In the court below Campbell's counsel argued that the facts relative to this matter of title in Secombe were the same as in Railroad *v.* Trimble (10 Wall., 367), where the contract was held still-born, the parties by their acts having manifested a consent that it should never go into operation; but here the facts are very different. There is no question that the assignment to Secombe vested the title in him. The bill alleges it, and the evidence shows it.

It was also urged that the utmost James could ask was that the representative of Secombe should be made a party to the suit. We submit that is not so. The bill alleges title in ~~Secombe~~ Campbell in a particular way. That title failing, the bill must be dismissed (see Vattier *v.* Hinde, 7 Pet., 252; Langdon *v.* Goddard, 2 Story, 275.)

The defense is meritorious; for, if any liability exists, it is to Secombe, and not to Campbell, and in a suit by Secombe we could not defend by showing that we have paid the judgment in this case to Campbell, the bill and other parts of the record showing that Campbell claims not in privity with Secombe, but by title paramount.

Shortly after the rendition of the interlocutory decree herein, David A. Secombe, the brother and administrator of Wm. W. Secombe, filed a bill in the circuit court, southern district of New York, praying that the title might be declared to be in him, and that James might be directed to pay the judgment in this case to him as administrator, and that Campbell might be enjoined from collecting such judgment. To this bill James demurred generally, and Judge Wheeler sustained the demurrer for lack of privity between Campbell and Secombe. The opinion has not yet got into the reports, and, accordingly, we hand up a certified copy of the bill, demurrer, and opinion, as an authority upon the point now under consideration. It follows, of course, that we should have no defense on the score of title, should Secombe file a bill against us, charging an infringement and praying an account.

II.—*Of the validity of the patent.*

A. The validity of the patent depends of course largely upon the date of the patentee's supposed inven-

tion; and in determining that date it is necessary to know what the supposed invention is; in other words, what the correct construction of the patent is, and to such construction the light afforded by the state of the art is essential. What the state of the art was, the court can best decide when all the evidence upon that point and upon the question of priority is before it.

Here we shall content ourselves by stating such facts relating to the art as cannot well be disputed; then we shall state *provisionally* the construction of the patent which it is understood the circuit court adopted; and finally we shall go into a discussion as to the date of Norton's supposed invention.

(1) Facts bearing upon the state of the art. The patented instrument is really a printing-machine. It belongs to the same class of instruments as the common hand-stamps used for printing names upon clothing. Campbell's expert, Kittle, says that he knows that such stamps were in use and on sale as early as 1850. (1 Rec., 243–4). Defendant's model, Ex. 169, is such a stamp. It was purchased by defendant's expert, Robertson, in Broadway, New York City, prior to March 10, 1856. (2 Rec., 884–'5).

One form of the patented instrument has a canceler consisting of a metal tube with an elastic "die or type" therein made of cork, rubber, or wood used endwise. Wood type so constructed that the end of the grain should be the acting surface, held in place by "chases" "frames" "rings and tubes" (which also prevented them from being crushed by the power of the press) were in common use among printers as early as 1850, and probably much earlier than that (2 Rec., 884, 886; 1 Rec., 244–'5).

Campbell's expert, Kittle, testified that it has also long been common among mechanics to put rings of metal around mallets, chisel handles, beetles, spiles, &c., to prevent bruising or splitting. (1 Rec., 97.) If the court will examine dictionaries upon this point (as it may do, Brown *v.* Piper, 91 U. S., 37) it will find in the dictionary of Charles Richardson, London, 1839, the following definition of ferrule: "A i
the end of a staff, &c., to strengt e
from riving"; in the dictionary o g.
1774: "Ferule—a ring put aroun l tr
from cracking"; in the dictionary of
common schools in the United S d
1817): "Ferule—a ring at the end te

The use of the patented machine contemplated in the patent consists, in part, of the cancellation of postage-stamps. Postage-stamps were first authorized by Sec. 11 of the act of March 3, 1847 (9 Stat. at Large, 201. Sec. 3 of the act of March 3, 1851 (9 Statutes, 589), made it the Postmaster-General's duty to issue them. The latter act also reduced the rate on ordinary letters from five to three cents. Section 4 provides "that it shall be the duty of every postmaster to cause to be defaced, in such manner as the Postmaster-General shall direct, all postage-stamps attached to letters deposited in his office," &c. In the postal regulations of 1847 (No. 501, page 70) is the following: "Stamps so affixed are to be immediately canceled in the office in which the letter or packet may be deposited, with an instrument to be furnished to certain of the offices for that purpose. In post-offices not so furnished, the stamps must be canceled by making a cross (X) on each with a pen." The regulations of 1852 (Sec. 380 and 382, page 86) contain the following on the

tion; and in determining that date it is necessary to know what the supposed invention is; in other words, what the correct construction of the patent is, and to such construction the light afforded by the state of the art is essential. What the state of the art was, the court can best decide when all the evidence upon that point and upon the question of priority is before it.

Here we shall content ourselves by stating such facts relating to the art as cannot well be disputed; then we shall state *provisionally* the construction of the patent which it is understood the circuit court adopted; and finally we shall go into a discussion as to the date of Norton's supposed invention.

(1) Facts bearing upon the state of the art. The patented instrument is really a printing-machine. It belongs to the same class of instruments as the common hand-stamps used for printing names upon clothing. Campbell's expert, Kittle, says that he knows that such stamps were in use and on sale as early as 1850. (1 Rec., 243–4). Defendant's model, Ex. 169, is such a stamp. It was purchased by defendant's expert, Robertson, in Broadway, New York City, prior to March 10, 1856. (2 Rec., 884–'5).

One form of the patented instrument has a canceler consisting of a metal tube with an elastic "die or type" therein made of cork, rubber, or wood used endwise. Wood type so constructed that the end of the grain should be the acting surface, held in place by "chases" "frames" "rings and tubes" (which also prevented them from being crushed by the power of the press) were in common use among printers as early as 1850, and probably much earlier than that (2 Rec., 884, 886; 1 Rec., 244–'5).

Campbell's expert, Kittle, testified that it has also long been common among mechanics to put rings of metal around mallets, chisel handles, beetles, spiles, &c., to prevent bruising or splitting. (1 Rec., 97.) If the court will examine dictionaries upon this point (as it may do, Brown *v.* Piper, 91 U. S., 37) it will find in the dictionary of Charles Richardson, London, 1839, the following definition of ferrule: "An iron ring put about the end of a staff, &c., to strengthen and prevent it from riving"; in the dictionary of John Ash, London ~~1775~~ 1775– "Ferule—a ring put around anything to keep it from cracking"; in the dictionary of Noah Webster for common schools in the United States (New Haven, ~~1817~~ 1807): "Ferule—a ring at the end of a stick," &c.

The use of the patented machine contemplated in the patent consists, in part, of the cancellation of postage-stamps. Postage-stamps were first authorized by Sec. 11 of the act of March 3, 1847 (9 Stat. at Large, 201. Sec. 3 of the act of March 3, 1851 (9 Statutes, 589), made it the Postmaster-General's duty to issue them. The latter act also reduced the rate on ordinary letters from five to three cents. Section 4 provides "that it shall be the duty of every postmaster to cause to be defaced, in such manner as the Postmaster-General shall direct, all postage-stamps attached to letters deposited in his office," &c. In the postal regulations of 1847 (No. 501, page 70) is the following: "Stamps so affixed are to be immediately canceled in the office in which the letter or packet may be deposited, with an instrument to be furnished to certain of the offices for that purpose. In post-offices not so furnished, the stamps must be canceled by making a cross (X) on each with a pen." The regulations of 1852 (Sec. 380 and 382, page 86) contain the following on the

same subject. "Sec. 380. The cancellation should be effected by the use of black printers' ink wherever that material can be obtained, and when it cannot the operation should be performed by making several heavy crosses or parallel lines upon each stamp with a pen dipped in good black writing ink. SEC. 382. The use of the office dating or postmarking stamp as a canceling instrument is prohibited—unless it be used with black printers' ink and in such manner as to thoroughly effect the object." These regulations of 1852, are repeated in the regulations of 1857 (secs. 336 and 338, page 84) and in those of 1859, secs. 395 and 397, p. 118. On the 23d of July, 1860, General Dix, then postmaster at New York, was imperatively forbidden to use the postmarker as a canceler. (See defendant's Ex. 6, 2 Rec., 1142.) Similar instructions were given at about the same time to several other post-offices. (Cincinnati, 1 Rec., 830; Cleveland, 1 Rec., 172, 208; Buffalo, 1 Rec., 807.)

Postmarking stamps (in shape like defendant's model Ex. 4, but of different sizes) have been used in the postal service since Jackson was President (2 Rec., 1407; 1 Rec., 217; 1 Rec., 801; Chambers' patent of September 23, 1851, 2 Rec., 1284; drawings between pp. 1282 and 1283).

Cancelers having a brad-awl handle of wood and a metal base piece (like defendant's model Ex. 4 in shape, but smaller in size) have been in use since postage-stamps were first introduced. Rating stamps (used in early times for marking the rates of postage on envelopes) were also used; they were sometimes made like the cancelers, partly of wood and partly of metal, but oftener wholly of wood (1 Rec., 218, 222, 801, 803; 2 Rec., 861.)

Though the Post-Office Department furnished separate cancelers, yet, down to 1860 the clerks were prone to

save themselves trouble by using the postmarker as a canceler. The extracts from the Post-Office regulations heretofore quoted show that they were not *imperatively* forbidden to do this.

(2.) As to the construction (provisional) of the patent.

Judge Wheeler did not discriminate between the different claims of the patent. He says generally (2 rec., 1453), "The invention in controversy combined the advantages of a safe and effective canceller, well balanced upon the same handle with the postmarker, for the first time." And what he says on the subject of infringement (2 Rec., 1457) also shows that he considered the balancing of postmarker and canceler on the same handle as the soul of the patented invention. We infer therefore that he considered all the claims as substantially the same.

It seems to us that the first and second claims (1 Rec., 486) will not bear this construction; the first appearing to be for a separate canceler, and the second for a combination of postmarker and canceler in which the canceler is a metal tube holding an elastic blotter.

The third claim, which at first blush appears to be for a process, would, probably, if that construction were given to it, be invalidated by two prior patents issued to Norton (presently to be referred to) for combined postmarkers and cancelers, the process of using which, as described, is identical with the process described in this patent. The claim must be taken to be for the described *means*, whatever they are, of postmarking and canceling.

On the principle ruled in O'Reilly *v.* Morse (15 How., 62), the fourth claim would be invalid in form if the

concluding words, "in the manner substantially as herein described," are considered to modify *postmarking* and *canceling*, which, grammatically, they seem to modify. Taking those words as modifying the introductory words *employment and combination*, this claim, like the third, is for the described means of postmarking and canceling.

The point of most importance is whether the balancing of postmarker and canceler shown in the patent is a material element in the combination. Is the patent broad enough to cover an instrument in which the handle is directly over the postmarker, the canceler being on one side (*e. g.*, model Exs. 135 and 136), or is it confined to instruments which have the postmarker and canceler balanced on the handle? This distinction must be kept in mind while the evidence as to the date of Norton's invention and as to priority is under consideration.

(3.) As to the date of Norton's supposed invention.

The defendant introduced evidence which proved (so clearly that probably no question will be made about it here) that both the balanced and unbalanced instruments had been either patented or in use prior to January 1, 1861. This evidence with other evidence as to anticipation will presently be adverted to.

The burden was thus thrown upon the complainant to prove that the patented invention was made earlier than that date, and he put in some evidence for that purpose, which will now be considered.

The rule of law governing this matter is thus stated by Mr. Justice Clifford, in Johnson *v.* Root, 2 Clifford, 116:

"Beyond question the patent was *prima facie* evidence that the plaintiff is the original and first inventor of

what he has described therein as his invention, and, when taken in connection with his original application, is *prima facie* evidence that the invention was made at the time the application was filed. Presumptions were in favor of plaintiff to that extent, but when he proposed to show that his invention was of a date prior to his original application he took the burden upon himself, and to maintain that theory it was incumbent upon him to prove, by competent and sufficient evidence, that he made the invention at the period suggested, and that he reduced the same to practice in the form of an operative machine; and if he failed to prove either of the elements of the proposition, then the verdict should have been for the defendants."

The record contains evidence supposed to bear upon this question, which will be considered under the following heads:

a. Sherwood's testimony (1 Rec., 139) and complainant's paper Ex. J, K, L (1 Rec., 598).

b. Davis's testimony (1 Rec., 134).

c. King's testimony (1 Rec., 130) and complainant's paper Exs. "King, A, B, C" (1 Rec., 595), "X X—King" (1 Rec., 548) referred to therein; also defendant's paper Exs. 6 and 163 (2 Rec., 1142, 1361), probably referred to in King's testimony.

d. Letter of Postmaster Wakeman to Third Assistant Postmaster-General, dated January 3, 1863, complainant's paper Ex. T, T (1 Rec., 542).

e. The pretended amendment of Norton's caveat of October 20, 1853 (1 Rec., 455; 2 Rec., 1341, *et seq*).

f. The testimony of Norton himself (1 Rec., 142 *et seq*).

While examining this evidence, we ask the court to keep in mind the following facts in addition to the distinction between balanced and unbalanced instruments: First, that on Agust 9, 1859, a patent for a combined

postmarker and canceler was issued on Norton's application to Ransford & Low, his assignees (2 Rec., 1270); that on January 14, 1862, a patent for a postmarking stamp was issued to Norton (1 Rec., 585), and that on December 16, 1862, another patent for a combined postmarker and canceler was issued to Norton (2 Rec., 1276). It is, of course, all important to determine whether complainant's evidence relates to the patent in suit or to these patents. If it is not clear what the evidence relates to, complainant's case is not made out, the burden being on him.

(*a.*) As to Sherwood's testimony (1 Rec., 139–142); under objection to the form of the question this witness was asked when he first made a stamp for Norton which would postmark a letter and cancel a stamp thereon at the same time. He answered that, as nearly as he could remember, it was in 1857.

On cross-examination he stated that his recollection had been refreshed by his books of account. These books were not produced, but a copy was.

This reliance upon a copy when the original could have been produced is very suspicious, and shows the witness's statement as to dates to be unreliable.

Moreover, the witness gave a sufficient description of the instrument asked about on direct examination to prove that it was in all respects quite unlike the patented instrument.

(*b.*) As to Davis's testimony (1 Rec., 134–136).

This witness cannot fix the date when he saw the instrument which he did see more accurately than that it may have been in 1858, 1859, or 1860; and he says that he understood Norton had several patents, and the instrument he saw was the one patented in 1859.

(*c.*) As to King's testimony (1 Rec., 130–134).

King was Acting Postmaster-General from 1858 to 1861. The court below laid great stress upon his testimony, and it will accordingly be carefully examined. We do not claim that it is false. We do claim that it does not appear to relate to the instrument covered by this patent, and that it is insufficient to show the perfected invention of any instrument.

On direct examination the witness was asked only to identify certain letters as having been written or received at their dates, namely, his letter to postmaster at Troy, dated May 4, 1859 (complainants' Ex. King A, B, C, 1 Rec., 595); Norton's letters to witness, dated April 2, 1859, April 11, 1859, and October 31, 1859 (complainants' Ex. X, X, 1 Rec., 548–9). Then he said that, independent of any writings, he remembered that as early as 1859 he had correspondence and conferences with Norton "relative to A combined postmarking and stamp-canceling instrument." On cross-examination he fixes the date by the fact that he knew such correspondence with Norton took place prior to certain other correspondence which he or the department had with General Dix, who was postmaster at New York early in 1860. The correspondence with General Dix referred to was probably the letters Defendants' Exs. 6 (2 Rec., 1142) & 163 (2 Rec., 1361), though King does not say so.

This is all of the testimony as distinguished from the correspondence. Note that King does not describe any stamp. He does not know that any stamp existed as an operative machine; he merely had talk and correspondence with Norton relative to *some* combined postmarker & canceler.

Let us now examine the correspondence.

Probably it is a fair inference from King's testimony, though not stated as a fact, that his letter to the postmaster at Troy of May 4, 1859 (1 Rec., 595), was a part of the correspondence which he spoke about in reference to A combined postmarker and canceler. That letter merely authorized the Troy postmaster to use for three months "Norton's improved marking stamp" for "*postmarking* letters." From Norton's letters of April 11 and October 31, 1859 (1 Rec., 548–9), it appears that this instrument had a canceler attachment; but it does not appear whether the combination was that described by Sherwood, that of the 1859 patent, that of the 1862 patent, or that of the patent in suit.

If now we turn to the Dix correspondence some light will be thrown on the matter. Dix, having been instructed to use a separate instrument for canceling (in place of the postmarker which had been frequently employed for that purpose), says in his letter to King, of August 8, 1860 (2 Rec., 1142):

"It occurred to me that the 'separate instrument' required by the department might be attached to the postmarking stamp, and I sent for the stamp maker and gave him my idea, which he has carried out very well. *The canceling stamp is soldered on to the other, so* that one handle answers for both, and the double operation is performed by one blow."

This is clearly a description of an *unbalanced* instrument, and Dix's testimony in this cause (2 Rec., 849) shows such to have been in fact the construction of the instrument here described.

Now mark the reply. It is signed by the Acting First Assistant Postmaster-General, but appears to have been dictated by King, who was then Acting Postmaster-General (1 Rec., 130). It is dated August 10, 1860 (2 Rec.,

1361). "I have to acknowledge," it says, "the receipt of your letter of the 8th instant in relation to canceling stamps. The arrangement is an excellent one, and will save much labor in making up the mails, but I fear the attachment you have affixed to your marking stamp has *not only been thought of before, but has actually been patented.* If so, it may at some future time subject your office to a heavy charge to the patentee for its use, or perhaps to a lawsuit. The Postmaster General therefore desires that you will give the matter such timely attention as will be calculated to avoid such consequences."

From this letter it is tolerably clear that King believed that Norton's combined stamp was the one patented in 1859. And it is certainly clear that King did not know the distinction between *balanced* and *unbalanced* stamps, and that his testimony and correspondence are no evidence of the existence of a *balanced* stamp in 1859 or in 1860.

Judge Wheeler says in his opinion (2 Rec., 1450–1):

"Norton was an inventor of other improvements in such stamps; and there is a question as to whether the stamp referred to in that letter (King's letter of May 4, 1859, to the Troy postmaster, 1 Rec., 595, referred to above), was this one (the patented stamp) or some other. King's testimony and correspondence settle it that this is the one. After he went out of office he was employed by Shavor and Corse to assist them about obtaining compensation for the use of [*t*] his stamp, and was kept familiar with it all the while; and his testimony is that this is the one."

Judge Wheeler construes the patent to be for a balanced instrument; consequently this is a finding that a balanced instrument was referred to in King's letter of May 4, 1859.

The learned judge is in error when he says (as he does say in substance) that King's testimony is that that letter relates to a balanced stamp. King nowhere says that, nor anything that can be construed to amount to that.

It appears that King was at one time employed as agent by Shavor & Corse (assignees of the patent in suit, by assignment, dated April 20, 1863, 1 Rec., 462); that he was also employed as agent by Norton in 1861 or 1862, long before he had heard of Shavor and Corse, and long before the patent in suit was issued or applied for. But it does not appear that he was familiar with the detailed construction of any of the stamps, that in respect to which he was employed by Shavor & Corse, or that in respect to which Norton first employed him, or that referred to in his letter of May 4, 1859. How, then, can his testimony be construed to be that all these stamps were identical in construction? The Dix correspondence, already cited, shows affirmatively that he did not distinguish between balanced and unbalanced instruments, and that he believed the unbalanced instrument constructed by Dix to be covered by the patent of 1859. The questions put to King on his direct examination relate merely to a combined post-marker and canceler, not to a balanced instrument, nor to the instrument described in the 1863 patent.

d. Judge Wheeler (2 Rec., 1451) also put some reliance upon the letter of Postmaster Wakeman to the Third Assistant Postmaster-General, dated January 3, 1863 (1 Rec., 542).

Wakeman might have been examined as a witness. On what principle the unsworn historical statements contained in this letter, and written and signed by his secretary,

are competent evidence, does not obviously appear. The letter was offered in evidence twice and duly objected to on both occasions as irrelevant, immaterial, and as containing statements not sworn to (1 Rec., 137, 185, 186). Its statements ought not to be regarded.

Further, the letter states that Norton's double postmarking and canceling stamping-iron "was in use in this office when I first entered upon my duties." Judge Wheeler says that Wakeman became postmaster "in 1861, or thereabouts" (2 Rec., 1451). The record does not show this. The evidence is that Dix entered Buchanan's cabinet from the New York post-office in January, 1861 (2 Rec., 849); that in 1861 William B. Taylor was postmaster (the witness Ryer states that combined stamps were introduced in the New York office in 1860; that he first heard of Norton's patent [N. B.—This must have been the 1859 patent, as the patent in suit was not then issued] about a year afterwards, and that William B. Taylor was then postmaster—1 Rec., 345, near bottom, 846, near bottom); and that in 1862 or 1863, or thereabouts, Wakeman became postmaster (1 Rec., 840).

We submit, therefore, with regard to this letter, first, that it is not competent evidence of the facts stated therein, and second, that it does not tend to prove that Norton had invented the patented stamp prior to 1862.

e. As to the pretended amendment of Norton's 1853 caveat.

A *portion* of the present contents of this caveat file is contained in Complainant's Ex. C (1 Rec., 452). The *whole* is contained in Defendants Ex. 160 (2 Rec., 1340).

The caveat of October 20, 1853, relates to a "machine for mailing and folding letters." The file contains nothing which has any bearing whatever upon the patent in

suit except the paper (marked Exhibit B) which bears the date August 7, 1854. This paper contains a much fuller description of the alleged invention in suit than is contained in the original patent (1 Rec., 459). It resembles in many parts the first reissue—that of August 3, 1864 (1 Rec., 462).

(1.) Unlike the other important papers in the file, it has no mark upon it to show that it was ever received or filed at the Patent Office.

(2.) There is an indorsement upon it, signed by the Commissioner of Patents, to the effect that it does not form a valid portion of the caveat (2 Rec., 1346). Reference is made to the order dated September 18, 1871, of the Commissioner of Patents, approved by the Secretary of the Interior, in the case of the trial of M. P. Norton for gross misconduct. A certified copy of the record of that trial is printed as Defendant's Exs. 161 and 162 (2 Rec., 1348–1359). Mr. Norton was charged with surreptitiously introducing said paper, Ex. B, into the file of the caveat of October 20, 1853, with intention to deceive and practice fraud upon the Patent Office. (See charges 1 and 2, 2 Rec., 1349.) Of these charges he was found guilty (p. 1351). In this matter the Commissioner acted under authority conferred by § 17 of the patent act of 1870 (16 Stats. at L., p. 200; Rev. Stats., § 487.)

(3.) Norton testified on cross examination (1 Rec., 254) that in the spring of 1878, he examined this caveat file in the Patent Office; that the file then contained the "additional description" of August 7, 1854; that it was in his handwriting as he wrote in 1864; that it was made by him in 1864; that it did not belong to the caveat file, but to the file of the reissue of 1864. He says also, that

this paper in the file *is a copy* and *suggests* that some enemy of his had extracted the original and put the copy in its place.

On these facts it is clear that the certified copy of the additional description introduced by complainant is of no value whatever *as an independent piece of evidence.* The Commissioner's indorsement alone is conclusive on that point. (See Judge Blatchford's decision in Robertson *v.* Secombe Manufacturing Company, 10 Blatchford, 489, in respect to a similar additional description found in another of Norton's caveats.) But Norton's confession that the paper found in the file was not made till 1864, clinches the matter. That paper undoubtedly does not belong to the caveat file. The existence of the alleged original cannot be proved by the record; it must be proved, if at all, by the verbal testimony of Norton. Hence the additional description cannot independently prove the date of invention; nor does it corroborate Norton's testimony, for without Norton's testimony there is no evidence whatever of the existence of such additional description.

See p. 137 of this brief

f. As to Norton's testimony (1 Rec., 142–3; 163–4). Norton testifies that the letter to the Commissioner of Patents, dated August 7, 1854, found in the caveat file (2 Rec., 1343) was written on the day of its date. It states that, "an additional description of my machine for mailing and folding letters" has been sent.

There seems to be no foundation for disputing the genuineness of this letter. It tends to show that *some* additional description was actually sent to the Patent Office in August, 1854. What was this additional description?

Norton swears (1 Rec., 142) that it is the paper "con-

tained in the caveat filed as an exhibit by complainant" (Ex. C., 1 Rec., 453). This testimony was given at Troy on May 18, 1878. It was not till June 27, 1878, on further cross examination in New York, that he made the confession already referred to, that the paper in the caveat file was not made till 1864 (1 Rec., 254). The evidence which shows that his testimony is not to be relied upon will be collated by itself in another part of this brief. Here it will suffice to point out a single circumstance. In the file of this caveat there are several exhibits which bear stamped impressions (2 Rec., diagrams between pages 1347 and 1349). The date in one of these impressions is October 13, 1853 (2 Rec., diagram marked 2640), from which it is inferable that this exhibit accompanied the original caveat. The date in other impressions is July 12, 1854. That date being subsequent to the original caveat would not naturally have been made in 1853, and therefore it is inferable that the exhibits bearing this date were a part of the additional description referred to in the letter of August 7, 1854. The fact that these impressions are quite different from what would be made by the patented instrument indicates that the patented instrument was not described in that additional description.

Norton also testified that he exhibited the instrument described by Sherwood in the Post-Office Department in the fall of 1854; that shortly after the caveat of October 20, 1853, was filed, he had made a combined postmarking and stamp-canceling instrument, "substantially like the one now in use"; that two or three more were made prior to the time of the preparation of the "additional description," in that caveat file (1 Rec., 143–4). On cross-examination he describes the con-

struction of the instruments, which he says were made and used "experimentally" in the shop of Richardson, the manufacturer, who is dead. The first went by crank and foot power; the second was a hand instrument, "*like* that described in the additional description dated August 7, 1854," and was made at Poultney, Vt., in the winter or spring of 1854 (1 Rec., 164).

In the progress of this cause Norton took the stand on four or five occasions as a witness for complainant. We do not think any of his testimony is trustworthy, and have accordingly discussed his credibility by itself in a separate part of this brief. At this point we will only call attention to his letter of February 6, 1864, to the postmaster at New York (Defendant's Ex. 180, 2 Rec., 1367), where such inconsistent statements as to his invention are made as to unsettle (we submit) all his testimony on that point.

In this letter he says:

"The double canceling stamp now used by you in your post-office is my invention as far back as the year A. D. 1856, as I can most fully and satisfactorily prove. It was patented by me in the early part of the year 1863, upon an application made a long time before then. I had several such stamps made in 1858, as I can prove by the person who made them. * * *

In the year 1856 I first submitted the double canceling stamp to the department for consideration. * * During each year from 1856 to the year 1863, inclusive, I have urged upon the Post-Office Department the improvements covered by the patent of 1859–1862, and after having tested them all in the manner and the time (as well as place) selected and desired by the Post-Office Department, the *improvements of* 1856, *patented in* 1863, were selected and adopted as the best and which at first I thought of the least value. * * * * *

I first began with the Post-Office Department for a

change in the then existing unwieldy plan of *postmarking and mailing of letters* in the year 1854, and have letters, etc., to show that fact."

Note, that this letter which is dated in the early part of the year 1864, and before the time when Norton says that the additional description now in the caveat file was made by him (1 Rec., 254), makes no reference to the caveat as containing the invention.

Judge Wheeler seems to have thought that this letter was put in evidence as the admission of a part owner of the patent, and, on the well-settled rule as to admissions, that they are legitimate evidence according to their just weight, as well to those parts in favor of as to those against the parties making them, holds that this letter tends to show that Norton had made the patented stamps in 1858.

This letter was not offered in evidence as the admission of a part owner, and could not have been received as such, for prior to February 6, 1864, Norton had assigned the title absolutely to Shavor and Corse (1 Rec., 463.) He had a right arising from contract merely to a share of such proceeds as should accrue (1 Rec., 751-2). He was completely divested of the title.

The letter was offered and is admissible as the prior inconsistent statement of a witness. No objection was taken to it when it was offered (2 Rec. 1110), nor at all in the court below. Objection to it is therefore deemed to have been waived (Rule 13 of this court).

As an inconsistent declaration the letter is certainly not legitimate evidence of any fact therein stated. Its only function is to impeach the testimony with which it conflicts.

But, for argument's sake, concede that this is not so;

what do the statements in the letter amount to? Norton's construction of his patent is, that it covers any and every instrument which at one blow will cancel the postage-stamp by blotting and postmarking the envelope apart from the postage stamp (1 Rec., 143). This being so, it is not absolutely necessary to charge Norton with untruth when he says in this letter that he had several "*such*" stamps made in 1858. He may have believed that the stamps referred to were substantially the same as the patented instrument, when in fact, according to the construction which the court shall put on the patent, they were not. The evidence, if evidence it be, is defective because it gives his judgment instead of the facts on which it is based.

Norton also testified that the invention referred to in the bill in this suit was used in the New York office in the fall of 1860, and that he consented to such use *as a test* (1 Rec., 143).

This testimony amounts to nothing, because his answers show that he construes the patent to cover every form of combined postmarker and canceler. Norton says he had correspondence with the postmaster about the matter (*idem*). This identifies the construction of the instrument about which he was speaking, for Dix was then postmaster, and we have his testimony in regard to the arrangement with Norton, and as to what stamp that arrangement related. It was an unbalanced stamp. (See 2 Rec., 849, *et seq.*, Defendant's Ex's 6 and 7 (Dix); 2 Rec., 1142; and the model of the Dix stamp, Defendant's Ex. 5; see also what is said hereinafter on the defense of public use for more than two years prior to the application for the patent.)

This is all the evidence of complainant bearing upon

the question of when Norton made his invention. The circuit court construed that invention to be a combined postmarker and canceler, *well balanced on a brad-awl handle*, and held that this evidence showed such invention to have been made as early as May 4, 1859, the date of King's letter to the Troy postmaster. In reaching this conclusion it ignored Norton's *testimony* completely; it relied chiefly on Norton's letter of February 6, 1864, and on King's testimony and correspondence. How little they justified the conclusion has been pointed out.

Norton's letter is not legitimate evidence of anything therein stated; and, if it were, only conclusions and judgments, not facts, are stated. King's testimony and correspondence seem to relate to an instrument constructed on Norton's 1859 patent; there is certainly nothing in it to show that he had the distinction between balanced and unbalanced instruments in mind; how could he have had that distinction or the distinction between the different Norton patents in mind when (so far as appears) *he never saw or heard an accurate description of the stamp or stamps to which his letters relate?*

Here let particular attention be given to Norton's patent of August 9, 1859 (2 Rec., 1270). The instrument there described is a combined instrument; but the handle is wholly over the postmarker, and there is no balance. Now, balancing clearly being an advantage, is it not very remarkable that this patent does not show a balanced instrument, if the idea of one had then entered Norton's mind? It was not till more that three years later that the balanced construction appeared in Norton's patents (see patent of December 16, 1872, 2 Rec., 1276).

The canceler in the 1859 patent is so constructed as to both blot and cut. As the idea of cutting seems to

be an advance upon mere blotting, it is almost certain that Norton had then invented an *unbalanced* combined postmarker and canceler, in which the canceler was a mere blotter. Probably King's letter of May 4, 1859, related to such an instrument, if not to the identical instrument described in the 1859 patent.

We submit the following as the fair conclusions from the evidence on this point:

(1). The balanced instrument is not proved to have been invented by Norton so early as January 1, 1861.

(2). The unbalanced instrument is not proved satisfactorily to have been invented by Norton at any date prior to May 4, 1859.

B. The patent relied on as proving that Norton's supposed invention had been patented before he made it, is the English patent of D. G. Berri, dated April 24, 1860, No. 1020, for "An improved date stamp." This patent was sealed Sept. 27, 1860; but the complete specification was filed on April 24, 1860, the day the patent is dated (2 Rec., 1362–'4). The drawings show with the greatest clearness a combined postmarker and canceler, well balanced upon a brad-awl handle.

The specification says:

In conclusion to the foregoing description, it may here be necessary to note that my improved date stamp may be employed *either in connection with the double or obliterating mark, as represented, or separately*, &c.

Defendant's Exhibit 168 is a model constructed according to the drawings and specifications of this patent. (See testimony to the point, which is not contradicted, of defendant's expert, Robertson, 2 Rec., 884.)

In all material respects this stamp is clearly the

same as that described (according to the construction of the circuit court) in the patent in suit. It differs chiefly in the method of securing the postmarking type; but the method described in Norton's patent is no part of the essence of his construction.

Judge Wheeler says in his opinion (2 Rec., 1453), "That (Berri's invention) seems to embody all the material parts of this one (Norton's), but was subsequent to it." That he was wrong as to the date, so far as balancing goes, has, we respectfully submit, been already shown.

The patent in suit is therefore anticipated and destroyed if balancing is the essential feature of the Norton patent.

That balancing is very material appears from an inspection of the instrument, the effect being to bring both acting faces to the surface to be stamped, although the instrument is not so aimed as to strike precisely perpendicularly; also from Ryer's testimony to the point that when the unbalanced instrument was used in the New York post-office in 1860, about ten per cent. of the letters had to be gone over a second time, while ninety-seven or eight per cent. of the work was well done the first time after the introduction of balanced instruments (1 Rec., 848); also from Bogia's testimony as to the use in the Philadelphia office, that the unbalanced instruments were apt to twist in the hand, were heavy and required more skill for their use (2 Rec., 1439). What is said hereinafter on the question whether patentable invention is shown, also supports Judge Wheeler's construction. The point briefly stated is, that while it may have required invention (though even this is doubtful) to construct the balanced instrument, only ordinary intelligence and common sense was displayed in fixing a

canceler to the side of a postmarker, and that, therefore, on the well-settled principle of construing patents so as (if possible) to sustain rather than destroy them, this patent must be deemed to be for a balanced instrument.

If the first claim of the patent be, as we think it is, for a separate canceler, it is destroyed by Chambers's patent of 1851 (2 Rec., 1284, diagram opposite p. 1283). The instrument there described is mortised (that is, tubed) for the reception of type, and at that time wood and other type of soft material were a well-known substitute for metal type (2 Rec., 884-886; 1 Rec., 244-5).

Chambers's stamp, to be sure, is a postmarker, but of course the use for which it was designed is immaterial. The patent in suit says that the canceler may have *any* configuration desired. Moreover, the evidence of complainant's own witnesses is that in 1851 separate cancelers as well as separate postmarkers were in existence, and were used, but that generally postmarking and canceling were done at one operation by striking the postmarker upon the postage-stamp (1 Rec., 218, 222, 801, 803; 2 Rec., 861).

C. The evidence as to prior knowledge and use by others, now relied on, relates to balanced instruments used in the post-offices at New York and Janesville, Wis., and to unbalanced instruments used in the Philadelphia and Cleveland post-offices.

1. As to the New York office.

On the 23d of July, 1860, General Dix (postmaster from the early part of January, 1860, to the early part of January, 1861), was peremptorily forbidden to use the postmarker as a canceler, and directed to use a separate instrument for that purpose. He found that his force of clerks was not adequate to allow of the exe-

cution of this order without delaying the mails. In this extremity he hit upon the plan of removing the handle from the canceler, and having the metal part soldered to the side of the postmarker. This combined instrument answered "the purpose perfectly" (see his letter of August 8, 1860, Defendant's Ex. 6, Dix, and the envelope showing impression of the stamp (Defendant's Ex. 7, Dix, 2 Rec., 1142). In his deposition (2 Rec., 849), Dix says that defendant's model, Ex. 5, is an accurate illustration of how his combination was made, except that the canceler and postmarker were a little farther apart. There is some slight discrepancy among the witnesses as to how long this combination continued in use. Dix says "for some time" (2 Rec., 851-'2). Yeoman, one of his stamping clerks, says "three or four days—perhaps a week" (1 Rec., 838). Ryer, another stamping clerk, says "one month; very shortly after they (the soldered instruments) were adopted" (1 Rec., 844"). Corbett, the manufacturer of the stamps, says that at first the soldered cancelers were knocked off in use pretty frequently, and that "perhaps two or three months" afterwards he attached them more securely by a steel pin running through the canceler and partly through the postmarker (2 Rec., 857). Ryer and Yeoman agree that when these unbalanced instruments were discarded their place was taken immediately by cross-bar instruments, of which Defendant's Ex. No. 3 is a model. These were balanced instruments. They also agree that these cross-bar instruments were introduced while Dix was postmaster, and in the year 1860, and were thereafter in continuous uninterrupted use for many years. Corbett corroborates them in respect to the date of introduction. Holbrook, one of the clerks,

is entitled to the credit of first suggesting the cross-bar. Post, another clerk, was the first to use it (1 Rec. 840, 847; 2 Rec., 857–'8).

This testimony is unimpeached and uncontradicted. It proves that the cross-bar or balanced instrument was introduced into the New York office in 1860, the last day of which year is (as has been shown) earlier than the time when Norton made or even knew of such an instrument.

2. As to the Janesville, Wis., post-office.

The testimony upon this point is that of Ezra Miller, the inventor of well-known couplers and buffers for railroad passenger cars (2 Rec., 871 *et seq*). He became postmaster at Janesville in 1858, about a year after Buchanan's inauguration. At that time he found that postage stamps were canceled by the postmarker, which was like defendant's model Ex. 4, and that frequent attempts to remove postage-stamps were made. To prevent this he devised an instrument, the handle of which was like the handle of a carpenter's hammer. With this "hammer stamp," having its handle parallel to the acting face, a better impression less likely to be washed out, with less exertion of muscular force, was made than with the ordinary postmarker. Miller obtained a patent for this instrument on the 22d of March, 1859. It is in evidence as Defendant's Ex. 153 (2 Rec., 1288, *et seq*).

He also made a "double-headed" instrument, consisting of the hammer-postmarking stamp, and a canceler attached to the side thereof by two screws. This was shortly before he applied for his patent, "in the winter of 1858, or January, 1859." This "double-header" was used perhaps for a couple of months, when it was dis-

carded, because the handle was not in the center (2 Rec., 876). Another instrument, in which the whole postmarker and canceler were balanced on the handle was then made. Defendant's Ex. 9 (2 Rec., opposite p. 1143) is a drawing of this stamp. The "double-header" of this shape was used by Miller as long as he continued to be postmaster, and was passed over by him to his successor in 1861. He showed it to many postmasters in the vicinity of Janesville, and exhibited it in the Post-Office Department (2 Rec., 873–4, 878–9).

Miller states that in his estimation the thing of value in his invention was simply the hammer-handle, and that he did not think the union of postmarker and canceler much of an invention (2 Rec., 875).

No attempt was made to invalidate Miller's testimony. It is presumed that the existence of the facts which he testifies to will not be controverted. The debatable point is whether his combination is substantially the same as the Norton combination. We leave this matter to the court to pass upon, when it shall have decided what exactly the Norton combination is. So far as the arrangement of the handles is concerned, there appears to be no substantial difference; for, as has been shown, brad-awl handles had been used on postmarkers and cancelers long before the idea of the hammer-handle was reduced to form by Miller. Hence, so far merely as the combination of postmarker and canceler is concerned, the brad-awl handle is to be regarded as the mechanical substitute or equivalent of the hammer handle.

It is to be observed, also, that nowhere in the specification or claims of the patent in suit is stress laid upon the position of the handle with reference to the acting face of the postmarker and canceler.

3. As to the Philadelphia office, by stipulation, the testimony was taken orally before the court at the hearing in June, 1879. [Note.—One clause of this stipulation was that nothing therein should be construed "to prejudice or impair *in any respect* the right of appeal" of any of the parties (2 Rec., 1404).] It consists of the depositions of William M. Ireland, John P. Rees, Matthew C. Bogia, and Dudley W. Burchard for defendant and of M. P. Norton for complainant (2 Rec., 1406–1447).

Ireland was first employed in the Philadelphia post-office from 1849 to 1855 (2 Rec., 1422). At that time stamping was not confined to a few clerks as now, but most of the clerks took a hand at it off and on (2 Rec., 1423). Ireland had it to do every day more or less (*idem*). He was forbidden to use the postmarker as a canceler (2 Rec., 1424), and as an assistance in his work had the handle of a canceler removed and the metallic part attached to the side of a postmarker (2 Rec., 1423–4). This combined instrument was put in use (idem). Subsequently it was improved by the insertion of a piece of metal between the postmarker and canceler (2 Rec., 1424–5, and drawings figs. 1 and 2 opposite p. 1424).

Ireland fixes the date of the making of the first combination as near the winter of 1849–'50 (2 Rec., 1423, 1425). He is sure that it was before three-cent postage-stamps were introduced (2 Rec., 1427). The statute fixes this date as March 3, 1851.

These instruments were used openly, successfully, and during a number of years (2 Rec., 1423, 1425). Ireland does not remember seeing them since 1853, at which time he went into the registered letter department and had no occasion to observe stamping (2 Rec., 1425).

In 1861 Ireland was again employed in the Philadelphia office, this time as assistant chief clerk (2 Rec., 1425–6). He found that during his absence the combined instrument had not continued in use; instead, postmarkers were used as cancelers and separate instruments were also used to some extent (2 Rec., 1426, 1430). It is not surprising that in the interval between 1853 and 1861 Ireland's stamp should have dropped out of use, considering that the postal regulations allowed the use of the postmarker with good printer's ink for canceling. Ireland's duties on the occasion of his second employment did not lead him to observe the stamping very frequently at first (2 Rec., 1430). But when the office was moved into a new building, the stamping table was placed near his desk. This naturally led him to observe the work more carefully; and one day he described to Bogia, a stamping clerk, the stamp that had been used years before, and gave him a sketch of it, from which with some slight changes a number of combined stamps were made that went into general use in the office and were used until the department furnished combined stamps (2 Rec., 1426). At the time of this description to Bogia Ireland had never seen or heard of any combined postmarker and canceler except the two that had been made prior to 1851 (2 Rec., 1426–7).

Rees, another witness, went into the Philadelphia office as a clerk in his boyhood, during Jackson's administration (2 Rec., 1407), and staid there till a short time before the birth of his third son. At the time of the examination (June, 1879) this son was in his twenty-eighth year. This is a thing about which there could not well be a mistake, and fixes the date of Rees's leaving the office approximately at 1851 (2 Rec., 1411, 1417–'8).

He then went to Camden, N. J., to live, and was not in the Philadelphia office after that time (2 Rec., 1414, middle). He testi fies to the use of a combined rater and postmarker prior to 1849 (2 Rec., 1408–1410), and also to the use of a combined postmarker and canceler after that date. The principal parts of his testimony relating to the latter instrument are as follows (2 Rec., 1411–'12, 1414):

Q. State whether previous to 1851, at the time you left the post-office, there was any instrument in use which would postmark a letter apart from the postage-stamp, to one side of it, and cancel the postage-stamp at the same blow.—A. Yes; there was an attachment screwed on, similar to this.

Q. You remember seeing that in use?—A. Yes, sir.

Q. You used it yourself?—A. Yes, sir.

Q. Was there any concealment about the use of that instrument?—A. No.

Q. Was it publicly used in the office?—A. Yes. It laid on the marking-table, a table as long as *this*, and at that end was a place where the letters were dropped in by the citizens, and on that side were boxes, and after they were marked they were thrown in, separated.

Q. Do you know Mr. William M. Ireland?—A. Yes, sir; he was appointed to a clerkship under White.

Q. Do you know whether he used that combined instrument or not?—A. Yes; he was the junior clerk, and I guess had more to do with rating letters than any other clerk.

Q. In regard to this attachment of the figure "5," was that attachment secure and strong?—A. Yes.

Q. Mr. Binney did his work well?—A. Yes.

Q. And the attachment of the canceler, was that secure?—A. Yes, sir.

Q. Can't you fix the date when you left the post-office; where did you go when you left?—A. I moved to Camden, N. J. Soon after I moved there my wife gave birth to a boy, who is now in his 28th year.

Q. When was he born?—A. I don't remember. It was in 1851. I had left the office before that time.

Q. Had 3-cent postage-stamps been introduced before you left the Philadelphia office?—A. I think they had; I am not sure.

Q. You are sure it was before 1851, or at least not later than 1851, that you left?—A. Yes. My second son was born January 2d, 1849, while this trial was going on, and my third son was born after we moved to Camden.

Q. You are perfectly clear about the recollection of these facts about the birth of your children and about the Van Ness case?—A. Yes.

Cross-examination by Mr. WILLIAMS:

Q. You left the office when Mr. White became postmaster?—A. Not immediately. I was there sometime after that. He was appointed the latter part of 1849, and I left in 1851.

Q. Can you state when White was appointed postmaster?—A. The latter part of 1849.

Q. Is that as definite as you can fix it?—A. Yes.

Q. When did Mr. Ireland come into the office?—A. He was one of his first appointments, I think, in 1849.

Q. When was this instrument, with the canceler attached, introduced into that office?—A. That was after Mr. White's appointment.

Q. Specify the date?—A. I can't give the month. I know it was soon after White's appointment.

Q. Can you give the year?—A. It was the latter part of 1849, I think.

Q. Who made it?—A. I don't know. My impression is, Mr. Binney did it, from the fact that he had been doing all that work.

Q. Do you know who had it made?—A. No.

Q. How many of them were there in the post-office?—A. I don't recollect but one at that time.

Q. How was it made?—A. The attachment was screwed on similar to that Fig. 2, except the *stamp was round.*

Q. Was there any impression on the face of the canceler?—A. Yes, sir.

Q. What was it?—A. I think they were crosses.

Q. What was it made of?—A. Iron or steel.

Q. Was that in the office when you left?—A. Yes.

Q. Was it generally used?—A. Yes.

Q. Were all the letters stamped with the instrument in the office?—A. I can't say whether they were all stamped or not. I presume they were; the most of them.

Q. Were there other stamps in the office?—A. Yes.

Q. Were there separate cancelers in the office?—A. I think there was.

* * * * * * *

Q. How do you fix the date of the attachment of the canceler—in what way do you fix it in your memory?—A. It was just previous to my leaving the office. It was in use then, or rather in 1849, after White had come in—between 1849 and 1850.

Q. How do you fix the date in your mind as to the time it was introduced?—A. There were postage-stamps used at that time.

Q. Postage-stamps used when?—A. I think they were first used in 1847.

Q. How do you fix the date in your mind when this canceler was attached to the postmark—is there any way that you fix the date?—A. Nothing further than this, that it was not used until after White came in the office. It was not used before.

Q. You are sure it was used after he came in, before you left?—A. Yes, because I recollect distinctly of using it myself.

Q. I understood you to say you did not use it?—A. Oh, yes, I did. When I was on night duty, stamping these packages of money. I remember that I used it then—money packages sent in by brokers.

Bogia and Burchard, the next witnesses for defendant, corroborate Ireland as to the use of Ireland's form of

the instrument, in 1863, before the department provided combined stamps (2 Rec., 1438–1440). Burchard produced model, Exs. 204 and 205; they are the postmarkers of two of the Ireland stamps; they show three holes arranged triangularly where the cancelers were attached. Burchard removed the cancelers and used the postmarkers as chucks for a small lathe he had, and so they were preserved.

Ireland on cross examination stated that while in Washington, between 1864 and 1871, acting as chief clerk of the Third Assistant Postmaster-General, he occasionally met Norton; that he frequently had conversations with him in regard to the combined stamp; that he told him he himself was one of the first to make such combination, and that he exhibited to him one of the 1863 stamps which he had taken to Washington (2 Rec., 1431). Norton being called by complainant denied this (2 Rec., 1441–44). Ireland being re-examined reiterated his statement (2 Rec. 1445). A clear issue of veracity between him and Norton was thus raised. Whether Norton was right, let the rest of the testimony given by and about him in this cause decide.

The testimony of defendants' witnesses was given positively, without hesitation or evasion.

The court below does not intimate that it considered them untruthful, but it seems to have thought that they made a mistake in dates. All there is in the opinion on this subject is as follows (2 Rec., 1452–3):

"Ireland was a boy *fifteen years* old, in the Philadelphia office, in 1851. He was also there *in the same employment* in 1861. He doubtless did do in 1861 what he says he did in 1851. At this distance of time he may have carried back in his mind what he did, with the associations of 1861, to the same associations existing in 1851.

When he made it in 1861 *he remarked to others that it was his, without stating that he had made it previously.* It is manifestly difficult to distinguish occasions in memory after so great a lapse of time."

As to this:

The statement that Ireland was fifteen years old in 1851 is manifestly incorrect. The testimony is that he was fifteen in March, 1849, shortly before he went into the post-office (2 Rec., 1427).

The statement that Ireland was in the same employment in 1861 as in 1851 is also incorrect, so far as it relates to the details of the work. It is only true in general that he was a clerk in the office at both those dates. From 1849 to 1853 he had stamping to do every day, and at first did more stamping than anything else (2 Rec., 1423). In 1861 he had nothing to do with stamping. He was assistant chief clerk and his desk was not near the marking table (2 Rec., 1426, 1430). It was the circumstance that the marking table was placed directly in front of his desk in the new arrangement of the office, *on the removal from one building to another*, which led to the description to Bogia of the 1850 stamps and to the making of others after the 1850 pattern (2 Rec., 1426, 1430.)

The statement in the opinion that when Ireland made the stamp in 1861 he remarked to others that it was his, without stating that he had made it previously, is also in conflict with the evidence. Ireland says (2 Rec., 1426), referring to the instructions to Bogia, "*I then told him that I had made a thing years before, and told him just what it was, and suggested certain changes.*"

It did not occur to either complainants' or defendants' counsel to question *Bogia* particularly as to whether Ireland stated that he had made the combination years before. In answer to a general question by defendants'

counsel, Bogia volunteered the statement that Ireland remarked, "I want you to understand that this is mine" (2 Rec., 1438–9.) This does not go so far as Ireland's testimony, but so far as it goes it corroborates Ireland, and in nowise contradicts him.

But even the possibility of mistake, on which the circuit court relies, fades away when Rees' testimony is considered. Rees left the office in 1851, and was not there afterwards. What he saw and did while in the office could not therefore have been subsequent to that date.

Perjury is the only other suggestion which can be made to break the force of this testimony. There is no basis in the record for such a suggestion. It can come, if at all, only from the imagination of counsel, and, no matter with what vehemence of declamation it may be urged, it ought to be indignantly discarded.

The effect of this testimony is to destroy the patent, if the patent is broad enough to cover unbalanced instruments. This is the effect not only of the combined postmarker and canceler of which both Ireland and Rees speak, but also of the combined postmarker and rater (defendants' drawing, Ex. 202, 2 Rec. 1408), about which Rees alone testifies. The fact that this instrument was not used for canceling, it being plainly well adapted to it, is immaterial.

4. As to the Cleveland post-office:

See testimony of defendant's witnesses: Charles E. Wheeler, 1 Rec., 662; Henry S. Bishop, *id.*, 704; Wel. come L. Cottrell, *id.*, 713; John Coon, *id.*, 721; W. J. Warner, 2 Rec., 999; John Albinger, *id.*, 1003; C. Clifford Nott, *id.*, 1012; Ery S. Beardsley, *id.*, 1023; Models,

Defendant's Exs. 137, 138; Drawings, Defendant's Ex. 175, 2 Rec., 1004.

See testimony of complainant's witnesses: Asem L. Bassett, 1 Rec., 171, 207; James McGough, *id.*, 187; Henry C. Cook, *id.*, 195; Henry A. Mastick, *id.*, 199, 210; James R. Haskell, *id.*, 214; David L. Wood, *id.*, 225. And Drawing Complainant's Ex. No. 1 (Haskell), 1 Rec., 624; Letter Complainant's Ex. (Wheeler D, E, F), 1 Rec., 595; Letter Complainant's Ex. (AA, C. E. Wheeler), 1 Rec., 566.

Defendant contends on the basis of this testimony that a combined instrument contrived by Charles E. Wheeler was used under several modifications in the Cleveland post-office, whenever there was an unusual accumulation of mail matter, for several years, commencing at a date earlier than July 4, 1853, and that from a date at least as early as the summer of 1860 till the time the department furnished combined stamps (1863 or '64) it was in constant every-day use.

The witnesses fix dates by circumstances within their individual recollection and in common by referring to the situation of the post-office and to the term of office of different postmasters.

Situation of the post-office:

1. In the Herald Building on Bank street, from 1850 to July 4, 1853.

2. In Gray's building on Water street, from July 4, 1853, to December 29, 1858.

3. In government building on public square, from December 29, 1858, to the present time.

The removal on July 3 and 4, 1853, from the Herald building to Gray's building on Water street, is proved by John Coon's deposition (1 Rec., 721), and with him

agree defendant's witness, Wheeler (1 Rec. 664), and complainant's witnesses, Mastick (1 Rec., 203), and Wood (1 Rec., 226).

The removal on December 28 and 29, 1858, from Gray's building to government building on public square is proved by the books of the builder of the new building, W. J. Warner (2 Rec., 999), and with him agree Wheeler (1 Rec., 664), and Beardsley (2 Rec., 1023).

Postmasters:

1. D. M. Haskell, under Taylor and Fillmore's administration, about four years, down to April, 1853.

2. J. W. Gray, under Pierce's administration and part of Buchanan's.

3. B. Harrington, under Buchanan's administration, about four years.

4. Edwin Cowles, under Lincoln's first administration (1 Rec., 663).

Testimony of defendant's witnesses: Charles E. Wheeler (1 Rec., 662—703).

Mr. Wheeler entered the Cleveland post office as stamping and box delivery clerk, May 4, 1849. He held that position for about four years, and then went into the distribution department, where he continued about ten years.

He then became a special agent of the Post-Office Department, which position he held until October 1, 1866. Soon after the introduction of three-cent postage-stamps (March 3, 1851), while the post-office was in the Herald building, on Bank street, he made a combined instrument which is represented by the wood model, Defendant's Ex. 137. This he did by removing the handle of a separate canceler, filing flat faces to match on the cylindrical surfaces of the iron portions

of the canceler and of a postmarker, and then binding the two iron portions together with cord and wire. This instrument was not used continuously, because it was rather heavy and blistered the operator's hand; but it was used as often or oftener than once a week, whenever there was an unusual accumulation of mail matter—*e. g.*, just before closing mails—and it lay on the stamping table and was handy for use. When the combined instrument was not used, a separate canceler and a separate postmarker were sometimes used, and sometimes the postmarker was used for both canceling and postmarking. The latter proceeding was contrary to the rule of the department, to the violation of which the attention of the Cleveland office was called on several occasions. Wheeler himself only made this one instrument, but he removed the binding on one or more occasions, and tightened it by a wedge whenever it became loose. Several changes (the date of which Wheeler cannot fix with precision) were made in succession in the method of attaching the canceler within five or six years after 1853. The first change consisted in brazing the canceler to the side of the postmarker. The second in cutting off about one-half from the height of the canceler; the third in still further reducing the size and weight of the canceler. Defendant's Ex. 138 is a wood model illustrating the second change. The stamp like Ex. 138 was in every day use till the third change took place. The instrument in its third form was used till the department furnished combined stamps, in Lincoln's administration. Mr. Wheeler consulted lawyers (Brainard and Burridge) in 1853, with reference to obtaining a patent for his invention, but on account of sickness of himself and family he was unable to spare

the necessary money till 1863, when he made an application which was unsuccessful, owing, as he was informed, to an existing patent. He asked for an interference, which was at first allowed him, but the grant was subsequently withdrawn, for some reason he knows not what. Mr. Wheeler exhibited his invention to special agents of the Post Office Department and to A. N. Zevely, Third Assistant Postmaster-General, some time between 1859 and 1861.

WELCOME L. COTTREL'S testimony (1 Rec. 713–721): Mr. Cottrell is a model-maker. He was born in 1830. When twenty-two or three years old he used to go frequently to the Cleveland post-office in the Herald building on Bank street, for love-letters. While waiting for his letters he on several occasions saw Wheeler, whom he knew personally, at work at the stamping table, through the delivery window. The rapidity with which the stamping was done arrested his attention, and he observed that with one blow on the ink pad and one blow on each letter two marks were made, one on the postage-stamp and one on the envelope to the left of the postage-stamp. He cannot describe how the instrument which Wheeler used was constructed, further than by saying it was a hand-stamp with a wooden handle and some kind of metal bottom. He made the models, Defendants' Exhibits 137, 138, and cannot say that he ever saw before any devices of the kind or character represented by them. In this testimony he doubtless referred to the exact construction of Exhibits 137, 138. He had never had an opportunity of witnessing the operations of postmarking or canceling in any post-office since 1852 or 1853. What he saw, however, in 1852 or 1853 was recalled to his memory in 1864 or 1865,

when a Mr. Wilbur, who claimed to have invented a machine in which he thought postmarking and canceling at one operation was a patentable feature, employed him to make a model. He then told Mr. Wilbur that he thought an instrument for canceling and postmarking at one operation was not patentable, as he had seen a device in use accomplishing that purpose ten or twelve years before. What Cottrell saw must have been (as he says) in the Herald building on Bank street, because in the Water street office the stamping table was not visible from the delivery windows. (See Bishop's testimony, 1 Rec., 712, bottom, and Bassett's testimony, 1 Rec., 175.) Cottrell's description of the internal arrangements of the Bank street office, so far as visible from the hall, is fully corroborated by the testimony of complainant's witness, Haskell, and by the drawing of the ground plan of the Bank street post-office, which that witness furnished. (See 1 Rec., 214–'5, and Complainant's Ex., No. 1, Haskell, 1 Rec., 624.)

C. Clifford Nott's testimony. (2 Rec., 1012–1023.)

Mr. Nott was a clerk in the Cleveland post-office, then in the Herald building on Bank street, from October, 1852, to March, 1853, and since the latter date has never been employed in any post-office. He states that Wheeler did most of the stamping at that time; that at first postmarking and canceling was accomplished by two instruments; that afterwards the canceler was bound by cord to the side of the postmarker, and this combined instrument was used by Wheeler and by myself. Wheeler told Nott at the time that he, Wheeler, put the two instruments together. Complainant's witness, Haskell, swears that no person by the name of Nott was employed in the Bank street post-office. (1 Rec., 219.)

But in this Mr. Haskell is contradicted, not only by Nott himself, but by complainant's witness, Mastick (1 Rec., 200), and by the certified copy of Mr. Nott's receipt for salary for the month of February, 1853. (Defendant's Ex. 182; 2 Rec., 1369.)

Henry S. Bishop's testimony. (1 Rec., 704.)

Mr. Bishop was a clerk in the Cleveland post-office for about six months in 1853, and nine months in 1854. The office was then on Water street, and J. W. Gray was postmaster. A postmarker with an attachment was used for postmarking and canceling. He does not remember the precise construction of this instrument, but as to the results attained by it his memory is clear. The combined instrument was Wheeler's contrivance, and witness knows of Wheeler's using it. The witness also recollects the use of a separate wooden canceler, but is not sure that the combined instrument was not used at least part of the time when he first went into the office. From the time he left the post-office to the time of his examination, twenty-four years, he never saw any combined postmarker and canceler.

Ery S. Beardsley's testimony. (2 Rec., 1023.)

Mr. Beardsley was employed in the Cleveland post-office from 1854 to 1867. For about three weeks in 1854 or 1855, he is not certain which, he did the stamping while another man was sick, and used a combined instrument, consisting of a postmarker with a canceler soldered to the side thereof.

John Albinger's testimony. (2 Rec., 1003.)

Mr. Albinger became a clerk in the Cleveland post-office in October, 1854, and was employed there for over twenty years.

He remembers seeing in the Water street office a com-

bined instrument used for postmarking and canceling. This instrument he describes, and Defendant's Ex. 175 (2 Rec., 1004) is a drawing of it.

Testimony of complainant's witnesses:

James R. Haskell. (1 Rec., 214.)

Mr. Haskell was employed in the Cleveland post-office from the spring of 1849, to April, 1853. He was the brother of the postmaster, D. M. Haskell, and was assistant postmaster. He says that separate "date stamps" and "canceling stamps" were furnished and used; that when the business increased the "date stamp" or postmarker was used for canceling; that he had no knowledge of the use of a combined stamp, and that he never saw one until the time of his examination. The untrustworthiness of his memory on this point may be inferred from the fact that he denies positively that defendant's witness, Nott, was a clerk in the post-office while it was on Bank street. (1 Rec., 219). That he was in error on this point, see discussion above of Nott's testimony. He describes the separate cancelers and the rating stamps for printing the numbers 3, 5, 10, 15, 20, 24 and 48, and the word "Paid," as of the shape of Defendant's model Ex. 4, but smaller and having a suitably engraved face, and as generally made of wood, though sometimes they had metal at the lower end. These rating stamps and cancelers were used when his brother first became postmaster. He is not aware that any rule prevailed while he was assistant postmaster against the use of the postmarker as a canceler, but says there may have been "when the stamps were first sent out."

Henry A. Mastick's testimony. (1 Rec., 199, 210.)

Mr. Mastick was employed in the Cleveland post-office on several different occasions: first, from 1849 or '50 to

1851; second, from the fall of 1852 to July, 1854; third, from 1861 to the spring of 1863. In 1852–'54, while the office was on Bank street, he and Nott were delivery clerks. It was the regular duty of Wheeler to attend to stamping. Mastick says that cancellation was performed with the postmarker; that he did not see a combined instrument or know of its use. During the year he was in the Water street office, July, '53, to July, '54, he does not think that Wheeler was in the office. In this he is contradicted by Wheeler himself and by complainant's witness, Wood. (1 Rec., 226.) When he returned to the office in 1861 he found the combined stamp in use.

David L. Wood's testimony. (1 Rec., 225.)

Mr. Wood was never regularly employed in the Cleveland post-office, but from the early part of 1853 to the latter part of 1854 he was local mail agent, and a large portion of his time was spent in the post-office, and sometimes he used to assist in stamping and in delivering letters, and for about two months just after the office was removed to Water street he alone attended to stamping. He used the postmarker as a canceler, and never knew of the use of a combined instrument.

James McGough's testimony. (1 Rec., 187.)

This witness was employed in the Cleveland post-office about sixteen years, a year and a half in the Bank street office, five years in the Water street office, and the remainder of the time in the government building on the public square. He never knew of the use of a combined instrument in the Bank street or Water street offices. He states that in the Herald building, on Bank street, the stamping was done in the D. P. O. (distributing post-office) room up stairs, but he had no means of

knowing this, because he had access to only one room—a room next the alley where the mails were taken in and out. Defendant's witnesses, Wheeler, Cottrell, and Nott, and complainant's witnesses, Haskell and Mastick, agree in stating that the stamping was done in the room on the ground floor, from which letters were delivered to the public. McGough says he *never was in that room.* (1 Rec., 194). His mind was plainly shattered by sickness (see his cross-examination), and his testimony is untrustworthy.

Asem L. Bassett's testimony. (1 Rec., 171, 207.)

Mr. Bassett was employed twice in the Cleveland post-office: first, from April, 1855, to April, 1856; second, from January, 1859, to February, 1863. In 1855–'56 his duties were to distribute letters and do what was called "entering on the sheets." He states that he also sometimes assisted the stamping clerk, and that postage-stamps were canceled by the postmarker. In 1859–'63 he was the regular stamping clerk. He states that he used the postmarker for canceling till an order was received from the Postmaster-General forbidding this; that he then conceived the idea of tying a postmarker and a canceler together by their handles; that he used an instrument so constructed for a day or two, and then the handle of the canceler was removed and the iron portion brazed or soldered to the postmarker by a locksmith, and that he used the instrument so constructed till he left the office. He further says (except as above indicated) no combined instrument was used in the Cleveland post-office to his knowledge, and if there had been he would have known and remembered it. He further states that in 1855–'56 Mr. Wheeler was not a clerk in the office. (1 Rec., 171, 177.) In

this he is contradicted by Wheeler himself (1 Rec., 662), by Beardsley (2 Rec., 1023–'4), and by Albinger (2 Rec., 1004).

Henry C. Cook's testimony. (1 Rec., 195.)

Mr. Cook is Mr. Bassett's partner in the hat business. He recollects seeing Bassett use a clumsy contrivance consisting of a postmarker and canceler bound together with twine. He gives August, 1860, as the date of this. He was employed in the Cleveland post-office for two or three months at a time on several occasions, the dates of which he does not fix. He says that in the winter of 1859 he did stamping, using the postmarker for canceling for a few days, but gave it up because he mashed his hand so in the work.

As to these witnesses *of complainant* it should be noticed that the memory of nearly every one of them is shown by the cross-examination and by the concurring testimony of two or more other witnesses to have failed in respect to one or another important matter, and that their testimony is merely negative, while that of defendant's witnesses is direct and positive. Defendant's witnesses must have either told the truth or perjured themselves. (See Stitt *v.* Huidekopers, 17 Wall., 384.)

To impeach Wheeler complainant put two letters in evidence—one from Wheeler to Zevely, the Third Assistant Postmaster-General, dated November 28, 1863 (Complainant's Ex., Wheeler, D. E. F., 1 Rec., 595;) the other (Complainant's Ex., Wheeler, A. A., 1 Rec., 566), probably written at Wheeler's request, from Postmaster Cowles to the Postmaster-General, dated May 7, 1864. Wheeler does not appear to have been acquainted with the contents of the Cowles letter at the time it was written. All he says is that if it be the genuine letter of Cowles it was written at his suggestion or request. (1

Rec., 692.) As impeaching evidence, therefore, this letter has little weight. With Wheeler's own letter, however, the case is different. He seems in that letter to claim having made the combination in 1861. The statements, to be sure, are not unequivocal, and the pendency of the interference case referred to in the letter may have prevented him from showing his hand fully in a document that might become a public record, and he does say that he could prove priority beyond a doubt. Still, if we had only Wheeler's testimony to rely on, this letter would go far to undermine it; the evidence, as a whole, might fairly be described as unsatisfactory. But Wheeler does not stand alone. His letters have no effect upon the independent testimony of Nott, Cottrell, Bishop, Beardsley, and Albinger. These witnesses swear with such positiveness and detail that mistake is impossible. They must have told the truth or committed perjury, and there is not a place in the record on which the court can put its finger and say this shows that what they say is willfully false.

The Cowles and Wheeler letters were offered in evidence to impeach Wheeler's sworn testimony. That certainly was their only function. Judge Wheeler, in his opinion (2 Rec., 1452), seems to have thought that they were substantive evidence of the facts stated in them, for he says, apparently not solely with regard to Wheeler's testimony, but to that of all the witnesses:

"There is in the case important written evidence upon this point, and the whole is to be weighed together. * * * These deliberate statements made by two persons (Wheeler and Cowles in letters above referred to) separately and at so near the time of the transaction in question * * * and made in writings now produced, far outweigh in reliability statements made wholly from

memory fifteen years later and further from the transaction."

But prior inconsistent declarations are admissible only to impeach the witness who made them, and are not legitimate evidence of the facts stated in them. Furthermore, as to Cowles, he did not become postmaster till after Lincoln became President (1 Rec., 663, 208); therefore he could not have known what had happened in the post-office prior to 1861. Wheeler's letter is also equally unreliable as substantive evidence of the facts stated therein, for it is as certain as the sworn testimony of all the Cleveland witnesses can make it (complainant's witnesses as well as those of defendant), that this combination was in use in that office *at least* as early as the year 1860.

If the course pursued by Campbell's counsel in the court below is followed here they will argue that the instruments used in the Cleveland, Philadelphia, Janesville, and New York offices were "abandoned experiments." That this is not correct, see Railway Co. *v.* Sayles (97 U. S., 554); Coffin *v.* Ogden (18 Wall, 120); Parker *v.* Ferguson (1 Blatchf., 407); and Evans *v.* Hettick (3 Wash., 408).

D. The defense that the patented invention had been in public use in this country for more than two years before Norton's application for his patent is next to be considered.

The application was made on the 5th day of January, 1863. (See the file wrapper and contents, Defendant's Ex., 156, 2 Rec., 1299, and at page 1303, near top.)

That the use of the unbalanced instruments in the New York office, as already described, was with Norton's knowledge and consent there is no dispute.

Dix was warned by the reply (2 Rec., 1361) of the Post-Office Department, to his letter of August 8, that his device had then been patented. He wrote to Norton about the matter, and had an interview either with him or his agent (2 Rec., 851–5). The result was an arrangement with Norton for the use of the stamps made by Dix, or of stamps made according to Norton's patent of 1859, Dix cannot recollect which, though his impression is that his own stamp was continued in use. Dix's letter of August 28, 1860 (1 Rec., 543, introduced by complainant, and already cited under A, above), corroborates his statements as to Norton's knowledge and consent.

No attempt has been made by complainant to traverse this testimony. Norton himself testifies that his invention was used in the New York office in the latter part of 1860, and that he consented to such use (1 Rec., 143). Remember in weighing his testimony that he does not distinguish between the balanced and unbalanced constructions, but supposes the patent in suit broad enough to cover both (1 Rec. 143), and that his reference to correspondence with the New York postmaster fixes it that the stamp referred to was his unbalanced stamp. He seeks to avoid the effect of the testimony by saying that he consented " simply and only for trial tests or experiments." Dix's letter of August 28 (1 Rec., 543) seems inconsistent with this, as it indicates that there were negotiations with Norton and Ransford for a sale which could hardly have been if the device had not been adequately tested. But without relying entirely upon that, we insist that under the circumstances of this case the avoidance is inadequate in law.

The circuit court felt itself bound by the case of Eliza-

beth *v.* Pavement Company (97 U. S., 126) to hold that the use in the New York office was not "a public use" within the meaning of the statute, but a private use for testing the invention and informing the inventor as to its perfection and usefulness, with the design on his part, all the time, to procure a patent for it when it should prove to be ripe for that purpose. But Elizabeth *v.* Pavement Company was a very different case from this. There the invention was a new style of pavement From the very nature of the thing, no one can tell whether a new and useful pavement has been invented without a trial. But in this case there was no need of a trial. From a mere inspection of even the unbalanced instrument the court can tell *a priori*, from its own knowledge, without evidence, that it would work well, and the evidence of all the witnesses as to all the post-offices is that, in fact, it did work well from the very start. (See particularly Dix's letter of August 8, 1860, 2 Rec., 1142.) That the use in the New York post-office in 1860 was, in fact, a public use, there is no disputing. It was as public as the nature of the thing admitted of, the instruments being useless for any other purpose than post-office work. In this connection the attention of the court is called to the case of Consolidated Fruit Jar Co. *v.* Wright (94 U. S., 94), where the patent was held invalid because the patentee had sold a few of his jars more than two years before his application for the purpose of testing salability in the market. (See also Shaw *v.* Cooper, 7 Pet., 292; Hide Co. *v.* Tool Co., 4 Fish., 284; McMillin *v.* Barclay, 5 Fish., 189; Winans *v.* R. R., 2 Blatch., 291; Egert *v.* Leippmann, 14 Pat. Of. Gaz., 822.) The law is that there must be no unnecessary delay in applying for a patent after the perfection of the invention is

ascertained, and that there is a wide difference between a perfect invention and a machine embodying the invention which is so mechanically perfect that it will make the invention produce the best possible results.

Campbell's counsel asked Norton to explain his delay in applying for a patent. The gist of his answer, covering about a page of the record, is that he was waiting for a report from the New York postmaster as to the satisfactoriness of the tests to which his invention had been subjected. He says that this report was made on January 3, 1863, and that two days afterwards he filed his application; and he further states that had the report been made at an earlier date he should have filed the application sooner. (1 Rec., 143.) The report referred to is Postmaster Wakeman's letter of January 3, 1863. (Complainant's Ex. II, 1 Rec., 542.) Norton is contradicted in respect to this testimony by his letter of March 23, 1863 (Defendant's Ex. 27, 2 Rec., 1165), written more than two months after his application, in which he says: "The New York office has given it the highest kind of a recommend. I shall have a copy of the letter to show you when I get home; it is a big thing. *I never saw the letter till yesterday.* It is now on file in the Post-Office Department." This letter also shows that at that time the improvements covered by other patents (doubtless those of 1859 and 1862) were thought to be required by the Post-Office Department. This makes it highly improbable that there could have been any delay in applying for the 1863 patent for the reason now given. Further, the file-wrapper contains a letter to the Commissioner (quoted in full hereinafter), in which Norton states his understanding of the invention covered by the application to be that it is a combination in which the

Rec 844
Rec 838

conceler is a metal tube holding a blotter of elastic material like wood, cork, or rubber. (2 Rec., 1303.) Now, *that* combination was never used or tested in the New York office, and it is impossible, therefore, that Norton could have been actuated, in delaying his application, by a desire to get a report about it.

To return to the use at the New York office in 1860, it does not appear that Norton had, at this time, devised the balanced instrument; still less that he knew of the use thereof testified to by Yeoman, Ryer and Corbett. Consequently this defense fails, if balancing be an essential part of the patented combination, and if the patentees consent and allowance be an essential element of the defense.

This case therefore presents the question whether, under the patent act of 1839, which was in force when this patent issued, the consent and allowance of the patentee is essential to the defense now under consideration.

[This question is presented not only by the New York evidence, but by much other evidence that appears uncontradicted in the record.

Powers shows that an unbalanced instrument was used for several years in the Buffalo office, commencing with the summer of 1860. (1 Rec., 800.) Ex. 135 is the identical instrument so used.

Rupp and Geilfus show that another unbalanced instrument began to be used in the Cincinnati office in the summer of 1860. (See 1 Rec. 819, 830, and Drawing Ex. 1422; Rec., 1270.)

Edmund S. Zevely and John H. Zevely, manufacturers of stamps, show that both balanced and unbalanced instruments of a cheap construction were sold to different

appellant, the said Campbell, as assignee in trust, and the said Eddy individually and as trustee for said Caswell and said Clexton have execution against James, this appellant, for the sum of $64,471.40, with interest thereon from the date of entry of said final decree.

OUTLINE OF THE ARGUMENT.

The errors which we have assigned in some instances overlap in a measure one upon another. We think, therefore, it will be more convenient to present topically the principal questions raised, rather than to attempt to discuss the errors assigned *seriatim*. We ask that the argument may be considered to apply to the respective errors assigned wherever in fact it is applicable.

The heads of the argument are as follows: #

Page

I.—Of the title. 17

And herein of—

A. The alleged transfer from Secombe to Ingalls. 17

B. The alleged assignment from Ingalls to Campbell. 35-

II.—Of the validity of the patent.

And herein of—

A. The construction of the patent and the date of Norton's supposed discovery, with some account of the state of the art. 55-

B. Prior patents. 55

C. Whether Norton is the first inventor. 57

D. Two years' prior use in public. 80

E. Abandonment. 86

F. Whether patentable invention is shown. 89

G. Whether reissue is for same invention.

H. Whether the reissue is void by reason of an 11

ambiguous and misleading specification, and by reason of vague and indistinct claims.

113 I. Whether the Commissioner was authorized by law to issue the reissue patent in suit.

113 III.—Of Norton's credibility as a witness.

And herein of—

115 A. Contradictions of his testimony.

117 B. His reputation for truth.

120 C. His testimony respecting the alleged Shavor and Corse reassignment.

138 IV.—Of infringement.

140 V.—Of the form of the interlocutory decree in respect to the account for profits and damages therein directed.

148 VI.—Of the exceptions to the report of the master.

And herein of—

150 A. Whether the salaries of the clerks whose services would have been required to postmark and cancel in the same way and in the same time, had non-infringing instruments been used, are a proper measure of gains, profits, and advantages under the circumstances of this case.

155 B. Whether, if it was proper in this case to make a comparison as to advantages in use between the infringing machines and other instruments, the infringing machines ought not to have been compared with unbalanced combined instruments rather than with separate postmarkers and cancelers.

6 161 C. Whether James has personally received or made any gains, profits, or advantages.

165 D. Whether, if James is not liable for the profits as such, he can be held liable for an equal or any amount as damages.

postmasters so early as 1859. (See 2 Rec., 927, 952, and Model Exs. 139, 140.)

The Cleveland witnesses already referred to, those of complainant as well as those of defendant, show that unbalanced instruments began to be used there *at least* as early as the summer of 1860.]

We concede that the reports contain many dicta, by eminent judges, to the effect that the patentee's consent and allowance is necessary. But in none of these cases, so far as we have been able to discover, was the point necessarily presented for adjudication. In Egbert *v.* Lippman (14. O. G., 822) the pleadings raised the point squarely, the defense, as stated in the answer, being merely that more than two years before the application the invention was known and in use in the United States, without saying that this was with the patentee's consent and allowance. Judge Blatchford held the patent invalid by reason of the two years' prior use. Speaking of the act of 1839, he said:

S. C. 15 Bla 295

"Consent and allowance by the patentee are not necessary to such invalidity.

* * * * * * *

The policy introduced by the act of 1839, and thus continued, is that the inventor must apply for his patent within two years after his invention is in such condition that he can apply for a patent for it, and that if he does not apply within such time, but applies after the expiration of such time and obtains a patent, and it appears that his invention was in public use at a time more than two years earlier than the date of his application, his patent will be void, even though such public use was without his knowledge, consent, or allowance, and even though he was in fact the original and first inventor of the thing patented, and so in public use. Such public use for such a length of time is made equivalent to absolute abandonment."

In reaching this conclusion he relies solely upon the wording of the act of 1839 in connection with the act of 1836, which it amended, except that he finds corroboration in the acts of 1870 and in the Revised Statues, which are *in pari materia.*

We commend his reasoning to the consideration of the court.

E. The defense of abandonment now to be considered assumes for argument's sake that Norton was in fact the original and first inventor of the machines described in the patent.

It applies if the court construes the patent to be broad enough to cover unbalanced instruments.

It also applies if the the court limits the patent to balanced instruments.

It does not apply to the second claim if the court restricts that to a combination in which the canceler consists of a tube containing a cork or other elastic die.

The evidence is to be found in the patent of August 9, 1859 (2 Rec., 1270); in that of December 16, 1862 (2 Rec., 1276); in the duplicate models of those patents, Defendants Exhibits 146 and 148; and in the depositions of the experts Chambers and Robertson. (2 Rec., 990; 2 Rec., 877, 889–'90, 908–'10.)

The point made is that the balanced and unbalanced instruments which are now claimed to be covered by the reissue patent in suit were described *and not claimed* in Norton's prior patent, and that therefore if he was in fact the inventor of them he must be deemed to have intended to dedicate them to the public so far as any subsequent patent is concerned.

No decided case sustaining this conclusion has been found.

But it seems clear that if the omission to claim the described matter be intentional, then there is an abandonment in fact; and if, on the other hand, the omission is inadvertent, the statute gives a remedy, not by allowing a new patent to issue, but by permitting the Commissioner to reissue the patent on amended specifications and claims.

Whether or not the law conclusively presumes an abandonment, there can be no doubt that describing a thing in a patent without claiming it is, while unexplained, strong *prima facie* evidence of abandonment. It is as if an inventor, instead of applying for a patent, should write and publish a full description of his invention in a book. Curtis in his work on patents, at § 117, says, "It is a strong, perhaps a conclusive presumption, that what is described in a patent and not claimed is given up to public use."

The 1859 patent was issued to Ransford and Low as Norton's assignees, and is for an unbalanced combined postmarker and canceler.

The claim is for "the blotter (J) connected or attached to the main part of any 'post-office postmarking stamp' for the purpose of cutting and inking, blotting and effacing, so as to successfully cancel the frank or postage-stamp of any letter or any package, at the same time and operation of marking or printing upon such letter or package the name of any post-office, the year, the month and day of the month, substantially as and for the purpose herein set forth."

The specification (p. 1271–6) shows the construction of the "blotter J." It is fastened to the immediate side of the postmarker by a screw and shaft. It is "for the purpose of cutting, inking, blotting, effacing and

effectually canceling the frank or postage-stamp," while at the same operation the postmark is put on the envelope apart from the postage-stamp. It "may be made of any size or shape and of any material to answer the end or purpose sought to be attained" (p. 1274).

"*The face which receives the ink and which comes directly upon the frank or postage-stamp* is grooved or cut, thereby leaving various projections which have a sharp or knife edge sufficient for each to cut entirely through the frank or postage-stamp, but not through the envelope immediately under the same, while at the same time the places thus cut are inked by the same sharp edge projections or cutters on the face of the said blotter as aforesaid" (p. 1274). The projections may be kept sharp and in cutting order by filing and sharpening them when dull (p. 1274).

Defendant's Ex. 146 is a certified duplicate of the model filed with the specifications of this patent.

The stamp of the 1862 patent is a balanced instrument.

The first claim is for the canceling device (C), having on its lower surface knives or cutters and guards to prevent the knives from cutting too deep.

The second claim is for a combination consisting of 3 elements—1, the canceling device (C); 2, the postmarker (D); 3, and the cross-piece (B), substantially as and for the purposes set forth.

The nature of the improvement is described at p. 1277–8: "The nature of my improvement consists in so constructing canceling stamps that the same shall cut the postage-stamps or any stamp similar thereto without injury to the contents of the envelope or packet enclosed therein, *and at the same time cause a heavy circular mark upon the inside and one upon the outside of that part of the stamp or letter frank canceled by the cutting device,*

so that said postage-stamp or letter frank shall readily show cancelation in ink, &c. * * *

"It also consists in the employment and combination of a canceling stamp with a cutting and inking device thereon with a postmarking or rating stamp," &c.

The construction of the stamp is shown in the drawings and in Defendant's Ex. 148, which is a certified duplicate of the model filed with the specifications of this patent. The ink marks are made by broad bands (see *ee* and *oo*, figs. 2, 3, drawing between pp. 1276 and 1277), which are a trifle below the level of the edge of the cutters and which are the guards referred to in the claims.

No person of ordinary intelligence can read these patents without obtaining knowledge of a construction in which the canceler does not cut. All that is necessary to change the 1862 stamp into that claimed in the reissue of 1870 (according to the construction of the court below) is to file away the cutters or even rub them against a stone (2 Rec., 887, 889–90, 908–10).

Chambers's testimony that in 1862 or 1863 his father contrived a combined instrument consisting of handle, base-piece (cross-bar), postmarker and metal canceler, which he, the witness, took to the Patent Office for comparison with models on file there; that he found a model which he describes, and which must have been the model of the 1859 patent, and that he thereupon abandoned further search, having come to the conclusion that his father's device was not patentable, is especially significant, since it indicates the judgment of a practical expert not made up with reference to the pending case. He is and has been for many years a manufacturer of stamps. (2 Rec., 990–6).

F. Does the patent show invention?

We submit that only ordinary intelligence and com-

mon sense was required to remove the handle of a separate canceler and solder, braze or rivet the metal part to the side of a postmarker, and so make both impressions simultanteously instead of one after the other. The combination is a mere convenient aggregation of devices. The postmarker does not postmark any better or more rapidly, and the canceler does not cancel any better or more rapidly because of the union. Nothing inventive would be shown if the operator, instead of going over the letters twice, first with canceler and then with postmarker, and supposing his hand large enough, should take the separate instruments in his hand and so strike both blows at once, nor if he should tie a separate postmarker and a separate canceler together by the handles with twine, and by that means strike both blows at the same time. The difference between tying instruments together by the handles and removing the handle of one and fastening its metal part by well known means to the metal part of the other, is purely mechanical.

To put the matter in another light, the postmarkers that were in use years before Norton made his combination, and probably before he was born, had their acting faces so embossed that at one blow they made a dozen or more distinct and separate impressions—one for each letter in the name of the city, and one for each dating type, besides the inclosing circle. What invention was there in merely enlarging the postmarker and embossing an additional device thereon so that one more impression might be made?

The evidence in this case shows that prior to 1860 or 1861 there was no imperative postal regulation against using the postmarker as a canceler. It is, therefore, not

strange that prior to that time but few instances of combining postmarker and canceler have been found, and those only where, as at Philadelphia or Cleveland, there was a local office rule against using the postmarker for canceling. There was no need of a combination. But just so soon as it was stringently forbidden to use the postmarker as a canceler, the evidence shows that the idea of the unbalanced instrument came into the minds of the postal employés in different places, and was by them reduced to practical form without knowledge or hint of what had been done elsewhere.

The evidence shows that this unbalanced combination has been independently contrived and made by no less than eleven men besides Norton, to each of whom the dignified name inventor is as applicable as it is to him, viz:

Anthony in Geneva in 1861 (1 Rec., 816). Powers in Buffalo in 1860 (1 Rec., 800). Dix in New York in 1860 (2 Rec., 849). Riley in New York in 1853, perhaps (2 Rec., 861). Hunt in Cincinnati in 1860 (1 Rec., 819–830). Bassett in Cleveland in 1860 (1 Rec., 171, 207). Wheeler in Cleveland in 1853 (1 Rec., 662). Miller in Janesville, Wis., prior to March, 1859 (2 Rec., 871); Rees in Philadelphia prior to 1849 (2 Rec., 1406). Ireland in Philadelphia prior to March 3, 1851 (2 Rec., 1422). E. S. Zevely in Pleasant Grove in 1850 or thereabouts (2 Rec., 952).

The remarks of Judge Woodruff in Rechendorfer *v.* Faber (12 Blatch., 78) are in point:

"What, then, did Lipman invent? * * * There was the pencil and here was the eraser; each had its own holder or sheath. If he had spliced the two together for convenience in use, tying them with cord or fastening them with glue, would that have been a pat-

entable invention? Would the man who first put blades of a knife into one handle, instead of one only, be an inventor? and would he be any more so if one of the blades wes a file, such file-blades having been in common use in a like separate handle? If to obtain the utilty and convenience which the union of two implements produces, something new in the construction of the implements, or some new device requiring thought or study more or less, is necessary to unite them, such union may be patentable. But here each implement is constructed precisely as it was before, and the means of union was not in itself novel. It was like inserting two awls of different sizes or uses in one handle, or like the recent case before the Commissioner of Patents, in which the alleged invention consisted in uniting a putty-knife and a glass-cutter in one handle. When the function and uses of each are unaffected by the union, and the means of uniting has no novelty, it is not obvious certainly that anything of invention can be alleged of the combined instruments. That the aggregate result may be very convenient, may for that reason be popular, and may meet a ready sale; that such sales are very large and show a great demand, does not determine the question." (See also Reckendorfer *v.* Faber, 92 U. S., 347; Dunbar *v.* Myers, 94 U. S., 187; and cases cited by Judge Blatchford in Alcott *v.* Young (decided March 31, 1879), reported in The Reporter, p. 552, for April 30, 1879.)

We submit, in concluding the discussion of unbalanced instruments, that the patent is certainly void, if it must be construed as claiming them.

There remains to be considered the questions whether the cross-bar (balanced) instruments were patentable, and whether the instruments covered by the second claim (in which, as we understand it, the canceler consists of a metalic tube, with an elastic die or type therein) are patentable. In view of the state of the art, as already developed, we submit that neither of these classes of instruments shows any invention.

Miller's "double-header," if it does not anticipate the patent, makes a part of the art. It shows a balanced construction. Balancing appears also in the clothes-stamps, of which defendant's Ex. 169 is a model, that was purchased in Broadway prior to March 10, 1856 (2 Rec., 884). Stamps like Ex. 169 are said by Kittle, Campbell's expert, to have been, to his knowledge, on sale in 1850 (1 Rec., 243–4). At this point we beg leave to make a somewhat liberal quotation from the testimony of our expert Robertson, who purchased the clothes-stamp (Ex. 169), and who has been a practical printer. We cite 2 Record, pages 885–6:

"10 Q. At the time you purchased that stamp (defendant's Ex. 169) on Broadway, in 1856, were there any common and well-known means by which that stamp could have been altered in size and other respects, so as to be adapted at one end of the tube for making a postmark on letters, and at the other end of the tube for making a postage-stamp cancellation mark, at one operation?

(Objected to under the allegations in the answer, because the witness is not a proper person to give such an opinion.)

A. Defendant's Ex. 169 could, without any alteration in said tube or handle, have been made to date or postmark a letter and cancel the stamp thereon by simply taking out the types and using in lieu thereof proper letters and figures to produce the date at one end of the tube, and putting in the other end of the tube one or more letters with their faces downward, so that the "feet" of the type would produce an impression upon the stamp, or even if types were used in the ordinary manner the effect produced would be sufficient to cancel the stamp. At the time referred to the year was seldom given on the postmark, so that there was plenty of room in the tube for the date as then given and a canceling device besides.

11 Q. Using only common means, and means well known to persons familiar with the art of printing in the year 1856, describe how nearly the stamp (Defendant's Ex. 169) that you bought in Broadway could then have been made to approximate to the thing patented in Mr. Norton's original patent of April 14, 1863, a duplicate of the model of which has been offered in evidence, marked Defendant's Ex. 149.

(Objected to as above.)

A. So far as relates to the first claim, it was only necessary to have inserted in the tube or box any of the type made of soft material referred to in my answer to Q. 9, or ordinary wooden type commonly used in all printing offices, to have made the hand-stamp (Ex. 169) essentially the same as the canceling device referred to in the first claim of the patent. So far as relates to the second claim, a device similar to the combination covered therein may be made by placing in one end of the box in Defendant's Ex. 169 one of the wooden type or type made of soft material referred to in my previous answers. Next, placing an ordinary "space" against the side of said soft type, then inserting type of about the size shown in Defendant's Ex. 149 sufficient to form the name of the town and date, Defendant's Ex. 169 would accomplish all that Defendant's Ex. 149 would, and would substantially meet the combination claimed in the second clause of the claim of the patent granted to Marcus P. Norton April 14, 1863, No. 38175. At the end of the box the space before referred to in conjunction with the sides of the box would form the equivalent of the canceling device; and the type at the other end of the box would give the date or postmark—that is, without any other change in the tube or box of Defendant's Ex. 169. By taking other means well known to the art of printing, and changing the form of Defendant's Ex. 169, two small boxes, one of which would contain a soft type and the other giving the date or postmark (such boxes as are referred to in my answer to Q. No. 9), and attaching them by any means then well known, or by the means by which the boxes referred to

were attached to the frame to the opposite ends of the tube or box of Defendant's Ex. 169, the same combination would be produced as in claim 2 of the patent referred to. Such boxes and means of attaching to the frames carrying the boxes were seen by me certainly as early as 1854, and then been in use for several years in the Sun office. It was a common device well known to printers to attach two or more different "chases" to one press, each of which contained different type and were secured so as to move simultaneously. Another class of type-holders called "turtles" were frequently used in clusters of four upon the same frame, each one of which would occupy the same position with reference to the adjoining one that the Norton canceler described in Plaintiff's Ex. D (the patent of April 14, 1863) does to the postmarking device therein shown; the two turtles being connected by a cross-bar in substantially the same manner as the canceling and postmarking devices before referred to are connected by the cross-bar in claim 2 of Complainant's Ex. D. So far as the use of the soft type is concerned in canceling postage-stamps, it would make no difference whether the type were used with either faces or feet up, as cancellation would be produced in either manner.

12 Q. Would the changes which you have referred to have been in 1856 essential modifications of Defendant's Ex. 169 or only formal and immaterial changes?

(The same objection, and also that it is not admissible for the witness to give his opinion on that subject.)

A. They were such that were within the knowledge of every one well versed in the printing business, and would therefore be mere formal changes."

Judge Wheeler held that the patented invention was the *balanced* combination.

On the subject of patentable invention he said (2 Rec., 1453, bottom):

"That its production did involve the exercise of inventive faculties and skill is apparent from the various

steps, trials, and tests by which it was reached, from the fact that so many have been granted upon attempts approaching the same object without accomplishing it, and from the fact that the patent has sustained a suit for infringement of it against a party using the invention in fulfillment of a government contract."

What "various steps, trials, and tests" the learned judge referred to is not clear. According to his finding the patented invention (balanced stamp) was produced by Norton so early as May 4, 1859. There is no valid evidence of any "trials and tests" by Norton in directly the same line prior to that date. Since that date there have undoubtedly been "trials and tests" with a view to *advance upon* and *improve* the combination. Thus cancelers that would cut as well as blot have been tried unsuccessfully. And Yeoman (once stamping clerk and now superintendent in the New York office) says that there had not been a year since 1860 up to the time he testified but what some invention was tested in that office. Perhaps it may fairly be said that invention has attempted to improve upon what common sense has done, and has so far failed in the attempt.

A similar criticism may be made with regard to the patents that Judge Wheeler refers to.

Pearson Hill's English patent of September 27, 1857 (2 Rec., 1291–7), shows most elaborate and complicated machinery designed apparently for the transaction of all the business of a post-office. The last plate shows the stamping device and its mode of operation by treadle and foot power distinctly; with reference to the die E it is said in the specification (at the middle of page 1295), "I also made the die *with the whole design in duplicate*, so that the design with the date may be legibly impressed upon the letter or envelope, as well as upon the

postage-stamp, which is obliterated or canceled by it." Now, it may well be that this intricate and ingenious machine, designed to do the work of a post-office *automatically*, failed in practical operation, though there is no evidence of it. But how can that possibly affect the question whether another instrument which does not pretend to work automatically shows invention.

Miller's hammer stamp patent (2 Rec., 1288–91) shows an instrument which undoubtedly is adapted to successful work, and which is proved by Miller's testimony to have, in fact, worked well. Judge Wheeler cannot have had this patent in mind when he said, "So many other patents have been granted approaching the same object without accomplishing it." The fact that Miller's stamp has not been generally adopted does not prove that it would not accomplish the object.

The remaining patents which Judge Wheeler may have referred to are patents issued on Norton's applications, one on August 9, 1859 (2 Rec., 1270), the other on December 16, 1862 (2 Rec., 1276). They are for combinations in which the canceler will *both blot and cut* and are therefore to be considered as intended for improvements or advances upon the simple combinations of postmarker and blotting canceler. They do not *precede*, they succeed, the so-called patented invention.

The action in which this patent was sustained, referred to by Judge Wheeler, is Shaver & Corse *vs.* Hoole, commenced in 1864 in the northern district of New York. An exemplified copy of the record of this case is in the transcript (1 Rec., 514–537). It shows that the defendant *made default at the trial* (1 Rec., 535, near middle), *and that only nominal damages were asked or given* (1 Rec., 535, bottom). This looks like collusion, and it cer-

tainly takes away all weight from the judgment. See also, the testimony therein of Hoole's expert, Stetson (2 Rec., 921–5): He says that he had prepared Hoole's defense; that he believed it to be a good one; that he attended the trial, but could do nothing because Hoole and his lawyers did not appear, and that "there was a good deal of fog about the case."

G. We claim next that the reissue patent in suit is void, because it is not for the same invention as the original patent.

The power of the court to declare a reissue void for the reason stated does not admit of dispute (Gill v. Wells, 22 Wall., 1; Cornplanter Patent, 23 Wall., 181; Wood Paper Patent, 23 Wall., 567; Russell v. Dodge, 93 U. S., 460).

In this case the patent has been three times reissued; first in 1864, to Shaver & Corse, as assignees of Norton (1 Rec., 462); second in 1869, to Norton himself (1 Rec., 471); third in 1870, to Ingalls, as Norton's assignee (1 Rec., 479). The last reissue is the one on which suit is based. It appears to be literally the same as that of 1869; and that of 1869 differs from that of 1864 only in unimportant particulars. We may therefore compare the reissue in suit directly with the original patent. They are printed respectively at page 459 and page 479 of the record. Defendant's Ex. 149 is a certified duplicate of the model originally filed. Fig. 4 of the drawing annexed to the original patent may be laid out of account, as it represents a device the full description of which was stricken from the original application while it was pending in the Patent Office. (See file-wrapper and contents, Defendant's Ex. 156, 2 Rec., 1299 *et seq.*).

In the original patent the nature of the improvements is stated very plainly and unambiguously as consisting "in the employment and combination of a device for canceling postage or other stamps by means of wood, cork, or *similar* material inserted in a tube or recess therein," and in the combination of this canceler with any postmarker. By reference to the drawings it will be found that the wording of the description of the improvement is in some immaterial respects inaccurate. Thus D, which is the dating type-holder *part* of the postmarker, is called "the postmarking stamp"; C, which is the tube *part* of the canceler, is called "the canceling device"; G, which is "wood, cork, rubber, or *similar* material" contained in the tube, is also called "the canceling device"; and the recess in C, which in the drawings is marked F, is in one sentence of the specification called F, and in another G. The context of the specification, when these letters are used, however, makes what is referred to clear; and a reference to the drawings shows distinctly what part each reference letter belongs to. Thus A is the handle; B is the cross-bar; C is the canceling type-holder *part* of the canceler; D is the dating type-holder *part* of the postmarker; E is the recess in D which receives the dating type; F is the recess in C which receives the canceling type; G is the canceling type; *a* is the hole through cross-bar B by means of which the canceling type may be detruded. The drawings show the recess F in C, extending only partly through C. The specification, however, indicates that if it is desired this recess may extend entirely through C, for it says (at page 461, top), "the said tube or recess G" [F is meant] "may be any size in diameter required, or any depth desired"; and

(at p. 461, near middle) "the said cork, rubber, or other elastic material may extend upward to the said cross-bar (B), and then be connected to the same by a screw or pin-bolt, if desired, which will be the same in effect and operation." The "inventions" described in this patent are two: 1st, a canceler, consisting of a tube (C) made "of any suitable material" (1 Rec., 460, last paragraph), which contains a cork, wood, rubber, or other *elastic* die or type (G); and, 2d, the combination of such a canceler with a cross-bar (B) and a post-marker (D). The specification points out with much clearness the supposed advantages in use of this canceler, and contrasts it with, and differentiates it from, a metallic canceler (1 Rec., 461, top). The claims are aptly drawn to cover exactly the specific "inventions" described.

The interpretation of these "inventions," made by the patentee himself at the time his application was pending in the Patent Office, is entitled to consideration. The file-wrapper and contents are in evidence as Defendant's Ex. 156 (2 Rec., 1299–1306). Therefrom it appears that the application was in the first instance rejected (2 Rec., 1303). Thereupon Norton wrote the following letter to the Commissioner:

NATIONAL HOTEL,
Washington, D. C., March 21, 1863.

Hon. COMMISSIONER OF PATENTS:

SIR: In the matter of my application for a patent upon "improvements in post-marking and canceling stamps," filed in the Patent Office January 5, 1863, and rejected February 21, 1863, I have to request a second or re-examination of the same.

I do not understand that the device referred to in your letter of the 21st of February last is "a common

ink-canceling stamp, such as has been used for years in our post-offices for blotting, and thus canceling, postage-stamps." The devices to which you undoubtedly refer have always been made of metal entirely or of wood entirely. Wood was found to answer no purpose, because not at all durable, so metal ones were used. Now this device consists of a barrel or tube, into which wood, cork, rubber, or some such material, is inserted for the purpose of holding an indelible ink in quantities sufficient to blot the postage-stamp so thoroughly as to prevent the same being washed or cleansed by a chemical mixture and again being used in payment of postage. This tube or barrel holds firmly the elastic substance therein, and prevents the same from undue wear and exposure. The elastic substance therein being worn out, can again be replaced at the office where used, thus saving the trouble and expense of returning the same to the government contractors for such repairs. This, therefore, constitutes a new device, composed of two distinct parts in combination, producing new results, besides blotting the postage-stamp.

This device being new, its combination with the postmarking device for the purposes set forth in the specification is, of course, new; upon these two claims I therefore most respectfully ask a patent.

As to the claim for the cutters in combination with the postmarking device, I am inclined to the opinion, after reflection upon the same, that the office is right in the intimation that this device should be embraced in a new and separate application, and will therefore amend the same.

Your obedient servant,

MARCUS P. NORTON,

Attorney per (sic) se.

(Indorsd:) From applicant. Filed March 21, '63. D. S. S.)

We believe that after the court shall have examined the original patent it will have no hesitation in conclud-

ing that Norton was right in the construction of his "inventions" contained in this letter.

Now, is the reissue for the same "inventions"? It fills six solid pages of the record (1 Rec., 481–7), while the original occupies less than three (1 Rec., 459–61); certainly, therefore, it contains many new words, if not much new matter.

We here give the specification in full, italicising the parts which we claim alter the invention:

The schedule referred to in these letters patent and making part of the same.

To all whom it may concern :

Be it known that I, Marcus P. Norton, of the city of Troy, in the county of Rensselaer and State of New York, haven invented new and useful improvements in "postmarking letters," "packets," &c., and in the "canceling" of the "postage-stamps" thereon, in the manner and by the means substantially as hereinafter described and set forth; that letters patent of the United States were duly issued thereon, under and bearing date April 14, 1863, which were assigned and transferred under a certain agreement and by virtue of a certain instrument in writing bearing date the 20th day of April, 1863, and recorded in the United States Patent-Office on the 8th day of March, 1864, in liber C^7, page 458, of transfers of patents, to Jacob Shavor and Albert C. Corse, of said city of Troy, county, and State, and who, on or about the 23d day of February, A. D. 1864, duly reassigned and retransferred the said invention, improvements, and letters patent to the said Marcus P. Norton, inventor and assignee aforesaid, by a certain instrument in writing, duly executed and bearing date on the said 23d day of February, 1864, and which assignment and transfer from Jacob Shavor and Albert C. Corse was duly recorded in the said United States Patent-Office on the 24th day of July, 1869, in liber U^{11},

page 319, of transfers of patents. On or about the 23d day of October, A. D. 1869, I, the said Marcus P. Norton, by deed of assignment in writing, did lawfully assign and transfer unto Helen M. Ingalls, of the city of Troy, State of New York, the said invention and letters patent, dated and reissued as hereinbefore stated and set forth; which deed of assignment was duly recorded in the United States Patent-Office on the 1st day of August, 1870, in liber B^{13}, page 351, of transfers of patents, and who is now the lawful owner thereof under and by virtue of the said sale, assignment, and transfer so made, executed, and delivered, and recorded, as before stated. Now, therefore, I, the said Marcus P. Norton, do hereby declare the following to be a full, clear, and exact description of the construction and operation thereof, reference being had hereinafter to the accompanying drawings and to the letters of reference marked thereon, which drawings so marked and lettered hereby make a part of these my specifications of and concerning my said invention and improvements herein contained and set forth.

Like letters refer to and represent like and corresponding parts of my said invention.

Figure 1 represents a side elevation of the postage-stamp cancelling and postmarking device hereinafter described and set forth, for canceling postage-stamps with any suitable ink contained upon such instrument at the same time, blow, and operation of the making of the postmark on the letter, envelope, or packet, one side of and from such postage-stamp or frank so canceled.

Figure 2 represents a vertical section taken on a line through the center of the various parts of the postmarking and postage-canceling device or instrument herein contained, described, and set forth.

Figure 3 represents a face-view of the device, showing the postmarking stamp ready for use, and the postage-canceling die or device, made of wood, used endwise, or of cork, rubber, or other suitable material therein

inserted in the manner substantially as shown, and more at large described hereinafter.

Figure 4 shows a device for the purpose of canceling postage-stamps or letter-franks used to represent value, by the use and power of any suitable ink by the means of wood, cork, or any elastic material for the type or die, which may be used for that purpose separate and alone, or in combination with any suitably-constructed postmarking stamp or device, substantially as shown at Fig. 3 of the said drawings.

Figure 5 represents a vertical section of a postmarking and postage-stamp canceling device or die combined, and constructed entirely of iron, steel, or other metal, and more fully described hereinafter.

Figure 6 is a plan or face-view of Fig. 5, showing the postage-stamp canceling device or die, made of iron, steel, or other suitable metal or material.

Figure 7 represents the wrench used for securing the dating-type in a proper place within the postmarking device, having the name of the town or post-office where used engraved thereon in relief letters.

Figure 8 represents the tool or instrument used for removing the cork, wood, or rubber die or type used for canceling postage-stamps, from the tube or surrounding case where held or contained, so as to repair or replace the same with a new one when worn out or unfit for use.

The nature of my said invention and improvements herein contained and described consists in the employment and combination of a device or die used for the more complete and perfect cancellation of postage-stamps and letter-franks, by means of soft wood, used endwise, or of cork, rubber, *or other suitable material*, whereby such stamp or frank is effaced and canceled, in and by indelible or other ink, in the manner substantially as herein described and set forth.

It also consists in the combination of a postage-stamp-canceling device or die, constructed of wood, cork, rubber, *or any suitable material*, with any suitably arranged and constructed postmarking stamp or device, so as to cancel, efface, or destroy the postage-stamp or letter-

frank with indelible or any suitable ink at the same time, blow, or operation of the stamp or instrument by which the postmark is given or made upon the letter, envelope, or packet, substantially as herein described and set forth.

It also consists of the postmarking of letters, envelopes, or packets, and in the cancellation of the postage-stamp or stamps thereon, with, in, or by any suitable ink, or similar material, by means of some soft wood, used endwise against the postage-stamp, or by the means of cork, rubber, iron, or steel, or by means of any other suitable material, so combined with the postmarking stamp or instrument as to cancel, efface, or destroy the postage-stamp or stamps at one and the same blow or operation of the entire instrument thus constructed for that purpose, whereby to prevent a second or re use of such postage-stamp or stamps.

To enable others skilled in the art to which my said invention and improvements relate, to make and use the same, I will here proceed to describe the construction and operation thereof, which are substantially as follows; that is to say:

I construct the postmarking device or stamp D of any suitable material, and of any size in diameter required, while in length it must correspond to the canceling device and die or type.

E, Fig. 3, is the mortise or recess, of suitable dimensions to receive the type for the month, day of the month, and for the year, and called or known as the dating-type, around which is the name of the town or post-office where used, in relief-letters, and upon the lower face of such postmarking stamp or device.

I construct the postage-canceling stamp or device G (for the purpose of canceling, in a more perfect and thorough manner, the postage-stamps on letters, envelopes, or packets) of wood, used endwise upon the postage-stamp, or of cork, rubber, or of any *suitable or* elastic material, and insert the same in the tube or recess F, which is that part of the canceling device marked C of the accompanying drawings, and which is connected to,

and combined with, the said cross-piece B, as herein described.

I prefer to have the diameter of the canceling device and die or type F, Figs. 2, 3, and 4, about the same as the width of the postage-stamp to be canceled or destroyed by means of the same.

The said canceling die or type G *may* be of any length required, and so made as to correspond with the tube or recess F, and closely to fit the same, and it *may* be made of wood, cork, rubber, or of any elastic material, as aforesaid.

The face of this device may contain a plan or form for canceling the postage-stamp in, with, or by ink, like unto that shown at Fig. 3, or it may have any configuration deemed proper to use for the purpose aforesaid.

The said device, die, or type G will project somewhat below the face of the postmarking device D, if deemed best so to do, and it may be removed out of the said tube or recess F by means of a pin or bolt, substantially like that shown at Fig. 8, the lower end of which operates in and through the aperture *a*, Figs. 2 and 4, for the purpose of repairs, or to replace it by a new one, when desired.

A is the operating handle, firmly secured to the cross-bar B by any suitable mechanical means, and it will be made of wood, &c.

The said postage-stamp-canceling device, die, or type G, being thus constructed of cork, wood, or rubber, or other elastic material, and combined with the said device C, with recess or tube F therein as aforesaid, will receive and contain, on the face or configuration thereof, the ink aforesaid, in quantities sufficient to permanently cancel, efface, or destroy the postage-stamp whereon the same is used while postmarking letters, packets, &c., in such manner as to prevent the said postage-stamp being cleansed of the said canceling-ink by any chemical or other process; for the said canceling-ink, so put upon the postage-stamp by means of said cork, die, or type, would be so effectual that any attempt or effort to remove it therefrom would entirely destroy, or nearly so,

the aforesaid postage-stamp, and thus and thereby render the same incapable for, or of, a second or other use, without immediate detection.

The said cork, rubber, or other suitable elastic material, used as aforesaid, will render the said postmarking and postage-stamp-canceling die or type of a more easy, and consequently rapid, use, because of there being a yielding of the said canceling die or type G when the blow is given upon the letter, envelope, or packet and postage-stamp as aforesaid; the operator will not tire as much by means of a constant, continuous, and rapid use of the same; and it will also somewhat aid the operator in raising the entire instrument or apparatus from the paper or packet and postage-stamp, when the impression thereon and the cancellation of such postage-stamp shall have been given by the operator, in the manner substantially as aforesaid.

The said canceling type or die can be easily repaired, or replaced by a new one, whenever desired, and at very little expense; and such canceling die or type G may extend upward to the said cross-bar B, and there be connected to the same by means of a screw, pin, or small bolt. *In such case there would not be any tube or pipe surrounding said canceling die or type G.* The operation and effect produced would, in such case of construction, be the same.

The said postage-stamp-canceling device, die, or type G may be of any desired distance from the aforesaid postmarking or dating device or stamp D, *or it may be securely fastened to the immediate side of the said postmarking and dating part or stamp or device D, by any convenient and suitable mechanical means.*

The said canceling die, type, or device G. I prefer to use made of cork, as it will hold a much greater quantity of canceling-ink upon and in the lower face thereof, and when it comes in contact with the printed surface of the postage-stamp, such surface will become somewhat and sufficiently broken by means thereof, and thus and thereby inject into or impregnate such broken surface with the said canceling-ink, whereby such post-

age-stamp so operated upon and filled with such ink, cannot be sufficiently cleansed by any means as to enable it to be reused or used a second time in fraud upon the postal revenue without immediate detection of the same.

Soft wood, used endwise, will answer nearly the same purpose. Still, long and continued use, after the granting of my said patent, April 14, 1863, has fully proven the superiority of the cork for the canceling die or type used upon postage-stamps as aforesaid.

The said tube or cylinder C, Figs. 2, 3, and 4, may be constructed in any suitable manner, or by any convenient means, and thereafter fastened to the under side of the cross-bar B, in or by any mechanical means which will answer the required purpose. It may also be of any form or shape deemed best.

I also construct my said postage-stamp-canceling device, die, or type, of cast-iron, steel, or other suitable metal, substantially as shown at G′, Figs. 5 and 6, and which may be secured to the said cross-bar or piece B in like manner as the said tube or cylinder C, Figs. 2 and 4, and which is done either by screw and nut, where the same unites with the said cross-bar, or it may there be firmly fastened by means of suitably constructed and arranged pins or rivets, or the same may be soldered to the under side of said cross-bar or piece B, or otherwise attached thereto.

The said postmarking and dating device D is also secured to the under side of said cross-bar or piece B, and at or near the end thereof, opposite that where said tube or cylinder C or canceling die, type, or device G, is securely fastened, as aforesaid, in like manner and by substantially the same means as used for such fastening of said canceling device to said cross-bar upon the under side of the same as aforesaid.

The aforesaid metal canceling device, die, or type G′, Figs. 5 and 6, may also be fastened or secured to the immediate side of the said postmarking device by any good and sufficient means, substantially as hereinbefore described and set forth in reference to the said device C, or tube, or cylinder, constructed to receive and contain the said type or die G, Figs. 2, 3, and 4.

Such metallic device, die, or type may also have upon its lower face or lower surface any suitable configuration deemed best to use for the purpose of canceling the postage-stamp in, with, or by any suitable ink at the same time, blow, and operation of the instrument or apparatus, as hereinbefore stated and set forth.

In any and every case the postmarking of the letter, envelope, or packet, and the effacing or cancellation of the postage-stamp or letter-frank thereon representing value, are done at the same time, and by the same blow or operation of the said several devices and parts, constructed and combined in the manner and by the means substantially as herein described and set forth.

Both the postmarking and cancellation of the said postage-stamp are done with indelible or other and suitable ink used for such cancellation or effacing of the postage-stamp, and that, too, without any injury to the letter, envelope, or packet, or to the contents thereof, as would be the case were the said postage-stamp canceled by being cut in several parts and places by means of cutters or knives constructed for that express use and purpose, as is the case by the cutters or knives contained and set forth in letters-patent granted to me on the 9th day of August, A. D. 1859, also on the 16th day of December, A. D. 1862, the first of which contains no guard or guards to said knives or cutters, while the second contains such guard or guards for the purpose of preventing such cutters or knives from cutting too much or too deep in and upon said postage-stamps.

The said instrument and devices herein set forth and described will not, under any circumstances, cut either the letter, envelope, or postage-stamp thereon in any way or manner, but perform the cancellation required to be done in, with, and by ink only, as aforesaid, no cutting device whatever being used. But the said cork device, die, or type will, when it comes in contact with the printed or enameled-like surface of the postage-stamp, somewhat mar, bruise, or break the same, by means of the blow given by the instrument, whereby to prepare the same to be filled by or impregnated with any suita-

ble ink used for such cancellation, substantially as aforesaid.

In no case could a fraud be committed by a second or reuse of the government postage-stamp or letter-frank, representing value, without being discovered.

This arrangement and combination of devices will greatly hasten or facilitate the making up of the mails for transportation. It will also economize in labor, and reduce the labor in postmarking letters, and in the canceling of the postage-stamps thereon, to about, if not entirely, one-half of the number of workmen, laborers, or clerks absolutely necessary when and where this combined instrument is not used in the manner aforesaid.

It therefore saves at least one-half of the labor required in the postmarking of letters, envelopes, or packets, and in the cancellation of the postage-stamps thereon. It also makes the cancellation of the postage-stamps more effectual or permanent, so as to prevent a second or reuse of such postage-stamps by any means whatever, which is very important in the successful management of the post-offices in this country, whereby and by means of which large sums of money are annually saved this government; and frauds upon the postal revenue, by the second or reuse of postage stamps, are also prevented by the use of my invention and improvements herein contained, described, and set forth.

By the use of said invention the letters to be mailed and prepared for transportation, by means of postmarking the same, and in canceling the postage-stamps thereon, as aforesaid, need not be handled over but once, thus and thereby economizing in time and in labor.

The cross-bar or piece B, Figs. 1, 2, 3, and 5, may be of any suitable width or thickness, or of any metal which will answer the required purpose. It may also be of any length deemed best to use, in order to get the said postmarking device and the said postage-canceling device, die, or type suitably arranged upon the lower surface of the same, and thereto firmly and securely fastened or attached, in the manner substantially as aforesaid.

The type whereby to give the date are arranged in the said mortise E, as shown at Figs. 3 and 6, and are there held in their proper place by means of a set-screw, substantially as shown in Figs. 2, 3, and 6.

The cork or other material used for the canceling device, die, or type, will be pressed into the said tube or pipe at recess F, cylinder C, Fig. 2, and the same is there firmly held, substantially as shown at G, Fig. 4.

The device or configuration for the cancellation of the postage-stamp, in the manner substantially as aforesaid, may be seen at C and G, Fig. 3, where cork is used; *but when iron, steel, or other suitable metal is used, the device or configuration may be at G′, Fig.* 6.

The invention and improvements contained in and covered by the several claims hereto annexed or below given is and are not contained in the letters-patent granted on my application, in due form, on "the 9th day of August, 1859," nor is nor are the same to be found in my said letters-patent granted to me "December 16, 1862," but the said invention and improvements are contained in my caveat duly filed in the United States Patent Office, in the year 1853, containing, also, other improvements.

Having thus described my original invention and improvements in "postmarking" and "postage-canceling" devices, combined and arranged, for the purpose aforesaid:

What I claim, and desire to secure by letters patent of the United States of America, is—

1. The postage-stamp canceling device, cylinder, or tube C, containing a die or type, G, made of cork, wood, *or other suitable material*, or any equivalent for said cylinder or tube C, or for the said canceling die or type G, whereby to efface, cancel, or destroy the postage-stamp with indelible or other ink, in the manner and for the purposes substantially as herein described and set forth.

2. The canceling device, cylinder or tube C, with cork, or wood, or any substantial equivalent thereof, forming the die or type G therein, in combination with the cross-bar or piece B, and with the postmarking device D, sub-

stantially as and for the purposes herein described and set forth.

3. *The postmarking of letters, envelopes, and packets and the cancellation of the postage-stamps thereon with ink, at one and the same blow or operation of the instrument, in the manner and by the means substantially as herein described and set forth.*

4. *The employment and combination of a postmarking device with a postage-stamp canceling device, both being operated by one and the same handle, for the postmarking of letters, envelopes, or packets, and for the cancellation of the postage stamps thereon with indelible or other ink, in the manner substantially as herein described and set forth.*

In testimony whereof I have, on this 14th day of September, 1870, hereunto set my hand, in the presence of two witnesses, to wit:

MARCUS P. NORTON.

Witnesses:
FREDK. KOONES,
EDW. W. DONN.

Figures 5 and 6 of the drawings, showing the solid metal canceler G′ (1 Rec., opposite page 480), are also material additions to the original patent.

The certain effect of these additions is to extend the scope of the original patent in the following respects: 1st, by making the tube E no longer an essential part of the canceler, and, 2d, by making the patent cover a metallic canceler as well as one made of elastic material.

a metal tube

We submit that there is nothing whatever in the model, the drawings, or the specifications of the original patent which justifies the additions and changes in the reissue which have been pointed out.

It will be said that the original patent has these words (1 Rec., 460, last par.): "I construct the canceling stamp or device (C) *of any suitable material*," and that metal is suitable material for the whole canceler. But an

examination of the drawings and specifications will show that the phrase "canceling stamp or device C" does not mean the *whole* canceler, but only the tube *part* thereof having a recess, F, adapted to receive the canceling-type G. In the same way it is said (1 Rec., 460, below middle), "I construct the postmarking stamp (D) of any suitable material." The drawings show that D is only the dating type-holder *part* of the postmarker, and, as in the case of the canceler, the specification shows that it is recessed or mortised so as to receive the dating type.

It will also be said that metal is mentioned in the original patent as a possible material for the canceler. The only mention of metal is where the advantages of the elastic canceling type or die are pointed out (1 Rec. 461, middle). It is said "the operator will not tire as soon by a constant or continued use of the same *as though it were of solid metal*"; and "the said blotter or type can be more easily repaired or replaced by a new one at less expense *than if made of solid metal.*" This is an express differentiation of the "invention" claimed in that patent from a combination in which the canceler consists of solid metal. It is tantamount to a disclaimer. Suppose Norton had said in words, "My invention does not extend to a solid metal canceler, and I do not claim such a canceler"; would a reissue describing and claiming such a canceler have been valid? According to the reasoning of Judge Wheeler (2 Rec., 1454), it would. We submit that such is not the law. (See Leggett *v.* Avery, 101 U. S., 256.)

The abuse of the privilege of reissuing patents, illustrated in this case, has received the severe censure of this court. (Burr *v.* Duryea, 1 Wall., 521.)

H. The reissue is void, because the specification and claims do not distinctly point out the actual invention of the patentee, but are vague, ambiguous, and apt to mislead and deceive the public.

The law of this defense is stated in Carlton *v.* Bokee, 17 Wall., 463. See, also, Seymour *v.* Osborne, 11 Wall., 516; Barrett *v.* Hall, 1 Mas., 447, 476; Lowell *v.* Lewis, ib., 182; Langdon *v.* De Groot, 1 Paine, 203; Parker *v.* Stiles, 5 McLean, 44; Whittemore *v.* Cutter, 1 Gall., 478.

The actual "inventions," as has already been pointed out, were, first, a metallic tube holding an elastic canceling-type; second, the combination by cross-bar and brad-awl handle of such a canceler with a postmarker.

The wording of the reissue is well calculated to lead the public to believe that the process of postmarking and canceling at one operation, and any and every conceivable combination of postmarker and canceler, are covered by the patent and their use interdicted to all the world except the patentee and those who please to purchase privileges from him.

That the public has in fact been completely and most outrageously deceived appears from the reports of postmasters, Postmasters-General, and committees of Congress, which complainant's counsel have thrust into the record. They are favorable to the Norton invention (so called) because they all proceed upon the idea that there is no choice except to use it or to use separate postmarkers and cancelers.

All of those reports, except that of Postmaster Wakeman, dated January 3, 1863 (1 Rec., 542), were made subsequent to 1864, in which year the patent was first reissued (1 Rec., 462), in substantially the form which it now presents. Wakeman's report (or, to speak more

accurately, the report of his secretary) does not relate to the "invention" for the protection of which this patent was granted, and was made before this patent had issued or been applied for, and at a time when, as Norton's letter of March 23, 1863 (2 Rec., 1165-6), shows, the whole ground was supposed to be covered, not by any one patent, but by a series of patents which Norton had obtained.

I. Had the Commissioner of Patents power to grant the reissue on which suit is based?

See the discussion in relation to the alleged Shavor and Corse reassignment, III, C., *infra*. p. 120 p. 120

III.—*Of Norton's credibility as a witness.*

Norton was put upon the stand by complainant so many times, and testified upon such a diversity of topics, that it has seemed best to collect the evidence bearing upon his credibility under a separate head. The whole may be looked at in determining what credence is due to his statements on any particular point. This evidence is divisible into three classes, viz: Contradictions, as to his reputation for truthfulness, and as to the Shavor and Corse reassignment.

A.—Contradictions:

We have picked out, and here present, a few of the contradictions of Norton's testimony which the record discloses. There are many more, as will be found on careful reading.

a. With reference to the alleged Secombe reassignment, Norton swore point-blank that subsequent to the date thereof (July 10, 1873) Secombe never made any claim in or under the patent in suit to him, or to his knowledge (1 Rec., 144).

In this he is contradicted by his letters. (Defendant's Exhibits 190–201. See particularly Exhibits 198, 199, 200, 201, 1 Rec., 441–451.)

b. On cross-examination, being asked whether, subsequent to the date of that assignment, he had not requested Secombe to reassign, he said, first, "I have no recollection of any such thing." Being asked if he was sure, he repeated, "I am sure I have no recollection of any such thing." He then continued his answer by delivering a long, irrelevant speech as a cloak for the concluding admission, that he *may* have asked Secombe to reassign; and less than a page further on, he says, "I think likely I did. I don't know as I have any doubt about it"; and a little way further on he fixes the date when he made this request of Secombe as "within 8 or 10 months after the commencement of this suit, and perhaps less time than that." (1 Rec., 165–'7.)

c. His letter to Shavor of Nov. 27, 1876, (Defendant's Ex. Marcus P. Norton A, 2 Rec., 1394), in which he tells Shavor that he had asked Secombe to reassign, having been put in evidence, the following questions were asked by the complainant's counsel (1 Rec., 168)

"When you wrote to Mr. Secombe for a reassignment, * * * did you propose any consideration for the reassignment, or did you expect him to make it on your request?"

The answer was:

"I expected him to make good the one that I supposed had been lost or destroyed, and without any further consideration."

In this also, he is contradicted by Ex's 198, 199, 200, 201 (1 Rec., 447–451).

d. The inconsistency between his explanation of his delay in applying for the patent in suit (1 Rec., 143), and

his letter of March 23, 1863 (2 Rec. 1165, Defendant's Ex. 27), has been hereinbefore pointed out. p. 83

e. With reference to the date of his invention he swore that he had made several instruments "substantially like the one now in use," prior to August 7, 1854 (1 Rec., 143–'4) p. 83

This conflicts with his letter of February 6, 1864 (2 Rec. 1367), to Postmaster Wakeman, when he says:

"The double canceling stamp now used by you in your post office, is my invention as far back as the year A. D. 1856, as I can most fully and satisfactorily prove * * *. I had several such stamps made in 1858, as I can prove by the person who made them."

f. With reference to the unbalanced instruments used in the Philadelphia office, Norton swore that Ireland never told him of his having made a stamp with a canceler attached, and that Ireland never exhibited a stamp to him in the world of any kind, of any form or shape, in the Post-Office Department, or anywhere else. (2 Rec., 1441–'4).

Ireland swears positively that neither of these statements is true; that he did talk with Norton about making the stamp, and that he did show him one of the combined stamps that had been used at Philadelphia, (2 Rec., 1444–'5.)

B. As to his reputation for truth and veracity.

Defendant called thirteen witnesses on this point. Their testimony is printed at pages 1038 to 1140, of the record.

Ransford, Pramer, Bishop, Smith, Henderson, Hermance, and Giles, swear that they know his reputation in Troy for truth, from the speech of people concerning him; that it is bad, and that they would not believe him on oath, at least when his interests are involved.

Burden testifies to the same effect, but his cross-examination shows that he did not distinguish between reputation for truth and general reputation.

Ball says that he has known but little of Norton lately; ten or fifteen years ago his reputation for truth was bad, and upon any matter in respect to which his feelings or interests were involved, Ball would not then have believed him on oath.

Merritt says that he knows nothing of Norton's reputation in Troy for four or five years past; prior to that time it was bad.

Chamberlin says Norton's reputation "isn't very good, I must say; rather bad, if anything, for truth and veracity." He could not swear that he would not believe Norton on oath, but would believe another who stands fair in the community in preference, if their testimony conflicted.

Colby has heard people of equal credit and standing speak for and against Norton's reputation for truth, and has no opinion of his own.

F. J. Parmenter says he never heard Norton's reputation for truth and veracity called in question. This would be favorable to Norton, if Parmenter had not shown total ignorance by stating that he did not think he knew even Norton's general reputation.

To sustain Norton a pamphlet, purporting to contain letters to President Grant, recommending that Norton be appointed governor of Wyoming, was offered in evidence. It was duly objected to (1 Rec., 418), and of course is not evidence.

Norton himself was also examined (1 Rec., 396–419), and in his own testimony the following facts (important as tests of the extent of knowledge possessed by other

witnesses called in his favor) appear, viz, that in 1869 he was a candidate for the governorship of Wyoming; that in 1871 he filed a petition in bankouptcy; that evidence against his reputation for truth was given in the Groom-Hagan interference case, and in one of the trials that sprang from the murder of Lincoln; that in 1871 he was debarred from practicing as a patent agent in the Patent-Office, and that in 1872 he was indicted for forgery.

Between forty and fifty other witnesses were also examined to sustain his reputation (1 Rec., 265–396). A careful analysis of their testimony, given on direct and cross-examination, will show—

1st. That most of them knew very little about Norton; they had never heard of his bankruptcy, or of the impeachments in prior cases, or of his candidacy for the governorship of Wyoming, or of his losing his right to practice as a patent agent, or of his being indicted. They had met him a few times, perhaps had business dealings with him to a small amount without suffering loss, and had little or no acquaintance with people who knew him.

2d. As to others, the questions asked related entirely to the witnesses' personal dealings with Norton, and to their knowledge of his character (not reputation) derived from their personal dealings. These questions were improper, and the depositions amount to nothing.

3d. Several of these witnesses (notably Lawson, Sill, Daniels, Knowlson, Phillips, Alden, and Tupper), admit that they have heard remarks unfavorable to Norton, but say that they do not allow rumor or gossip (which is plainly a factor of reputation) to influence them at all in determining a man's reputation for truth; Norton hav-

ing never lied to them, they care not a straw what other people say about him.

No one can carefully read the evidence of both parties on this point and fail to be satisfied that Norton's reputation for truth is tainted.

C. As to the Shavor and Corse reassignment.

The bill, to show title in Ingalls in 1870, when the reissue patent in suit was granted to her, alleges that on April 20, 1863, Norton assigned the original patent to Jacob Shavor and Albert C. Corse; that on February 27, 1864, Shavor and Corse reassigned to Norton, and that this reassignment was recorded on July 24, 1869.

The answer denied the making of the reassignment. (1 Rec. 58.)

This raised an issue as to title upon which a great mass of testimony was taken.

It appeared, however, when all the evidence was in, that on the 23d of October, 1869, Charles Eddy, being authorized to act as agent of Shavor and Corse, came to a settlement with Norton, the substance of which was that Shavor and Corse should recognize the 1864 reassignment as valid, and that Norton should assign one-third of the patent absolutely to Eddy, as trustee for himself, Shavor, and Corse. (1 Rec., 759, *et seq.*; 2 Rec., 1251, *et seq.*; 2 Rec., 1147, *et seq.*) The circuit court held that this settlement disposed of the question as to title. And, though we think it may be doubted whether a sound public policy will allow of the ratification of a forgery (Brook *v.* Hook, L. R., 6 Ex., 89)—for forgery we claim the alleged reassignment was—and, though a further question is presented whether the law authorized the Commissioner of Patents to reissue the patent in 1869 to Norton as an assignee by virtue of

this document, nevertheless we have concluded not to press the point strenuously, because after the evidence was closed Eddy, as trustee, for himself, Shavor, and Corse, came voluntarily into the suit under a claim of owning one-third only of the patent. This action on the part of those who would be chiefly benefited by having the alleged reassignment declared void would probably estop them from making a larger claim against Postmaster James in any other suit, and it is not perceived, therefore, that substantial justice, as between the parties at least, would in anywise be subserved by dismissing the bill for this defect in the title.

In deciding upon Norton's trustworthiness, however, it is proper for the court to examine all of the testimony pertinent to the issues made by the pleadings which he gave; and we beg of the court not to rely upon any of his statements without first studying the evidence upon this alleged reassignment.

Complainant, on his *prima-facie* case put in a certified copy of the reassignment in lieu of the original. This is printed at page 467 of the record. Defendant, not being able at first to get hold of the original, used another certified copy in examining his witnesses. This is printed at page 1143 of the record. Subsequently Campbell himself was put on the stand and forced to produce the original. It is Defendant's Ex. 126, and is printed at page 1254 of the record.

This original cannot be found among the original exhibits sent to this court by the clerk of the circuit court. We are compelled, therefore, to rely upon the copies in the record and upon such description of the way the original was put together as the testimony of the witnesses affords.

The document in form purports to be both an affidavit and an assignment. The signature of Commissioner Lamport to the jurat is genuine, as is also that of Corse. About Shavor's signature there is some doubt (1 Rec., 756, 797), but no particular stress is placed upon that. The important fact is that the jurat and the signatures of Shavor and Corse appear at the very top of the eleventh page. No part of the pretended affidavit and assignment is on the sheet of paper which contains the jurat and signatures.

[If complainant's counsel avail themselves of the disappearance of the paper to dispute this fact, the court can satisfy itself about it as follows:

Defendant's Ex. 134 (2 Rec., 1270) is a table prepared by the witness Bolton (1 Rec., 794), showing the number of lines and words on each page of Ex. 126. By counting the words (commencing at the point where the expert, Ward, says the yellowish paper begins, 1 Rec., 798, top), according to the plan that Bolton points out in his testimony, it will be seen that the signatures are at the top of the eleventh page. It also appears from Bolton's testimony that page 10 is the one *preceding the signatures*, and that the 11th, 12th, and 13th pages contain the certificate and affidavit of Lamport.

The instrument is in Norton's handwriting, (1 Rec., 752), and he admits that the sheets are not folded at the top. (1 Rec., 151.)]

Our theory with regard to this document is that the jurat and the signature of Corse, and perhaps that of Shavor, belonged to some genuine affidavit; the last sheet of which, containing said jurat and signatures, was taken off and appended to this pretended "affidavit and assign-

ment." There is nothing in the make-up of the document inconsistent with this theory.

So much by way of necessary explanation. Let us now turn to Norton's testimony. He was cross-examined as to his interest in the suit, and referred to the assignments that had been put in evidence (of which this was one) to show that he had no interest (1 Rec., 146, 148). The door was thus opened for questions about this reassignment, he was asked whether Jacob Shavor and Albert C. Corse executed any instrument about the month of February, 1864, purporting to reassign to him the patent granted in April, 1863. His answer was as follows (1 Rec., 148):

"On the evening of the 23d day of February, 1864, in my office in this city, before John T. Lamport, a United States commissioner, Jacob Shavor and Albert C. Corse signed and sealed an instrument in writing of the character contemplated in the question, a certified copy of which has been filed in evidence by complainant's counsel; that instrument was in my handwriting, read by me to them, and they stated to the commissioner that it had been read to them, and that they understood it, and thereupon Mr. Lamport subscribed his name as a United States commissioner, having previously sworn those persons to that part of the instrument that was in the nature of an affidavit; and that instrument was left by them with me on that evening."

Is this testimony true?

The evidence against it consists of—

1. Norton's declarations made between the date of the instrument (Feb. 23, 1864) and the date of record (July 24, 1869).

2. Some collateral circumstances.

3. Corse's testimony.

1. Norton's declarations:

They are to be found in his letters, more than a hundred of which are in evidence (Def'ts' Exs. 16 to 123, inclusive; 2 Rec., 1160–1249), addressed chiefly to Shavor or to Corse; in his testimony in the Court of Claims case, Shavor & Corse vs. The United States (2 Rec., 1334); in oral statements to defendants' witnesses Weed (2 Rec., 986), Merriman (2 Rec., 996) and Baldwin (1 Rec., 781), and in representations by acts.

(*a*) As to the letters:

There is hardly a month between March, 1864, and July, 1869, in which there is not one or more letters that contain admissions of Shavor's and Corse's interest in and rights over the patent, and of Mr. Norton's subordination and responsibility to them. In most of the letters the admissions are, of course, only incidental, but, cumulated, they allow but of one inference.

In some of the letters Mr. Norton calls on Shavor to pay expenses relating to the stamp (2 Rec., 1168,1171, 1206). In others he, a lawyer, speaks of Shavor & Corse having the power to obtain an injunction against the manufacture and use of the stamp (2 Rec., 1187, 1235).

In the letter of December 26, 1866, to Postmaster-General Randall (Defendant's Ex. 112, 2 Rec., 1235), he states that Shavor & Corse have authorized him, *as their attorney*, to say that they will accept of $100,000 as compensation, and that "on these conditions they will duly assign and transfer the said patent or invention to the department or U. S. Government," and he subscribes himself "attorney for Shavor & Corse."

Particular attention is requested to the following letters, which contain direct, unequivocal admissions of Shavor & Corse's ownership of the patent:

Ex. 181, 2 Rec., 1368, March 14, 1866, (to P. M. General):

In order to successfully defend my right to this invention as the *original* and *first* inventor, it became necessary to part with the title by deed of assignment to *Shavor & Corse*, as at that time parties to suits in the United States courts could not be witnesses in their own behalf. Since then Congress has changed the law in that respect. But for this I would to-day have been owner of the *entire* invention.

Ex. No. 129, 2 Rec., 1261, June 22, 1866 (to Dr. Baldwin):

I am overruled, and can do no more than submit to the directions of Shavor & Corse, which of course I shall do, as you have requested, and as they through you *have directed*. I can do no more, no less, if I would. Those gentlemen have been more than kind to me, and Mr. Shavor has always done by me as no other live man would do, and I am therefore the very last man on this earth who would oppose their wishes, or refuse to counsel them, or take their advice. They are missing it in this course, as in the end it would *certainly* prove, for I know whereof I speak; but they are the masters, and have the full right and liberty to say *what* shall be done, and I am willing to trust it all to them. I know that they will not do a dishonorable thing by me. Why, my dear sir, we have never for these long years had a scrap of writing between us in our contracts and various agreements.

Ex. 130, 2 Rec., 1262, January 2, 1867 (to Shavor):

I have just had an interview with the P. M. G., as well as a long conversation on our—*your* matters, and one thing is certain, the stamp not only looks well, but is well. * * * Your objections to that part of my letter where I say *my* patent, is all wrong and entirely immaterial to you or Corse, but very material in statement of the case, because the patent *was issued*

to me on the invention made by me, but assigned to you. It would have injured our case to have stated it otherwise. It was my patent, but assigned to you. Whenever *the title* is mentioned, *that* is another thing. The patent had not at that time been assigned. I was speaking of *then*, now (not ?) now.

Ex. No. 114, January 9, 1867, 2 Rec., 1238 (to Shavor):

Now as to King. He told me he had written you, and expected "a paper" in reply, which would give him the one-fourth part, deducting all expenses. "Well," said to him, "if you get that you will get what I could not, for my rightful interest. Why," said I, "I asked them for an absolute assignment, but I did not get it, because they promised me, when I made the assignment to them, that *the title* should remain in them unincumbered, and of course I had no right to press it. And now," said I, "if they give it to you, they will violate that contract, and very likely lose all their rights, and of course they won't be trapped like that."

Ex. 131, 2 Rec., 1264, April 21, 1867 (to Shavor):

It is quite evident that I shall never be able to fully satisfy you about the stamp case, although I did arrange with Mr. Van Winkle the case in such a way as to get the Senate committee to report and pass a bill for $100,000, backed by Senator friends of mine, and of my family. Now, what I propose is this: that you produce an account of all moneys paid out by you up to now in and about *your* stamp, and then add to that the amount I owe you, and then fix a price or sum which you will take for your and Corse's interests, cash down, and then let my own invention come back into my hands again, so that I can manage it, as I am advised is the better way. This will relieve you of a great deal of trouble and anxiety, as well as care on account of this stamp matter, and then you will get your expenses paid out, and the interest thereon paid back to you and to Mr. Corse, as well as what I personally owe you, and I will make efforts to get the money at once for

you; you then can assign the patent back to me. This will let you out from much unpleasantness, and put you upon sailing ground, while I will have to wait until some one who has the right and the power to pay for the use of the invention. I hope you will now evince that same hope and confidence in me as I did in you and Corse when I assigned to you *the whole* things without the payment of a dollar for the purchase of the patent, save a certain agreement that you and Corse would be at the expense of putting the matter in *that* condition when the government would recognize the right and pay up, but which agreement you repudiated last year, by reason of the heavy expenses, and which you refuse and repudiate this year for the same reason, and find much fault with me, that I do not make the P. M. G. do to suit me at once, or compel Congress to pay on a moment's notice. Now I propose to go at this whole matter in an entirely friendly manner, and settle it up, so that I can have my invention and my patent back again, and you get your money and interest thereon, and thus lose nothing, because it is now apparent that we do not, and will not hereafter agree, in the management of this case, and in the expenses attending it. We can do so, and have no unkindness towards either, but be just as friendly as ever we have been. We must do something, as I can never endure these feelings which your letters have brought over and upon me. I am now full of suffering to think that I have been the cause of so much trouble to you. I know that you have always been very kind to me, but you seem to think that I have forgotten it, as you take care to call my attention to it in every letter; I shall never forget your many acts of kindness to me.

Ex. No. 119, April 25, 1867 (to Shavor) 2 Rec., 1244:

You have an assignment of the whole patent, and I have simply nothing. * * * Inasmuch as I made the invention, and labored to get the government to adopt it, before you ever had to do with it, and as I have stood by the thing "through good report and evil report," and got it where you can manage it yourself, and

inasmuch as you and Corse have obtained two-thirds of the invention and patent by an agreement, and three-thirds by assignment, it would seem but fair that you should now release me from debt, and take the whole thing as you now have it. (Read this whole letter.)

Ex. No. 132, 2 Rec., 1266, June 27, 1868 (to Shavor):

Here is another thing. You charge me with bleeding you. Here is your language. Read it, to wit: "I have never had such a bleeding from any person before, and by whom I thought would be the last person in this world." Now, to cut *this* matter short, I have this to say: Most all of those notes were in an arrangement with you to go on in certain inventions, and to share alike in them; and now, without waiting to get through with that part of the business, you turn around, back out, and charge me "*with bleeding you.*" Now, let me ask you one or two questions, and then lay down the rule, and then I will close up this letter. Well, here is the first one: You and Mr. Corse claim to own my patent upon an invention in "post-ffice post-marking and postage canceling device," now in the Court of Claims. Now, how came you by it, and what did you pay for it? *Not one cent;* and yet you go about calling it *your* patent, and treating me as though I were an entire stranger in the matter, and not one thing to do with it. You tell me there is nothing for me to do here in the stamp case, when I know that there is. Now, in this matter, I have only to say that it is my purpose to go to the Postmaster-General and then spread out the whole case just as it is, as to *how* you came by the title of the patent. Then I propose to go to the Court of Claims and there tell the same story. Then I shall, by petition to Congress, set out all these facts and ask compensation as an inventor, and then we can see where the *bleeding is.*

* * * Now, Mr. Shavor, you will find that I have warm personal friends in Troy—men of means and of standing, too. Had you reassigned my patent, as I proposed, when you were finding so much fault with me, I could before now have paid you every dollar back. I now ask you to do so at once, and I will bring you men who will

give you *all* the expenses you have been at, and pay you back all the money you put in other inventions to share with me, and will pay you interest at 14 per cent. at that, and who will also pay up any balance found due Chas. Eddy & Co. on settlement, with same rate of interest. This business must be settled up. The stamp must come back into my hands, and if not done on my return I will commence a suit in equity, compelling you to return to me the title which you took from me without paying me a single dollar or anything else. I am forced to do this because you call me a leech, a sucker, a thief, and many other like names. If you have come to the conclusion that you can thus deal with me, because I have been examined in the Court of Claims, you have made a mistake, for it is in my power to explain that deposition, and to withdraw it from the case.

Ex. 133, 2 Rec., 1266, March 15, 1869 (to Corse):

What do you propose to do about the stamp matter here? I can't act, as I have no authority from you or Shavor, that having long ago been taken from me. I think that you and Shavor ought to assign to me my full one-third part—it would be justice towards me, at least; now I have nothing to show, and you know how Shavor is.

From the letter to Corse, of May 13, 1869, Defendant's Ex. 121, 2 Rec., 1247, it appears that on May 3, 1869, Shavor revoked all powers of attorney that had been given to Norton to do business for Shavor & Corse.

So much for the self-disserving declarations contained in Mr. Norton's business letters.

(*b*) We pass now to the considerations of his deposition in the case of *Shavor & Corse* v. *United States* in the Court of Claims.

The record of that case showing the questions involved in Defendant's Ex. 158 (2 Rec., 1320–1333). Norton's deposition is Defendant's Ex. 159 (2 Rec., 1334).

The suit was begun in Feb'y, 1867. The claim in the original petition was for $400,000, for *four* years' past use of the invention patented April 14, 1863 (p. 1328). It may be noted that Mr. Norton's name is appended to the original petition as attorney and counsel (p. 1329), and that in the body of the petition, near the end (p. 1329), it is alleged that "the entire title to said invention and patent now is fully vested in the said Shavor & Corse as hereinbefore set forth." Shavor, in the verification (p. 1329), swears to the truth of this, and that "no assignment or transfer of said claim, or any part thereof, or any interest therein has been made, except as in said petition set forth."

Mr. Norton was examined as a witness for claimants. To make him competent, under the rules of the Court of Claims, it was necessary for him to answer the interrogatory whether he had any interest in the claim which was the subject-matter of inquiry. His sworn answer (p. 1334) was: "*I have no interest in the claim which is the subject-matter of inquiry.*"

In 1 Rec., 151–3, Norton attempted to explain this testimony in the Court of Claims. The substance of the explanation is that as a *lawyer* he believed that the title was in Shavor and Corse, so long as their reassignment remained unrecorded. This explanation is absurd in itself. It is inconsistent with the letters to Shavor and Corse already cited; and it conflicts with another explanation stated in a pamphlet prepared and submitted by him to the Postmaster-General in 1869, and which is in evidence as Defendant's Ex. 183 (2 Rec., 1369). It is identified by Norton's description (1 Rec., 151–160). The explanation there given (2 Rec., 1380) is that the claim of Shavor and Corse against the United States covered

only the interval between the date of transfer to them (April 2, 1863) and the date of retransfer (February 27, 1864). This last explanation in its turn is falsified by the record of the Court of Claims case (Norton appearing as attorney), which shows that the claim covered four years.

(*c*) With reference to Mr. Norton's statements made to defendant's witnesses between 1864 and 1869, which next claim our attention, it will be sufficient to make a few references to the proofs.

See testimony of Dr. Baldwin, a clergyman and friend of Shavor and Corse, who on their behalf went to Washington on several occasions to use his influence with certain members of Congress (1 Rec., 782); of Weed, who was solicitor of the United States in the case of Shavor and Corse *v.* U. S. (2 Rec., 988–9); of Merriman, who was counsel for Shavor and Corse in that suit (2 Rec., 996–7).

(*d*) Consider next some of Mr. Norton's acts, between 1864 and 1869. They tell the same fatal story which has been clearly revealed already in his spoken and written statements, and in his deposition.

During that time he acted in various capacities for Shavor and Corse, knowing that they claimed title to the patent, and advocating the justice of their claim. In the action of Shavor and Corse *v.* Hoole (see the record, Complainant's Ex. Y, 1 Rec., 514), Mr. Norton was not attorney of record, but he was examined as a witness for plaintiff, and he read the assignment of April 20, 1863, to Shavor and Corse in evidence (1 Rec., 152). His testimony with some documents was the only evidence offered (see 1 Rec., 537, and 2 Rec., 1262–3). The jury brought in a special verdict which contained an ex-

press finding, that by virtue of the assignment from Norton, of April 20, 1863, the patent was then the sole and exclusive property of plaintiffs (1 Rec., 535). Though Mr. Norton was not the attorney of record in this case, it may be inferred from his letters (Defendant's Ex's 36 and 37, 2 Rec., 1171) that he was the real manager of it.

The patent was reissued to Shavor and Corse on August 23, 1864 (1 Rec., 462), and Mr. Norton prepared the papers (1 Rec., 733).

In the applications for relief that were made to the Postmaster-General and to Congress, Norton professed to be acting for and as the attorney of Shavor and Corse. (See Defendant's Ex. 55, 2 Rec., 1183; Defendant's Ex. 112, 2 Rec., 1235; Defendant's Ex. 113, 2 Rec., 1237; Defendant's Ex. 122, 2 Rec., 1249, 1 Rec., 750; Defendant's Ex. 165, 2 Rec., 1361; and see the letters generally.)

In the suit of Shavor and Corse *v.* U. S., Norton subscribed his name as attorney and counsel to the original petition (2 Rec., 1329). He was also a witness, and in his testimony he details what had been done by him on behalf of claimants (2 Rec., 1334, et seq.).

2. Some collateral circumstances:

(*a*) The assignment by Norton to Shavor and Corse (Defendant's Ex. 15 A, 2 Rec., 1143) on its face purports to have been made on April 20, 1863. It was not really made till January 21, 1864, hardly a month before the date of the pretended reassignment. (See Defendant's Ex. 108, 2 Rec., 1230; Defendant's Ex. 18, 2 Rec., 1161; Norton's testimony, 1 Rec., 162.)

It was not recorded till March 8, 1864, fourteen days after the pretended reassignment (2 Rec., 1143). So that, on his own showing (if his statement that as a lawyer

he did not consider an unrecorded assignment as conveying title deserves any consideration), there was no necessity for a reassignment in February, 1864, to give him the title.

(*b*) From the letter of May 17, 1864, Defendant's Ex. 127, 2 Rec., 1259, it may be inferred that the assignment from Norton to Shavor and Corse was not then known by their mutual friends.

(*c*) It is stated in the body of the reassignment that a Congressional committee had objected to giving Shavor and Corse compensation, on the ground that they were not the inventors, but were speculative assignees. (Defendant's Ex. 126, 2 Rec., 1256.)

Now, was that objection made as early as February, 1864?

The first hint of it in the Norton letters appears in that of January 2, 1867. (Defendant's Ex. 130, 2 Rec., 1262.) On the other hand, so far was it from being necessary in 1864 to show that Norton owned the patent, it appears that an important difficulty that had to be surmounted was to convince the Postmaster-General and the committee that Shavor and Corse really held the title.

Thus on March 14, 1864, Mr. Norton sent a certified search of the Patent Office records in relation to the title to the patent to the Postmaster-General. (Defendant's Ex. 165, 2 Rec., 1361.) This was a representation that Shavor and Corse held title, because it was not till July, 1869, that the reassignment was recorded, and the only assignment then on record was that from Norton to Shavor and Corse, recorded six days before the date of this letter, on the 8th of March, 1864. (See Defendant's Ex. 15 A, 2 Rec., 1143.)

In the letter to Shavor of March 11, 1864 (Defendant's Ex. 30, 2 Rec., 1167–8), it is stated:

Your original assignments in the stamp matter I had to leave with the House committee, as well as the original patents, which we can get again, if we have use for them.

And in the letter of May 17, 1864 (Defendant's Ex. 127, 2 Rec., 1259):

The com. are unanimous in the opinion that *your* and Corse's title and right to the improvement in P. O. S. is clear, and beyond a doubt.

3. Corse's testimony (1 Rec., 728, et seq.).

The only persons who can be presumed to have had any knowledge as to whether this testimony of Norton is correct are Lamport, the commissioner, Shavor, and Corse.

Lamport was examined (1 Rec., 789 et seq.). He stated that he had no recollection of the facts; he was sure of nothing except that *some* affidavit had been taken before him. He explained the two appended affidavits signed by himself as containing, according to his understanding of them, only the implied meaning of the jurat written out in words.

Shavor died before there was any opportunity to take his testimony. Before referring to Corse's testimony on the point under consideration, some statement of his and Shavor's relations with Norton, taken from his deposition, may not be out of place.

Shavor and Corse were for many years manufacturers and dealers in stoves in Troy, and with Charles Eddy were the principal partners in the firm of Charles Eddy & Co. They first became acquainted with Mr. Norton in 1859 or 1860, and soon entered into business relations with him, which subsisted for ten years or more. Being

capitalists, they were able to, and did, furnish funds which Mr. Norton lacked for obtaining patents and introducing patented devices. Mr. Corse thus describes the oral agreement that was made in regard to the 1863 patent (1 Rec., 751, 2):

A. Shavor and Corse were to have the title; they were to pay all necessary expenses and were to have one-half of the net proceeds, the balance was to go to Mr. Norton or his heirs.

Q. 252. "Net proceeds," what do you mean by that, exactly?

A. After the expenses we had been to were taken out, the balance was to be divided.

The patent issued on April 14, 1873, to Mr. Norton.

An absolute assignment bearing date April 20, 1863 (not the true date as has been shown), was soon made.

In August, 1864, Shavor & Corse surrendered the original patent and obtained a reissue.

In June, 1864, they began an action at law for infringement of the patent in the northern district of New York against Edmund Hoole, a manufacturer of stamps. The record of this action is set out at length in Complainant's Proofs, Ex. Y (1 Rec., 514). It appears that defendant defaulted and a judgment for nominal damages (all that was asked at the trial) was entered for plaintiffs.

In nearly every year between 1864 and 1869 Shavor & Corse had a petition before one or the other House of Congress for compensation. See the bill and Corse's testimony *passim*.

In February, 1867, they began a suit in the Court of Claims against the United States for compensation for the use by the government's officers of the patented instrument. The record of the case is Defendant's Ex.

158, 2 Rec., 1320. In December, 1869, the court dismissed the petition on the ground that no contract was proved.

So much by way of general statement.

During the first part of Mr. Corse's statement he was examined with reference to a certified copy of the reassignment (Defendant's Ex. No. 15), the complainant having declined to produce the original (1 Rec., 730).

He swore that he did not reassign the patent in 1864, or ever, and that Mr. Shavor did not do so to his knowledge, and that a large number of the absurdly incredible historical statements in the pretended reassignment were false, and that the first he ever heard of a reassignment was in 1869. Read the testimony, pages 730–2.

Subsequently the pretended original reassignment (Defendant's Ex. 126) was produced by complainant Campbell, on his examination. (1 Rec., 774.) It was laid before Mr. Corse, and after examining it he swore that he had no correction to make in the above testimony, and that he never delivered the instrument to Mr. Norton with intent to pass title to the patent of 1863. Read pp. 752–3.

And he gave the following reasons (p. 753) for believing that the document was never made by him:

In the first place, if we parted from the title, we would not have reissued the patent of 1864, thereby putting ourselves in a false position before the government; we shouldn't have sued Hoole, claiming to be the owners of the patent; we shouldn't have went to the Court of Claims, claiming to be the owners of the patent, if we hadn't supposed we owned it; we shouldn't have applied to Congress for relief, if we hadn't supposed that we had the title; nor we wouldn't have spent the amount of money that we spent in the matter, if we didn't suppose that we had the title; nor Mr. Norton never intimated

to me, either verbally or in any other manner, but what the title was in us, and I never heard to the contrary until some time about the first of August, 1869.

The cross-examination was devoted chiefly to the signatures, about which Mr. Corse felt some doubts, and it entirely failed to shake his testimony in chief.

Such is the evidence on this point. Is it possible for any one who has read it carefully to believe that Norton's testimony was true? To us it seems that he must have been out of his mind when he gave it.

Norton is an officer of this court and of the circuit court. We submit in conclusion, that the judgment concerning him given by Judge Blatchford, in his opinion in the case of Robertson *v.* The Secombe Manufacturing Company (10 Blatch., 489), is the proper judgment to be rendered here. Judge Blatchford said:

"The principal defense set up in this case is that the improvements claimed by the plaintiff, in his reissued patent, were previously invented by one Marcus P. Norton, of Troy, New York. So far as regards the contents of a caveat filed in the Patent Office by said Norton on the 21st of June, 1855, it is sufficient to say that the improvements claimed by the plaintiff are not found in that caveat. So far as regards the paper called "an additional caveat," and purporting to be dated August 21st, 1855, and set up in the answer as having been filed in the Patent Office on the 25th of August, 1855, in and with and as part of the said caveat filed June 21st, 1855, it is sufficient to say that after due notice to said Norton, and a trial had before a commission appointed by the Commissioner of Patents, the said paper was, in September, 1871, adjudged by the said commission to be fraudulent, and to have been surreptitiously introduced into the caveat file of said Norton, filed June 21st, 1855, and that thereupon the Commissioner of Patents indorsed on said paper a memorandum, signed by him, that said paper does not

form a valid portion of said caveat. There remains the evidence as to the prior existence in fact as completed inventions, made by Norton, of the plaintiff's improvements. As to this, the burden of proof is on the defendants, and they do not establish the fact satisfactorily. Norton's own evidence is, manifestly, not to be relied upon. The circumstances attending the taking of his deposition in this suit, the contradictions in sworn statements he has made at different times regarding the alleged caveat, and the manner in which, as shown by this record, he caused witnesses to testify in *ex parte* depositions to matters of which they had no recollection make it impossible to rely on his testimony. But the evidence of Norton, and that of the other witnesses for the defendants, shows nothing done by Norton prior to the plaintiff's invention which amounted to more than an unsuccessful experiment."

If ever a witness was, or can be, thoroughly impeached and discredited, Norton is that witness.

IV.—*Of infringement.*

The denial in the answer of the allegations in the bill respecting infringement is certainly inartistic (1 Rec., 64). Nevertheless, the complainant did not except to the answer as insufficient. He treated it as denying infringement, and put in evidence accordingly. In this he clearly acted rightly, for the law is that there are no constructive admissions in an answer in equity. What is not expressly admitted or denied must be proved by the complainant. (Wigram on Disc., §§ 48, ~~115;~~ Langdell's Summary of Eq. Pleading, §§ 79, 84; Young *v.* Grundy, 6 Cranch, 51, by Marshall, C. J.; Brown *v.* Pierce, 7 Wall, 211; Brockway *v.* Coff, 3 Paige, 539; Cropper *v.* Burton, 5 Leigh, 432; Coleman *v.* Lyne's Ex'r, 4 Randolph, 456; Smith *v.* Ins. Co., 2 Tenn. Ch., C, 602; and see Jones *v.* Morehead, 1 Wall., 155.)

155

To prove infringement, Campbell's counsel put James, the defendant, on the stand, and obtained from him the stamps Exs. A and B, which represent the classes of combined instruments that have been used successively for postmarking and canceling since James became postmaster. (1 Rec., 69, 70, 71, 72.)

Whether these instruments are substantially the same as the patented improvement depends, of course, very largely upon the construction of the patent. The testimony of experts in respect to such simple mechanisms is of little or no weight. We presume that the court will determine by inspection whether the exhibits come within the patent.

Ex. B (which took the place of Ex. A in 1874 or 1875, 1 Rec., 69, 70) shows a peculiar method of fastening the dating type in place, and in that respect is quite unlike, and substantially better than, the patent. (1 Rec., 71.) Moreover, though it will postmark and cancel at one blow, and, though it is well balanced on the handle, the construction is essentially different from the patent. There is no cross-bar, no canceling cylinder, no postmarking cylinder. If you take one of the postmarkers (*e. g.*, defendant's model, Ex. 4) that have been in use more than thirty years (Chambers' Patent, 2 Rec., 1284; complainant's witnesses, Mastick and Haskell, 1 Rec., 201, 217); if you lessen the height of the metal cylinder and increase the diameter thereof; if then, in place of a circular acting face, you cut two tangent ovals, with suitable designs on each; if you do these things, you have Ex. B, barring (what the patent cannot be construed to claim) the means of fastening the dating type. What is it you have done? You have changed the size and shape of the postmarking cylinder.

Had you not a right to do that? You have changed the design on the acting face of the postmarking cylinder. Had you not a right to do that, too? Where, then, is the infringement?

Further, it is manifest that both Ex. B and Ex. A are substantially unlike the invention described and claimed in the original patent (1 Rec., 460), for in neither of them is the canceler a tube containing an elastic die or type. Consequently there is no infringement of the reissue patent in suit, as that patent, if valid, is for the same invention as the original. That this is proper reasoning was held in Railway Company *v.* Sayles (97 U. S., 554, where this court directed the bill to be dismissed because the alleged infringing machines were not the same as those described in the patentee's *application*, and therefore could not be the same as those described in the patent, it being essential to the validity of the patent that it should be for the invention described in the application. At the bottom of page 563 the court intimates that the same principle is applicable to reissues.

VI.—*Of the directions in the interlocutory decree in respect to the accounting.*

Paragraphs 5 and 7 of the decree are as follows (2 Rec., 1458–9):

"Fifth. That an account be taken of the gains, profits, and advantages *which have in anywise been received or made, or which have arisen or accrued*, on account of the infringements aforesaid, and also of the damages in addition thereto, if any, which the said complainant has sustained by reason of the infringements aforesaid.

Seventh. That it be referred, and the same is hereby referred to Kenneth G. White, esq., of the city of New

York, to ascertain and take and state and report to the court an account of the gains, profits, and advantages *which the said defendant, Thomas L. James, has in anywise received or made, or which have arisen or accrued*, on account of the infringements aforesaid, and also of the damages in addition thereto which the said complainant has sustained by reason of said infringements."

As to the account of profits, we object that the direction is prejudicially broad, and as to the account of *damages in addition*, that it is founded upon an unconstitutional statute.

A. As to the account of profits.

The decree makes it the master's duty to report not only the profits which James has made, or which have arisen or accrued *to him*, but also the profits which have arisen or accrued to the government—for it speaks broadly of profits "*which have in anywise been received or made, or which have arisen or accrued*," or which James "*has in anywise received or made or which have arisen or accrued*."

The master understood this decree as making James accountable for the profits which the government has received, for he says in his report (2 Rec., 1548):

"It (this suit) is for the infringement of a patent, and although against the defendant, James, personally, any recovery which may be had against him will be for "gains, profits, and advantages" which have "arisen or accrued," not to him individually, but by his use of it in his official capacity as postmaster of the city of New York."

And in conclusion he says (2 Rec., 1555): "It results from the testimony, and the master hereby finds, and reports, that the gains and profits which have arisen or accrued to the defendant James *under the decree*, in the

saving of salaries alone," are the items set out at the end of the report.

The final decree (2 Rec., 1664) directs "that the report of the master on this cause be, and the same is hereby, in all respects ratified and confirmed and accepted"; that the gains, profits, &c., which "have been made, or which have arisen or accrued" (without saying, *made by James or accrued to him*), are the sum of $63,000, and that there be a recovery from James of this amount. This shows that the circuit court approved and adopted the master's interpretation of the interlocutory decree.

The question is therefore presented, whether a defendant is liable not only for the profits which he has made *to himself*, but also for the profits which, as agent, he has been the means of making for his principal. The interlocutory decree is erroneous unless this question can be answered in the affirmative. (See Littlefield *v.* Perry, 21 Wall., 206.)

Sec. 4921 Rev. Stats., taken from the patent act of 1870, and providing only in general terms that the complainant shall be entitled to recover, "in addition *to the profits to be accounted for by the defendant*, the damages," &c., leaves it undetermined what *the* profits to be accounted for are. The matter must therefore be decided on the general principles of equity.

Courts of equity decree an account of profits against the infringer of a patent on the theory that he is an *involuntary trustee.* The rule as to patents in its general feature does not differ from other cases of tort. Thus, in Lee *v.* Alston (1 Ves., 82), Lord Eldon says that when one enters wrongfully upon the land of another, and

makes money thereby, he shall be considered to be a *bailiff* and held to account for what he has made.

This involuntary trust extends only to the profits which the infringer has "*actually made*"; by which is understood profits "made," not for a principal or master, but to the defendant himself, so that he has control of them without being under obligation to answer for them to any person unless it be the owner of the patent.

In Livingston *v.* Woodworth (15 How., 546), the court said:

> In a suit in equity for an injunction and an account of profits of a patented machine the defendant is accountable only for what profits he actually made, not for what, by diligence and skill, he might have received.

And this is said to be the true rule in Dean *v.* Mason (20 How., 203).

In Packet Co. *v.* Sickles (19 Wall., 611) the court again said:

> The rule in suits in equity of ascertaining by a reference to a master the profits which the defendant has made by the use of the plaintiff's invention stands on a different principle. It is that of converting the infringer into a trustee for the patentee of the profits thus made.

In Conover *v.* Mers (6 Fish. P. C., 508), Judge Woodruff lays it down that when, for any reason, the defendant has made no profits the complainant can recover none. (See, also, Cawood Patent, 94 U. S., 710; Birdsall *v.* Coolidge, 93 U. S., 68; Carew *v.* Fabric Co., 5 Fish. P. C., 108; Wooster *v.* Taylor, 14 Blatch., 404.)

The question of the liability of a workman to account for profits made by his employer came up in Sargent *v.* Learned (2 Curt., 349), and Mr. Justice Curtis there said:

> As against Seagrave I think the complainant entitled

to a decree for an injunction and an account. But he, Learned, the other defendant, in the employment of Seagrave, no decree for an account can be had against him, for he has nothing to do with any profits.

In Elizabeth *v.* Pavement Company (97 U. S., 137), the infringement consisted in the laying of the patented pavement in the streets of Elizabeth. The defendants were the City of Elizabeth, the New Jersey Wood-Paving Company, and Geo. W. Tubbs, who, in his own name, made the contracts with the city in behalf of the New New Jersey Wood-Paving Company, receiving a salary for his superintendence.

The circuit court rendered a decree for profits against all the defendants. On appeal this decree was reversed by the Supreme Court so far as it affected the city of Elizabeth and the agent, Tubbs, because neither of them had made any profits.

The court, after remarking that the subject of profits recoverable in equity is surrounded with many difficulties, says:

But one thing may be affirmed with reasonable confidence, that *if an infringer of a patent has realized no profits from the use of the invention, he cannot be called upon to respond for profits;* the patentee in such cases is left to his remedy for damages.

The bill in Elizabeth *v.* Pavement Company was filed before the statute of 1870 was enacted. But that is not material to the present discussion. The act of 1870 did not change the law in respect to what profits are recoverable in equity. It merely enabled a complainant in equity in certain cases to recover "*the damages in addition,*" or "*the damages beyond,*" which he had sustained by reason of the infringement. (Marsh *v.* Seymour, 97 U. S., 360; Birdsall *v.* Coolidge, *supra;* Packet Co. *v.*

Sickles, *supra;* Buerk *v.* Imhaeuser, 14 Blatch., 19; Wooster *v.* Taylor, *supra;* Carew *v.* Fabric Co., *supra.*)

Again, in Elizabeth *v.* Pavement Company, the New Jersey Wood-Paving Company, which alone had made profits, was a party to the record, and as to it the circuit court's decree was not disturbed, while in the present case the United States, which alone has made profits (if any have been made), is not a party to the record and cannot be sued. This, also, is immaterial, for the reason given for the decision in Elizabeth *v.* Pavement Company was that neither Tubbs nor the City of Elizabeth had made any profits. Further, the rule which forbids the bringing of a suit against the sovereign in its own courts is founded on great principles of public policy, and the court will not be astute to invent evasions of it. (Carr *v.* U. S., 98 U. S., 433; Siren, 7 Wall., 152; Heaton *v.* Quintard, 7 Blatch., 73.)

In every essential particular Elizabeth *v.* Pavement Company is on all fours with Campbell v. James, and it seems to be a controlling decision.

B. As to the damages:

Prior to the patent act of 1870 courts of equity could not give damages to a patentee suing for infringement. (Livingston *v.* Woodworth, 15 How., 546; Elizabeth *v.* Pavement Company, 97 U. S., 126.)

The remedy of the patentee for damages was by action on the case at common law. (Curt. Pat., § 344; Addison on Torts, 3d Engl. ed., p. 49.)

Article VII of the amendments to the Constitution provides that, "In suits at common law, when the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved."

We claim, therefore, that infringers of patents are absolutely entitled to a trial by jury when damages are sought, and that the act of Congress (Rev. Stats., § 4921), which ostensibly gives courts of equity power to assess damages, is in that respect void.

With reference to the meaning of the words "suits at common law," Judge Story says, in Parsons *v.* Bedford (3 Peters, 447):

By common law, they (the framers of the amendment) meant what the Constitution denominated in the third article, "law"; not merely suits which the common law recognized among its old and settled proceedings, but suits in which legal rights were to be ascertained and determined, in contradistinction to those where equitable rights alone were recognized, and equitable remedies were administered; or where, as in the admiralty, a mixture of public law and of maritime law and equity was often found in the same suit.

In Shields *v.* Thomas (18 How., 253) it is said that this provision of the seventh amendment "should be understood as limited *to rights and remedies peculiarly legal in their nature*, and such as it was proper to assert in courts of law, and by the appropriate modes and proceedings of courts of law."

In Scott *v.* Bilgerry (40 Miss., 144) it is said:

A suit to recover damages or compensation for the breach of a contract for the sale and delivery of personal property is a purely legal demand, and is properly the subject of a "suit at common law"; and the party cannot be deprived of his right of trial by jury by a legislative or executive declaration that the subject-matter shall be cognizable in a court of equity. What belonged to the jurisdiction of courts of equity at the adoption of the Constitution belongs to them still, and whatever was then cognizable in the courts of common law remains a "suit at common law," in which the parties are entitled to a jury trial—a right justly dear to the Amer-

ican people, and which it is the duty of the court to preserve, protect, and defend.

In Hudson *v.* Caryl (44 New York, 553), it was held that an action to abate a nuisance and to recover the damages occasioned thereby must be tried by jury.

In Davis *v.* Morris (36 New York, 572, 573), it was held that where the facts stated, arising out of the same transaction, entitle a party to both legal and equitable relief, the right to the legal relief must be tried by jury.

In Reubens *v.* Joel, (~~44 New York, 493~~) 13 N.Y. (3 Kernan) 493, Selden, J., says:

What are the distinctions between actions at law and suits in equity? The most marked distinction obviously consists in their different modes of relief. In the one, with a few isolated exceptions, relief is invariably administered and can only be administered in the form of a pecuniary compensation in damages for the injury received; in the other, the court has a discretionary power to adapt the relief to the circumstances of the case. * * * Another leading distinction between common law actions and suits in equity consists in their different modes of trial. The former are to be tried by a jury, the latter by the court. Can the legislature abolish this distinction? * * * It is, in my judgment, clear that the legislature has not the constitutional power to reduce all actions to one homogenous form, because it could only be done by abolishing trial by jury, with its inseparable accompaniment, compensation in damages, which would not only conflict with Art. 2, § 2, which preserves trial by jury, but would in effect subvert all jurisdiction at law, as all actions would thereby be rendered equitable, or by abolishing trial by the court, with its appropriate incident, specific relief, which would destroy all equity jurisdiction and convert every suit into an action at law.

495; Whitehurst *v.* Coleen, 53 Ill., 247; King *v.* Hopkins, 57 New Hamp., 334; Thomas *v.* Bibb, 44 Ala., 721.)

VII.—*Of the exceptions to the master's report.*

The evidence that was before the master is not complicated.

Both parties put in portions of the final hearing record, defendant taking the same objections to what complainant offered as when the alleged evidence was originally offered. (2 Rec. 1501; 1545–6.)

Complainant called several employés of the post-office to show that if separate postmarkers and cancelers had been used more clerks must have been employed, if postmarking and canceling had been done in the same way and within the same time, and what the salaries of such clerks would have been, namely, Yeoman (2 Rec. 1460) and Steele (2 Rec. 1492), with reference to the third division; Lawrence (2 Rec. 1480), with reference to the foreign department; and Gaylor (2 Rec. 1470, 1475), with reference to the fourth division and the city stations. Wareing (2 Rec. 1497, 1547) was examined as to the number of combined instruments that have been used; Norton (2 Rec. 1499, 1546) and Campbell (2 Rec. 1500) to show that no license fee or royalty for making, using, or selling the patented invention has been established; and Kittle (2 Rec. 1484, 1546) to express some opinions.

No evidence of the pecuniary value of the postmark, or of putting it on the envelope apart from the postage stamp, or of transmitting the mails with any particular decree of rapidity was offered; and there was no evidence that complainant has been deprived of anything

by the infringement, which but for the infringement he would have had.

For the defendants no evidence was offered as to the number of clerks who would have been required if separate instruments had been used, that question not seeming to be involved in the case.

Burchard (2 Rec., 1509, 1512) and Bogia (2 Rec., 1512), two of the witnesses from Philadelphia, who were examined at the final hearing, were called to testify as to the perfection of the postmark and cancellation marks made by the unbalanced instruments used at the Philadelphia post-office before the cross-bar instruments were introduced by the Post-Office Department, and as to the number of clerks employed before and after such introduction.

Waring (2 Rec., 1514), O'Connor (2 Rec., 1519), Magee (2 Rec., 1520), Beach (2 Rec., 1525), Andrews (2 Rec., 1531), and Richards (2 Rec., 1538), all employed in the New York post-office, were called with a view of defining, to a certain extent, the advantage of balancing the postmarker and canceler upon the handle. They testified as to experiments recently made in the post-office with Master's Ex. 5 (a cross-bar instrument) and with Master's Ex. 4 and 6, which we presume the court will find to be substantially like the unbalanced instruments described in the testimony for final hearing.

Mr. James (2 Rec., 1502, 1505) testified that he had not personally made any profits or derived any advantages from the use of the infringing machines. A conversation between him and complainant's solicitor, Mr. Norton, was also brought out (2 Rec., 1503) for the purpose of strengthening the inference afforded by the other

circumstances of the case, that the owner of this patent is not interested in maintaining a close monopoly of the privileges secured by it.

The master reported (2 Rec., 1548 *et seq.*) that the "gains and profits which have arisen or accrued to the defendant James under the decree" amount to the sum of $63,000. His report is based upon the theory that if the infringing machines had not been used separate postmarkers and cancelers must have been used, more clerks must have been employed, and consequently the salaries of such additional clerks have been saved. It covers the time between April 1, 1873 (at or about which date Mr. James became postmaster), and January 1, 1880 (the day prior to the date of the report).

To this report James duly filed the eighteen exceptions, which have been hereinbefore set out at large in the assignment of errors. They may also be found at 2 Record, 1559, *et seq.*

A. Exceptions 12, 14 (G and H), and 15 present the question whether the salaries of the clerks whose services would have been required to postmark and cancel, in the same way and in the same time had non-infringing instruments been used, are a proper measure of gains, profits, and advantages under the circumstances of this case.

To be perfectly clear, we admit at the outset that *savings* (in respect to salaries or anything else) are, if proved, "gains, profits, and advantages" within the meaning of the law. This is settled by abundant authority.

But does evidence that additional clerks would have been needed had the postmaster compelled to use separate postmarkers and cancelers (and this was all the

evidence before the master. See the questions put to James by Campbell's counsel at 2 Rec., 1508. These are substantially the same questions that were put to all the other witnesses called by Campbell)—does such evidence standing by itself prove that the salaries of such additional clerks have been in fact *saved?* We claim that it does not; that between the premise and the conclusion there is a gap which the master spanned, not by the exercise of legitimate inference but by pure speculation and guess-work.

The salaries have not been saved unless more clerks would have been employed, if the infringing machines had not been used. This is a question of fact to be proved by evidence. There is not in the whole case a particle of evidence to show that more clerks would have been employed. There never was a time in the history of the post-office when any more clerks were employed because separate postmarkers and cancelers were used; and there never was a time when any fewer clerks were employed because combined postmarkers and cancelers were used. Prior to 1860 the postmark and the cancellation mark were usually identical, being made by one blow of the postmarker. Then came the order to Postmaster Dix prohibiting the use of the postmarker as a canceler and directing cancellation to be performed by a separate instrument. General Dix reported that this could not be done without an increase of his clerical force. But what in point of fact was done? No more clerks were in fact employed. Instead the mails were delayed (Deft's Ex. 6, Dix, 2 Rec., 1142), and in a few days combined instruments, that have been used in one form or another down to the present time, were introduced. Now, who can say that if the combined instruments

had not come into use more clerks would actually have been employed? The circumstances show four lines of action open: 1st. Employ more clerks; 2d. Delay the mails; 3d. Do away with the postmark altogether; or, 4th. Revoke the order requiring cancellation to be performed by a separate instrument.

There is no basis in the evidence for saying that one of these lines of action would have been adopted rather than another. Neither the value of dispatching the mails with a particular degree of promptness, nor that of postmarking apart from the postage stamp, nor that of the postmark itself is shown (Master's report, 2 Rec., 1552, middle). Nor is the value of all or any of those things shown to be equal to or greater than or to stand in any certain ratio to the salaries of the additional clerks.

What advantage has been obtained by using the infringing machine? It is manifestly the securing without delaying the mails a postmark on the envelope distinct and separate from the cancellation mark on the postage-stamp. That was the end or purpose sought to be accomplished. The master in his report has lost sight of the end aimed at or has regarded it as fixed and immutable; and looking at the infringing machines only as a means of accomplishing the immutable end has found that they possess a particular advantage over certain other means of accomplishing the same end. We have not used the infringing machines *because* they saved the salaries of clerks, but because they gave us a postmark on the envelope distinct from the cancellation mark. The value of the end accomplished may be greater or less than the advantage pertaining to the infringing machines as a means. There is no evidence

showing it to be greater, and therefore we claim that the salaries of the clerks who would be required to do the same work with separate instruments are no measure of the actual advantages that have been obtained by the use of the infringing machines. The report, which finds that making postmarks on envelpces distinct and separate from the cancellation marks is worth so large a sum as $9,000 a year in a single post-office, is based on the merest conjecture and speculation.

Let us suppose a case:

Livingston *v.* Woodworth, (15 How., 546), is one of the few cases in the reports bearing upon the question of what profits are recoverable when the infringement consists merely in the *use* of a patented machine. It appeared that the defendant had planed with the patented planing-machine several million feet of boards at an average cost of $1.50 per 1,000 feet, and that he had sold them for $2 per 1,000 feet. The Supreme Court held that complainant could not recover more than fifty cents per 1,000 feet. Now suppose it had been shown that 1,000 feet of boards could not be planed by hand at a less cost than $10 per 1,000 feet, would the profits derived by the defendant have been $8.50 per 1,000 feet, viz, the difference between the cost of planing the boards by hand and that of planing them with the patented machine? Manifestly not. The defendant used the complainant's machine for the purpose of obtaining the profits on the sales of the boards, and such profit was the only advantage he derived from his unauthorized acts. His profit was the value to him of the end he had in view.

Again: Crossly *v.* The Derby Gas Light Co. (3 Mylne & Craig, 428), is another case where the infringement

consisted in the use of a patented machine, namely, a gas meter. It appeared that before the introduction of the meter the company determined the amount of gas supplied to its customers by ascertaining the capacity of the burners used and stipulating as to the time during which they should be used. Frauds were frequently practiced by exceeding the stipulated time and by altering the burners; so that it was calculated the company had to furnish 1,250 cubic feet of gas for every 1,000 feet for which it received pay. The meters prevented these frauds, and the master reported that the company had derived a benefit equivalent to profit of 25 per cent. in the saving of gas. Lord Chancellor Cottenham, holding that the grounds upon which the master proceeded did not support his conclusions, pointed out a number of elements that ought to be considered, but the consideration of which would be attended with many difficulties, and recommended a compromise.

Now, what could have been more simple in this case, where Lord Cottenham found the ascertainment of profits so nice and intricate and difficult a matter, than to have held that the result, to wit, the prevention of frauds which was attained by the use of the meter, could have been obtained by the company's employing and stationing at every house where gas was burned an inspector who would see to it that the burners were not altered, and that the stipulated time was not exceeded; and that, therefore, the saving of the salaries of such inspectors was gains and profits which defendant had derived by his wrongful acts? That is the rule followed by the master in Campbell *v.* James. It is very easy to apply, and by means of it reasonably exact results can be obtained. But its fault is that it is fundamentally unjust.

B. Exceptions 9, 10, 11, 14 (1), present this question. If it was proper in this case to make a comparison as to advantages in use between the infringing machines and other instruments, ought not the infringing machines to have been compared with unbalanced combined instruments rather than with separate postmarkers and cancelers?

a. The unbalanced instruments referred to are those having the handle directly over the post-marker and the canceler attached to one side as shown in Defendants' Exs. 135 and 136, which are the identical instruments that were used, the first in the Buffalo post-office from 1860 to 1863, and the second in the Geneva post-office from 1861 to 1863 (depositions of Powers and Anthony, 1 Rec., 800, 816).

These instruments could be constructed by any man of ordinary intelligence, from the description contained in the Ransford & Low patent of August 9, 1859. (Defendant's Ex. 145, 2 Rec., 1270.) See expert testimony of Chambers and Robertson. (2 Rec., 990, 887, 889, 890, 908–910.)

They were manufactured and sold prior to the commencement of the war by John H. Zevely and E. S. Zevely. (2 Rec., 927, 952.)

They were used in many post-offices prior to the issuance of the patent in suit (April 14, 1863), to wit:

Philadelphia. (Depositions of Ireland, Rees, Bogia, Burchard, 2 Rec., 1406–1446.)

Cleveland. (Depositions of Wheeler, Bishop, Cottrell, Coon, Warner, Albinger, Nott, Beardsley, 1 Rec., 662–721; 2 Rec., 999–1023.) See, to the same point, depositions of complainants' witnesses, Bassett and Cook. (1 Rec., 171, 195, 207.)

Cincinnati. (Depositions of Geilfus and Rupp, 1 Rec., 819, 830.)

Janesville, Wis. (Deposition of Miller, 2 Rec., 871.)

Buffalo. (Deposition of Powers, 1 Rec., 800.)

Geneva. (Deposition of Anthony, 1 Rec., 816.)

New York. (Deposition of Yeoman, Ryer, Dix, Corbett, and Riley, 1 Rec., 835, 843; 2 Rec., 849–860.)

In most of the above offices these instruments were used during a period of several years and they proved themselves adequate to the work of efficient postmarking and canceling. They were discontinued on the introduction by the department of balanced instruments, which doubtless were better. But the unbalanced instruments were themselves clearly better than separate postmarkers and cancelers.

Bogia and Burchard (2 Rec., 1509–1512), in their testimony before the master, show that the impressions made by the unbalanced instruments at Philadelphia were as good as those made with the cross-bar instruments; and that no more clerks were employed than when cross-bar instruments were used.

The witnesses from the New York office who experimented with Master's Exs. 4, 5, and 6 show (if their testimony based on their experiments has any weight) that, at an ordinary rate of speed, the unbalanced instruments make as good impressions as the balanced, and that the advantage which the balanced instruments possess for rapid work, although always existing, may be diminished by reducing the weight of the instruments. See especially the testimony of Andrews, the most expert stamper in the office, and of Richards his supervisor (2 Rec., 1531, 1538).

b. The question whether these unbalanced instruments are covered by the patent in suit has been already sufficiently discussed. We claim that if they are, the patent is anticipated, and that if they are not, they were open to the public to use during all the period of infringement, and, consequently, the master should have taken them as the basis of comparison.

The rule of law on which we rely is thus stated in Mowry *v.* Whitney, 14 Wall., 620, at p. 651:

The question to be determined in this case is, What advantage did the defendant derive from using the complainant's invention over what he had in using other processes then open to the public and adequate to enable him to obtain an equally beneficial result? The fruits of that advantage are his profits. They are all the benefits he derived from the existence of the Whitney invention. It is found that there are other processes by which the inherent strain caused by unequal cooling could be and was prevented, counteracting which strain was the sole object of the complainant's invention, and a car-wheel could be prepared for similar service, valuable in the market, and salable at a price not less than was obtained for those which the defendant manufactured. The inquiry, then, is: What was the advantage in cost, in skill required, in convenience of operation, or marketability, in bringing car-wheels, by Whitney's process, from the condition in which they are when taken hot from the molds, to a perfected state, over bringing them to the same state by those other processes, and thus rendering them equally fit for the same service? That advantage is the measure of profits." (See also Littlefield *v.* Perry, 21 Wall., 228.)

A lucid exposition of the reason of this rule is given by Mr. Justice Strong, in Locomotive Safety Truck Company *v.* Pennsylvania Railroad, vol. 2 Federal Reporter, 677 (issue of June 29, 1880). He says:

The rule is that the measure of profits, as distin-

guished from damages, for which an infringer is responsible, is the aggregate of gains or savings which he has made from the use of the patented invention above what he could have made in doing the same work from the use of any other device or process existing at the time, capable of accomplishing the same purpose, or attaining the same result and *free or open to public use.*

The rule is founded upon the soundest reason. *It is only that which was previously not known, or, in other words, it is only the addition to human knowledge and convenience which a patentee has made, that he can be said to own. The patent laws give him the exclusive right to that addition and to the advantages resulting from it, and to nothing more.*

In Railway Co. *v.* Sayles, 97 U. S., 554 (see p. 556, top), the account appears to have been stated on the principle followed by the master herein. The counsel for the appellee (complainant) conceded that, in the light of the decision in Mowry *v.* Whitney, the principle adopted by the master was not correct, and consented that the decree be reduced nearly one-half.

In ruling against us on this point, Judge Wheeler said (2 Rec., 1645):

It is said that the master erred, because the defendant might have used another form of stamp which would not have been an infringement, and that the saving by using the patented invention instead of that would have been much less than the saving reported. It does not appear, however, but that such use of the other form would have been an infringement; and if that appeared, it appears that the other form was not known to the defendant, and that the saving reported was, in fact, saved by substituting the patented improvement for what was known and would probably otherwise have been used.

Let us consider this:

Of course, if the use of the unbalanced instruments would have been an infringement, nothing more is to

be said. We think it strange, however, that Judge Wheeler should have said, in his first opinion, that the patented invention was a balanced instrument, and that he should say here that it does not appear but that the use of the unbalanced instrument would have been an infringement. For if balancing is a material factor in the patented combination, the use of an instrument that does not have that factor cannot be an infringement. This is well settled. (Prouty *v.* Ruggles, 16 Peters, 336; Gould *v.* Rees, 16 Wall., 544, and cases cited.) To us there appears to be an irreconcilable conflict between Judge Wheeler's two opinions.

1 15-Wall 187

Besides the doubt expressed as to infringement, the learned judge says that the unbalanced instruments were not known to James, as though that were a reason for not adopting them as the basis of comparison. But two of James's subordinates knew of them. Ryer, a stamping clerk, and Yeoman, now a superintendent, formerly a stamping clerk, both swear that unbalanced instruments (of which Defendant's Ex. 5 is the model) were used while Dix was postmaster. (1 Rec., 835 *et seq;* 843 *et seq.*) The postmaster of a great office, like that at New York, ought not to be presumed to be familiar with all the details of the business he supervises, Had the question of discarding the machines which have been held to infringe been contemplated, naturally and probably the postmaster would have consulted with these very subordinates and thus obtained knowledge of the unbalanced instruments. Moreover it makes no difference in law whether James in fact knew or did not know of the unbalanced instruments. They had been publicly used for years and were known to many persons, as we have shown; they made a part of the stock

of public knowledge. Norton improved upon them (if you please to consider it so) by making a balanced instrument. He gave the improvement to the public, and in return received the conditional guarantee of the Nation that he or his assigns should reap all the advantages of the improvement (but of nothing else) during a limited period. In no suit ought anything in addition to those advantages to be recovered. Neither in Mowry *vs.* Whitney nor in any of the cases which have followed the rule there laid down has the defendant's *knowledge in fact* of the other processes or machines that were free to be used been made a condition of the application of the rule. In Locomotive Safety Truck Co. *v.* Penn. R. R., *supra*, the master did not find that the locomotive which might have been used was known to the defendant. He found only "that this latter form of locomotive was then in common and unrestricted use."

The conclusion of the extract above given, from the opinion of the circuit court herein, is to the effect that "the saving reported was, *in fact*, saved by substituting the patented improvement" for separate postmarkers and cancelers. This is a grave error in fact, if by patented improvement is meant the balanced combination. It is not pretended that James made such substitution. He found the balanced stamps, like Complainant's Exhibit A, in use when he became postmaster in 1873; and the uncontradicted and unimpeached evidence is that they had then been in use at the New York office since the last part of the year 1860; that in 1860 they were substituted in the place of unbalanced combined instruments, like Defendant's Ex. 5; and that such unbalanced instruments, when adopted, took the place, not of separate postmarkers and cancelers (though

they were used perhaps for a day or so) but of postmarkers alone, the impressions from which had commonly been made, in whole or part, upon the postage-stamp, so that the postmark and cancellation mark were identical. (See James' depositions, 1 Rec., 69; 2 Rec., 1506; Yeoman's depositions, 1 Rec., 835, *et seq.*; 2 Rec., 1462; Ryers' deposition, 1 Rec., 843, *et seq.*; Dix's deposition, 2 Rec., 849, *et seq.*; Corbett's deposition, 2 Rec., 855, *et seq.*)

C. Exceptions 2, 3, 4, 5, and 14 (E & F) raise the question whether James has personally received or made any gains, profits, or advantages.

Mr. James testifies (2 Rec., 1502–3; 1505) that the salaries of the clerks employed in stamping are paid by the Post-Office Department; that when stamps are wanted a requisition is made on the department, which authorizes the office to procure and pay for them; that the department has paid for all of the stamps that have been used in the office; that he has never manufactured or used or caused to be manufactured or used any combined stamps except as postmaster; that personally he has neither made nor received any gains, profits, or advantages from the manufacture or use of the combined stamps; and that it is no benefit to him what stamp he uses.

This testimony is consonant with the circumstances of the case, is entirely uncontradicted, and settles the facts.

It will be observed that the master's report is in keeping with this testimony. It says (2 Rec., 1548): "Any recovery which may be had against him (James) will be

for gains, profits, and advantages which have arisen or accrued, not to him individually, but by his use of it (the patent) in his official capacity as postmaster of the city of New York." The master does not hold that James has personally made any profits, but that under the interlocutory decree he is liable for the profits which the government has made. Whether the interlocutory decree is lawful in form has already been sufficiently discussed. What was said there applies here as well.

James's position in this matter is substantially identical with that of Geo. W. Tubbs in the case we have already cited on this point (Elizabeth *v.* Pavement Company, 97 U. S., 126). Tubbs, a salaried superintendent, made contracts in his own name on behalf of the New Jersey Wood Paving Company with the city of Elizabeth; the contracts brought profits to the paving company, and the circuit court decreed that both it and its agent, Tubbs, were liable for such profits. This court reversed the decree, so far as Tubbs was concerned. *The fact that James is the agent of the government certainly ought not to put him in a worse position than if he were the agent of a private corporation.*

Nothing remains under this head except to point out a mistake of law which Judge Wheeler seems to have fallen into in his discussion of this subject (2 Rec., 1645–6). If we understand his meaning correctly, it is that the title to the money with which clerks in the New York post-office are paid, is vested in the postmaster, so that if any clerks are dispensed with, he personally saves their salaries. If that be so, it is argued, it makes no difference, so far as liability in this case is concerned, whether the postmaster keeps the savings him-

self, turns them over to the government, or throws them into the sea. This necessitates a somewhat extended investigation of the statutes for the purpose of ascertaining the character with which the money that is paid to clerks in salaries is stamped.

Rev. Stats., sec. 3860, provides that the clerks shall be paid out of the surplus revenues of the office, that is to say, the excess of box-rents and commissions over and above the salary assigned to the office.

R. S., § 4051. "All postages, box-rents, and other receipts at post-offices shall be accounted for as part of the postal revenues." §§ 3843, 3844 require postmasters to render sworn accounts of such receipts to the Postmaster-General.

§ 407. "The postal revenues and all debts due the Post-Office Department shall, when collected, be paid into the Treasury of the United States under the direction of the Postmaster-General."

[The procedure of payment into the Treasury of sums withheld from receipts by postmasters for their salaries, the hire of clerks, &c., is as follows:

1. An appropriation by Congress for the ensuing year, § 3674 and § 4054; see also § 3668, which shows that the Postmaster-General must submit estimates to Congress for appropriations under a number of heads, including "compensation of postmasters," "compensation of clerks," &c.

2. The Postmaster-General fixes the amount of the allowance of each office by order (§ 3860).

3. The Postmaster-General certifies his order to the auditor (§ 405).

4. Under the direction of the Postmaster-General,

postmasters deduct their salaries and expenses, *authorized by law* (§ 3861).

5. Vouchers for all deductions are submitted to the auditor, and no deductions shall be valid unless found in conformity with law (§ 3862).

6. If found in conformity with law (*id.* and § 4057), the auditor states and certifies an account thereof to the Postmaster-General (§ 294).

7. Thereupon, the Postmaster-General issues his warrant to the Treasurer to carry the amount to the credit of the postal revenues, and to the debit of the proper appropriations upon the books of the auditor (§ 406)].

Section 4049 provides that the accounts of the postal service shall be kept in such manner as to exhibit separately the amount of expenditure for enumerated objects, among which are "compensation of postmasters," "compensation of clerks," "postmarking and canceling stamps," &c.

Rev. Stats., Title XL (The public moneys) *passim*, (especially §§ 3639, 3641, 3642) shows that the postal revenues, which we have seen include *all* receipts at post-offices, are a part of the "public money."

§§ 3846, 3847, 3848 provide that all "public money" collected by postmasters must be safely kept: that it must be deposited in designated depositories at given intervals.

§ 4053. Willful neglect on the part of any postmaster "*having temporary custody*" of any money "which by law is a part of the postal revenues," to deposit the same as required, constitutes the crime of embezzlement.

§ 3623 shows that all money disbursed by postmasters under § 3860 is advanced out of an appropriation.

§ 4057 shows that where any money has been improp-

erly paid out of the funds of the Post-office Department the Postmaster-General must cause suit to be brought (against the payee) to recover back the money so paid, with interest.

These sections of the statutes, taken together, make it clear that the money paid to clerks in salaries is the money of the United States, never the money of the postmaster. The postmaster is the conduit pipe through which the revenues flow into the Treasury and out of it. As indicated in one of the sections above cited, he is the mere *temporary custodian of public money*. It necessarily follows that if ever the salaries of clerks are saved the United States alone makes the saving; neither in fact nor in law does the postmaster make it.

D. The final decree (fifth paragraph, 2 Rec., 1664) indicates on its face that the $63,000 for which James is held liable are profits, not damages. Nevertheless the master reported (2 Rec., 1553) as follows: "No damages, apart or separate from profits, as the master understands it, are claimed. The claim is for the profits made by the defendant, which under the decision of the courts are the same thing as damages, and are called damages," and this part of the report, like all the others, is confirmed and ratified in the final decree. (2 Rec., 1664.) On this basis counsel for the appellees will probably contend (as we infer from their exceptions 11 and 12 to the report 2 Rec., 1558) that, if James is not liable for the profits as such, he is responsible for an equal amount as damages, and that accordingly the court should send the case back with directions to enter a new decree against James for the $63,000 as damages.

Our exceptions 6, 7, and 8 raise the question.

a. There was no evidence before the master except

such as related to the question whether any profits had been made by the use of the infringing machines, and whether any license fee or royalty for the use of the patented invention had been established. On the latter point it was proved that there was no established license fee (2 Rec., 1499; 1500).

The evidence, therefore, presents the question squarely whether, there being no established license fee, the defendant is responsible for the profits that have been made *as damages*.

b. Now, what are damages and how proved?

The damages referred to in Rev. Stats., § 4921, as recoverable in equity, are, of course, the same as those which it is provided in § 4919 a jury may find in an action on the case; that is, they are the "actual damages" which the complainant has sustained by the infringement. (Bancroft *v*. Acton, 7 Blatchf., 505.)

"Damages are given as a 'compensation, recompense, or satisfaction to the plaintiff, for an injury actually received by him from the defendant. Compensatory damages and actual damages mean the same thing; that is, that the damages shall be the result of the injury alleged and proved, and that the amount awarded shall be precisely commensurate with the injury suffered, neither more nor less, whether the injury be to the person or estate of the complaining party. (2 Greenl. Ev., 10th ed., § 253.)" (Birdsall *v*. Coolidge, 93 U. S., 68.)

The burden is upon the complainant to prove his loss satisfactorily. (Birdsall *v*. Coolidge, *supra;* Blake *v*. Robertson, 94 U. S., 728.)

Actual damages must be calculated, not imagined, and arithmetical calculation cannot be made without *certain* data on which to make it. (Mayor, &c. *v*. Ransom, 23 How., 487.)

The decisions of Judge Johnson in Buerk *v.* Imhaeuser (14 Blatch., 20), and of Judge Blatchford in Ingersoll *v.* Musgrove (14 Blatch., 541), show with what exactness the *data* on which a calculation of the amount of damages is based must be proved.

c. Damages sustained by the complainant and profits made by the defendant are not the same thing.

They are clearly contrasted in the statute (Rev. Stats., § 4921). See this point taken in Holbrook *v.* ——— (17 P. O. G., 55), where Lowell, J., says that profits are never of themselves the measure of damages at law.

In many reported cases the distinction between profits and damages is clearly pointed out. (See Birdsall *v.* Coolidge, *supra;* Burdell *v.* Denig, 92 U. S., 719–20; Marsh *v.* Seymour, 97 U. S., 360; Philip *v.* Nock, 7 Wall., 460; Seymour *v.* McCormick, 16 How., 480; Buerk *v.* Imhaeuser, 14 Blatch., 19; Ingersoll *v.* Musgrove *Id.*, 541; Wooster *v.* Taylor, *Id.*, 404.)

In England the difference is so marked, that Lord Chancellor Westbury held, in the House of Lords, that going for the profits was a *condonation* of the damages. (Neilson *v.* Betts, L. R., 5; H. L. C., 1.)

It is not denied that, under certain circumstances, the profits made by the defendant may be considered in arriving at complainant's damages. Thus in Birdsall *v.* Denig, *supra*, the Supreme Court, after saying that at law established license fees and in equity profits are the true measure of recovery, state: "In the absence of satisfactory evidence of either class in the forum to which it is the most appropriate, the other may be resorted to *as one of the elements* on which the damages or the compensation may be ascertained." And in Philip *v.* Nock, *supra*, the same court says in respect to a case where

the test of established royalties cannot be applied: "In arriving at their conclusion the profit made by the defendant and that lost by the plaintiff are *among the elements* which the jury may consider." But, it should be noted, profits are only *one of the elements* to be considered. To repeat what Judge Lowell said in Holbrook *v.* ———, *supra*, profits are never *of themselves* the measure of damages. There must be evidence that the infringement has caused the complainant to suffer a *loss;* that, but for the infringement, he would have had something which the infringement has prevented him from obtaining.

It was once thought that there was a presumption of law that, if the defendant had not infringed, the plaintiff would have made an amount equal to what defendant had realized from his unlawful acts; and Judge Nelson charged the jury to that effect in two cases (Wilbur *v.* Beecher, 2 Blatch., 143; McCormick *v.* Seymour, *id.*, 256). But that doctrine was, by the decision of the Supreme Court in one of those cases, completely exploded. In Seymour *v.* McCormick (16 How., 480) the Supreme Court reversed the judgment of the circuit court for errors in Justice Nelson's charge, saying: "Actual damages must be actually proved and cannot be assumed as a legal inference from any facts which amount not to actual proof of the fact. What a patentee would have made if an infringer had not interfered with his rights *is a question of fact and not a judgment of law.* The question is not what speculatively he may have lost, but what actually he did lose." In this case the Supreme Court also says, speaking of the cases when the infringer's profits are the criterion of the actual damage of the patentee, "*and where the profit of the patentee*

consists neither in the exclusive use of the thing invented or discovered nor in the monopoly of making it for others to use, it is evident that this rule could not apply." In Cowing *v.* Rumsey (8 Blatch., 38) Judge Woodruff said: "There may be cases so peculiar that there are no means of proving the plaintiff's loss without proof of defendant's profits, and such proof becomes clearly admissible; but, even then, the recovery is what the jury shall find to be the plaintiff's loss, not because the defendant realized profits, but because under all the circumstances the jury infer as a fact that but for the interference the plaintiff would have realized those profits." In Buerk *v.* Imheauser (14 Blatch., 19) Judge Johnson cited the above extract from Seymour *v.* McCormick with approval. In McComb *v.* Brodie (5 Fish, P. C., 384) the court charged the jury as follows: "The rule is not what the defendant made by the infringement or what he might have made, but it is the loss sustained by the plaintiff by reason of the infringement."

d. The case of Mayor of New York, &c., *v.* Ransom (23 How., 487) seems to be directly in point on this matter of damages. The circuit court for the southern district of New York in that case charged the jury in words which embody with the utmost exactness the doctrine which Mr. Campbell now contends for. The charge, which is set out in full in the opinion, was as follows:

"If the invention was valuable; if by its use the power and efficiency of the fire engines belonging to the defendant are so increased that fifty engines used with this improvement are equal in practical effect to seventy-five, or any other number of engines used without the improvement, the jury are at liberty to infer, if they think the inference a just one, that the defendant

in its corporate capacity, has saved the cost of the purchase and operation of the additional number of engines which would have been required to produce the same results if this invention had not been used; and that the corporate authorities, if they had admitted the plaintiff's rights, would have paid the amount of this additional cost, or a large portion of it, as the consideration for a license to use this invention rather than to abandon its use; and that the plaintiffs have therefore lost by the infringement what the defendant would have so paid to secure such license. It is for this reason that the benefits received by the defendant in its corporate capacity, from the use of the invention in the consequent reduction of its expenditures for fire engines and their management and operation, are proper subjects for consideration in determining the plaintiffs' damages; and the jury must determine for themselves upon the consideration of this and the other facts of the case (if they find that the plaintiffs are entitled to recover) what damages have been sustained by the plaintiffs in consequence of the unauthorized and unlawful acts of the defendant, being careful only to give the actual damages proved, and not to speculate upon the possibility or even probability of damages beyond such as are proved to have been sustained by the plaintiffs."

The Supreme Court held that this charge was erroneous and ordered a *venire de novo*. They say:

"It was of little use to caution the jury from giving speculative or any other than "actual damages," after the large margin of inference and presumption which they were permitted to take in order to find data by which to calculate them.

It was said in the case to which we have referred (Seymour *v.* McCormick) "actual damages should be actually proved, and cannot be assumed as a legal inference from facts" which afford no data by which they can be calculated. In order to find out the plaintiffs' loss or damage, the jury were allowed by the court to *infer* [italicised in opinion] that the defendants have saved all the money indicated by the comparative pow-

ers of the engines with and without the improvement; and after having made this inference they may *presume* [italicised in opinion] that the defendants would have paid this amount to the plaintiffs for the use of the improvement. Thus the possible advantage or gain made by the use of plaintiffs' improvement on their machines is made the measure of his loss.

If the plaintiff, unable to furnish any other data for a calculation, had proved that the defendants had made a certain amount of money by putting out the fires in New York which the plaintiff would otherwise have made by use of their invention, he might with some reason contend that this was a proper measure. But if he fails to furnish any evidence of the proper data for a calculation of his damage, he should not expect that a jury should work out a result for him by inferences or presumptions founded on such subtle theories."

e. Applying these principles to the case in hand, what do we find?

The circumstances surrounding this case are peculiar and perhaps unprecedented. The complainant on the one hand has a monopoly of making, using, and vending the patented invention; while on the other the United states alone has any use for it. The control of the government of such market as exists is as complete and real as that of the complainant. The complainant's patent is worth nothing unless the government uses it; and in determining the market value the government, having no competitor, has as potent an influence as the complainant has. The two parties stand on an equal footing. If they were to come together for the purpose of entering into a contract it would be to the interest of both to make concessions.

This is not a case where it is the interest of the owner of the patent to maintain a close monopoly. None of the many owners have ever made a business of making,

using, or selling the invention. The patent would be practically worthless unless the invention were used in the postal service. Complainant's chance of receiving any reward from his ownership is conditioned upon such use. This appears from the very nature of the patented instrument itself, it being fit for nothing except post-office work; from the fact that complainant has waived an injunction, which shows that he does not desire to stop the use; from the petitions to Congress for *compensation*, referred to in the bill; and from the admissions of the complainant's solicitor at the time a copy of the complaint was served on the defendant (2 Rec., 1503).

There is no evidence to show that if the defendant had not infringed, either he or the government would have purchased the right to use, nor what price for the privilege would have been agreed on and paid. It cannot be assumed in the absence of evidence that if defendant had not infringed, either he or the government would have purchased a license; much less can it be assumed that a license would have been purchased at any particular price; and it would be foolishly absurd to assume that a sum equivalent to the whole saving or advantage derivable from the use of the invention would have been paid, for on such an hypothesis the government would not be benefited in any respect whatever.

In short, the evidence does not establish any certain data from which the amount of loss sustained by the complainant can be calculated; indeed it does not show that the complainant has suffered any substantial damages.

E. The first exception relates to the time which the account should cover.

The master stated the account on the theory that the term began at the date when James became postmaster, namely, April 1, 1873. We contend that he should have commenced with the date of the assignment from Miss Ingalls to the complainant, January 2, 1873.

a. The bill is based upon the *ownership* of the patent by Campbell, who is alleged to have got title on the 2d of January, 1877. There is not sufficient language to raise the point whether Campbell could, in this suit, recover on Ingalls's *choses in action* against infringers if he were an assignee thereof.

b. We urge, in the second place, that the only claims which the assignment was intended to convey were claims against the United States, and not *choses in action* against a private infringer, which Mr. James is, on the only theory that allows complainant to maintain his bill. See the assignment set out in full in the bill. (1 Rec., 31 *et seq.*) At page 34, top, it is stated: "Intending herein and hereby to sell, assign and convey in trust unto the said Christopher C. Campbell in the manner herein provided and set forth, all my right, title and interest or *claim against said United States* for the past or future use," &c. And at near the top of p. 33, the use spoken of is that "by the Post-Office Department." The bottom of p. 32 and top of p. 33 is a little broader, but that is in the recitals, and can hardly extend the meaning of the words used in the operative parts of the instrument. Page 33, bottom, relates only to such claims for *past use* as were assigned to Miss Ingalls by Mr. Norton in 1869, and of course does not cover any cause of action against Mr. James, who had not then become postmaster.

c. We say, thirdly, that the law does not authorize

Campbell to sue in his own name as the assignee of *choses in action.*

It was held in Moore *v.* Marsh (7 Wall., 515) that after the assignment of a patent the assignor could maintain a suit for infringements that occurred while he held the title. Speaking of § 14 of the patent act of 1836, which provides that actions shall be brought in the name of the person "interested," Mr. Justice Clifford, speaking for the court, said: "True meaning of the word interested, as employed in the last clause of the 14th section of the patent act, when properly understood and applied, is that the right of action is given to the person or persons owning the exclusive right at the time the infringement is committed."

The party to sue in equity is the party who can sue at law (Curt. Pat., 4th ed., § 402–403). The only parties who can sue at law are parties who at the time the infringement was committed were interested in the patent either as patentees, assignees, or ~~grantors~~ (Rev. Stats., § 4919; Curtis § 345–8; Littlefield *v.* Perry, 21 Wall., 205; Moore *v.* Marsh, *supra*).

grantees.

Or, to put the matter in another way, grants from the sovereign being construed strictly, patents for inventions would not be assignable without express statutory authority (Grier, J., in Blanchard *v.* Eldridge, 1 Wall., C.C., 337). The only statutory authority existing is confined to assignments of the whole patent, or an undivided interest in the whole patent, and to grants of exclusive privileges in a limited district. The construction of this court in Moore *v.* Marsh, *supra*, excluding from an assignment claims for part infringements, limits the authority still more. There appears, therefore, to be no statutory authority for the assignment of claims for past

infringements. That being so, nobody can, by assignment, get the *legal* title to such claims, and no trust can be created since a trustee *e vi termini* holds a legal title.

It is not necessary to deny that a court of equity would respect such an assignment, and would compel the assignor to allow to the assignee the use of his name for the purposes of a suit. That is not this case.

F. The thirteenth exception is to the finding that "more perfect and efficient work is done by the patented combined instrument" than by any other instrument known or used prior to the use of such combined instrument.

The evidence is not that more perfect and efficient work is done "*by the patented combined instrument*" than by any other instrument known or used prior to its introduction. The evidence is that the *infringing machines* cancel better than the postmarker alone did. (See Yeoman's deposition, 2 Rec., 1469, middle and bottom.) One reason for this given by Yeoman is that the stamp now being used "has a cross-bar, numbers, &c." (N. B. The *cross-bar* referred to is not the *cross-bar* connecting the postmarker and canceler, but parallel bars on the face of the canceler. See Complt's Ex. B, and the following testimony.) He says also that the improvement is not at all due to the combination. On redirect examination at p. 1470, Mr. Williams again brought out the fact that cancellation has been more effectually performed *since* the introduction of the combined stamps, and from this he will argue that the credit of the improvement belongs to the Norton invention. But the argument is unsound; it is an illustration of the com-

mon fallacy condensed by the logicians into the formula, "*post hoc, ergo propter hoc.*" The evidence is that, though before the introduction of the combined stamps, the postmarker was generally used for canceling, there were also separate cancelers which were sometimes used and could always have been used. Manifestly they would do as good work as the canceler in the combination.

Mr. Wareing (2 Rec., 1514) shows moreover that the ink used is now much better than formerly.

As to postmarking, the method of fastening the dates now in vogue shown in Complainant's Ex. B, is a great improvement upon the old set screw shown in the patent and formerly used. (2 Rec., 1509 middle; 1515 middle; 1516 middle).

G. The sixteenth, seventeenth and eighteenth exceptions relate to the *number* of clerks whose salaries, the master reports, have been saved in the foreign department, the fourth division, and the city stations. The master assumes that the number has been the same during all the time from April 1, 1873, to January 1, 1880. The evidence before him was that of Lawrence and Gayler (2 Rec., 1470–80), and relates entirely to the present time. The only testimony bearing at all upon the needs of the office in 1873 is that of Mr. James, who says (2 Rec., 1508, bottom): "Six years ago it would have been done cheaper, because the work in the office is now almost double." In respect to the Third division the master himself makes a discrimination. He reports the salaries of nine clerks saved from January 1, 1877, to January 1, 1880, and of only six from April 1, 1873, to January 1, 1877.

VIII.—*Of the rights in this suit of the adverse parties, other than Campbell, as against James.*

Courts of equity will not adjudicate the rights of defendants *inter se* when the determination of the extent of relief to which the complainant is entitled does not depend upon such adjudication (Cottingham *v.* Shrewsbury, 3 Hare, 627; Sanford *v.* Morrice, 11 Clark and Finelly, 667; Fletcher *v.* Green, 33 Beav., 513; Mitford and Tyler, Pleading and Practice in Equity, at p. 18).

IX.—*Of the disposition of the appeal.*

The decree of the circuit court should be reversed, with costs, with directions to enter a decree dismissing the bill with costs to James.

ADDENDUM.

[NOTE.—By inadvertence this point was omitted in its proper place. It should be at page 35 of the brief, before II.—*Of the validity of the patent.*]

B.—AS TO THE ASSIGNMENT FROM MISS INGALLS TO CAMPBELL.

It is set out in full in both original and amended bill, and a certified copy may be found in 2 Rec., 1157.

Our position is, that it did not transfer any such interest in the patent as enables Mr. Campbell to maintain this suit.

The last recital states that it is deemed advisable that Mr. Campbell become vested in trust with all Miss Ingalls' right and title to the patent, and to her claim for past use of the invention in the postal service of the United States (pp. 1158–9).

It is then stated that the right and ownership of the patent is, in trust, vested in Campbell, upon the conditions that he shall have the sole management of the trust, and be at the expense of the same until a fair settlement shall be made with the United States; and for these services Campbell is to have $\frac{1}{3}$ of such sum as shall be determined upon by the Court of Claims in payment for the past use of the invention in the postal service, while Miss Ingalls is to have $\frac{2}{3}$ of such sum, and the Court of Claims is authorized to enter a judgment in favor of them severally for their respective shares, so that $\frac{1}{3}$ to Campbell and $\frac{2}{3}$ to Ingalls shall be paid directly from the United States Treasury, "and in no other manner shall payment be made for such use by the United States of said invention and letters patent" (p. 1159, middle).

Then come the words of conveyance: The consideration stated is one dollar, and the consideration "hereinbefore and herein stated as the main considerations," upon which the instrument is made. All Miss Ingalls right, title, and interest to the patent, and her claim against the United States for past use, is conveyed in trust, *as aforesaid.* "The same, and each and every thereof, to be held in trust in the manner and for the benefit of each of the persons herein named, and as herein specified and set forth, *and on no other grounds, and for no other use or purpose*" (p. 1159, bottom).

Is not the gist of this that Campbell shall manage the patent and trust, and be at the expense thereof, for the purpose of obtaining a settlement with the United States through the Court of Claims, and until such settlement shall be made, "and on no other grounds, and for no other use or purpose"?

This instrument (the repugnances therein being considered) should be construed to vest in Campbell only a power to settle with the United States. He cannot sue an infringer in his own name.

We think that the point is doubtful, and raise it only that James may have the benefit of a decision thereon as a protection against further liability.

CHARLES DEVENS,
Attorney-General.
SAMUEL B. CLARKE.

In the Supreme Court of the United States.

OCTOBER TERM, 1880.

CHRISTOPHER C. CAMPBELL, APPELLANT, *vs.* THOMAS L. JAMES, CHARLES EDDY, Samuel R. Clexton, and Horace T. Caswell, appellees.	No. 1101.
SAMUEL R. CLEXTON, APPELLANT, *vs.* CHRISTOPHER C. CAMPBELL, THOMAS L. James, Charles Eddy, and Horace T. Caswell, appellees.	No. 1098.

BRIEF FOR APPELLEE, THOMAS L. JAMES.

What is said in the brief for James on his appeal (No. 945) is relevant on these appeals and leaves little to be be added.

Clexton's appeal assumes that there will be some recovery against James. It is directed only to the proper distribution of such recovery. With that matter James seems to have nothing to do, except that, of course, he ought to be protected from liability to pay whatever recovery is had more than once.

Campbell's appeal relates largely to the same subject. It complains, however, in addition, that the circuit court erred in overruling his exceptions to the master's report.

For the report see 2 Rec., 1548; Campbell's exceptions, *id.*, 1556; final decree overruling the exceptions, *id.*, 1664.

I. The first exception complains that "the master, after finding the fact to be that time was saved in the making up and in the dispatch of the mails for transportation by the use of" the patented machine, has made no allowance of "damages or profits" therefor.

The finding referred to is at p. 1552, top, and is manifestly a part of the broader finding at p. 1551, middle; "that the combined instrument has conduced to the regular and speedy transmission of matter through the mails," upon which complainant's third exception is based. What we say upon that exception is applicable here.

II. The second exception is based on, p. 1551, middle, where the master finds that more perfect and efficient work has been done by the "patented combined instrument" than by any instrument known or used prior to its introduction. The claim is that the master should have allowed some amount as the value of this advantage.

As to this:

a. No evidence of any pecuniary value of this advantage was given.

b. The master's finding is incorrect, and was duly excepted to by the defendant in his 13th exception. (See what is said on that exception, *supra.*)

III. The third exception complains that the master should have allowed some amount for the advantage "that the use of said machine or combined instrument had conduced to the regular and speedy transmission of matter through the mails" (p. 1551, middle).

As to this:

a. The master's finding is not absolute, as stated in the exception. He says that "the combined instrument has conduced to the regular and speedy transmission of matter through the mails, assuming, of course, that had not such combined instrument been used, two separate instruments * * * would have been used, *and no additional clerks had been employed.*"

He estimated the profits on the assumption that enough more clerks would have been employed to do the same work. It would be manifestly improper to allow *both* the value of time saved on the theory that no more clerks would have been employed, and the salaries of clerks who, if employed, would have prevented any loss of time.

b. No evidence of the value of the time saved was before the master. The wildest conjecture would not have enabled him to state an exact amount.

IV. The fourth exception is to the master's refusal to allow any sum as the value of the space which would be occupied by the additional clerks needed if separate instruments were used. The finding is at p. 1551, below middle.

As to this:

a. Of course all the objections urged against allowing the salaries of the additional clerks as profits would apply to an allowance for the space such clerks would occupy.

b. The only evidence of the value of such space is that of Mr. Kittle, who testified as an expert (2 Rec., 1489). It is submitted he was incompetent to testify on that point. (See p. 1490.)

c. The only evidence of the amount of such space is also that of Mr. Kittle. He is not an expert on post-office management.

d. The evidence is satisfactory that there is plenty of room in the post-office building to accommodate the additional clerks (pp. 1495, 1503, 1537).

V. Exceptions 5, 6, 7, 8, 9, 10, 11, and 12 complain that the salaries of just twice as many clerks should have been found to have been saved, viz, in the 3d division, twelve instead of six from 1873 to 1877, and eighteen instead of nine from 1877 to 1880; in the foreign department, two instead of one, and in the city stations, eight instead of four.

a. The theory that it takes double the number of clerks now employed to use separate instruments is contradicted by every post-office witness who testified before the master. Its only support is Mr. Kittle, who manifests extraordinary assurance in swearing to things that he knows nothing of.

b. Separate cancelers are now and have long been used for canceling the very cheap stamps on circulars and the very expensive stamps on foreign letters (2 Rec., 1474, 1481, and Master's Record, pp. 1460–1547, *passim.*)

Instruments substantially the same as separate postmarkers for printing the word "received" and the date on letters that come to New York have also been used. (Master's Rec., p. 1496, *et passim*). So that the evidence of the post-office employés is entitled to all the weight that belongs to large experience and observation.

c. The witnesses agree that a separate canceler can be used with more rapidity than the combined instruments. They state this as a fact and not as an opinion, though they do not lack convincing reasons for the minds of the inexperienced. (Yeoman, 2 Rec., 1464, 1465; Gayler, *id.*, p. 1472; Lawrence, *id.*, p. 1483, bottom; Steele, *id.*, p. 1493–4; Burchard, *id.*, p. 1511; Magee, *id.*, p. 1524; Andrews, *id.*, p. 1535.)

d. As to whether a separate postmarker can be used more rapidly than the combined instrument, there is some difference of view.

Andrews, the most skillful stamper in the office, who has accomplished the astonishing feat of putting the postmark and cancellation mark on 5,000 postal cards in twenty-three minutes, says, that on a long run he can use the separate postmarker about one-third faster than the combined instrument (2 Rec., 1535).

e. The master's report is based upon the estimates of the witnesses called by complainant. We submit that the number is not too small.

VI. The eleventh and twelfth exceptions raise the question as to damages which has been discussed in the brief on James's appeal, upon his exceptions 6, 7, and 8, and upon the form of the interlocutory decree.

THOMAS L. JAMES, APPELLANT,
v.
CHRISTOPHER C. CAMPBELL ET AL., APPELLEES.
} No. 945.

SUPPLEMENTAL BRIEF FOR JAMES.

On the points whether a patent excludes the government, and whether the alleged infringement herein is an act of state which relieves the government officer from personal liability.

The evidence shows that the postmarking and canceling stamps used at the New York office were purchased with the money of the United States, and were its property, and the use thereof was with the knowledge and approval of the Postmaster-General. It does not appear that the use was originally directed by him.

It also appears that Congress knew of and ratified the use.

Revised Statutes, section 4049, provides that the accounts of the postal service shall be kept in such manner as to show the amount of expenditure for (among

other things) "postmarking and canceling stamps." See also the Private Resolution of Congress approved July 14, 1870, which was offered in evidence by Campbell (1 Rec., 502).

I.

The grant of a patent for an invention does not exclude the government from using the thing patented. (Feather *v.* The Queen, 6 Best & S., 257; Dixon *v.* London Small Arms Co., 10 Law R. Q. B., 130; same case in court of appeal, 1 Law R. Q. B. D., 130; same case in House of Lords, 1 Law Rep. App., case 632.)

The English judges, in reaching their conclusion, were guided by the following principles:

1. The sovereign's grant is to be construed against the grantee.

2. The sovereign is not bound by the general words of a statute or grant, unless expressly named or included by necessary implication.

These principles have been held to apply as much to the sovereignty of the United States as they do to the crown of England. (Charles River Bridge *v.* Warren Bridge, 11 Pet., 420; Dollar Savings Bank *v.* U. S., 19 Wall., 227.)

II.

The alleged infringement, consisting in the use of government property by a government officer, was an act of state which merges the individual liability of the officer and remits the owner of the patent to such remedy against the government directly as the law affords. (Heaton *v.* Quintard, 7 Blatch., 73; Buson *v.* Denman, 2

Exchequer, 167; Wiggins *v.* U. S., 3 Ct. of Clms. R., 422; Carr *v.* U. S., 98 U. S., 433; Langford *v.* U. S., 101 U. S., 341; Doe A. Legh, 8 Mee. & W., 579; U. S. *v.* McLemore, 4 How., 286; Hill *v.* U. S., 9 How., 389.)

vs.

CHRISTOPHER C. CAMPBELL, ET ALS., APPELLEES.

No. 1,101.

CHRISTOPHER C. CAMPBELL, APPELLANT,

vs.

THOMAS L. JAMES, ET ALS., APPELLEES.

BRIEF ON BEHALF OF CAMPBELL.

STATEMENT OF CASE.

SUIT in Equity brought by appellee against appellant James, for infringement of his rights as assignee in trust of a patent granted to Marcus P. Norton, on the 14th of April, 1863, and re-issued to Shavor and Corse on the twenty-third day of August, 1864, and again to Marcus P. Norton on the third day of August, 1869, and again to Helen M. Ingalls on the 4th of October, 1870, in Division A, numbered 4,143.

Appellant James was, and for many years before the filing of the bill had been, postmaster of the city of New York, and by his answer admits a continuous use to a large extent of the article described in the patent, in the post-office at New York by his predecessor in office and himself, from the year 1860 until suit. His defences are:—

First, That there was no patentable invention in the machine or device used.

Second, That Norton was not the inventor, being anticipated by others.

Third, Abandonment by Norton to public use, with his consent, for more than two years before his application.

Fourth, That the re-issue to Ingalls was not for the same invention.

Fifth, Denies title in appellee Campbell.

Sixth, Alleges that all that James has done was done in his official capacity, and not for his own gain and profit, but admits in his deposition to the great gain and profit of the United States from the use of the machine by himself and predecessor.

It will be convenient to discuss these defences in the order here set down, because if either is made out it is an end to the action, and

then to make answer to several of them when grouped together considerations which will apply to the whole group.

Before proceeding to discuss in detail these first four defences, the plaintiff desires to invoke an estoppel against James as an officer of the United States claiming to act under the orders of the Government and in its behalf.

First, Because James cannot be heard to set up these defences by reason of the acts and representations of the Government through its officers and privies made and done *en pais*.

Second, Because they are *res adjudicata*.

The machine is sufficiently described for the present purpose as a combined stamp, which at one blow impresses the post-mark upon the envelope, and cancels the postage-stamp in the best manner that the state of the art has yet shown, to prevent washing and re-use of the stamp, and also to always preserve the same exact relation between the post-mark and the cancelling-mark as a means of detecting fraud about post-marking and cancellation in any other manner.

A notable instance of this element of usefulness has been brought to public attention very lately in the case of the "Morey letter," as a most potent means of detecting a forgery of an envelope.

This machine, in its combination as used, was applied to be patented Jan. 5, 1863; but it is not denied that it was known to others before that date. In 1859, April 11 (*Record*, p. 548), Norton addressed a letter to the First Assistant Postmaster-General for the second time, as stated in the same, asking the privilege of having his "post-marking stamp tested by the postmaster in this city" (Troy), and to have the postmaster authorized to receive one for that purpose.

To that the Postmaster-General gave the order as requested, March 4, 1859 (*Record*, p. 557), and the test was made, and proved satisfactory.

This correspondence establishes the fact that Norton produced a working machine before March 31, 1859, because the letter of April 11 refers to a prior application made "on the 31st ult."

Gen. Dix was appointed postmaster at New York early in the year 1860, and, realizing the difficulty of cancelling and stamping the letters by two operations, he himself invented a combination of the two stamps for the purpose of doing it by one blow, reported it to the Postmaster-General by his letter of the 8th of August, 1860 (*Record*, p. 1142), with a specimen of its work, showing the great saving that it made, and stating that it was nearly impossible to get along without it. The Postmaster-General (Holt), through his first assistant, replied to that letter on the 10th, saying, "the arrangement is an excellent one, and will save much labor in making up the mails," but fears that it was "not only thought of before, but has actually been patented, and may at some future time subject your office to a heavy charge by the patentee for its use. The Postmaster-General there-

fore desires that you will give the subject such timely attention as will be calculated to avoid such consequences." (*Record*, p. 553.) He also calls attention to the "imperfect impressions made by (Dix's) marking stamps in your office," and asks if a remedy cannot be found for that defect.

Accordingly, on the 28th of August 1860, Mr. Dix acknowledges the receipt of a letter from the Postmaster-General in which he says, "I fear Mr. Norton's letter refers to a different stamp, and not the one exhibited to me by Mr. Ransford. Still I shall consider Mr. Norton's letter as referring to the kind we want." (*Record*, p. 543.)

This correspondence enables Mr. King, then First Assistant Postmaster-General, to testify most positively as to this invention, and as to its use in the New York Post-Office: —

"It was found there in 1861, when Abram Wakeman was appointed postmaster. It had been put in the New York Post-Office at the request of Gen. Dix in 1860, and by the consent of Norton for the purpose of testing its usefulness." (*Record*, p. 132.)

It remained so, being tested without any report as to its usefulness, until the 3d of January, 1863, when a report was made to the Third Assistant Postmaster-General at Washington which contains among other things the following: "The design of Mr. Norton is indispensable to us. Indeed, unless I should nearly double the stamping force we could not dispense with its use. I am satisfied the interests of the department would be subserved by securing its general use. We are now testing a stamp and canceller on Norton's plan made of box-wood." (*Record*, p. 542.)

Upon the reception of this report that the trial of his stamp was successful, Norton, on the fifth day of the same January, filed his application for a patent, which he had prepared at Troy, N.Y., on the twenty-ninth day of December, previously.

Immediately thereafterwards, with the consent of Norton, that canceller was adopted by the Post-Office Department, and has been universally and solely used by the Government by order of the Postmaster-General throughout the United States, and remains used to this day, and Norton, by himself or his assignees, made application to the Postmasters-General for compensation for its use from time to time; but the Postmasters-General were powerless to grant him any relief.

The owners of the patent, therefore, applied to Congress for relief.

Reports were made sustaining the invention and patent, its usefulness, value, and use by the Post-Office Department, as follows: —

First, In the House of Representatives, by the House Committee on Post-offices and Post-roads, July 24, 1866. (*Record*, p. 494.)

This report states: —

"This invention has been in practical and continuously exclusive use by and under the order and direction of the Postmaster-General since the 1st of April, 1863, without compensation whatever to said patentees, nor upon any other stipulation than their consent that the same might thus be used until its utility and advantage to the Government should be effectually tested, when a fair and equitable compensation for either its use or the patent should be made to them by the Government.

"The invention having been sufficiently proved, and its utility satisfactorily tested by uninterrupted use in various post-offices of the States, application was made to the thirty-eighth Congress for compensation therefor, in accordance with the informal stipulation already referred to. Another claimant to said invention appearing, the committee of that Congress who were then considering the subject of compensation decided that, since the validity of the title to the same was called in question, *that* should first be determined by the courts; and the case was accordingly thereupon remanded.

"By a transcript of the proceedings and judgment, now submitted as rendered in the United States Circuit Court of the northern district of the State of New York, it appears that the question of validity of title was tried, and decided in favor of the patentees, Shavor and Corse."

For copy of the record referred to in Shavor and Corse *vs.* Hoole, see *Record*, p. 514.

In this case the title and validity of the patent were established. The suit was brought against the government contractor who manufactured the machine for the use of the Government. Every question in regard to it, and the fact that the Government was the sole user of the device, was determined.

Second, In the Senate, by the Committee on Post-offices and Post-roads, Feb. 9, 1866. (*Record*, p. 497.)

Third, In the Senate, by the Committee on Post-offices and Post-roads, July 6, 1870. (*Record*, p. 499.)

Each of these reports recognized the fact of the priority and value of the invention, and its great use to the Post-Office Department; and that it had been adopted and used by that department, by each successive Postmaster-General, and the reports were made in pursuance of recommendatory letters from the several Postmasters-General.

In consequence of these reports, a private resolution was passed by Congress in favor of this patent, approved July 14, 1870, "authorizing the Postmaster-General *to continue to use* in the postal service a certain invention and device for the post-marking of mail-packages, and for the more perfect cancellation of postage-stamps, and to make a just and equitable compensation for the PAST and *future* use of the same by the Post-Office Department."

By this resolution the Postmaster-General was further "authorized and directed to investigate the right and title of the plaintiffs to the device and instrument for the post-marking and stamping and cancelling in the postal service, patented on the fourteenth day of April, 1863, re-issued Aug. 23, 1864, and again re-issued the third day of August, 1869, now and for many years past in use in the general postal service of the United States; and to ascertain and determine upon a fair, just, and equitable compensation for the use of said invention and device from the first of its use by the Post-Office Department, and also to ascertain and determine upon a fair and equitable compensation for its use and value to the Post-Office Department while said letters patent shall continue, and to whom it should be paid under said letters patent and re-issues thereof, and to report the amount thus ascertained and determined to Congress [illegible] 502.)

Whereupon the Postmaster-General reported to Congress "that he had given reasonable opportunity to all parties, in interest, to present their claims, that they had been fully heard in person and by counsel, and that the hearing has been postponed, on the application of claimants, to allow them every facility in procuring their testimony. He reports that the title is vested in Helen M. Ingalls (*under whom the complainant claims*); that the stamp has been in use in the department, and furnished by contractors under contracts commenced April 1, 1863, and April 1, 1867, each for four years; and that no other stamp appears to have been used in the department containing this combination for postmarking and cancelling at one and the same blow, except experimentally. He further reports, that there is a contention as to whether the patent in 1863 interferes with the one in 1859, and that therefore he did not feel authorized to decide upon that subject, and therefore he submits the matter again to Congress."

He further says: "The combined stamp has been demonstrated by our use during nearly eight years, to be valuable in the larger post-offices and the railway service. Simple as it is, no other device has been hit upon, that will do the work of this one without adding largely to the number of stamping clerks employed, and consequently increasing the expense of the department. It is impossible to ascertain with any degree of accuracy the amount of money which has been saved by its use." (*Record*, p. 503.)

In consequence of this, another favorable report was obtained July 15, 1872, from the Senate Committee, by which the whole matter was recommended to be referred to the Court of Claims. But no bill was actually passed for that purpose. Thereupon, in consequence of this suggestion of the Senate Committee in their report, the owners of the patent, Shavor and Corse, did apply by petition to the Court of Claims, in which they set up a contract between the Postmaster-General in behalf of the United States, and the petitioner's assignor, to pay for the use of the patent, the existence of such contract being the only ground of jurisdiction of said court in such case.

The Court found: —

First, That the claimants are and have been the assignees of the patent set forth in the petition.

Second, That the defendants have used said invention in the Post-Office Department since 1863, and that said invention has been of great use and value to the defendants. The Court finds that as a matter of fact the contract set up in the claimants' petition was never entered into between the complainants and the United States as alleged, but, on the contrary, it was expressly agreed between the claimants and the agents of the defendant, the Postmaster-General and his successors, that the Postmaster-General had no authority to purchase said patent-right or its use; that the claimants should allow the use of the invention so long as the claimants saw fit. (*Record*, p. 1320.)

The suit at bar is now defended by the United States for its benefit by its officers, and by its attorney-general, so far as the Postmaster, Mr. James, is concerned, the United States having assumed the burden of its defence.

ESTOPPEL BY MATTERS EN PAIS.

It is respectfully submitted, that where the agents of a private party had had for many years the use of a patent by permission of the patentee by virtue of an understanding that the patentee should have payment for that use, and had made great profit and gain out of the same, and had repeatedly, through his servants and agents agreed to its usefulness, patentability, and that the title was in the patentee, and where such private party had never been interfered with by any other person claiming the patent, that such party and his privies would be estopped in equity, by his acts *en pais*, from litigating those questions.

Such case would be the same in principle as where an assignee or licensee of a patentee had used a patent, and had never paid, or been called upon to pay by any other owner of the patent, any thing for such use, who when called upon to account for the profits sets up want of title in his assignor or licensor. In such case it has been expressly decided that such assignee or licensee would be estopped. He cannot even purchase an outstanding title as against his assignor.

Kinsman vs. *Parkhurst*, 18 Howard, p. 289.

How much stronger is this case against the United States and its privies!

Their Postmasters-General, by permission of the patentee, put the patented machine into use, continued its use solely and exclusively for the period of more than ten years; had many thousands of the machines made by their own agents and contractors for their sole and exclusive use.

The United States sanctioned that course of conduct by four several reports of committees of both houses of Congress; and after suggesting through a committee of its Congress that the validity of the title of the patent should be submitted to one of its own courts in a suit against one of its own agents, and the manufacturer of the machine for its use, for the purpose of settling all questions in regard to the patent and the party to whom the profits should be paid, which suit was brought and decided in favor of the patentee, and neither fraud nor collusion is suggested in the conduct of said suit, — thereafterwards all said reports having been made in favor of the patentee and the validity of the patent, that they were fully established; and after the passage of a resolution through Congress authorizing the Postmaster-General to "*continue*" the use of such machine, and to pay what was just and equitable for the past and future use thereof, and thereafterwards, during all the time continuing to use the same by the permission of the patentee in expectation of payment from him, by which the patentee was induced to sleep upon his rights for many years, until by death, time, and accident,

the testimony tending to establish the validity of his patent and his title thereto may well be lost; and having made great gains and profits from its use, for which the United States have not been called upon to pay, or have paid to any other person, — are not the United States estopped by these acts *en pais* from disputing the validity and ownership of the patent during this time, as would be a private party who has done the same acts, and held out the same representations and inducements to the patentee, by the well-established rules of equitable estoppel, arising from representations made and acts done *en pais?*

This doctrine of equitable estoppel, by acts, agreements, and understandings between parties, by which the action of either is controlled, applies to every transaction of life, and has been widely favored by Courts of Equity, as the best means of working out justice, and putting an end to litigation.

There can be no need of citing cases in support of equitable estoppel in its various branches.

Indeed, the whole doctrine of equitable laches stands upon the fact of non-action by a party in asserting adverse rights, or setting up defences. Do not these rules apply as well to the Government as to persons — indeed, more strongly to the Government, because it can never be presumed to acquire the property of its citizen without compensation; or to mislead him as to his rights? *Omnia rite acta* has been applied many times by this court to the doings of the officers of the Government. Will not the court translate *rite* in this case, "with due regard to equity and good conscience"? Is the language too forcible if we say that if the Government, after such things as these being done to its subjects, is not bound by their consequences, there is neither justice in the Government nor equity in its courts?

ESTOPPEL BY RES ADJUDICATA.

As we have seen by the above recital, at the suggestion of a Postmaster-General and of a committee of the Thirty-Eighth Congress, these four defences were submitted to a jury in the northern circuit of New York in Shavor *et al.* vs. Hoole, *ubi supra*, against one of the agents of the Government, and each one of them decided in favor of the plaintiff's assignees.

Again, at the suggestion of the Government, as we have seen, a suit was brought by Shavor and Corse, assignees of the patent, against the Government in the Court of Claims, and there the validity of the patent, and the title in Shavor and Corse as the assignees of the patentee, was decided in a case directly against the United States.

After these two adjudications against the Government and its officers, is not another officer of the Government estopped to set up in its behalf, years afterwards, anew the defence that there was no patentable invention in the same machine, that the same patentee was not the inventor, that he had abandoned it to a public use, that a prior re-issue to him was not for the same invention, or that the title

was not in the assignees' plaintiffs at the time of the adjudication, as decided in these cases?

Anybody else but the United States may set up these defences anew; but the United States or its privies, never again. The rule is stated in Bigelow on Estoppel, p. 45, and is as follows: —

The rule in these cases is, that a *point* once adjudicated by a court of competent jurisdiction, however erroneous the adjudication, may be relied upon as an estoppel in any subsequent collateral suit, in the same or any other court, at law or in chancery, or in admiralty, when either party, or the privies of either party, allege any thing inconsistent with it; and this, too, whether the subsequent suit is upon the same or a different cause of action."

This rule is sustained by this Court in *Thomas* vs. *Roberts*, 24 Howard, p. 233.

NOVELTY, INVENTION, AND VALIDITY OF PATENT.

If this equitable estoppel, whether in acts *en pais* and at law, should not be held sufficient, it becomes necessary to discuss the questions of priority and patentability of the invention.

We have already seen by the documentary evidence that Mr. Norton was asking to have this machine tested on March 31, 1859. The inventor claims that the invention was made in 1853 or 1854, and was described in a *caveat*, and he has given testimony to that effect. Very much of the testimony in the voluminous record is expended upon Mr. Norton the inventor's credibility as a witness, or want of it.

An examination of the whole matter, if it were not too wearisome, would show him sustained at every point.

The principal contestation, however, is directed to the question whether Norton is to be believed when he swears that he filed a *caveat* for this invention prior to 1854. If he did, that clearly establishes the priority of invention; for the record shows no reliable evidence of any like invention before that date: not because of the force of the *caveat*, because the patent was not taken out within proper time after filing the *caveat*, but simply as conclusive evidence of the fact that the *caveat* existing fixes the date of invention.

The proceedings between Mr. Leggett, then Commissioner of Patents, and Mr. Norton, for some supposed violation of the rules of the Patent Office, in regard to that *caveat*, are in the record. They are not evidence in this controversy between third parties, and, if they were, would be wholly immaterial.

There are two pieces of documentary evidence which establish the fact of such *caveat* being filed. They are two letters of Norton, the genuineness of which is not disputed by any evidence coming from the Patent Office, dated Aug. 7, 1854, which refer to that *caveat*. He says, "I send to-day an additional description of my machine for mailing and folding letters, &c. When will my *caveat* expire? The copy you sent me has no date. Please communicate the answer to Mr. Hodges."

This encloses another paper, dated the same day, addressed to the Commissioner of Patents, as follows: —

"*Sir*, — I wish the following to be added to my subjoined description for mailing and folding letters, for which I have a *caveat* in your office."

Then follows an exact description of the machine, as now patented, *in extenso*. (*Record*, p. 455.)

Can it be possible that Norton was writing the Commissioner of Patents about a *caveat* not then in the office?

On page 458 of the Record appears a paper indorsed, "Certified Copy of Caveat filed in the United-States Patent Office in 1853, for Improvements in Post-Office Stamps," which is apparently the indorsement on the envelope containing the *caveat*. It does not seem to be denied that such a *caveat* once existed, but that it had been lost out of the office; and the contention between Mr. Leggett and Norton was as to whether another one had been put in.

All those questions become unimportant, the genuineness of the letter of Aug. 7, 1854, and the inclosure, being admitted, as is done. That fixes the date of the invention before Aug. 7, 1854, and presumably the date of the filing of the *caveat* of which it speaks. But Aug. 7, 1854, the date of the letter, is early enough, because that ante-dates any reliable testimony as to priority in this case.

But we need not trouble the court further upon this question.

Sufficient that there is no testimony tending to show that he did not make the invention as early as he said.

We will examine, hereafter, the testimony as to what date others made a similar invention. But the record is barren of any evidence tending to show that he did not make it as alleged. Slight affirmative evidence, therefore, if his testimony was struck out of the case, would be sufficient to establish an otherwise uncontradicted fact. This testimony is found in a letter of Mr. Norton, of Feb. 4, 1864, to Abram Wakeman, postmaster at New York (put in evidence by James), in which he states his claim and the date of his invention in the words following: "That the double cancelling stamp used by you in your office is my invention as far back as the year A.D. 1856, as I can most fully and satisfactorily prove. It was patented in the early part of 1863, on an application made by me a long time before then. I first began with the Post-Office Department for a change of the then existing unwieldy plan of post-marking and mailing of letters, in the year 1854, and have letters, &c., to show that fact. The Post-Office Department at Washington contains a large number of letters written by me in the years 1858–63, upon the matter of post-marking letters and cancelling stamps." (*Record*, p. 1367.)

Now, if the facts in this letter, made evidence by being put in by the defendants, are not true, it can be shown by those letters in the Post-Office Department, to which Norton's letter refers; and the record contains no certificate even that a search was made for them and that they cannot be found. Certain it is that there is not one word from Norton inconsistent with this claim.

It is true that he made another invention for defacing the stamp

by cutting. That was tried at his request very early, but was found not to work successfully in that, while it defaced the postage-stamp, it, with the utmost care, would deface and destroy the contents of the envelope. Norton tried to remedy that defect by guards on the cutting-knives. But then that canceller, which differed from the one under consideration in the fact that it cut the stamp to pieces, while the present one simply bruises it and fills it with ink, was laid aside by the Post-Office Department, as wholly worthless in practice.

WAS NORTON ANTICIPATED?

There are three persons only, whose claims as to anticipation need consideration; to wit, Charles E. Wheeler, James J. Riley, and William M. Ireland; and but two patented machines.

The anticipator whose testimony is probably most relied upon is *Charles E. Wheeler*, in 1853, at the Cleveland Post-Office. Wheeler swears that he made a quite similar invention; that he put it in use in 1853 at the Cleveland Post-Office. *Such* is his recollection. We may remark in passing, that it is a fact not a little suggestive as to the existence of Norton's *caveat*, that Wheeler swears his invention to have been made in the summer of the precise year in which Norton filed his *caveat* in the October following; disclosing a date, the year 1853, not found in any other of the patent papers but the *caveat*. Where did Mr. Wheeler get his date?

But on the twenty-eighth day of November, 1863, Wheeler himself wrote Zeverly, the Assistant Postmaster-General, that he made the invention about the first day of July, 1861, and the order issued at that time led him to make it. On the seventh day of May, 1864, Mr. E. Cowles, the postmaster at Cleveland, Ohio, by whom Wheeler was employed as a clerk, at the request of Wheeler wrote to the Postmaster-General, that the invention was made immediately upon the receipt of an order issued by the Postmaster-General; and Cowles was not appointed, as appears by the record, until after Lincoln's administration came in, in 1861, and that order was issued in July, 1861. (*Re ord*, pp. 565–566.)

The burden of proof in anticipation is upon the defendant; and no amount of parole evidence of recollection going back more than twenty years would countervail this written evidence in the matter of dates, especially when it will be seen that Wheeler gives no explanation of the fatal letter in his deposition, nor is Cowles called as a witness to account for his letter.

The testimony of Riley, which is found in Record, p. 860 and the following pages, is too indefinite as to what he made, how it was used, and how long it was used, to show that any invention was made. At the most, it was simply an experimental work, the experiment was not successful, and it was abandoned in the New York office, where he says he made it, if ever made at all; and his machine had to be re-invented as we have seen, if it ever was invented, by Gen. Dix. Besides, it was made at a time by Riley, when there was no need for such a contrivance, as he expressly testified that he used a "plain stamp-killer" instead. But, in addition to all

these weaknesses, Riley testifies that Hoole made the instrument, whatever it was, that Riley invented; and yet Hoole, when sued by the owners of the patent for infringing it, did not set up the invention of Riley in answer, and being the maker he must have known of it. It is also to be remarked, that no witness is brought to confirm Riley; and yet such an invention must have been well known, if ever made, among the clerks in the New York Post-Office.

William M. Ireland testifies that he made something which is relied upon as anticipatory in 1849, when he was in the post-office in Philadelphia. He was also there in 1861. Then he was twenty-five, being a boy of fifteen in 1851 when it is claimed that he made his anticipatory invention. Nobody confirms his story. Very possibly he did in 1861 what he claims to have done in 1851, his attention being brought to it nearly twenty years afterwards. True, he said in 1861 when he showed it, that it was his, but he forgot to remark that he made it in 1849. In 1861 there was some use for it: in 1849 there was none. In truth and in fact, the orders of 1861 set all the large offices of the United States to looking for a labor-saving machine in the matter of cancelling postage-stamps and stamping letters; and thus sprung up a large number of inventions. And years afterwards, when Congress was offering to pay the inventors of such a stamp large rewards, the memory was stimulated to forget the date.

SUPPOSED ANTICIPATORY PATENTS.

There are but two patents set up which are any thing like the device of the plaintiff's, or need a moment's thought.

The nearest one to it is Berry's English patent of April 24, 1860; and that is admittedly a year and a half too late, because the letter to King of March 31, 1859, shows Norton's invention ready for trial.

The patent of Ezra Miller, dated March 22, 1859, had two stamps together on the head of a hammer, and was attempted to be used in that way; but it was *entirely* a different machine from that of Norton, and not capable of producing any such results, and became wholly disused.

IT IS CLAIMED THERE WAS NO INVENTION IN THE DEVICE OR MACHINE.

After the struggle of the defendants to prove that so many people had invented this at so many different times, it is difficult to see how it could be claimed that there was no invention in making it. Gen. Dix thought there was. All the supposed anticipators thought there was. The Patent Office thought there was. All the Postmasters-General, whose reports are in the Record, thought there was. All the committees of Congress thought there was. The Court of Claims thought so. The Circuit Court for the northern circuit of New York thought so. Immense numbers of people have thought so, who have been trading by assignments and re-assignments of this

invention for so many years. There would not be much invention, perhaps, in simply tying two stamps together by a piece of wire or cord, and using them at one blow, which is the character of the inventions which the defendants claim as anticipatory; but is, in this perfect machine, able to have a change in the date and in the stamp, by competent devices and mechanism, so as to be readily used and easily adapted, thus making a machine requiring great thought, many experiments, and long use, testing its capabilities for its perfection.

Upon all the questions of novelty, invention, and usefulness, the great and determining fact stands forth upon the record everywhere, that during more than twenty years' use no adverse claim has ever been set up against it. No adverse use of it has ever been made, so far as appears upon this record, save where a suit was brought to test its validity against a man who was manufacturing them for the Government, who testifies, "I commenced the thing believing that Marcus P. Norton was not the inventor of the patent: I come out of it believing he was."

THE TITLE IN THE PLAINTIFF.

In whom was the title, or subdivisions of title, in these letters-patent prior to the decision of the courts of the United States, we have already claimed as *res adjudicata*. What is the state of that title since, will not be discussed in this brief, but left to the brief of my learned associate, who, having tried the case in the Court below, is more conversant with the title than myself.

OBJECTIONS TO RE-ISSUE AS AFFECTED BY TITLE.

The objections to the re-issues, which depend upon the state of the title, are also left to be discussed in the same brief by the same counsel.

OBJECTIONS TO THE RE-ISSUES UPON OTHER GROUNDS.

This class of objections, as stated, consists in a general statement that the re-issues were fraudulently made, and that they cover a different invention.

The first objection can be disposed of in a word. There is no averment in the statement of the answer, or any plea showing how, or in what manner, the fraud was committed; and general allegations of fraud relating to the action of another tribunal are not sufficient to set aside its judgment, within its own jurisdiction.

Now, this Court has just re-affirmed, in the present term in the case of *Ball et al.* vs. *Sangles*, United States Supreme Court, Oct. 7, 1880, what had frequently before been decided by the Court, that all questions upon re-issue, "whether the surrendered patents are invalid by reason of defective or insufficient specifications, or by reason of the patentee's claiming as his own invention more than he had a right to claim as new, and whether these errors have arisen from inadvertence, accident, or mistake, and without fraudulent intention,

the decision of the Commissioner is conclusive, and not subject to revision by the courts."

"But whether he has claimed more than he has invented, and if that appears on the face of the specifications, drawings, and re-issued patent, that is for the judgment of the court."

No one will claim that any thing appears upon the face of the drawings or specifications in the re-issue other and different from what was fairly, though not too distinctly, and perhaps erroneously, set forth in the original specification.

The drawings and model are the same in both. The only claim against the re-issues so far as is perceived is, that in one portion of the stamp cork is used instead of iron to make a stamping face. This certainly cannot be a new invention, hardly a new adaptation.

CAN APPELLANT JUSTIFY THE USER OF THIS PATENTED MACHINE AS AN OFFICER OF THE UNITED STATES?

This defence is put in two aspects, which resolve themselves as follows: —

First, That the Government has a right to use the invention.

Second, Whether the Government has that right or not, an officer of the Government, for the benefit of the Government solely, has; and as he did not receive any profits from the invention personally the officer is not to be held to account.

As to the first question, we suppose it will be admitted that if the Government has no right to take this property without compensation, the defendant acting in behalf of the government has not. The agent has certainly no greater right than his principal when claiming under the principal.

The first question is, Is an invention property?

Without entering upon a discussion of the question whether an invention was property at common law, as separate from the machine in which it is embodied, it cannot be doubted that under our Constitution it must be property.

Congress having by appropriate legislation provided for securing for a limited time inventors in the exclusive right to their respective discoveries, that discovery becomes (a "right,") property secured to them by Article I., Sect. 8, of the Constitution.

It is sometimes said that the Government does not grant letters-patent to operate against itself. This is an idea which appears to have obtained commonly among officers of the Government, seems to be founded on an inapt use of words.

The "right" is not a *grant* of the Government, any more than the right of enjoyment of life, liberty, and property, "secured" by the Constitution, is a grant of the Government.

It is an inherent right recognized by the Constitution, and secured to the inventors in pursuance of the provisions by an appropriate law.

It is denied that Congress could pass a law appropriating the use of a patent to the Government without compensation, because that

would be a law appropriating the right of an inventor, not securing it. But it is enough to say that no such law has been passed, and the right has been secured. The right of the inventor is one of the few descriptions of property that are distinctly recognized by the Constitution, land and slaves being two other examples.

But if the matter was left doubtful upon the construction of the provisions of Article II., it would be settled conclusively by Article V., "Nor shall private property be taken for a public use without just compensation." This property stands like every other class of property.

United States vs. *Burns.*
12 Wallace, 246.
Commeyer vs. *Newton.*
94 U.S. S.C.R., 225.

This defence claims a right in the appellant to take this property for the use of the United States at his will, or at least under the order of the Postmaster-General; and, as he used it only in doing the business of the United States, that he is not liable for its use. But no officer of the United States in time of peace can take the property of a citizen at his will for the use of the United States, leaving the owner to seek compensation where he can, whether he acts by the order of a superior, or on his own judgment of the expediency of so doing. If he does, he becomes personally liable to the owner.

Mitchell vs. *Harmony.*
13 Howard R., 115.

He is liable to account to the owner for the use and value of the same in the same manner that a private party would be. This point has been decided in an exhaustive opinion in the case of *Brady* vs. *The Atlantic Works* by Justice Clifford, 4th Clifford Reports, p. 409. And so far as we are advised there is no intimation to the contrary in any decision of this Court.

There is, however, another answer to this claim of the appellant, arising from matter of fact.

He did use this property for his own benefit. The Master, upon reference of this case to him, has found, as profits to be assessed against the appellant, the amount of clerk-hire, only, saved by the use of this machine. That is to say, that so many more clerks, at so much per year, would have been required to have done the same work in the New York Post-Office if it had been done by any other known mechanism, because the Post-Office Department required the mails to be sent out of the Post-Office at New York with a certain frequency. To meet that requirement of time in despatch of mails without the use of the patented machine, would have required double the number of clerks to be employed that were actually employed.

The Revised Statutes, Section 3860, provide that "the Postmaster-General may allow to the postmaster at New York out of the rev-

enues of his office, that is to say, the excess of box-rents and commissions over and above the salary assigned to the office, a reasonable sum for the necessary cost of clerks, &c., to be adjusted on a satisfactory exhibit of the facts."

SECT. 3861. "The salary of the Postmaster and such other expenses of the postal service authorized by law as may be incurred by him, and for which appropriation has been made, may be detained out of the receipts of his office under the direction of the Postmaster-General."

So that these savings by use of the machine were a direct personal benefit to the postmaster. He had just so much more money in his hands received from the use of this invention. If he received the profits of this invention, is it of any concern of the owners of the patent what he did with those profits? He was not bound to receive them, or intermeddle with them.

We do not, however, press this consideration further, because we think that the Master, as well as the learned Judge in the Court below, in the assessment of damages took too narrow a view of this question, which we propose to discuss in the matter of the cross-appeal of the appellee.

FOR WHAT IS THE POSTMASTER, ACTING FOR THE UNITED STATES, RESPONSIBLE TO THE OWNER OF THE PATENT?

As we have said, the Master has found a certain saving of clerk-hire by the use of the invented machine, and has given that only as profits for which the defendant James is accountable.

But he also finds that there was a very great saving in room which would be required for the occupation of a double number of clerks necessarily required if the machine had not been used.

The Master also finds that there was a great advantage in the despatch of the mails by the Government.

He also finds that the work was done in a much better manner for the Government; that the Government was thereby protected from fraud.

But he decides that no direct evidence in exactly estimated amounts was given, of the pecuniary value of these savings to the Government, and therefore such items cannot be allowed.

To these and correlative parts of the Master's Report the complainants have excepted, and, the exceptions being overruled, they are before this Court.

It will only be necessary to discuss the principles of the decision of the Master. Because, if the complainant is right as to the principle of computing the profits or damages, in the judgment of the Court the case will have to be again returned to the Master for further hearing and report.

So that the question is, whether James as an infringer is liable to account as profits for all the advantages capable of being measured by money, which accrued to him, or his principal, the Government, by the use of the machine.

Second, Is he liable for these pecuniary advantages in the nature

of unliquidated damages, either as profits or damages, to the complainant?

It is difficult to see why, if he is liable to pecuniary advantages, that a given witness may estimate in figures as savings by use of the patent in one direction, he should not be liable for the same kind of pecuniary advantages which accrued to him and his principal in every other accruing from the same use, although they are not capable of as exact computation or estimation as those at first named. The savings in both cases were actual; the advantages were actual; the pecuniary gain was actual; but the objection seems to be, that these latter are too large for computation or estimation by the witnesses.

Or, to put the matter in another form of words, the pecuniary advantages or profits were so great in these regards, that the inventor is not entitled to any thing arising of them, for that reason. If they had been a small matter like clerk-hire, he would be entitled to that saving. Being a great matter, for the testimony is that it would have been almost impossible to have done the business of the New York Post-Office without these advantages derived from this machine, then he is not entitled to any thing for these most profitable and enormous advantages and profits accruing to the defendant and his principal.

Our belief is, that the complainant is entitled to a reasonable sum, such as a Master of due discretion and prudence, under all the circumstances, ought to find from the testimony to have in a pecuniary sense accrued to the Government.

But if not, then a reasonable amount to be estimated as unliquidated damages ought to be found for complainant, as, after all, the words "profits" and "damages" are only used in accounting in patent cases as a matter of convenience. Both in fact are unliquidated damages; and because they are such, this Court has decided in the case of *Parks* vs. *Booth*, *October term*, 1879, that interest cannot be allowed upon profits because they are unliquidated damages in fact, as in case of other unliquidated damages.

In this, as in every case of unliquidated damages, therefore, to be compensated only by a sum of money, the amount is left to the wise, just, and sound discretion of the tribunal by whom the question is heard.

BENJ. F. BUTLER,

Of Counsel for CAMPBELL, *Appellee and Appellant.*

JAN 17 1881

IN THE

Supreme Court of the United States.

OCTOBER TERM, 1880.

CAMPBELL *vs.* CASWELL & CLEXTON.

ADDITIONAL BRIEF FOR CAMPBELL.

Counsel for Caswell and Clexton has filed three briefs and what is called an addenda in this matter.

The so-called addenda relates to a question not raised before this Court by Campbell, and seems to have for its chief object the vituperation of Norton. It needs no attention.

2. Great effort is made in said briefs to avoid the effect of the assignment by Shavor and Corse to Eddy, dated December, 1876, (R. 576), by reference to the stipulation between Campbell and Eddy, dated June, 1878, under which Eddy became a party to the suit.

It is repeatedly averred in these briefs that the rights of Eddy are fixed and determined by that stipulation. The stipulation states that Eddy *claims* that his rights are fixed and determined by one instrument, and Campbell claims that they are fixed and determined by another and different instrument. The Court was to decide, of course, as to these claims. The question here is between Eddy or his representative and the representatives of Shavor and Corse, That stipulation related exclusively to a question between Eddy and Campbell. The respective rights of Eddy and Shavor and Corse, as between themselves, are not affected and were not intended to be affected by that stipulation. This is too plain for argument.

3. Much is said in these briefs about the faithlessness of Eddy to his trust, &c. This is all assumption. There is no evidence in the case to that effect. The *ex parte* affidavits made by Caswell and Clexton and filed with their motion to be made parties, are not evidence in this case. They were not offered as such and they would not have been competent if they had been offered. Eddy's rights were expressly saved by the interlocutory decree and he took a large amount of testimony to establish and define those rights and there is nothing to show but *ex-parte* affidavits filed with a motion and not in evidence, that he did not do everything he ought to have done as trustee, &c.

4. Let it be noticed that Shavor and Corse are not parties to this suit. They are not here complaining that Eddy has wronged or injured them in any manner. Caswell and Clexton, two speculators have undertaken to buy from Corse and Shavor the right to complain that Eddy has abused the trust reposed in him by said Shavor and Corse. This they cannot do. (Graham *vs.* LaCrosse, & Mil. R.R. Co., decided at this term.)

5. By the said assignment dated December, 1876, Eddy was invested with the absolute ownership of any title or interest that Shavor and Corse had in the patent in question and all the right that remained to them was the right to call for some portion of the moneys that might come into his hands under said assignment, or to go into court and ask, for some good reason to have said assignment annulled.

6. Said assignment of 1876 recites that said letters-patent are transferred to Eddy "in trust for the sole benefit of the owners thereof *in accordance with the memorandum in writing of even date herewith.*" No doubt this memorandum in writing defines the terms and conditions of said trust and the respective rights of the parties under it. Can this Court know how the moneys received or to be received by Eddy, under said trust deed, were to be divided between the parties

thereto without any knowledge of said memorandum in writing or the contents thereof?

7. On page 1658 of the record will be found an ~~argument~~ agree between Eddy and Campbell by which Eddy assigns his right to the patent in question to Campbell for $20,000 to be paid out of collections made under said patent. This agreement was admitted in evidence, by the court below without objection from any body and therefore no objection can be made to it in this court. This was an equitable and just arrangement. Eddy had not lifted a finger or paid a cent to assist in the prosecution of this suit which had been carried to judgment at great expense by Campbell. According to his own statements all the money that Eddy, Shavor, and Corse had invested in this patent was about the sum of $18,000 which was advanced to pay expenses in prosecuting claims under it and other patents prior to 1869. (R. 764.) Eddy had a right to make this compromise under the assignment of 1876, for it was simply relinquishing the right in said patent which he held under said assignment for $20,000, to be paid by infringers to him through proceedings against them by Campbell.

8. Campbell, therefore, independent of his right as the original complainant, has the same right to contest the claims of Caswell and Clexton that Eddy had, and he insists that all the right they have, if any, is to call upon said Eddy for their proportion of the said $20,000. No doubt a Court of Equity, upon a proper showing, would direct payments to be made to the several parties according to their respective rights.

9. Considering that Campbell, single handed and alone, has litigated this matter for more than three years against the General Government, it was hardly to be expected that two speculators, coming into court after the recovery of the judgment, would suggest that Campbell's bill might be dismissed and the suit retained for their benefit, thus reward-

ing their patient merit with the fruits of another man's labor. Such modesty can of course stand in court without any pleadings or proofs to support it.

Much of the greater part of the statements and arguments in the briefs of the counsel for Caswell and Clexton are founded upon the *exparte* affidavits, filed with the motion to make said Caswell and Clexton parties to this suit. These affidavits are not evidence against Campbell or Eddy, and cannot be used to affect their rights. Campbell should have the right to cross-examine those who make these affidavits, and if necessary introduce other evidence as to the truth of their allegations.

Whether Eddy was faithful to his trust or not is a question exclusively for a state court, and that seems to be the only ground which Caswell and Clexton pretend to have for their appearance in this case.

This Court cannot take jurisdiction of that question between residents of the same state.

GEO. H. WILLIAMS,
for Campbell.
